The traveling salesmen's mission on the road is not entirely to reap in the shekels for their employers, but to keep the buyers in touch with their houses; to introduce new goods, show their advantages, keep the dealers in line, etc.

Many manufacturers and jobbers have tried to reach the buyer by catalogues, circulars, etc., and have met with poor success—many with entire failure. Every mail brings you catalogues and circulars from some manufacturer or wholesaler, and ninety per cent of them are relegated to the waste basket or stove, many of them never getting any more than a glance. Had these same companies sent a salesman he would have shown up their superior points and no doubt made many sales. Speaking from experience, I do not receive one order in four from catalogues that I have been requested to send, and do not miss selling one in four where I go in person to answer the inquiry.

I learn from good authority that there are 500,000 traveling salesmen in the United States, drawing on an average $3,000 each for salary and expenses, making the enormous amount of $1,500,,000,000 a year. If our employers thought they could put this—yes, ten per cent of it—on the credit side of their ledges, and do away with the traveling salesman, our resignations would be called for post-haste. But the traveling salesman is like the rudder to a vessel—they need us to steer them into the different channels of trade.

This great expense does not come out of the dealers' pockets; it is a saving to them. If there were no traveling salesmen the buyers would be compelled to go to the markets at least once or twice a year or depend on catalogues. The total expense of your trips would be at least double what it costs the wholesalers and manufacturers to send their representatives to you.

I believe the majority of buyers are better posted on what they need, quantity they want, and last, but not least, prices, when on their own stamping ground. There they have their stocks before them and prices to refer to. I have heard many good merchants say that they become confused when buying away from home. A buyer does not realize how little he knows until he meets those who know more. They generally have those know-more men at headquarters, or think they do.

I have had described to me some of the old time Western Hardware stores, back in the forties, before the era of the traveling salesman, when the buyers went to the markets once a year (sometimes) or depended upon catalogues. One can picture in his mind what kind of stocks were carried, and then look at the average up-to-date Hardware store of to-day, with its well assorted and shelved stock, that is visited from two to twelve times a year by the traveling salesmen, who, each trip, offer something new, bring advanced ideas, give you a "hunch" on the coming advances, show you best method of displaying your wares, help you many times in figuring or selling special articles that you are not posted on, and then ask yourself do you want to go back to the old way of doing business? Don't misunderstand me that I advocate doing away with catalogues. Catalogues should be kept for reference, and every dealer should have some system of filing them away, so when he has a call for something he is out of, or not carried in stock, he could turn to his index and find it at once.

My universal experience has been that the true and tried traveling salesman of judgment and experience, who has gained your confidence through his integrity and good judgment, is as indispensable an ally for you, in the upbuilding and maintenance of your business, as your family doctor or your lawyer.

He has studied the wants and the requirements of your business; he knows the varieties and the qualities demanded by your trade, and his observations elsewhere enable him to advise and to counsel with you helpfully and intelligently.

C. F. Schmidt,

Marshalltown, then gave the views of a retailer by delivering the following remarks pertinent to the subject under discussion:

Iowa, with its numerous railroads, is blessed with an army of such teachers, and it is largely due to them that the Iowa dealer has become educated up to all the new ideas in goods and merchandising. Continuing, he said:

Take a line of Stoves, or Refrigerators, or Hay Carriers. The visiting salesman has with him a model of his article, by means of which he can easily explain its numerous advantages. If questions are asked he answers, and in fifteen minutes the dealer

LEARNS MORE ESSENTIAL POINTS OF THE ARTICLE,

gets more practical knowledge of the same than could be obtained by reading any catalogue over and over again. Then, also, the salesman not only gives the retailer information in regard to his own line, but is able to tell about other makes of goods, to compare both and show why his line is better, more practical, more saleable, a better profit maker. He strengthens the dealer's faith in his line, increases his enthusiasm and makes the line an easy one to sell.

Digitized by Google

The traveling man visits thirty, forty or perhaps fifty stores each month. He meets dealers of different ages, of various abilities and also of unlike character. In this way he has an opportunity to see and hear new ideas; here he notices

A NOVEL WAY TO SHOW GOODS

or trim the window, and there he learns of an ingenious manner of selling a stove, and the result is that his knowledge is mine for the asking, an open book with a new volume whenever he comes around.

A large number of customers in the store prefer to trade with the owner of the business or at least like to be recognized by him when in the store. We, in turn, would like to buy from some jobber or manufacturer whom we personally know—would like to shake hands with him, be shown around in his plant by himself. As this is impossible, we accept his salesman in his place, and if the salesman is up to his job he will be the connecting link between his house and the retailer. The more attentive he is in forming a friendly feeling, in causing confidence and faith between his employer and the customer, the better he will succeed as an order receiver.

BUYING FROM THE CATALOGUE ALONE

can never give the satisfaction as a personal intercourse between the jobber's representative and the retailer.

If the issuing of a catalogue would be sufficient to sell goods the catalogue houses would get all the business there is. Their prices are good, their description of articles is fine. It is a good thing for us dealers that quite a goodly number of the public is from Missouri—they prefer to see. Some of us have perhaps bought from a house which sells through catalogues alone, but how often one or more articles are found, even in a small bill, which would not have been ordered if they had been seen before or could have been explained in regard to quality or utility by an agent. To overcome this we must visit the jobber as was formerly done by the New Mexicans or else stay by the traveling man, and I am sure the latter will be the cheaper and more satisfactory for most of us.

E. H. Morris, Cedar Rapids, who was down to deliver an address giving the Jobbers' Views on the subject, was confined to his house by illness, so the paper proposed by him was read by W. H. Keating:

An intermission here took place, at the conclusion of which a number of questions, taken from the Question Box, were considered and discussed, after which the convention adjourned.

WEDNESDAY EVENING SESSION.

In response to an invitation from the association, Iowa jobbers met the retailers in executive session on Wednesday evening. President Miles, in opening the session, spoke of the advantages accruing from close personal understanding and relationship between jobbers and retailers.

F. E. Cutler, of Waterloo, president of the State Jobbers' Association, said that the jobbers' association was nine years old and had done good work from the start. He congratulated the retailers' association on its rapid growth and striking success, and advised the members to co-operate with the officers of their association in furthering the work in hand. He spoke of the importance of the work that was before the National and State associations, and said that the wholesalers were equally interested in anything that affected the prosperity and success of the retailer. Such problems as local credits, fraudulent bulk sales of stocks, parcels post bills and catalogue houses were as vital to the jobber as to the retailer. He congratulated the association on having in President Miles one of the three State representatives on the Joint Catalogue House Committee. He asked for the co-operation of dealers with the jobbers and manufacturers who had agreed not to sell catalogue houses.

C. E. Haas, Le Mars, said that every dollar's worth of goods shipped into Iowa by Chicago catalogue houses was so much less business for both jobbers and retailers, and that it beehoved wholesalers and retailers to work together for mutual protection and profit.

W. S. Brown, of Brown-Hurley Hardware Co., Des Moines, said that the greatest duty of retailers to-day was to get together in local associations, in harmony, and when possible, in prices. The jobbers of the State had the same difficulties to contend with as the retailers, as their territories overlapped, and their traveling men would come in with all sorts of complaints against the other jobbers, but as soon as the jobbers got better acquainted with each other, through their State associations, each came to see that his competitors were good fellows, animated by motives of fairness.

COMPETITION OF GROCERY AND DEPARTMENT STORES AND COUNTRY POST OFFICES.

This topic consumed an hour's discussion, particularly with reference to the sale of Ammunition, Galvanized, Tin and Enameled Ware, Wooden Ware and Rope. Officers and members of the jobbers' association assured the retailers that they had given this subject much attention and had accomplished some reforms, but that the retailers could probably do more than the wholesalers in overcoming this evil. It was promised that the retail association should be provided with a list of names of manufacturers and jobbers who made a practice of selling Hardware lines to other than Hardware stores. Messrs. Brown, Hurley, Luthe and Cutler took part in the discussion on behalf of the jobbers, and Messrs. Haas, Holbrook, Keating, Peterson, Rogers, Schmidt, Miles, Bolinger and others on the part of the retailers. Mr. Haas was applauded vigorously when he said that he had long ago laid aside such little grievances and devoted his time and energies to studying his own business from a scientific standpoint, adding profitable specialties that more than offset the small loss of trade to grocers and other outside competitors. He said that he had recognized long ago that business conditions were changing and had bent his efforts to make the most of new conditions.

THURSDAY MORNING SESSION.

The session was devoted to the Catalogue Houses, and by the efforts of some of the members, the president said the revival of active interest had taken place, referring especially to H. S. Vincent, Fort Dodge, who had studied mail order catalogues and made a list of comparative prices, which had reached the attention of Mr. Norvell.

S. Norvell's Address.

Mr. Norvell, who was then introduced, confirmed the president's statement, and gave further interesting details, including the formation and the subsequent labors of the Joint Committee of wholesalers and retailers, and the alliance of his firm with the National Association of Jobbers. While the various associations had been able to accomplish much for the dealer, the speaker argued that the battle was one that had to be fought by the merchant himself. Said he: "The average man, if he has energy, can accomplish wonders. What we want is more fire under our boilers. The do-nothings who sit back and criticize not only do not accomplish anything themselves, but the aggressive man is often afraid of the criticism of these so-called conservatives."

The speaker then spoke about the misconception of their rights that should go with membership in dealers' associations. In the first place, he challenged anybody to define what was a legitimate hardware dealer. He also defended the department store, which pays rent and taxes, hires clerks, discounts its bills and oftentimes sells more Hardware than the somnolent legitimate Hardware store of the same town. That a jobber should be asked to refuse to sell the department store in such a case he believed to be unreasonable. It was not this form of competition which he believed should be most vigorously opposed, but the foreign catalogue house that did nothing to support the community and which, by buying as cheaply, to say the least, as the jobber himself, threatened the existence of both jobber and retailer. He advised members to get the editors of local papers on their side as an antidote to the inspired articles and news items in the agricultural and cheap home papers.

Mr. Corey's Address.

National Secretary M. L. Corey said:

"The cause of most of our troubles is that the mail order people want to sell everything in sight, and some of these troubles arise from the fact that the retailer wants to do the same thing. Missionary work with local papers, of which Mr. Norvell spoke, is not new to us, and you will note that mail order advertisements in local papers, once so common, are now rare. Even though the mail order houses and department stores may not get a very large percentage of your trade, they make it appear that your prices are too high. No firm can long endure the reputation of overcharging. You must therefore meet the price or a leveling process must take place somewhere. Either the catalogue prices must come up or ours must go down. They sell five per cent and you ninety-five per cent.

"We are asking the manufacturers to take their choice of the two channels in trade, or if they continue to sell the mail order houses to do so on a basis that will compel them to name prices that will leave a fair profit to the retailer. The traveling men are more concerned in this proposition than they realize, because if the mail order houses make it continually unprofitable for retail dealers the traveling man will find his occupation gone."

Address by Mr. Muzzy.

F. E. Muzzy, second vice-president of the J. Stevens Arm and Tool Co., Chicopee Falls, Mass., was asked to address the convention on the experiences of his company with mail order houses. In introducing himself before reading his paper, Mr. Muzzy referred to the various parties who had been claiming the credit of being the first to start the campaign against mail order houses, and said that his firm had taken up the fight two years before any of the dates mentioned in previous discussions and had fought it out single handed against tremendous odds, but with a large measure of success. He also referred to the fact that it was hardly consistent for Hardwaremen who were constantly reaching out for new lines and invading new fields to try to prevent other merchants from keeping within very narrow limitations. He also called the attention of the convention to the usefulness of a joint auction of old and slow moving stocks at certain intervals. He spoke of the tremendous value of advertising and the fact that no success was possible without a scientific and practical knowledge of salesmanship. He stated boldly that nine out of ten—yes, nineteen out of twenty—dealers who devoted their time and efforts in securing that extra two or five per cent discount were the ones who were least able or least likely to sell the goods after they got them.

He then read his paper, which told with considerable dramatic force of the conflict between his company and the mail order houses, and of the large expenditure of time, effort and money that was necessary on the part of his firm before all the avenues of supply for the mail order houses were closed. First it was the jobbers who would sell the catalogue houses, and when the jobbers were brought to a point where they did not or dared not sell the Stevens goods to such houses the next trouble was with the retailers, the catalogue houses picking up lots all over the country from misguided retailers who were tempted by immediate profit to lend aid to their own worst enemy. In such cases the catalogue houses determined to win their point, continued to offer the Stevens goods at less than jobbers' prices, taking heavy losses on every sale. He said it was somewhat disheartening to his company to receive abusive letters from retailers because catalogue houses continued to illustrate and offer for sale the Stevens goods when his company was making so vigorous a fight against the catalogue houses. Affairs had reached such a stage now, he said, that mail order houses were compelled in most cases to write to customers sending in money for Stevens Arms asking them to select some other line from their Sporting Goods catalogue, as they could not obtain the Stevens goods.

THURSDAY AFTERNOON SESSION.

Was devoted to a discussion regarding Insurance, which was led off by the president, S. R. Miles, who said:

The question of mutual insurance was then taken up, and President Miles said: "Two and a half years ago a committee was appointed at Cedar Rapids to investigate the matter of mutual insurance. They thought that Hardware men were paying insurance on other lines more hazardous than their own. After consideration it was recommended that a company be organized and an insurance company commenced business on August 20, 1903. We consulted all authorities and are still seeking light. When the insurance company does not save us money I for one will discontinue and get out. The average business man knows less about insurance than any one branch connected with his business."

State Auditor B. F. Carroll then addressed the convention as follows:

"By mutual insurance you mean assessment mutual insurance. Mutual insurance, to be successful, must be mutual in fact as well as in name. Mutuals have been reasonably satisfactory. When they have failed to be satisfactory there is a cause. When a bank is in trouble it almost invariably means that a very few men look after it. When all stockholders serve on committees there is no trouble. If the cashier is the whole thing it is a bad thing. There is even greater danger in the case of insurance companies than in that of a bank in letting it fall in the hands of one or two men. This is so because the insurance company operates over a wider territory. It is an easy thing to determine whether or not a bank is solvent, but there is nothing in the statutes to determine whether insurance companies are solvent or insolvent. Mutuality in insurance means that every member has equal rights with every other member. When this is not true, a mutual insurance should not be undertaken. The only reason why one of these companies should be organized is to get good insurance and to get it cheaply. If by forming one of these companies you cannot secure cheaper insurance, there is no reason for forming it, as you could get good insurance without the responsibilities.

"These companies are supposed to be organized for mutual benefit and not personal gain. Ten years ago mutual insurance companies paid $219,000 in losses and this last year they paid $908,000.

"There was a cause for the growth of mutual insurance companies. This is a day and age of organization and it is natural that you should turn to insurance. Then again, there is a prevailing opinion that people have not been fairly treated by the insurance companies. The rate maker comes along and arbitrarily fixes the rate. A year later, after you have been at a considerable expense, you make your place more fireproof, you find that your rate is higher. You feel that this is unjust and there is no justice in it. The insurance companies form iron-clad agreements to maintain rates. Your policy expires, and you go to another agent, who writes you exactly the same rate. The legitimate expenses of the company and the amount of their losses are the two things to be considered in making a rate."

C. F. Ladner, St. Cloud, Minn., president of the Minnesota Hardware Dealers' Insurance Association, then addressed the conveniton on

Mutual Hardware Insurance.

BY C. F. LADNER.

Mutual insurance, be it life or fire, means, in its simplest construction, protection guaranteed by each stockholder to the others at cost. The word "mutual," however, is very much abused at the present time, and in a great many instances simply means that the insured mutually agree to pay a certain company or corporation a large amount for "protection," which is paid out to high salaried officers and for other expenses, and the so-called stockholder, while he is supposed to have an interest in the surplus, never, in fact, receives any dividends therefrom.

This is not the case, however, with Hardware dealers' mutual fire insurance companies. Our aim is to place our insurance at actual cost, and this is done by doing business direct with the insured through the secretary of the company, thereby saving the commission of agents. The secretary is usually the only paid officer of the company, the directors and other officers receiving only the actual expenses incurred in the work they perform.

Our premiums are collected in advance at about the same rate as old line or stock companies charge and the earnings of the company, less a safe surplus to enhance the stability of the company, are divided at the end of the year among our stockholders, the insured, either in cash rebate or in reinsurance, at the option of the holder of the policy. Mutual fire insurance is not a new or untried experiment. Mutual fire insurance companies have existed and flourished in the Eastern and Central States for a great many years and have saved their patrons thousands of dollars. This is especially true of those mutuals doing business among cotton and woolen mills and among the flour mill industries.

IS MUTUAL INSURANCE SAFE?

But the question might be asked, Is mutual fire insurance safe, and will the companies endure the test of time? The records of the United States Census Bureau show that during the decade of 1890 to 1900 33 per cent of all stock companies doing business during that time had gone out of existence and only ¼ of that per cent of mutuals retired.

F. J. Martin, chairman of the Statistics Committee of the National Association of Co-operative Mutual Fire Insurance Companies, makes this statement:

"In 1890 there were 350 stock fire insurance companies doing business. On January 1, 1903, only 153 of these remained. In all the States but five, in which we have not complete reports, there were 1,225 mutuals doing business in 1890. On January 1, 1903, all but 189 of them remained in existence. This shows the failure of over 50 per cent of the stock companies as compared with only 15 per cent of the mutuals."

If this is the showing which mutuals in general make, Hardware dealers' mutuals should be even more enduring, because they insure only Hardware stocks, which in themselves are safe risks, and because their clients are so separated that a fire scarcely touches more than one of them at a time, and we do no business in large cities.

Are Hardware dealers' mutual fire insurance companies justified in organizing and doing business? I say most emphatically, yes. It is a well-known fact that stock companies, as a rule, after paying large commissions to local and general agents, high rents and officers' salaries, still pile up large amounts of money, invested in good interest paying bonds and other securities.

The dividends of American joint stock companies were higher in 1902 than in any year since 1860, and the general average for the last eight years previous to 1902 was larger than the average for the past forty-two years.

Not content, however, with the large profits they made, the companies generally doing business through the West raised their rates on an average of 25 per cent, and were it not for the success shown by the mutual companies and the inroads they are making on the business of the "old liners," I have no doubt they would advance their rates still higher.

INCREASED SAFETY OF RISKS AND LARGER PROFITS.

You can very materially assist in making Hardware dealers' mutual fire insurance still more safe and profitable by paying closer attention to the surroundings and interiors of your stores. How many of you take proper precaution with the disposition of your ashes from your stoves or heating plants?

How do you care for the sweepings and litter and rubbish accumulating from the unpacking of goods? More fires occur from the careless handling of these things than from any other source.

Another source of great danger of fires is the largely increased sale of Gasoline, since the advent of Gasoline engines and automobiles. Many Hardware dealers are deriving a materially increased revenue from handling Gasoline, but at the same time are endangering their stock by keeping it either in the same building with their general stock of goods or in some open shed, where most anybody can get at it. Why not spend some of the earnings from handling this product by providing some safe place to keep it in?

It is conceded that the Hardware dealer in the village or city where he is located is considered above the average business man in intelligence and business qualification. I do not make this statement to flatter you, but state it as a solid fact. You should therefore lead in keeping your store and surroundings clean and safe from combustible rubbish and thereby not only make your own risk safer, but by example prove the confidence reposed in you and invite your business neighbors to do likewise.

IMPORTANCE OF RECORDS.

Another source of improvement which could be profitably made by a great many merchants is in the system of keeping their books. To illustrate this more fully I will relate an instance which came to my personal observation about a month ago: A merchant insured in our company suffered a fire loss and I was sent to make the adjustment. I found the building occupied by the merchant entirely destroyed, but as the fire started in an adjoining building about $600 worth of stock was saved. The man carried $2,800 insurance, one-half with us and the balance in an old line company. After invoicing the salvage I asked him how much stock he had. He thought about $4,000. I asked him to show me his merchandise account and previous invoice to prove his assertion. He had neither inventory nor merchandise account, but had a memorandum showing that his last year's inventory was $2,550. We had to go to work and figure up from the individual accounts in his books his purchases and sales, and, after allowing him the usual supposed profit, we could only figure out that he had a stock of about $2,600, and on that basis made our settlement. His banker and his competitors both supposed he had a large stock, but it could not be proved. Had he kept a better system of books the adjustment could have been made in one-fourth the time and no doubt more satisfactory to him and to us. How many of you would be in the same condition as this man was should a fire occur in your stores to-day?

INSURANCE NOT SOLE OBJECT.

Pleasing as the growth and profit of Hardware Dealers' Mutual Fire Insurance is to all of us, we must not, however, lose track of the fact that the insurance business was not the sole object of the formation of these companies. They were formed principally for the purpose of aiding the Hardware associations to perform their noble work—to better the conditions of the retailer. The money saved to you on your insurance should be considered a special fund by you to be used for the purpose of paying your dues to the association and for your expenses in attending the annual meetings and in assisting your officers in their arduous tasks. The real work of the Hardware associations, as you have noticed from the reports of your local officers and from that of the National Committee, has just begun, and they need your most hearty co-operation, not only in your membership, but by financial assistance. Devote your savings from the insurance department to this purpose, and then you will have carried out the principle for which Hardware dealers' mutual fire insurance companies were formed.

Digitized by Google

A. R. Sale, secretary of the Insurance Association, then read his report, which gave the details of the inauguration and success of the company and how it was accomplished by hard work. This report closed the Insurance Session.

An interesting and instructive address, prepared at the request of the association, entitled "Some Suggestions as to How a Retail Hardware Dealer May Increase His Business and Profits," was then read by F. H. Luthe, of the Luthe Hardware Co., Des Moines. We reserve it for future publication in its entirety.

L. Lindenberg, Dubuque, gave a paper on

Hints for Stock Taking.

You will all agree with me in saying that a yearly inventory is necessary for every well conducted business. The benefits accruing therefrom are obvious. It brings to light many items of slow stock that must be brought out, placed in a prominent position in the store and worked off. It shows the business man just exactly where he is at—whether he is doing a profitable business, merely holding his own, or going behind. With the annual inventory, an invoice book showing purchases since inventory was taken, and a sales book showing merchandise sales, it would be a simple matter to determine the amount of stock on hand in case of fire, making the adjustment of a fire loss an easy thing to do.

About a week or ten days before the actual inventory commences it is a good plan to go over the stock, counting contents of open boxes and packages, putting a ticket in each package showing what it contains. Any sales made previous to inventory are, of course, deducted from the tickets. In writing down stock the use of inventory blanks will be found preferable to the use of a bound book. By using these loose sheets numbered consecutively from 1 up, several persons can work at them at the same time, one person pricing, and others, if necessary, figuring.

As a Hardware stock is too heavy to shift about a great deal, it will be found that the items composing same are generally in the same order of each inventory, year after year. This fact gives the price clerk an opportunity of taking list prices on such goods as Screws, Bolts, Auger Bits, Chisels, etc., from last year's inventory sheets, without looking through catalogues and price book for same. The discounts, of course, must be changed to represent present values.

Possibly the most tedious thing in the Hardware stock to take is Wire Cloth, it being necessary to measure all part rolls. A simple way of obviating all this trouble is to weigh the open rolls and figure 10 pounds to each 100 square feet of Cloth; the same rule will apply to Poultry Netting. The different widths weigh as follows: 1 foot, 12 pounds; 2 foot, 22 pounds; 3 foot, 30 pounds; 4 foot, 38 pounds; 5 foot, 45 pounds; 6 foot, 53 pounds.

Rubber and Metallic Weather Strip can also be weighed instead of being measured, the number of *feet contained* in the broken packages being determined by the weight as compared to a full package.

Not the least benefit derived from stock taking is the cleaning up that the goods and shelves get. To obviate raising dust when cleaning shelves it is advisable to use dampened sawdust on them. Sprinkle the sawdust over the shelves and after a little while take it up with an ordinary counter brush and dust pan.

J. H. Petty, of Elliott, read a paper outlining the problems of the small dealer other than those of mail order competition. His paper, in part, was as follows:

Problems of the Small Dealer.

My business experience for twenty years has been in a small town and I am not liable to touch on some of the questions that will interest a great many of my hearers who have not enjoyed this privilege.

As buying is so very important, I shall mention this problem first. The buyer should study well the conditions of his trade and keep posted on the markets at all times. He soon finds out that

THE TENDENCIES OF THE TIMES DEMAND LARGER STOCKS,

better assortments and less profits, and when he goes on the market to buy Nails and Wire and many of the staple articles he comes up square against this problem—the same price is made by all.

As we are dependent upon jobbers and manufacturers, we should see that our patronage goes to the legitimate Hardware trade. Mistakes are often made by trying to sell too many different brands of goods. Select as few as possible. Educate your trade that the best goods are always the cheapest.

After goods are bought and placed in stock then comes what might be called the twentieth century problem: How can we sell goods to obtain best profits, with least expense, and bring future results? First, wake up, if you are in the old rut. Get out, join the Retail Hardware Dealers' Association if you have not already done so; not only join, but be a part of it. Here you will meet the retailers, exchange ideas and use the Question Box to bring out any problem that you may want more light upon, and

GET BETTER ACQUAINTED WITH YOUR COMPETITORS,

not only in your own town, but in adjoining ones. Then we must improve our stores in every way possible, make them more attractive, do more effectual advertising, select more carefully the clerks we have in our employ. The clerk who has for his motto "Do something," and is always ready to treat customers with courtesy, who can sell goods that will stay sold without cutting prices and cause the customers to have a desire to come again, is the one always in demand. Let us build more confidence in our business and adopt better sytems.

Business conditions change. We have learned that we must face conditions as they exist. We have reason to think that our lawgivers have shown us no favors. I wish to say right here that I believe our Hardware magazines and trade papers have done more to right the difficult problems than we have done ourselves. Nineteen hundred and four brought new conditions for most all retailers, notably the rural free delivery and the mutual telephone, both of which have come to stay. These conditions are looked upon by the retailer as a problem for him to combat.

We do not want our country to retrograde, and if the major portion of our business comes from those who till the soil, our interests are mutual. The farmer cannot get along without the retailer any more than the manufacturer can without the jobber.

What we want to do, as retail merchants, is to

SELECT A LINE OF GOODS BEST ADAPTED TO OUR TRADE

and keep talking about them every opportunity we have. When sales are made and goods prove not as represented, make it right as cheerfully as you sold them.

These problems or similar ones have always been connected with the retail trade, and possibly always will be. What we want is Hardware men ready to meet them and overcome them.

PUSH SIX DAYS A WEEK.

And as we go from here to our places of business, let us put our shoulders to the wheel and push six days in the week. And when the wheel of Time rolls around to 1906, and to those of us who have been spared until the eighth annual convention, may it be said that 1905 was the best Hardware year ever known in the grand old State of Iowa.

R. R. Williams' Address.

An address by R. R. Williams, Hardware editor of *The Iron Age*, closed the day's session. In this address Mr. Williams plainly told the dealer that the small annoyances which were given such a prominent place in the convention discussions might, after all, be made stepping stones to larger success, and that it was idle for the retailers to spend their time in blaming anybody unless they blamed themselves for having given the catalogue houses an opportunity to intrench themselves. He warned them that the moment they brought into their proceedings anything that had the spirit of boycott they would fail disastrously. More profitable than to waste time in idle complaining would be a careful study of the catalogue house methods. Both catalogue houses and jobbers have systematized their business as not one out of fifty retailers had done. The jobbers had lists of names and they knew from whom every dealer is buying, whether he is a close or a careless buyer, and all about him. They were not content to have business come to them, but went after it with painstaking efforts. He advised every dealer to have a list of every farmer and possible buyer within five to fifty miles of his store, according to the character of business done, and to co-operate with other Hardwaremen in the same town to secure information about the people named on the list. He agreed with the previous speakers that while buying was important, selling was the vital point, and he spoke earnestly of the necessity of originality and initiative.

Entertainment and Smoker.

Departing from its custom of accepting the hospitality of local jobbers and manufacturers, the association gave its own entertainment and made the traveling men and local represenatives its guests. This was an entertainment and smoker given in the convention hall Thursday evening. President Miles gave a brief address, in which he emphasized the cordial feeling felt toward traveling men by members of the association, notwithstanding the fact that a discussion had taken place that day as to the advisability of abolishing them.

FRIDAY MORNING SESSION.

The following officers for 1905 were unanimously elected:

PRESIDENT—H. S. Vincent, Fort Dodge.
VICE-PRESIDENT—C. E. Haas, Le Mars.
DIRECTORS—
First District—T. A. Nichols, Burlington.

Amendment to By-Laws.

On motion by Mr. Bolinger, Article 2 of Section 1 was amended to read as follows, the italics being the amendment added:

Resolved, That it is the sense of the convention that the interpretation of the term "retail Hardware dealer," as set forth in the above constitution, to entitle him to purchase Hardware, Stoves and Tinware, be construed to mean any person having an established place of business and carrying a line of Hardware, Stoves and Tinware and such goods as are usually kept in a first-class Hardware store; and in cities of less than 5,000 population all persons carrying a general line of Hardware in connection with any other kind of merchandise, *provided that such Hardware department is conducted on a reasonably profit paying basis.*

Resolutions.

The Committee on Resolutions submitted eight resolutions, thanking the trade press, the honorary members of the association, the Entertainment Committee and the Commercial Club. Other resolutions were as follows:

ILLINOIS RETAIL HARDWARE DEALERS' ASSOCIATION

The Seventh Convention of the Illinois Retail Hardware Dealers' Association was held in Peoria, February 14th, 15th and 16th, the sessions being held in Turner Hall. It was a large and enthusiastic meeting.

TUESDAY AFTERNOON SESSION.

President Charles H. Williams called the meeting to order, and Mayor E. N. Woodruff welcomed the delegates on behalf of the city, and presented them formally with a key to the freedom of the city. In response to the address of welcome President Williams expressed himself in a few remarks. After the roll was called by Secretary L. J. Nish, of Elgin, President Williams announced the appointment of the following committees:

PRESS—G. R. Lott, Chicago; Charles Mauer, East St. Louis; W. B. Costello, Chicago.

LOCATION OF NEXT MEETING—E. L. Somner, Chicago; Fred. Giessing, East St. Louis; Dan Holder, Bloomington; Frank B. McKenny, Rockford; John Hohmann, Nashville; L. D. Ray, Belvidere.

C. H. WILLIAMS, EX-PRESIDENT.

RESOLUTIONS—L. M. Reeves, Peoria; Grant Porter, Chicago; A. G. Kurth, Anna; T. J. Mathews, Mt. Vernon.

AUDITING—O. B. Stebbins, Chicago; Orlon Howe, Streator; J. P. Eckles, Decatur.

NOMINATIONS—James Gormley, Chicago; H. G. Cormick, Centralia; J. A. Hunter, Peoria; L. Babst, Kankakee; M. Fahay, Decatur.

The Chairman of the Committee on Question Box then announced a number of questions, in the discussion of which the following members took part: G. R. Scott, F. F. Porter, of Chicago; Frank B. McKenney, Rockford, and P. A. Lemoi, Evanston. H. M. Cole, a representative of the Sheldon School of Scientific Salesmanship, Chicago, then addressed the meeting.

Convention adjourned.

WEDNESDAY MORNING SESSION.

President C. H. Williams then delivered his

Annual Address.

Civilization grows by contacts—a nation, community or an individual shut within himself becomes narrow and fragmentary. We are gathered together from all over this great commonwealth of Illinois to receive that inspiration that personal contact with one another brings, and as I look over this representative body of men, all interested in a common line of trade, I feel that we cannot fail to absorb some mental stimulus that will lessen the annoyances and increase the pleasantries of next year's business.

In arranging the programme for this year's convention it is the plan of the committee to have as much general discussion as possible, and there is not a man on the programme who is sensitive to criticism, and we will all welcome criticism and diversity of ideas on all subjects that come up, to the end that we may all leave here like the inhabitants of that hermit nation far away, but with the aggressiveness, if not the warlike spirits of their island neighbors.

The spirit that can manage a winter campaign in an arctic climate would certainly make a success of the Hardware business in Illinois.

To the new members who are with us for the first time I want to say that you are all appointed on the Introduction Committee and to mix and get acquainted is your first duty.

It is a pleasure to know that we will have with us W. P. Lewis, of the National Association. For the able, aggressive and dignified manner in which the National Association's affairs are being managed we can heartily congratulate our national officers.

We should keep in as close touch with the National Association as possible, as through it, backed by strong State associations, can the most good be accomplished.

It is a pleasure to report progress, and the red lines printed crosswise on the invoices of all important jobbers in this State are the culmination of a long

CAMPAIGN OF EDUCATION AND ACTION.

I do not believe there is a country dealer present who has not made in profits more than his annual dues and expenses to this convention from sales of goods that the money had been mailed away and returned because Messrs. Blank could not pick up the goods from Mr. Jobber.

If any jobber is still selling pickups to these establishments, I hope it will be given publicity on the floor of this convention and I trust the gentlemen present to do the rest.

L. D. NISH, EX-SECRETARY.

There is no business matter of public interest attracting such universal attention at the present time as that of freight rates and the discriminations made in favor of and usually forced by large combinations, often enabling them to crush competitors by this item alone.

When we are quoted goods f.o.b. Pittsburgh, plus tariff rate to destination prepaid and added to the bill and allowed to discount freight and all 2 per cent, it simply means that Mr. Shipper gets a rebates. Reform in this line is a hard proposition and to be brought about must enlist on its side both powerful political and business interests. Our Freight Rate Committee have done everything in their power to have the unjust local tariffs in Illinois changed. Fred. Giessing, East St. Louis, of the committee, is here and will tell you what they have done and what they have been up against. I trust this convention will indorse, and have a copy sent to Washington, the stand taken by President Roosevelt in the matter of government control of freight rates.

For the

INTERESTS OF THE RETAIL DEALERS ARE WITH THE MASSES,

the people of moderate means, whose welfare is our welfare. We are not calamity howlers, and perhaps Lawson in his articles on "Frenzied Finance" or Ida Tarbell in her "History of Standard Oil" or Charles E. Russell on "The Greatest Trust in the World" may make some overdrawn statements, yet to any thoughtful citizens these sound an alarm.

Needed reforms will never come from the very wealthy and cannot come peaceably from the very poor. But what has this to do with the Hardware business?

The retail merchant occupies a perilous position between monopolistic greed and the masses of the people, and he

SHOULD STUDY FROM ALL POSSIBLE STANDPOINTS

the great national affairs of momentous importance and when the Chief Executive of the nation dares to shake off party conservatism and go into a struggle for justice to all, as against the privileged few, the people who come in closest touch with the masses should be the first to back him with all the power that they can command.

Our Executive Committee will present a matter to you which they believe will bring you back in dollars more than this association costs

Digitized by Google

you. It is pleasing to note that while the last year was a Presidential year, business was very little disturbed and all are reporting a fair share of prosperity. The demand for better grade of goods continues and this is a great factor for keeping trade in legitimate channels. The Hardware papers have spared neither brains nor expense to foster in every way possible our State and National associations, and we cannot in words express the appreciation we feel for their zeal and loyalty. I feel that the time has come when they

SHOULD NOT BE EXPECTED TO PUBLISH AS FULL REPORTS

of our various State conventions as formerly; it takes too much space. Also the dealer who stays at home and expects to get the full benefit of the conventions from his trade paper will feel more disposed to join the association and attend the convention if he cannot get it in full from their reports.

In speaking for the dealers outside of Chicago, I wish to say to the members of the Chicago Retail Hardware Dealers Association that we greatly appreciate the loyalty and vigorous support you have always given to the association. The conditions of business in a great city are such that you have not as much in direct benefits to expect from a State association as have the country members, and yet as your special train stopped at my home town apparently you had brought the whole of the Hardware people of Cook County and then some.

And, by the way, we have a Governor from your county, young, fearless and active, elected by 300,000 plurality, and we are looking for him to champion the cause of the masses in the matter of freight rates and other matters of vital importance. It has always been considered good business sense to keep out of politics, and as a strong partisan or seeker after office, as it is now, but I believe that every retailer in the United States ought to try and keep in touch with the political and industrial situation and be an ever stronger factor in the shaping of legislation.

The Committee on Freight Rates made an informal report in the absence of the chairman, C. M. Hurst, of Decatur.

L. D. Ray, Belvidere, then read an interesting paper on "Plumbing in Connection with the Hardware Business," as follows:

Plumbing in Connection with Hardware.

BY L. D. RAY.

We surely realize the fact that this is an age of combination and concentration of interests that apply to each other, and I think, from my experience, that you can increase your trade in many ways by adding the plumbing business to your present line of Hardware. The one great question that has confronted the majority of the Hardware dealers who contemplated adding plumbing is the question of union labor, for there has been a time, and not many years past, that it was almost impossible to run a plumbing department on account of the stringent rules of the journeyman plumbers, which gave the merchant very little show for profit, but I think that time has gone by, as the unions have overreached themselves until now, outside of the large cities, they have very little influence.

PLUMBING CAN BE PROFITABLY ADDED

to the Hardware business if properly handled. You must have a man who is thoroughly familiar with estimating and laying out your work, as there are no two jobs that can be figured alike. He must know the amount of work that each plumber can do. He must know the principles of water circulation, the amount of pressure it takes to run motors that pump the soft water, the sizes of sewer it takes for a given number of closets or baths, and, in fact, he must be a thoroughly practical man and a man of good judgment in that line of mechanics.

Plumbing has always been considered a business entirely by itself until the last eight or ten years, but we find from experience that it is a part of the Hardware business just as much as the Tin shop. Our plumbing pays us a greater percentage of profit for the amount invested than our Hardware or Tin shop, but it is looked after by a member of the firm, and he devotes his entire time to it and has charge of the plumbers and heating men whom we employ.

WE FIND IT HELPS OUR HARDWARE PROFITS

in many ways. First you find a party is going to build a modern residence. You go to him and ask him if you may submit prices on the trimming Hardware, Tin work and plumbing, heating, Paints, Oils, Varnish, and, in fact, everything except the carpenter work, lumber and plastering. You can make him a price on the whole. Your competitor in any one of the above mentioned lines does not know nor has he any way of finding out what your separate bid would be on any one of the items mentioned, and the owner, we find, would rather, in ninety per cent of the cases, let his contract for all that applies to the Hardware line to one man.

And further, we find our profit is not yet finished. When the owner gets that house completed he wants a new Range for his kitchen. We have it. Our plumber is working right there; he can connect it for less expense than you can buy a Range elsewhere and have it connected, consequently we sell him the Range.

And he is not finished yet. After he moves in he finds his wife wants Lavatory Glasses, Nickel Towel Bars, Nickel Soap Dishes, Sponge Holders and all of the little articles that go to make up the modern bathroom.

We also find that

IT INCREASES OUR HARDWARE BUSINESS WITH THE FARMERS.

In this age the farmers enjoy all the modern methods of farming. You find them with Gasoline Engines, Cream Separators and all the modern Machinery such as Valves, Steam Gauges, Water Glass, Automatic Oilers, Pipe and Fittings, Etc. We have placed in farm residences as complete a bathroom and sanitary plumbing job as you can find in any of your modern city residences. Does that plumbing in the farmer's residence help your Hardware business? My answer is yes, for he is convinced that he can go to your store and get anything that is made of Iron or Steel, and when he wants anything he does not bother to look up Mr. Catalogue House, but goes to his dealer for it first.

The Hardware jobber is surely endeavoring to help you all he can. I think I am safe in saying that fifty per cent of the Hardware jobbers carry most of the small lines in plumbing, such as Faucets, Lead Pipe, Sinks, Traps and Bathroom Fixtures. He adds to his line because it is profitable. If it is profitable to him it will be for you, if properly handled.

PLUMBING GOODS PROTECTED.

We find better protection among the manufacturers of Plumbing Goods. You do not see the catalogue houses advertise Plumbing Goods very extensively for the reason that they know that manufacturers will not put their best goods in their hands, and they could not use them if the manufacturers did. What would any person do with a Bathtub, Closet or Lavatory from a catalogue house? He could not connect it and he could not get a plumber to do it.

However, go at it lightly. Don't try to do all the plumbing business at once. Teach your trade the use of the modern conveniences. It will be a source of income after you have taught them.

This was followed by the reading of a well digested and thoughtful paper on

Hardware Stores, Past, Present and Future,

which we reserve for publication in a subsequent issue.

WEDNESDAY AFTERNOON SESSION.

W. P. Lewis, New Albany, Ind., then addressed the convention in the interests of the National Retail Hardware Dealers' Mutual Fire Insurance Association. He said in part: "This association was largely a feature of Illinois. I wish to say that it is one of the traits of suman nature that many men should see a good thing and not accept it. This is because of their inherent hesitancy. A great advantage of Hardware association is found in mutual fire insurance. It expresses to you in dollars and cents the advantages of belonging to an association. It represents at least the annual dues and in many cases the expense of attending the meeting. The National Retail Hardware Dealers' Mutual Fire Insurance Association is exceedingly broad in its scope, as it does business in every State. It has just finished the first year of its existence—namely: the year 1904. It has not made a rebate. It was considered a point of strength not to do this, as the money is in the treasury and the rebate could have been made. The expenses in the association, covering so broad a territory, are high. We spent $600 for postage stamps alone. The association has over $800,000 of insurance on its books, and this year a liberal rebate is contemplated.

* * * *

H. G. Cormick, Centralia, then asked the convention to endorse the National Retail Hardware Dealers' Mutual Fire Insurance Association, with the hope that when we meet in Chicago next year we would see three times as much insurance written as at present. The motion of endorsement was carried.

The convention was then addressed by M. S. Mathews, the secretary of the Minnesota Retail Hardware Dealers' Association, who talked insurance in the company represented by him. He said Minnesota has $2,000,000 of insurance written and eleven hundred policyholders.

F. E. Muzzy, of the J. Stevens Arms and Tool Co., Chicopee Falls, Mass., then gave an address which was listened to attentively. He said in part:

You are our distributors, and we prosper as you prosper. The Hardware dealers rank high in the commercial world, and are among the shrewdest of buyers. They were the first to organize, and to-day they have the best series of State associations and the best national association of any trade; and the work of the two closely fits together.

If grievances are presented by associations as strong as yours they naturally receive serious consideration. Every Hardware man in the United States should join the State associations. The Hardware associations are still young, but they have done more to check inroads of catalogue house competition than all other lines of trade put together. The catalogue house is here to stay, and they will have no difficulty in securing Hardware, which is marketed by from three to four hundred jobbers.

Mr. Muzzy then went into detail, explaining the experience of his house in fighting the catalogue houses on behalf of the retail trade. One disagreeable feature of this fight which he had had with these houses was that he had found that some jobbers, even some members of the National Hardware Association, were eager to sell these houses.

One day the president of a catalogue house said to him, "You have spent more money in keeping your goods from us than any one else we know of."

Owing to the stubborn fight made by this firm, retailers are now able to meet the price and make a profit. He said: Our firearms are the most profitable dealers can handle, and we propose to protect you.

I am going to tell you a story which occurred at the close of services in a certain church. While the money was being counted, one of the deacons was evidently disturbed, and a brother approached him and asked, "What is the matter?" He said, "A stranger deposited a ten dollar bill in the box." A second deacon said that was good. "No," the first deacon rejoined, "it was bad." This applies to the parcels post so many Hardware dealers have so bitterly opposed.

Digitized by Google

If it became a law it would drive half of you out of business.

The mutual insurance idea, which several Hardware associations have taken up, is a profitable one, and should prove beneficial. You will find dead stock in all lines, and auction sales will help you to reduce overstock without cutting prices. This is something which all merchants in a town should join in. All dealers should advertise, but it should be borne in mind that it is those dealers who advertise lawn mowers in December that lose out to the catalogue houses. They are merchants in name only, and should belong to the association.

All merchants should study salesmanship. Nine out of ten retailers look more for an extra two or five per cent than they do to selling goods. I remember when I was a boy and earned money husking corn and decided I would buy a pair of buckskin gloves with purple chinchilla backs. I went into the store and asked the price. The proprietor said they were $1.25, and I told him I only wanted to pay a dollar. He laid his hand on my shoulder and said, "There is nothing I had rather do than sell you those gloves for a dollar, but I can't do it." He did it so nicely that I paid him the $1.25 and went away feeling real pleased."

H. G. Cormick, Centralia, delivered the following address:

Our Association, Its Objects, Results and Future.

On August 16, 1899, the Illinois Retail Hardware Dealers' Association was organized in Chicago and those who were present at that meeting are yet active members. Each of the succeeding years have added to their loyalty and enthusiasm.

Many are the cities in which shorter business hours prevail. Social gatherings, where there are local associations, have become numerous, being of incalculable benefit to each individual. Such has been the interest in elliminating the dead beat that there is scarcely a place of any size but what restrictions have been so thrown around his operations that in the near future he will cease to be a menace to business health.

GREAT STRIDES HAVE BEEN TAKEN IN CO-OPERATIVE BUYING

and it is practiced to quite an extent in most of the cities of our State; also in a few instances has spread to the country, where dealers are suitably located. Carefully and conservatively followed, the results are "easy money" with a little effort on the part of the executives. Local associations have sprung up wherever there were sufficient members to justify them, and in many places where our membership is small they have been mainly responsible for the existence of retail merchants' or business men's associations, which have been of great value to their several communities. The attitude of the retailer towards the jobber, and in turn of the jobber towards the manufacturer, is such as has never existed. For this improved condition this movement is alone responsible, and I believe that the success in inducing the withdrawal of certain lines from catalogue houses is but one of the results destined to be gained.

If the foregoing premises are well taken, it behooves us to look into the future, and if possible gain knowledge whereby we may get better returns for our efforts.

First in importance is our increase in members. Past experience has demonstrated that of all means personal solicitation gets the best results; but this costs money. Will their convention provide the funds? Our officers are competent and will see that the work is done.

In order that our association be relatively more successful, let me impress upon every member the necessity of becoming

AN ACTIVE MEMBER OF A RETAIL MERCHANTS' ORGANIZATION

in his community, through which you can reach encroachments upon your rights as business men, foster local improvements and keep in close touch with abuses in local government.

Much has been said and written about the baneful influence of catalogue house and department store competition, and no specific has yet been offered for it; yet if our members will not live in their store rooms from morning until night, frittering away their time over the detail of their business

THAT CAN BE LEFT TO EMPLOYEES,

but will get out, mingle with their trade, entering into their life as much as possible, much can be done to help present conditions. Let me plead with you as incidental to the future welfare of our association that each of you take a high position as to civic local pride and citizenship, that the rumors of fraud and graft in the conduct of our governments may cease and be without a foundation of fact.

Convention adjourned.

WEDNESDAY EVENING.

Wednesday evening was devoted to a banquet at Turner Hall under the auspices of the Peoria members of the association, viz.: Charles Johnson Hardware Co.; Balzer & Reeves, Peoria Coal Drill & Hardware Co., J. P. Becker, Martens, Robinson & Co., F. W. Traeger, Hunter & Strehlow, F. Meyer & Bro. Co., R. L. Wilson & Co., M. Pfeifer & Co., Theo. Folkers, A. B. Weers, O. C. Slane, William Bittel.

After the banqueters had their picture taken at 9 p. m., William Bittel, of Peoria, introduced Charles D. Clark as toastmaster for the evening.

Among the speakers of the evening were: W. P. Lewis, ex-president of the National Retail Hardware Dealers' Association; C. L. Burch, of the Brand Stove Co.; H. G. McCormick, Centralia, ex-president of the Illinois Retail Hardware Dealers' Association; "Pop" Bennett, of the Lawson Manufacturing Co., Chicago; E. F. Baldwin, editor of the Peoria Star; R. R. Elliott, of the Estate of P. D. Beckwith, Dowagiac, Mich.; Will H. Collins, the monologuist; James M. Reeves, the Peoria advertising specialist; Alford P. Reiter, of Hibbard, Spencer, Bartlett & Co., and F. K. Gray, of the Heath & Milligan Manufacturing Co.

THURSDAY MORNING SESSION.

Secretary L. J. Nish, Elgin, delivered his secretary's report, which will be published in full in the forthcoming number of the *Bulletin*. In the course of this report Mr. Nish gave out the approximate membership of the different State Hardware associations as follows: Minnesota, 700; Iowa, 600; Indiana, 425; Wisconsin, 400; Ohio, 325; Illinois, 300; Nebraska, 200; Pennsylvania, 200; New York, 165, and Missouri, 160. He pointed out that Illinois was sixth on this list. During the past year the association has taken in ninety-eight new members, making its membership approximately 400, or a total of 388.

After the acceptance of the secretary's report, Treasurer George T. Englehardt, Chicago, read his report as follows, which report was adopted.

Balance	$2.20
Receipts	666.00
Expenses	659.52
Balance	9.68

Charles T. Woodward, Cartinville, then read a paper on

The Steel Range.

Charles Smith, of Charles Smith Co., Chicago, then made a rattling speech upon his belief that exhibition space should be sold by and in ure to the benefit and profit of the association.

T. J. Mathews, Mt. Vernon, then read the following excellent paper on

Work and Be Square.

BY T. J. MATHEWS.

If the individual members of this convention should be asked for the secret of their success in business probably no two answers would be the same. One might attribute his success to energy and enterprise; another, perhaps, to frugality and close attention to business: another to having what a customer wants at the time he wants it, to good advertising, close collections, etc. These are all factors of success, and there are perhaps many others; but I am sure that hard work and square dealing must go hand in hand with any of these to insure permanent success.

An article in one of our great story papers recently told of a young traveling man who asked an old salesman for some pointers before starting out on his maiden trip. The reply came in these terse, pointed words: "Work and be square—never come down on a price—make the price right in the beginning." I don't know when I have seen so much good advice expressed in so few words. The Hardware dealer probably needs this advice less than most men, for he seems to absorb the sterling qualities of the metals in which he deals—with the possible exception of Brass.

Some one has defined genius as an infinite capacity for taking pains. That kind of genius should characterize every active Hardware dealer. The indolent man has no place in a Hardware store.

Aside from financial considerations,

WORK WELL DONE BRINGS ITS OWN REWARD

—the sense of something accomplished and a keener and quieter satisfaction than ever comes to the indolent.

EVERY BUSINESS MAN SHOULD HAVE A HOBBY,

some non-money grubbing interest, outside of business to occupy his leisure hours. It may be association work, amateur photography, gardening, dog training—anything to take his mind out of the rut. The essential thing is to lock up his business affairs when he turns the key in his store door lock. The man who does this will live longer and accomplish more than his unfortunate brother who carries his worries home and takes them to bed with him. The mountain of worry locked up in the store the night before is often but a molehill in the light of another day. A worried poet once said, "Ye Gods; it would be rare if care were not the waiter behind a fellow's chair," but he can be easily banished. Lock the door on your worries. Worry is a habit of mind that can be cured by sane living and a vigorous effort. Be the master of your own mind.

PRICE CUTTING.

I believe in the gospel of work and what President Roosevelt calls "a square deal." The one-price store is where everybody gets a square deal. The merchant who continually cuts prices to effect sales begets a suspicion of exorbitant prices. The favored customer brags of his bargain and forms the "jewing" habit. The customer who does not "jew" hears of his neighbor's bargain and justly feels that he has been discriminated against.

One's best customers seldom try to beat down a price. They are certainly entitled to as good a bargain as our penny splitting friend, who is seldom a loyal customer. Be square with the man who never "jews:" make the price right in the beginning.

BE SQUARE WITH COMPETITORS.

Don't make a price on goods not in stock or a lower one on goods already purchased elsewhere. If your neighbor runs short and needs an article to fill an order make the price right and let him share in the profits. Never speak evil of your business rivals. No good was ever accomplished by running down a competitor.

BE SQUARE IN YOUR ADVERTISING.

If goods are advertised at a cut price, the cut should be genuine and a good reason given for it. The man who would be successful must tell the truth in print and out of it. We have all seen advertisements in which the lie was so patent that we wonder it deceived any one. A lie is a boomerang that seldom fails to come back to the thrower. A little boy once said: "A lie is an abomination in the sight of the Lord, but an ever present help in time of trouble." But I am afraid it only postpones the trouble. It pays to gain a customer's confidence and keep it; it never pays to abuse it. Frankness, truth and politeness are good business assets as well as cardinal virtues.

One of the best advertisements is a satisfied customer. Some are very hard to satisfy, but it pays to make an effort. Money back if

KENTUCKY RETAIL HARDWARE AND STORE DEALERS' ASSOCIATION

President's Address.

President Frederick opened the Tuesday afternoon session by reading his annual report, as follows:

Once more we meet in annual convention, the fifth in the history of our association, and I trust that it is as sincere a pleasure to each one of you as I can truly say it is to me. These gatherings of earnest, busy men are primarily for the advancement of our material interests.

THE CONSIDERATION OF EVILS THAT THREATEN OUR BUSINESS,

the interchange of opinions, the debating of business problems, the evolving of new, up-to-date ideas and the correction of faulty methods, are some of the benefits we expect to derive from these meetings.

But I hold that these advantages are really only secondary when we find how much more we have gained in the greater growth of those nobler attributes that mark the true man as a result of these deliberations. The enlargement of our ideas of life by the friendly intermingling, the uplift to our character by the wise counsels of

MODERATION AND STRICT REGARD FOR JUSTICE,

the uprooting of the poisonous growth of selfishness and prejudice that dwarf and warp and mar our better nature, the genial inter-

J. C. FREDERICK, PRESIDENT.

course with our competitor by which the dark clouds of suspicion and distrust are dispelled by the sunlight of friendly rivalry—these are the higher rewards received and thus are we unconsciously lifted to a higher plane, where we can make fuller use of life and its opportunities.

Organization is the watchword of the twentieth century. It should be our slogan as well. Were it not for organization you and I would stand here to-day dull, untutored savages. Self-preservation is the first law of nature. Primeval man early discovered the fact that his efforts joined with his neighbor's were more effective in warring against his enemies or in protecting himself from their attacks, and consequent organization or union of forces has made the world and civilization what they are to-day. Why, then, should not we, as wise, intelligent, farseeing business men, mutually co-operate for the protection of our interests against the danger that exists and not merely threatens but already injures us? Why should not we also pool our brains and experience in combating the enemies that confront us? Why not use our combined influence and the wonderfully persuasive effect of our elective franchise upon misguided and frequently debauched lawmakers to prevent the enactment of pernicious and hurtful laws? Why not move

THE MIGHTY FORCE OF OUR COMBINED CAPITAL

and purchasing power against the evils that cast their baleful shadows over the sunlit heavens of our prosperity?

What these evils and dangers are I do not deem it necessary to mention here categorically. That is left to abler minds and pens than mine, and they will all be intelligently and exhaustively presented for your consideration by men who are peculiarly well qualified for the task.

In this connection I wish to call your attention especially to what has been

ACCOMPLISHED BY THE NATIONAL ASSOCIATION

in the past few years in correcting many abuses that were harmful to the Hardware trade. It is composed of your representatives, to whom you have delegated the authority to act for you. It is the concrete expression of your opinions, your desires, your purposes, and it is deserving of your unswerving loyalty and generous support. Its Executive Committee is composed of men many of whom you know personally and whom to know is to admire. It has shown its fitness and capability by the fruits of its labors. It has exposed the unfair methods of catalogue houses and shown you how to fight and checkmate them.

IT HAS WATCHED AND GUARDED YOUR INTERESTS

against the insidious parcels post bills, and has been the chief agency to awaken the merchants in other lines to their danger. It has cleared many of the misunderstandings between the retail dealers and the jobbers and manufacturers, and has brought about the hearty, sincere co-operation on the part of many of them. It has organized the Hardware Dealers' Mutual Fire Insurance Association as a protection to you against the rapacity and greed of the regular insurance companies and given you the opportunity of saving enough in your insurance account to pay your association dues, expenses for the trip to the annual meeting, and have something left with which to buy presents for the wife and babies.

And this brings us to the consideration of the finances of our association. Your Executive Committee is necessarily handicapped in its efforts by a lack of funds. There are two ways by which this can be remedied. One is to increase our membership very largely; the other is to increase the annual dues. I am certain that the first will be more acceptable and so there is but this to do. Let every member feel that the life of the association depends in a large measure upon himself and so use every honorable means and effort to gain new members and to hold them. Tell them of the advantages and benefits you are deriving from it; do not fail to invoke the aid of the traveling man. If you can get him interested enough to talk for us you have gained a powerful ally, since his chief business in life is to talk and hustle and get results, and he usually gets what he goes after, as some of you well know—sometimes to your sorrow.

* * * *

W. R. Belknap's Address.

W. R. Belknap, president of the Belknap Hardware and Manufacturing Co., addressed the convention on "A Few Things That Will Help the Retailer." He referred to the establishment of his firm sixty-five years ago, and contrasted the Hardware business of the early day with the business of to-day. Fifty years ago, he said, most of the goods sold by Hardware dealers were imported from England, but gradually American enterprise elbowed the foreign manufacturer off our map, and to-day America not only supplied the bulk of its Hardware goods, but was invading foreign fields. The fundamental idea of success in business was the establishment of character and he hoped that the Hardwaremen of the State would so serve and labor to this end that every man should know the difference between a Hardwareman and others. It was unfortunate, he said, that a child could only learn to dread the fire by being burned, and that the new generation would have to learn its lessons by experience rather than precept.

The retailer and the wholesaler had the same problems to solve and the same principles governed both. He emphasized the importance of taking stock frequently, and the necessity of carrying proper fire insurance. Inadequate insurance or no insurance, said he, limits a dealer's credit. On the subject of local competition and the discussion of what constitutes a Hardware store the speaker contended that it depended on local conditions, and that the preponderating stock should govern.

He advised his hearers to add all articles of universal sale they could to their stocks, and suggested the wisdom of displaying samples of fancy high priced Tools and Specialties. Such articles looked so much better in themselves than they did in the catalogue pictures that their display would prove of advantage in counteracting the influence of mail order houses. He made a plea for stocks that would appeal to the women, advised care and study in the matter of more window and showcase display, and suggested that a valuable means of meeting the competition of 5 and 10 cent stores was to have a counter on which were displayed miscellaneous goods ranging from 5 to 25 cents in price, each piece or lot plainly tagged.

Co-operation and friendly feeling between retailers and wholesalers, systematic work through organization to accomplish worthy results, and a high standard of business honor and integrity were sure to win for the Hardware trade a victory over the hostile forces that sometimes assailed it.

The report of Secretary John R. Sower was then read.

Secretary's Report.

A year has passed since our last most pleasant meeting, and again we are gathered together to discuss the best means of improving and increasing our business and protecting ourselves from unfair and illegitimate competition. In submitting my first annual report to this our fifth annual convention, I want to thank the members and our able and most worthy president for their hearty and untiring support. I have had the advice of our president from time to time during the year, and have found him ever ready to advise, encourage and to give freely of his time in advancing the best interests of our as-

Digitized by Google

ciation, and while we have not always accomplished what we expected we have made good progress. Your seceretary has exchanged letters and circulars with his fellow State secretaries, and has profited by this pleasant correspondence.

The trade papers have shown their interest in our association work by the letters of inquiry regarding our meeting and have generously offered their columns for our association work.

I want to express my sincere appreciation of the favors rendered by our commercial friends, in talking the benefits derived from being members of our association. There have been a few grievances reported, all of which I believe have been satisfactorily adjusted.

We mailed out 500 copies of our last annual convention reprint donated by the *Iron Age*. During the year we sent out about 2,800 circular letters with membership blank enclosed, and I am pleased to state that we have added twenty new members to our list, and I believe by the time our next meeting rolls around we will be well to the front in association work.

At the secretaries' meeting held during the National Convention at Indianapolis in March, one of the principal questions borught up was, "How to Get New Members?" After an extended discussion it was decided that personal solicitation was much more effective and cost but little more in the long run than correspondence. I would suggest that this plan be considered during this meeting. I wrote about 125 letters to the different postmasters of the State asking for the names of the Hardware dealers in their town and enclosing postal for reply, and in this way was enabled to reach almost every dealer in our State with circular letters. I wrote about 250 letters getting advertising matter and preparing for our programme, and about 200 letters on various things relating to association work. You will notice that our programme has been generously patronized as an advertising medium and I earnestly hope that our members will show their appreciation of the favors of our advertising patrons. We sent out through mail 700 copies of our programme.

Our president called a meeting of the Executive Committee, to be held in Louisville January 18th to make arrangements for our convention. The Gault House tendered us the use of their parlors as a meeting place, free of charge, and I would suggest that our members show their appreciation of this favor.

In conclusion, I want to express my sincere appreciation of the cordial co-operation that has been given me during my term of office. I have always tried to promote the best interests of our association and the welfare of its members, and have at all times during my term of office served you to the best of my ability.

Gentlemen, I thank you for your attention.

JOHN R. SOWER.

WEDNESDAY MORNING SESSION.

The president announced the following Question Box Committee: A. Steitler, Owensboro; Mr. McEwen, Springfield, and Lester Gaines, Lawrenceburg.

Paul Wagner, of Louisville, ex-secretary of the association, read an extremely interesting paper on the subject of

Mutual Benefits Derived from Co-operation,

In the discussion that followed the reading of the paper a number of delegates took part, among whom were J. Ogden, Ashland; J. W. Mahan, Lawrenceburg; U. S. Shacklett, Fulton; J. W. Read, Hodgenville; A. N. Stone, Sturgis; Mr. Cubbage, Litchfield, and others.

A motion was passed that it was the sense of the meeting for future conventions to have three days instead of two, and as the by-laws conflicted, a committee was appointed to revise the Constitution in this and other particulars. This committee consisted of John W. Read, Hodgenville; B. J. Durham, Danville, and J. W. Mahan, of Lawrenceburg. It was instructed to submit to the secretary the amendments which it should propose, so that he could place copies in the hands of the members at least thirty days before the next session.

Mr. Shacklett read his report as delegate to the National Convention at Indianapolis last year.

At the Wednesday afternoon sessions Saunders Norvell, president of the Norvell-Shapleigh Hardware Co., St. Louis, Mo., chairman of the Joint Catalogue House Committee, addressed the meeting. He recited the events that led up to the formation of that committee, and gave a rapid outline of the work thus far accomplished.

During the executive session which followed, the Committee on Legislation, consisting of Messrs. Durham, Cubbage and Wagner, was made a permanent committee, and its attention was called to the necessity of correcting existing laws on the subject of license for pistols and dirks; the sale of blank cartridges; the unfair laws preventing garnishment for debt, and the fact that the present State laws gave the old line insurance companies almost autocratic power in the State, preventing the formation of mutual companies, such as have been formed by Hardware companies in other States.

The Committee on Resolutions, consisting of U. S. Shacklett, William Hinkle and John W. Read, presented resolutions of thanks to the president, secretary and Executive Committee; to the *Iron Age*; to W. R. Belknap; to the J. Stevens Arms and Tool Co. for the part taken by that firm in checking the power of mail order houses; to jobbers and manufacturers for their assurance of protection against retail mail order houses; to W. B. Lewis, treasurer of the National Hardware Mutual Insurance Co.; to Mr. Norvell; to the Galt House and the press of Louisville.

Officers for 1905-1906.

The Committee on Nominations, acting in accordance with the Constitution and By-Laws, submitted two names for each office. The result of the election which followed is as follows:

PRESIDENT—J. C. Frederick, Owensboro.

FIRST VICE-PRESIDENT—U. S. Shacklett, Fulton.

SECOND VICE-PRESIDENT—George W. Buck, Louisville.

TREASURER—A. Steitler, Owensboro.

SECRETARY—John R. Sower, Frankfort.

DELEGATE TO NATIONAL CONVENTION—John R. Sower; Alternate, John S. Ogden, Ashdown.

Secretary Sower was in receipt of a number of commendations for the tireless manner in which he labored for the association, and the convention, by a rising vote, tendered its compliments to Mrs. Sower for her assistance in the good cause. A fund was collected and turned over to the president, with instructions to purchase a suitable testimonial and present it to Mrs. Sower.

Louisville was selected as the place for the next meeting, the time and hall to be selected by the Executive Committee.

The paper of George Dehler, of Louisville, on the subject of

How Can the Retailer Improve His Profits and His Business?

was read by Mr. Shuman at the request of the chairman, and the association, by a rising vote, expressed its thanks to Mr. Dehler and expressed its regret that he was prevented from attending the convention by reason of sickness.

ILLINOIS RETAIL HARDWARE DEALERS' CONVENTION.

Concluded.

not satisfactory is a good working motto for every merchant. An unfair customer may present a claim not justified by the circumstances, but charge the loss up to advertising and you will find the money well spent.

But whatever you do, do it cheerfully, promptly, courteously. Replace defective or unsatisfactory goods with a pleasant smile, and you touch a warm spot in your customer's heart. On the contrary, an adjustment grudgingly or reluctantly made leaves a sense of injury at least equal to that left by a prompt but courteous refusal. The old customers that you retain by this kind of advertising cost much less than the new ones you gain by any other method.

IT SOMETIMES PAYS TO BE A LITTLE MORE THAN SQUARE.

Be square with your jobber. Don't cancel an order once given without his permission and a full explanation of the circumstances. He cannot afford to be less than square with you—the retention of your business depends upon it. Don't discount a bill after the time limit has expired. The creditor may not protest, but it is unwise to save one's bank account at the expense of his character.

Let us also be square with ourselves and not try to buy for our own use at wholesale prices goods kept in stock by reputable retailers at home and in the next breath condemn the catalogue house buyer who tries to do the same thing.

Chicago was chosen as the next place of meeting, after which the convention adjourned.

THURSDAY AFTERNOON SESSION.

W. P. Bogardus, president of the National Retail Hardware Dealers' Association, having been prevented from attending the meeting by other business, a resolution of regret was unanimously passed. E. F. Baldwin, of the Peoria *Star*, made a speech, at the conclusion of which he was given a vote of thanks.

The following officers were elected for the ensuing year:

PRESIDENT—Frank B. McKenney, Rockford.

VICE-PRESIDENT—F. Giessing, East St. Louis.

MEMBERS OF EXECUTIVE COMMITTEE TO SUCCEED THEMSELVES—W. T. Gormley, Chicago.

L. D. Ray, Belvidere.

LEGISLATION—C. Hauss, East St. Louis; J. D. Smith, Chicago; Charles H. Williams, Streator; George Harms, Peoria; George B. Churchill, Galesburg.

INVESTIGATION—G. R. Lott, Chicago; T. J. Mathews, Mt. Vernon; H. Groos, Peoria; Charles Robinson, Springfield; C. E. Mauer, East St. Louis.

DELEGATES TO CONVENTION NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION AT MINNEAPOLIS—

Charles H. Williams, Streator.

L. D. Nish, Elgin.

Frank B. McKenney, Rockford.

A Membership and Promotion Committee, consisting of members of the traveling fraternity, was also created at this meeting, as follows:

W. H. Bennett, Chicago.

R. R. Elliott, Springfield.

John LePage, Peoria.

Charles Smith, Chicago.

E. C. Loomis, Chicago.

L. D. Nish, Elgin, who was elected as secretary in 1904, holds over until 1906.

✤

"With the muse there must be no divided love!"

"What is more desolate than life's moral Great Divide?"

"These bookish women—they are trimmed back and stunted for the sake of the fruit!"

"Great men are rugged and lonely, like lighthouses, and, like lighthouses, they are very useful!"

"Her flashing wit was a spade bayonet with which when not piercing her enemy she intrenched herself!"

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

In the May issue o. .ne Butterick Trio (appearing April 10th), we will have a four page advertisement in colors costing

FIFTEEN THOUSAND DOLLARS.

This is the

LARGEST ADVERTISEMENT EVER PLACED

in this publication for one issue.

We will have in the April issue Ladies' Home Journal (appearing March 25th), an advertisement costing

EIGHT THOUSAND DOLLARS.

This will be the first double page advertisement which has ever appeared in this publication.

We will carry standard magazine sized pages in the following publications in addition to the above during the spring months alone: McCall's, Ladies' World, Good Housekeeping, Munsey's, McClure's, Cosmopolitan, Youth's Companion, Success, Christian Herald, Harper's Bazaar.

The combined paid circulation of these publications is 6,609,665: allowing four readers to each copy (which is conservative), our immense advertisements will reach 26,438,660 readers at just the right time for selling JAP-A-LAC.

Our expenditure for publicity advertising during the Spring months will amount to

SIXTY THOUSAND DOLLARS.

This is by far a larger amount of money than has ever been expended by all varnish houses combined for magazine advertising.

Just think of it,—this expenditure is for four months only. JAP-A-LAC will sweep the market this year. Prepare yourself for some of the dollars.

We are spending this money to help you sell JAP-A-LAC, by educating the consumers fully as to what it is, and what it does.

We will distribute $1000 in prizes for the best Window Displays made "JAP-A-LAC week" which begins April 10th 1905. Let us tell you about it.

ADDRESS 641 WILLIAMSON BUILDING,

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES,

CLEVELAND, OHIO.

THE DIFFERENT KINDS OF GLASS.

The varieties of glass have been described as: Soluble glass, bottle glass, common window glass, crown glass, plate glass, flint glass, crystal glass, strass and enamel.

All other glasses are simply varieties of these. Soluble glass consists of an excess of an alkali with silica. This may be either soda, potash or both. Its uses are for stiffening fibrous substances, as a substitute for gum or starch, as a varnish for wood or cloth to render these fire proof; or as a coating for ancient monuments or buildings of stone, which may be thus preserved from decay or the action of the elements.

It is stated that the great obelisk in Central Park, New York City, was thus treated.

Bottle or green glass is composed of silica, soda, lime and alumina and receives its green color from the iron present as an impurity in the sand. The methods of making are by the blow pipe. Its uses are evident from its name and it is the substance from which the cheaper bottles are made.

Common window glass consists of silica, soda and lime, sometimes also of potash. This is a blow pipe glass, usually formed by the blow pipe in a cylinder and then cut and flattened while in a plastic state.

Crown glass is a more aristocratic variety of common window glass produced by a different manipulation of the blow pipe. This is a glass of great luster and beauty, but its use for windows has been superseded by other products for the reason that only small panes can be cut from any piece of crown glass.

Plate glass, the purest silicate of soda or potash and lime, is made by casting the glass after fusion, upon a table in sheets of any required size. This is an expensive glass. Its uses are chiefly for windows and mirrors.

Flint glass is so named as it is composed of a fine variety of pulverized flint with potash and lead. It is to this latter substance that its brilliancy is due, which distinguishes this from all other varieties. The use of lead is supposed to be a recent discovery in the manufacture of glass, but as the analysis of certain ancient glass shows lead in its composition, it must be conceded as known to the ancient glass makers.

Its uses include the great bulk of decorative glass, either blown or pressed. Its qualities are various, depending upon the grade of material in its composition.

French crystal glass is a variety of flint glass. This is the choicest material from which glass is made and is used for table service and for scientific instruments, as optical glasses, etc.

Bohemian glass is a lime variety of flint glass. When more lead is added to flint glass the product is Strass. This is a glass of brilliant luster, from which gems are produced by the addition before fusion of the oxides of various metals for desired colors. Thus gold for the ruby and so forth.

Enamel is a term given to glass which is rendered milk white opaque by the addition of the binoxide of tin to the silica, soda and lead, of which it is composed. It is a variety of pure crystal glass and is a very ancient production. Colored enamels are produced by the addit on of the metallic oxides which produce the required colors.—*Oil, Paint and Drug Review.*

✤

G. W. COLE COMPANY, 141-5 Broadway, New York City, have recently issued 1,500,000 of their new "3 in One" oil book, and they are very desirous of getting these books into the hands of people who are, or ought to be, interested in the use of "3 in One" for any of its manifold purposes. The book is a complete dictionary of all "3 in One" uses. By its guide any one can determine how and where "3 in One" should be used. Those who praise it for one use will doubtless find many new purposes, while people not acquainted with "3 in One" will have, in handy shape, complete information, instructions and advice. The manufacturers will send, free of cost, this book and a generous sample of the oil to any one who will write in for the same.

✤

It takes a hammer to drive a nail.

Think twice and then don't say it.

Self-reliance is the first law of manhood.

Riches have wings, but it takes a crack shot to bring 'em down.

Every cloud has a silver lining, but sometimes it's sewed in pretty tight.

If you can't get what you want, take what you can get.

If we had our own way lots of people wouldn't have theirs.

A rose will do a live man more good than a wreath will a dead one.

REVIEW OF THE MARKETS.

WIRE NAILS: The mills have been kept busy filling orders under contract, specifications of which are urgent to average stocks. Contracts are restricted to sixty days from date by the leading mills. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. The local demand is fair. Jobbers find some trouble in the transportation, which more moderate weather may regulate. The market is firm at the last advance. Quotations as follows:

Single carloads $1.99
Small lots from store 2.05

CUT NAILS: New business is but moderate, the mills working with specifications on orders already booked. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

F.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Cut Nails.

New York. The local demand is light, with only a moderate business being done, quotations being as follows:

Carloads on dock $1.94
Less than carloads on dock..... 1.99
Small lots from store .....$2.00 to 2.05

SMOOTH FENCE WIRE: The business from the manufacturer keeps the mills well employed, while orders already on the books for delivery assist materially. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.65
Retailers, carload lots 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

BARB WIRE: New business is somewhat slow, but specifications on orders under contract keep the mills busy. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers carload lots $1.95		$2.25
Retailers carload lots 2.00		2.30
Retailers less than carload lots..... 2.10		2.40

AUGERS AND BITS: Under date of February 9, the Auger Bit Association announced new list prices on Augers and Bits as per the price list given herewith, which shows an advance varying from 10 to 25 per cent. The discounts at which the goods are sold to the retail trade are as follows:

Auger Bits .....70 and 10%
Nut Augers .....70 and 10%
Boring Machine Augers .....70 and 10%
Car Bits .....50 and 10%
Millwrights' Augers 50%
Rafting Augers .....60 and 10%
Long Bright or Cuban Augers .....60 and 10 and 10%
Short Bright Augers .....60 and 10 and 10%

AUGER BITS.

3	4	5	6	7	8	9	10	11
$4.50	4.00	4.00	4.00	4.50	5.00	5.50	6.00	7.00
12	13	14	15	16	17	18	19	20
$7.00	8.00	8.00	9.00	9.00	10.50	10.50	12.00	12.00
21	22	23	24	26	28	30	32/16	
$13.50	13.50	15.00	15.00	17.00	19.00	21.50	23.00	
Sets, 32½	24	21	21	20½	18	14	18¼4	11¼	15¼4
$7.00	5.25	4.75	4.65	4.40	4.00	3.00	4.00	2.60	3.35

AGRICULTURAL WRENCHES: Under date of February 15 the Wrench Association announced an advance in the list prices of Agricultural Wrenches, amounting from $1 to $3 per dozen, according to size. The discount remains unchanged. New list prices are as follows:

Inches	6	8	10	12	15
Black $10.00		12.00	14.00	17.00	24.00
Bright $12.00		14.00	16.00	19.00	27.00

ROPE: The following quotations represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger.....	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger.....	10
No. 2 Sisal, 7-16 and larger.....	8

Less ¼ cent to the large trade.

BINDER TWINE. General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9¼ to 9¾
Standard (500 feet to the pound)..... 9¼ to 9¾
Standard Manila (550 feet to the pound)....10¼ to 10¾
Manila (600 feet to the pound).....11¼ to 11¾
Pure Manila (650 feet to the pound).....12¼ to 12¾
Less than carload lots quarter of a cent extra.

LINSEED OIL: The following quotations were announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....46 cents per gallon.
In lots of 5 barrels or more.....45 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE CLEVELAND TRADE.

The extreme cold weather has interfered with business, but it only delays it. The large sales in December and early January, put many goods in retailer's stocks which usually go out in February or March, and they prove to be profitable purchases, and purchases made within the next sixty days are likely to be the same; as, without a decline in raw material, manufactured goods will continue to advance. There is much less speculation in business than usual. Retailers are confining their purchases to their probable wants for the immediate future, and this leaves a large demand to be furnished on special calls from consumers. Manufacturers of heavy goods have never had orders booked for so large an amount as they now have and they are some weeks behind in delivery in many lines. The advancing season will increase this delay, so that jobbers who have stocks, will be the only ones that can make prompt shipment. Two or three dollars premium is now being paid, to get prompt delivery of steel, and unless all signs fail, delay in shipments will be the rule for March and April. The smaller manufacturers, who were making the lowest prices during the depression, are now clamoring for advances, and we must again depend upon the larger makers to prevent a boom, that would end in a panic and another depression. If the small makers controlled the policy, we should have booms and panics following each other in rapid succession. It is fortunate that large responsibility makes officials conservative, realizing as they do, that their prosperity depends upon the prosperity of the general business of the country. In proportion as their influence prevails, panics and bankruptcy will be lessened. I am glad to pay this compliment to a class, that just now, it is popular to denounce. The trouble is that all the people, have not learned the difference between personal and official integrity, and when some of the big companies defy the law, such people imputed to the officials, on the supposition that the officers and the company are the same, and that the obligations of common morality, apply to officials. However, some of these officials, agree with such people, and the hope of the country is that this may become contageous.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

Cold weather during the first half of February held back the looked for increase in merchant business. Manufacturing interests are quite busy consuming larger quantity of raw material than ever, and showing that railroads and other large interests are getting ready for a heavy business during the year. The five cent advance on nails and wire which took effect recently is, we learn, to be followed by another of possibly ten cents. Late buyers have to pay for their timidity in holding back until the actual consuming demand is upon them. A greater Pittsburg is being agitated at present, and our State ligislature is asked by

Digitized by Google

the Chamber of Commerce to pass a bill authorizing a vote of the old city and adjoining municipalities on the question. Business men and organizations favor the movement but it is uncertain how the popular vote will stand if we get that far. We have a community of 600,000 to 800,000 which is one in everything but name, and should be one by organization to take its proper standing among the cities of the country.

LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

In such arctic weather as we have had in the last few weeks a red hot stove is much more attractive than the fields covered with "beautiful snow," and reports from our country dealers show that there are very few goods being sold by retailers, as farmers and mechanics spend most of their time sitting around the stove of the country store. Under such conditions trade naturally languishes and collections are deplorable, and we can only hope that "Old Sol" will soon assert his power and cause Spring to return. Yesterday the heart of the writer was cheered by a friend who told him he had seen a blue bird, and to-day at dinner the restaurant menu displayed the word "rhubarb." With these two signs of Spring we begin to be hopeful that this 'Winter of our discontent" will soon be past. We feel that the weather is all that stands between us and a good volume of trade. The New Year started off full of promise and milder weather will probably bring a renewal of activity. It must not be thought, however, that trade is at a complete standstill. On the contrary, it is keeping up in volume to last year's record for the month and all things considered, this is quite satisfactory. With such conditions in the country collections are of course slow and jobbers are carrying a great many accounts, and we sometimes wonder whether this action on the part of the jobber is to meet its reward in this world or only in the next. The catalogue houses, as we understand it, insist upon cash mostly in advance, and make no allowance whatever for adverse times, while the jobber, on the contrary, regards his trade in the light of personal friends, and is usually willing to help them over a tight place as far as possible.

BIDDLE HARDWARE CO.

THE ST. PAUL TRADE.

The trade of the Northwest, outside of those sections which had so poor a crop last Fall is very good, with a feeling that the Spring trade will be good. The advances in prices, which have been made in the last few months, have had a stimulating effect on the buyers and we believe that the conditions warrant liberal buying for any goods wanted before July 1st. We advise, too, the buying of goods for Fall delivery, as we believe that goods made of sheet iron, such as stove pipe, elbows, coal hods, etc., will bring higher prices during the season than at present. As the jobbers have already placed their contracts, for Fall delivery, they stand ready to give their customers the benefit of their purchases. All trade conditions are so favorable that in our opinion any and all goods will be likely to go higher rather than lower during this year.

HACKETT, WALTHER, GATES HARDWARE CO.

THE DAVENPORT TRADE.

The severe weather of the last few days has interfered with the trade to a great extent and prevents our making as favorable a report as we would like. The storm has passed; the mercury has risen to a respectable figure; the railroad blockades have been raised and the country roads restored to their usual passable condition. It will take some days to make up for the loss in time of people who have been temporarily out of work and whose expenses have naturally increased by the extraordinary demand for fuel, etc. The orders for the last two or three days, however, are much better and have to-day reached their normal condition. We now look for improved collections and fair trade.

SICKELS, PRESTON & NUTTING CO.

THE SAN FRANCISCO TRADE.

Although now, the eighteenth of the month, bright, sunshiny, summer-like weather prevails, the week previous was characterized by an almost ceaseless downpour of rain that was more than State-wide, and up and down the State wet good all outdoors from the Mexican boundary to beyond the southern boundary of Oregon. The weather prophet chief of the coast, located in San Francisco, remarked yesterday that "California is the most fortunate State in the Union. A killing frost is reported to-day at Jacksonville, Fla., the thermometer registering 28 degrees, and at New Orleans, 38 degrees, and 4 degrees at Point Comfort, but in Orgon and Washington, like in California, the weather is clear and the sun is shining, and up the Sierra Nevada a heavy fall of snow has been the all-week feature—a blessed feature that means an ample water supply for the lower levels and throughout the valleys later on."

The foregoing line of comment dovetails neatly with observations made to-day in the writer's presence by Manager Sharrocks, of the Hardware department of the Baker & Hamilton jobbing house. He was remarking on the surpassing trade of this year, to date, as compared with the first month and a half last year, the increase noted being upward of 50 per cent. "Our travelers report," he furthermore said, "that everywhere throughout the coast the farmers and miners are jubilant because of the abundant rainfalls which, according to their reckoning, is a prefiguring for them of excellent crops and an increased output of genuine gold and silver bricks."

When last year A. C. Rulofson resigned in his twenty-seventh year of service as Hardware department manager for Baker & Hamilton, there was general regret that included the personel represented by all local correspondents for eastern trade journals, for he was a splendid source for trade information. Therefore is the writer much pleased to announce that Mr. Rulofson has returned to San Francisco, where he has just opened fine offices in the Crosly Building for conducting business "in Iron and Steel products and specialties, with the jobbing trade only."

Recent visitors to San Francisco included Treasurer M. A. Potter, of E. C. Atkins & Co., of Indianapolis, who have a flourishing branch in this city. He spoke most enthusiastically of trade possibilities in California and the coast generally, and saw no reason for any tendency toward pessimism. The company expects to increase its large band-saw trade with the western dealers, when the San Francisco branch will be in a position to expedite California trade. Likewise it might be said of this visitor, manager of the California-Moline Plow Co. interests in this State. And also would it be apropos to similarly relate as coming from these visitors, C. A. Bennett and R. J. Cant, the former of the New Jersey Car Springs and Rubber Co., the latter being vice-president of the Lancaster (N. J.) Machine and Knife Works.

The following notes are from California travelers in the trade: At Stockton a wholesale and retail Hardware and Implement business has been incorporated in the name of the Schuler-Tschierschky-Scally Co.; capital stock, $25,000. The incorporators are W. C. Schuler, F. H. Tschierschky, T. F. Scally, H. O. Tschierschky and Hattie R. Schuler. The general Hardware and Bicycle store of S. C. Wright, of Santa Ana, has changed to Wright & Kendell, and business enlargement is taking place. Plans are about to develop in Whittier that will make the establishment of the Humphrey-Dagget Hardware Co. one of the most complete in the State. The experience and capabilities of the firm's members, combined with location and store rearrangement, it is predicted, will certainly insure success from the commencement.

A Hardware and Implement business is about to be opened in Redwood City by A. E. and G. P. Hull.

The Brown & Smith Hardware business in Los Angeles has been purchased by Case & Edwards.

A new Hardware store has been established in Redonda by Charles H. Guenther & Co.

The former manager of Baker & Hamilton's Hardware and Implement store in Sacramento, Mr. Paul Oakley, has crossed over the eastern boundary of the State and opened for himself in Hardware and Implement lines in the growing town of Goldfields, Nevada.

Business expansion is notably visible in National City, primarily in the material way the National City Hardware Co. are enlarging their stock. They have not only just purchased the considerable Hardware stock of their rival, the J. L. Mudgett store, but are placing large orders for goods.

THE MUSEUM OF MEAL TIME.

The Mahogany Dining Table And The Dishes It Once Held.

Quite an interesting and a somewhat extensive collection might be made of objects once familiar upon English tables, but now extinct and forgotten. The antiquities of the dinner table would certainly begin with the plates and dishes of long ago—first the trenchers of wood, if there are any still in existence, then the pewter which once made so brave and so shinging a show on noble boards and lastly the coarse delf and clumsy inartistic china which preceded the highly finished and beautifully decorated plates and dishes of modern days. Trenchers and porringers of the ancient style have long gone out of use, and are now rare curiosities indeed, but their names have not become altogether obsolete. They are among those words which are never used in ordinary speech, but retain a slight literary vogue. So late as 1572, it may be noted, the Earl of Northumberland, despising the fashionable pewter, ate his dinner off wooden platters.

Pewter was once in universal use among people who could afford to have the best of dinner-table furnishings then, as time passed, it sank to a despised condition and was disregarded by every pretender to taste; and now again, that genuine old pewter has become rare and difficult to get, it commands fancy prices in the auction room. That pewter was valued in mediæval and Tudor times is shown by the frequency with which it appears in wills and inventories. In the inventory of a Surrey knight who died in 1615 there appears as part of the kitchen furniture—"eight dozen of pewter dishes of all sortes, five dozen of sawcers, thirteen candlesticks of pewter, fower pewter flagons." All this pewter plate, well burnished, must have made a sparkling show on the worthy knight's dresser and kitchen shelves, when, like the pewter in the Acadian farmer's cosey home, it caught and reflected the flame, as shields of armies the sunshine.

In the "Taming of the Shrew," Gremio, recounting the treasures of his city house, after mentioning vessels of silver and gold, ivory coffers, and cypress chests, and fine linen and cushions of elaborate needle work adds—

Pewter and brass and all things that belong
To house or housekeeping.

A set of pewter vessels, that is, twelve dishes, twelve plates and twelve saucers, was of old called a "garnish," and a writer of 1530 remarks that "in some places beyond the sea a garnish of good flat English pewter is esteemed almost as precious as the like number of vessels made of fine silver." In one or two places where old habits and ways prevailed long after modern changes had modified the modes of living elsewhere, pewter maintained its place for a surprising length of time. There used to be old fashioned chop houses in the city where chops and steaks were served on pewter plates till past the middle of the last century, and until much the same period pewter plates were used at the table of the Inner Temple.

Among the antiquities of the dinner table may also be classed some of the ancient spoons and forks. The genuine Apostle spoons of Elizabethan and Jacobean days now fetch high prices. A few weeks ago a set of thirteen made in Charles I.'s time sold at Christie's for no less than £480. Forks were practically unknown on English dinner tables before the same period; and when they did come into use the early specimens were usually two-pronged. Those who first used them, like most introducers of novelties, were abused and despised. A worthy divine preached on the subject and denounced the use of the fork as an insult to Providence, by thus declaring that God's creatures were not worthy of being touched by human hands. But cleanliness and convenience triumphed, and the two-pronged fork of iron or steel, came slowly into general use, to be succeeded first by its three-pronged brother, made usually also of iron or steel, but occasionally of silver, and later by the four-pronged silfork which still holds the field, while its predecessors have become antiquarian curiosities. Again, among mediæval table appointments was the "voider," whose sole modern representative is the crumb-tray. The "voider" or long ago served a variety of purposes. Mediæval books of manners, which give the most minute directions for the conduct of children as well as of adults in every detail of daily life and habit, show that among the duties of a well-mannered child was to wait upon his parents at dinner and look after the "voiders." One of these articles stood on the table to act as a receptacle for bones and fragments; and when the meal was over the child waiter placed another "voider" on the table, and into it put the dirty platters, napkins and knives, while into a third similar receptacle he sweeps the crumbs. When every one else had finished and his own duties had been duly performed, the mediæval boy was at last allowed to eat his own dinner.

But apart from these early forms of articles still used at table, or in connection with meals—and among these should be mentioned the elaborate and massive salt-cellars which once played so important a part in table manners—the antiquities of the dinner-table must include certain articles which, although their names still remain, have gone completely out of use, and in some cases, indeed, are somewhat of a puzzle. What purpose, for instance, was served by the "cistern" which once upon a time graced all well furnished dinner tables? Mr. Pepys mentions in 1667 that he went "to see the price of a copper cistern for the table, which is very pretty, and they demand £6 or £7 for one." Dr. Mynors Bright, in a note to this passage, says that a cistern was formerly part of the furniture of a well appointed dining room—which is perfectly true—and adds that "the plates were rinsed in it when necessary during the meal," but of this there is no satisfactory evidence. These "cisterns" were sometimes very costly affairs. Luttrell, under date 1695, records the theft from Berkeley House of a "silver cistern, worth above £700," which belonged to the Princess of Denmark. There are many allusions to these articles in 17th and 18th century writers, and it seems likely that they were used for different purposes at different times. They may have been used, as Dr. Bright says, for the rinsing of plates, but more probably for the rinsing of smaller articles, such as spoons and forks and glasses; and some were certainly used as wine-coolers.

Of a later date than the "cisterns" were the "coasters," now equally antiquated, but regarding whose use there is no uncertainty whatever. "Coasters" flourished in the days when the cloth was drawn after dinner and the wine was placed on the mahogany. The low, round decanter stands which passed from guest to guest and were thus sent coasting around the shining table, were the "coasters." The idea, of course, was to avoid scratching the highly polished and much cherished wood.—*London Globe.*

OUR NEW ORLEANS LETTER

(Special Correspondence.)

With the rapid approach of the end of February, the business world of New Orleans, particularly that part dependent on the prosperity of the sugar and cotton producing sections of the immediate South, begins to sum up the work of the agricultural year just ended, and to cast a calculating eye over the prospect for the year to come. Hardwaremen, particularly, are affected by this, with the dealers who handle implements more especially interested. Just now, throughout the Hardware circles of New Orleans there is a reaction from a brief period of depression that set in after the tremendous decline in cotton valuations in December—and the dealers are expressing hopeful opinions about the season of 1905-06. Stiffening prices in all basic goods have not affected the demand, but the return of confidence to all sections of the South, incident to the apparent determination of the planters to hold their cotton surplus and to reduce their cotton acreage during the year to come, has enlivened lines of trade that had apparently suffered seriously, if not permanently, through the space of lethargic inactivity that ensued after December 3, of 1904.

Briefly, the Hardwaremen, at the close of the business year marked by the end of the harvesting of the two great crops, and the opening of the new season of planting, are looking back at a year that, despite the cessation of business in early January and late December, yet outranks far the very best proportionate year in the history of the city. Beyond this, returning confidence has persuaded the dealers that the Hardware market has permanently widened, and that nothing short of a panic can ever reduce the scope of their activities to a point below that of 1903-04.

Just now the lines are running rather unevenly. Farming implements affected by the determination of the cotton planters to reduce their acreage, have been going very slowly to the cotton districts; to the sugar section have been running lavishly; and to the rice belt have been going not at all. Mill supplies, throughout the Winter, irrespective of the low prices of cotton, went in unprecedented quantities to the sugar and the cotton fields—but have now ceased to go, save to the sawmills, wherein there is an era of sudden and rather remarkable activity. Builders' supplies, and building Hardware are said just now to be leading the ordinary Hardware lines, while there is a rather noticeable lack of movement in household Hardware and household furnishings.

Dealers in the city differ as to the proper comparison of the trade this February, with that of February in 1904. That last February surpassed anything that the city had before seen, is generally accepted to have been true. If the present February equals that, the Hardware world will be thoroughly well satisfied. However, some houses, particularly those whose trade is largely into the cotton district, insist that business is running now about five per cent behind last year. Other houses, especially those catering to the general building, export and ship supply trade, declare that this February equals if it does not surpass that of 1904.

All Hardwaremen say that with the prosperous condition of the sugar planters, the avowed and known determination of the cotton planters to reduce their acreage to a point to ensure high prices for cotton next season, and the thriving life of the timber belt, with the general good times in general business in New Orleans, that the outlook for 1905 is certainly for a year with a volume of business equal to 1904.

BROADER DEVELOPMENT.

However, certain definite and fixed results for the good of the city have come from the monetary depression and uneasiness following the "Black Fortnight." The Hardwaremen of the city have turned their attention with renewed earnestness to the upbuilding of the export Hardware market. As voiced by many of the local dealers, it is deemed time that the trade carried its eggs not all in one basket.

Practically every Hardware house in New Orleans has sent out additional men to the Spanish-American market of the West Indies and the Carribean. A number of very substantial returns have already been made. Into South Africa have been sent considerable quantities of farming implements, and some building material. A vigorous campaign with trade literature has been waged, and agencies have been established in Johannesburg, Cape Town and Pretoria by several local firms.

Cuban business is being fought for very earnestly, and a number of heavy sales have recently been made. Specifications were recently sent to New Orleans for the four and one-half million-pound iron water pipe contract for the Havana Aqueducto de Guanatracoa, but the freight rates, making the total transportation charge to Cuba the same from either the seaboard or the source of supply, shut out New Orleans and practically limited the bidding to Alabama and Tennessee foundries. If Chattanooga gains the contract the export will be through New Orleans.

During January these were the total export figures for the Spanish-American trade—a large proportion of which was to be properly credited to iron, steel and Hardware goods: Cuba, $479,680; Mexico, $163,000; Panama, $118,000; British Honduras, $71,000; Honduras, $63,000; Nicaragua, $60,000; Guatemala, $45,000; Costa Rica, $40,000, and Columbia, $32,000, totaling about $1,100,000 for the month.

It is recognized that the great drawback to New Orleans is the lack of shipping facilities to South America. The port is gradually drawing to itself more and more of the heavy import business from South America, but the opportunity of exporting in return is not gained. The port is building up more and more the heavy export business to Europe, but the opportunity for building up the European import business does not exist. The city is a way station on a great world circuit. Ships from Europe carry manufactured goods and assorted merchandise to South America, discharge and load up on coffee and nitrates, bring these cargoes to New Orleans, discharge and carry cotton and grain to England and the Continent. New Orleans loses the opportunity of buying her European imports directly—and loses the chance of selling her own manufactured goods to South America.

Now such men in New Orleans as Captain T. J. Woodward, Pearl Wight, James W. Porch and Albert Baldwin, are all interested in the movement under way by the New Orleans Board of Trade to alter these conditions. The Hardwaremen of the city are anxious to have direct communication with South America. They are willing to build up the European import trade, because ships will then come here direct—and ships will go from here direct to South America.

The same men interested in this are also interested in hurrying through the completion of the Public Belt Railroad, that will serve to emancipate the export trade from the railroads that control the big terminals here. It is said that the belt will be completed by the end of the coming year, and may be operated in sections by the end of the current year.

Captain T. J. Woodward, founder of Woodward-Wight & Co., has been appointed postmaster of New Orleans.

According to figures recently issued by the Custom house authorities, the exports of agricultural implements during the past year amounted to $842,000—a slight increase over the year before, due chiefly to the heavy business into the Black Sea.

HUMAN LEATHER.

A London (England) shoe dealer has a gruesome exhibit in his show windows, says the *Shoe and Leather World*, which attracts a great deal of attention. It is a piece of tanned human skin which the shoe dealer claims to have received from a medical man and which is only a fragment of a human skin which had been tanned. While the piece of human leather attracts the attention of the morbidly curious, there is nothing new about it, in fact, ancient and modern history both abound with examples that the covering of the human form divine may come "to such base uses" at last. In the "Tales of a Grandmother," Sir Walter Scott mentions the playful way some eminent Scotch raider had of constructing saddle flaps from the hides of his particular favored (?) enemies; whilst down to comparatively modern times the "dried pelt" of supposed Danish invaders was nailed to church doors as an object lesson, hinting to other undesirable aliens that it was as well not to come and to do likewise. Drum heads have frequently been made of human skin, and amongst others the famous Ziska, the Bohemian military leader, left orders that such should be done. It is also related that General F. Triska, who took up arms against the Emperor Sigismund to avenge the death of Jan Huss and Jerome of Prague, and who defeated the Emperor or in several battles, gave orders, which were carried out, that a drum should be made of his skin. De la Vego also relates that certain South American prisoners of war were flayed and drums were made of their skins, the theory being that the sound would put to flight their fellow tribesmen who heard it—a not altogether unlikely idea.—*Shoe and Leather World.*

COLORADO RETAIL HARDWARE DEALERS' ASSOCIATION

TUESDAY AND WEDNESDAY, FEBRUARY, 14TH AND 15TH

President's Address.

At the Tuesday afternoon session, which was called to order at 2 o'clock, President Branson delivered his annual address as follows:

Again it is my pleasure to greet the members of the Colorado Retail Hardware Dealers' Association in annual convention, together with a goodly number of our friends, the Hardware jobbers, their efficient representatives and others interested in our welfare. I extend you all a hearty welcome.

To our members present permit me to say the success of this meeting depends largely on every one of us. To make it a success all must participate. It is not only our privilege, but our duty, to get all we can out of these conventions and give all we can in return.

To our friends the jobbers, brokers and salesmen, who are here at our invitation, we ask you to join us in the free discussion of all subjects identifid in these open sessions. We want you to tell us where we are wrong, and we will try to show you that the jobber is not always guiltless.

LET US TALK THESE THINGS OVER

in a perfectly frank manner. It will do us both good, and may we not hope such discussion will lead to a better understanding, resulting in more pleasant relations between wholesalers and retailers?

The objects of a retail merchants' association not only should contemplate efforts in the direction of securing recognition of the rights of its members, but should give equal attention to educating its own members in the observance of the principle of absolute fairness on their part.

I am a firm believer that the principles properly advocated by and beneficial to members of a retail Hardware association are the very principles that the Hardware jobber can afford to indorse. In other words, the Hardware jobber who is loyal to the legitimate retail Hardware dealer should and does encourage the growth of the retail Hardware associations.

These retail associations are not formed to oppose the Hardware jobber, but rather to co-operate with him and the Hardware Jobbers' Association in combating common enemies in the endeavor to perpetuate the retail Hardware dealer as the principal distributor of Hardware. However, it is not the purpose of this paper to eulogize the jobbers in all their practices. While we applaud them for the stereotyped red ink phrase, "We do not sell catalogue houses," now quite generally conspicuously printed on some part of their billheads, yet we feel that they are only partly reformed when we find their representatives soliciting the sale of Hardware in the general store, the grocery store and the second-hand store in towns where there are legitimate Hardware stores. The motto, "A Hardware store for Hardware dealers," is hardly appropriate on the letterheads of any Hardware jobber doing business in Colorado. It sounds good, but is much abused.

When all the legitimate retail Hardware dealers of the country awaken to the value of organization sufficiently to co-operate in the conservative management of such associations, we may hope to see such motto observed and our business on a higher plane. The retail Hardware associations have not yet succeeded in

ELIMINATING ALL THE EVILS OF THE TRADE

chargeable to the jobber, but that the jobbers have recognized the justness of our claims in many instances and made corresponding concessions we all know. Nor have our associations succeeded in the entire reform of our own members, but we are after them. The influence is good and is being felt.

The sentiment of fair dealing emanating from a body of the most successful retail Hardware dealers of a State (and of such our associations are composed) goes a long way toward strengthening our determination to tote fair in all business relations.

In reviewing the work of our association in the two years of our existence some of our members have been disappointed in results. Perhaps regarding it from what we have done locally, some may feel that it has not paid. Even considered from our purely local accomplishments it has been profitable. To our members attending our convention and rubbing up against the successful jobber and salesman and brother dealer absorbing new ideas from all, broadening our views, forming sincere friendships, these alone are worth more than the cost. These alone put you ahead of the deal, although not to be regarded as the substantial benefits. Was it not worth more than the cost of the association to each of us to have the wholesale agency for Loaded Shells and Cartridges that had been placed with a big wholesale grocer of this city discontinued? Had it not been for the Colorado Retail Hardware Dealers' Association that wholesale grocery house would be quoting and selling every retail grocer in the State to compete with us. Through the efforts of our association the Ammunition manufacturer canceled this contract in less than ninety days after it had been made.

Right here I wish to state that the manufacturer for so promptly discontinuing this illegitimate agency when convinced of the justice of the position of our association deserves credit, and his action deserves formal recognition from this convention.

* * * *

CATALOGUE HOUSE COMPETITION

is still on. It is reported that the two big catalogue houses of Chicago sold $65,000,000 worth of stuff last year. A nice little business, we admit, but the cream of the trade is still ours. The most hopeful sign, to my mind, is that each succeeding catalogue compiled by these big catalogue houses lists less of the standard articles of Hardware, and of those still listed

MANY ARE LISTED AT A HIGHER PRICE

than in the preceding catalogue. This is due primarily to the work of the National Retail Hardware Dealers' Association, now enjoying the hearty co-operation of a strong committee from the Hardware Jobbers' Association. We do not expect these bodies to put the catalogue houses out of business. They are here to stay and we are here to stay with them, unless the United States Government puts us out of business through the enactment of postal laws burdensome to the people in general and favorable principally to the growth of catalogue houses.

The Postal Progress League, braced and supported principally by the catalogue houses, never seem to all go to bed at once. Part of them keep watch night and day in an attempt to secure town postal rates on merchandise. There seems to be no immediate danger of the passage of so radical a measure as the proposed Parcels Post bill, a bill

WHOSE PASSAGE WOULD BE SO DISASTROUS

to all the retail merchants throughout the whole country, as well as a death blow to the prosperity of hundreds of small cities and towns all over the country. But we must be ready to act in concert to oppose any reduction on fourth-class mail matter.

An alarm was sounded a few days since when the sub-committee of the House Post Office Committee consented to grant a hearing on the proposal to consolidate third and fourth class matter at a rate of eight cents per pound. Such a law would cut off one-half of the expense of sending merchandise by mail and result in a wonderful impuetus to the business of the catalogue houses. They pay no taxes in our towns, contribute nothing to our charitable institutions, never carry our farmers through crop failures, nor laboring people through strikes, but always get the money before they start the goods. We are not loyal to our families or our communities if we are not willing to give our time and even money to oppose legislation that puts in their hands the club that hastens our finish as retail dealers.

Secretary F. C. Moys Then Read His Annual Report

* * * *

The year just closed has been full of peculiar experiences. In a business way it has been one of the most difficult for a Hardware dealer to make money owing to numerous things. It has been a year of declining markets, which makes a Hardwareman puzzle his brain to keep things coming right so to show a balance on the right side of the ledger. We have had labor disturbances enough to satisfy the most exacting agitator for some time to come. With trouble in the principal coal camps as well as in some of the large mineral bearing districts, and an army of soldiers in the field, business in many portions of the State has been paralyzed. With the industries of the mining districts closed and bounteous crops in the States east of us, our farmers and fruit growers have had no little difficulty in finding a market for their products. Considering all of these conditions with which we have had to contend, it is not surprising that we have not accomplished as much as we had hoped for during the past year. Neither is it surprising that some dealers have become discouraged and asked to be dropped from our membership or that others have neglected to pay their dues. And yet with all we have had to contend our showing is not bad. In view of the fact that there are only 199 Hardware dealers in the State, many of whom live in out-of-the-way places and are not thrown directly in contact with conditions we are endeavoring to overcome, we have a goodly proportion of those available enrolled as members. I doubt if any other State can show as large a percentage. But it is not enough. With practically every dealer in the State as a member and all lending their hearty support to your officers and committees what is there in reason we cannot accomplish?

Most of the Denver jobbers are in the same position as before. They will sell to your customer at so near the price they quote you that you cannot do business on the protection thus afforded. And on a great many things at least, if not all of them, they will sell your customer as cheaply as they will you. This is especially true when your customer goes to them with a good-sized order ready to place and asks for a quotation. In such a case your so-called jobber of Denver forgets you are on the map. And still the Denver Boosters' Club wonders why retailers do not patronize Denver!

* * * *

It was my pleasure, as the delegate from this association, to attend last March the annual convention of the National Retail Hardware Dealers' Association. This was a meeting full of interest and enthusiasm. At this time plans were outlined for work looking to the improvement of Hardware conditions in many ways. The greatest effort of the year has perhaps been made along the line of fighting catalogue houses. No doubt Mr. Corey will give you full information along this line.

At the time of the National Convention I also attended the annual meeting of directors of the Fire Insurance Co. The affairs of this company were in the best of shape. Monthly reports from the secretary have shown a steady growth of desirable business. We have

Digitized by Google

No ADVERTISEMENT

which we could write, unless we should use several pages of this publication, would suffice to acquaint you with the many articles in each of our several lines which should demand your attention at this season. Even should we attempt to list them here, they would necessarily have to be condensed, and the points of excellence which we are anxious to impress upon you could not be well brought out. ¶ We have prepared several pieces of printed matter as follows,

Bulletin No. 10, Garden Trowels and Weeding Hooks

Bulletin No. 20, Carpet and Dust Beaters

Bulletin No. 30, Ice Tools and Ice Tongs

Bulletin No. 40, Wrought Iron Goods, Umbrella Stands, etc.

Bulletin No. 50, New Superior Wall Coffee Mill

Bulletin No. 60, Coat, Garment and Trouser Hangers

Folder "Dollars for Dealers," Carpet and Dust Beater Assortment

Folder "Successful Dealers," Classified list of line

Booklet "Pleases and Pays," comprising Monday and Tuesday line

Folder "The Triplets," three new 10c specialties

1905 Complete General Catalogue with Price List

¶ A postal card will bring you our new catalogue and if you will mention what particular line or lines in which you are most interested, we will enclose such special printed matter as we may have applying thereto.

¶ Simply address,

W. H. GLENNY & CO.,

Specialty Mfg. Dept. ROCHESTER, N.Y., U.S.A.

had some losses, all of which have been promptly paid, and there are ample funds on hand to meet any probable demands. Secretary's report to February 1st shows over $800,000 insurance in force. At the annual stockholders' meeting I was elected a director for three years. As long as I am officially connected with this company I shall do all in my power to see that the affairs of the company are handled in a thoroughly upright and businesslike manner. I bespeak for this company a share of your insurance. You can save money through this medium and at the same time help along the Hardware nssociation.

I understand our old friend, the Parcels Post bill, is again before Congress. No doubt Mr. Corey will give us full information and instruct us what action to take to combat it.

This meeting will be my last appearance as your secretary-treasurer. In handing over the burdens and pleasures incident to the office to my successor I wish to thank you all for your kindly interest in the work and the support which you have given me during the past two years.

* * * *

For my successor I ask your heartiest assistance. In all his efforts back him up loyally and I am sure he will prove worthy of your confidence. You should send him to the National Convention at Minneapolis in March. He will learn enough of how they do things in other States to make it pay. As a director in the insurance company I shall be at Minneapolis and will take pleasure in assisting him all possible.

M. L. Corey, secretary of the National Retail Hardware Dealers' Association, addressed the association at length, referring to the work of the association and some of the things that had been accomplished and plans for the future. Mr. Corey's address was of exceptional interest to the members, and at its conclusion he was given a vote of thanks.

J. M. Killen, of Pueblo, made an address on

The Proper Method of Ordering Goods.

Other addresses were delivered by J. M. Lyon, representing Hibbard, Spencer, Bartlett Co.; S. H. Hall, of Trinidad; George Trech; W. C. Henroux and Lucius Moore, of Denver, and G. W. Gladding, of E. C. Atkins & Co., Indianapolis.

The following officers for the ensuing year were selected:

PRESIDENT—A. B. Merservey, Colorado Springs.

VICE-PRESIDENT—Adolph Unfug, Walsenburg.

SECRETARY-TREASURER—Davis Barclay, Ft. Collins.

EXECUTIVE COMMITTEE—J. F. Wallace, Hooper; A. B. Corbin, La Junta; Davis Barclay, Ft. Collins; F. A. Ellis, Jr., Denver.

The newly elected secretary, Davis Barclay, was elected to represent the association at the National Convention to be held in Minneapolis March 13th, 14th and 15th. Ex-Secretary Moyes will also attend the convention as a director of the National Insurance Co.

THE STORY OF BABBITT METAL.

Every engineer uses babbitt. Every engineer and mechanical man uses the name "babbitt" with perfect familiarity, but we believe that few really know where the name originated or anything further about it. Therefore the following clipping should prove of interest to the readers of Graphite:

Although Isaac Babbitt was the inventor of the method of using soft metals in journal boxes, his patent specification makes no claim on the alloy itself, but simply on the method of holding the soft metal in place, says the *Metal Industry*, Isaac Babbitt was born in Taunton, Mass., on July 26, 1779. He learned the trade of goldsmith, and in 1824, in his native town, made the first britannia ware produced in the United States, but this enterprise proved unsuccessful. He then removed to Boston and entered the employ of the South Boston Iron Works, and in 1839, while an employee of this establishment, he produced the invention which has perpetuated his name. For this invention he was given a gold medal from the Massachusetts Charitable Mechanics' Association, and afterward Congress granted him the sum of $20,000 as a reward. In 1844 the invention was patented in England and in 1847 in Russia. After devoting some time to the production of metals, he engaged in the manufacture of soap, so that his name has become almost a houshold word. He died insane at the McLean Asylum, Somerville, Mass., on May 26, 1862.

The fact that in the patent specification no claim is made for the alloy, is sufficient to dispel the ordinary belief in this direction. Britannia metal, pewter or an alloy of tin, fifty parts; antimony, five parts, and copper one part, are recommended. The latter alloy is somewhat softer than that known as "genuine babbitt," which is commonly composed of tin, ninety-six parts; antimony, eight parts, and copper four parts. The original idea in the use of a soft metal was practically the same as it is now; *i. e.*, to make a bearing which would conform to the surface of the axle. It is natural, then, that the alloys used to-day are somewhat harder than the original material employed. It is also natural that the same Isaac Babbitt should have been handed down to posterity as the inventor of the alloy, although, of course, quite erroneously.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

London, February 11, 1905.

A POPULAR MOTOR EXHIBITION.

One of the largest motor exhibitions ever held in this country is now open in the large dome-top building known as Olympia, which is situated in Kensington, in the West end of London. It is the third exhibition of the kind promoted by the Society of Motor Manufacturers and Traders; and it contains a remarkable show of motor cars, vans and boats, rivalling in importance the great annual French Exhibition. As an international show it excels that held in Paris, for not only are the bulk of British makers exhibiting, but there are motor cars from almost every country where automobiles and accessories are manufactured. The great building at Olympia is well adapted for a show of automobiles, and for the comfort and convenience of the crowds of motorists and others which have been drawn there. The exhibition is under the patronage of the Prince of Wales, and is officially recognized by the Automobile Club. Among the visitors several well-known Americans who are now on tour in Europe were recognized, and it was evident from the satisfaction displayed they were much interested in examining the different automobiles and motor accessories shown in the halls and galleries.

PREPARING FOR SPRING GARDENING AND HORTICULTURAL OPERATIONS.

British ironmongers are now very busy preparing their stocks of Spring gardening and horticultural appliances. They are already making displays of lawn mowers and garden rollers, which will soon be called for, especially as the season bids fair to be an early one. Among the favorite lawn mowers are many well-known American makes. The "Champion" handled by Millard Bros., Ltd., of Houndsditch, E. C., is a thoroughly good machine built on English lines, and cuts closer than most of the American mowers, in consequence of which it is very popular. The "Pennsylvania" and "Chicago" are well known brands handled by Lloyd, Lawrence & Company, of 29 Worship Street, E. C. The "Pennsylvania" has recently been much improved and the working gear is well protected Other American machines which appear to be favorites with British horticulturists are the "Coldwell," "Excelsior" and "Gem." The Coldwell Lawn Mower Co. now handle their machines from their own depot in London. It is interesting to note that the first lawn mower ever produced in America was made by Thomas Coldwell, who was a native of Stalybridge, Lancashire, and from that fact alone the "Coldwell" machines may claim a place among British lawn mowers. Stearns' machines (made at Syracuse) are also seen side by side with such well-known British machines as those produced by Ransomes. Greens, Shanks and others.

GARDEN TOOLS.

Spades, forks and shovels, garden trowels, rakes and sundry horticultural appliances are now being brought to the front and most of the go-a-head British ironmongers have a good show of them in their windows. In discussing the displays now being made in the windows of provincial ironmongers with a commercial traveller who visits many towns, lately I was interested to learn that many of the displays were enlivened with an unusual mixture of bright colors—post-office red and bright green—used, not only for labels but also for the enamelling of the articles themselves. It is needless to say that many of the smartest goods commented upon were of American origin, and others of British make built upon U. S. A lines.

THE OUTCRY AGAINST BAD PACKING.

The outcry against bad packing on the part of colonial merchants comes up periodically, and like the sea-serpent rears its head from time to time with startling prominence. British manufacturers have generally to bear the brunt of the attack, and usually complacently listen to the tales of bad packing and injury to goods in transit over the seas. The complaint made some time ago by an American Consul in China has been read with interest in this country, as it shows that the evil is not altogether confined to Great Britain. In course of conversation with a London merchant recently I learned that it is by no means unusual for some of the parcels of American Hardware, although well packed in small boxes, to reach this country in a broken condition. It is scarcely possible to exercise too much care in packing, the injury often resulting from insufficient packing of the small parcels in the larger cases; it is needless to note that although the small parcels may be beautifully labelled and their contents carefully preserved they will be subjected to injury if the packets are not held securely in position in their outer cases. The excellent plan of supplying screws, nails and other little sundries required in fixing Hardware goods adopted by American manufacturers is much appreciated in this country, and although a small matter, often leads to their being enquired for by private customers in preference to other makes sold without these necessary accessories.

SHOWS OF IMPLEMENTS IN PROSPECT.

A long discussion has been going on in reference to the wisdom of holding an agricultural show in the vicinity of the metropolis. The shows held on the permanent show ground at Park Royal during the last two years have been most disastrous, the losses having swallowed the greater portion of the balance in hand at the disposal of the society. In consequence of a large guarantee fund having been provided by well-wishers of the Royal Agricultural Society, the Council have decided to again hold another show in the metropolis, and have fixed June 27-30 as the date. Special efforts are being made to make the show a success, and additional prizes are offered in the cattle section. It is anticipated that the majority of makers of implements will occupy their usual positions, and among them will doubtless be the familiar names of American makers, whose harvesting machinery is so popular in Great Britain. The Bath and West and Southern Counties Society which is now the premier migratory society in Great Britain, will hold their annual show at Nottingham, at which it is expected there will be a good attendance. A peculiar feature in connection with this agricultural exhibition is the introduction of an Art section, in which artistic furniture and pictures are shown in a specially provided pavilion. The Bath and West is the only show held in England where this feature is seen. It is an old custom of the society, and one often appreciated by agriculturists and those who are located in country districts who have comparatively few opportunities of visiting a good art exhibition.

IRONMONGERS' ASSOCIATIONS.

There are now about 50 ironmongers' associations in this country, a large number of which are very active and doing good work among the ironmongers in their respective districts. Since the Christmas holidays most of these associations have set to work in earnest, and have been holding their annual and monthly meetings, and in several instances their annual dinner or feast. One of the most important of these functions was the annual dinner of the London and Suburban Ironmongers' Association, held on January 25, under the presidency of Alderman A. Pond. The banquet was held in the Caledonia Chamber of the Holborn Restaurant. One of the most pleasing features of this banquet was the presentation of an illuminated address to Councillor Timpson, who has held the office of president of the association for the last three years. He is one of the pioneers of the association movement, and has done good work in London, where it was found so difficult to make headway during the first year or two of the association's existence. Among the distinguished visitors on the occasion was Alderman W. J. Bacon, the president of the Ironmongers' Federated Association, which is, of course, the central representative body of the whole of the ironmongers' associations in this country. He is the "Grand Old Man" of the movement, free and out-spoken, always ready to attack opponents, redress grievances, and back up the claims of British ironmongers, keenly alive to the importance of price maintenance, and ready to instantly pounce upon any direct trading offender, and those wholesale houses who act in contradiction to the lines laid down for retail distribution in the Magna Charta of the I. F. A.

A PARCEL POST BETWEEN THE UNITED KINGDOM AND THE UNITED STATES.

It is satisfactory to learn that greater facilities have now been provided whereby small consignments of goods can be purchased in this country from United States manufacturers, and on the other hand British productions sent to the States. The parcel post arrangement which has been negotiated between Lord Stanley, the British Postmaster-General, and the Postmaster-General of the United States has been concluded, and as soon as the convention is ratified by the American Postmaster-General the scheme will be put into operation. Under the new arrangement parcels up to the weight of 4 lbs. 6 ozs will be carried by the post offices of both countries. The rates which are not yet stated will be placed at reasonable prices much lower than the present parcel rate by the Cunard and White Star Lines.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Paducah, Ky.—S. E. Mitchell has opened a bicycle and automobile shop at Third and Tennessee Streets.

Charlotte, N. C.—H. M. Goodman, who has been closely associated with the bicycle interests of Charlotte for the last ten years, has left for Wilmington, to engage in the business there on a more extended scale. Mr. Goodman shipped a carload of bicycles, sundries, tools, etc., and this with the new stock which he will put in will give him one of the most complete shops in the State, enabling him to handle and repair gasolene launches and automobiles. He has secured the local agency for the Oldsmobile from the Osmond L. Barringer Co., the State agents.

Olympia, Wash.—G. H. Garrison & Company have opened a new store.

Sunnyvale, Cal.—M. L. Sherman has opened a new bicycle store.

Changes.

Cincinnati, Ohio.—The store room at No. 27 East Fifth Street, has been leased for five years to A. G. Spalding & Co., of Chicago, who will establish a store for sporting goods.

Cincinnati, Ohio.—The United States Playing Card Company has purchased the poker chip manufacturing business of Burt Bros., at Bridgeport, Conn., and it has been installed in the Norwood factory of the company here. The new department will start with a force of about 30 hands, and it is the intention to gradually increase this until 100 or more are employed. H. G. Schwerdtle comes from Bridgeport with a half dozen expert chip makers to install and operate the plant.

Buffalo, N. Y.—To fill a vacancy, Fred C. Vanderhoof has been appointed manager of the Fisk Rubber Co.'s Buffalo branch. He was formerly with the Standard Spoke and Nipple Co.

Indianapolis, Ind.—G. H. Westing has converted his business into a corporation, the G. H. Westing Co., and will add a general line of sporting and athletic goods. Mr. Westing is president and treasurer; Elbert Jenkins, vice-president, and Arthur E. McKee, secretary. Mr. Jenkins was formerly traveling representative of the American Bicycle Co., and late of the Geo. N. Pierce Co.

Bangor, Me.—The firm of Rice and Miller have removed to 30 Broad Street.

Grand Forks, N. D.—Lyons & Co. has purchased the stock of the bankrupt Ferguson Sporting Goods Co.

Portsmouth, Ohio.—Kaps Bros. have commenced laying the brick to restore the pistol factory walls torn out by the explosion several weeks ago. Work will now be rushed on the building, as the firm is anxious to resume operations at an early date.

Hammondsport, N. Y.—The George H. Curtiss Company have changed the title of their motor bicycles from Hercules to Curtiss. A new plant has recently been acquired by the Curtiss people which greatly increase their facilities.

Fires.

Islip, N. Y.—Frank H. Gates' bicycle store, totally destroyed.

Port Huron, Mich.—The Huron Cycle & Electrical Co. was damaged by fire to the extent of $8,000.

Lawrence, N. Y.—The bicycle store of D. E. Lenox was damaged to the extent of $1,000 with but $200 insurance.

Hartford, Conn.—Henry Andrus sustained a loss of $2,000 on his store with no insurance.

Grand Rapids, Wis.—The bicycle store owned by Eugene Mille was destroyed by fire.

Buffalo, N. Y.—The bicycle repair shop of Philip Poest, No. 1660 Bailey Avenue, was damaged $400 by fire. A lamp exploding was the cause.

Syracuse, N. Y.—The bicycle repair shop at No. 814 Grape Street, conducted by P. Rosenbloom, was gutted by fire. Three hundred dollars damage was done.

Miscellaneous.

The Flemington (N. J.) Bicycle Club has elected the folowing officers for the year 1905: President, William H. Bodine; vice president, John B. Case; secretary and treasurer, Hiram E. Deats; captain, Chas. L. Fell; lieutenant, Oscar M. LaRue; color bearer, Asa B. Reading; trustees, J. F. Bodine, W. W. Hawke, John B. Case, W. H. Bodine, H. E. Deats and Charles L. Fell. Organized in 1887 and incorporated in 1893, the club has had a remarkable success. In addition to owning the club property, there is a comfortable balance in the treasury.

According to Sweden's new tariff, which became effective January 1, finished bicycles must pay an import duty of 25 kronen each, and parts of cycles two kronen per kilo. Travelers using cycles as means of transport can introduce their machines free of charge, on condition that the machines are re-exported during a stated period; otherwise the import duty can be levied at a later date, when a small surcharge is made.

Fish hooks of precisely the same shapes as those of to-day were made twenty centuries ago. Then, however, they were of bronze, instead of steel.

For the ten months ending with October, the last date for which statistics are available, Germany's exportation of bicycles totaled 3,656 tons. During the same period of 1903 but 2,017 tons of cycles and parts left the Empire.

Bavarians are firm believers in the efficiency of bicycles in the postal service. At the present time 439 bicycles are used by letter carriers in that country.

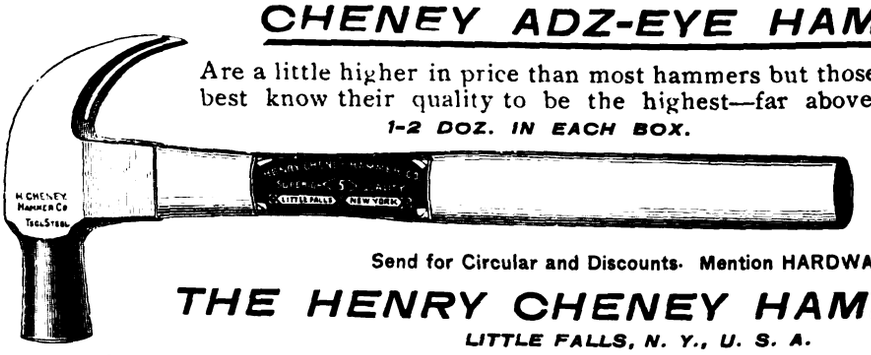
Competition in England is evidently becoming of the knife-edge variety. One of the better known concerns finds it advantageous to advertise its plant as "the only Britisn cycle factory without female labor."

BEING A GOOD FELLOW.

Any sensible young man ought to know that he can't be up late nights abusing his stomach and be in full possession of his faculties for business the next day. And he ought to know, also, that a man must be clear-headed and in full possession of his faculties to hold his own in the keen competition of life. Your "good fellow" is popular for the time being, but when his money is gone and he has lost his job and is on his uppers, the "good fellow" business doesn't get him anything. It's "poor fellow" then. Another good man gone wrong, and "the boys" are ready to hail another "good fellow" who has the price.

We don't mean by this to say that "the boys" are mercenary. They don't altogether pass up a "good fellow" when he goes broke, but it isn't the same. They say he hit the booze too hard and couldn't stand the pace. They feel sorry for him, but he is out of it. His good fellowship doesn't excuse him, even in the eyes of his friends, for having thrown away his opportunity.

The young man who gets the sleep his system needs, is temperate in his habits, lives within his means and shows up for work in the morning with a clear eye and active brain—that's the man business men are looking for. They want employees whom they can trust. Having worked hard and laid by a competence, they want to throw some of the burdens off, and they won't throw them off on the employee who is too much of a "good fellow."



Cut it out, boys. There's nothing in it. There's a whole lot of nonsense in that "good fellow" business. You can't fool the public very long by living beyond your means and keeping up appearances. There must be a show-down some time or other, and that means a loss of self-respect and many bitter experiences. All men will think more of you if you hold yourself in and don't try to live a wine existence on a beer income.

Many a bright and prominent business man has failed because he tried to travel in too swift a class; whereas, had he lived within his means, he might have become a highly successful merchant.

The world doesn't give up its treasures easily. It isn't in the cards for all of us to be millionaires, and mighty few of the "good fellows" get into that class. It's better to earn your way first and go hunting for good times when you have reached the point where you can spare both the time and the money. Then, possibly, you'll have more sense and have a different notion about what a good time is.—*Toledo Bee.*

CORDAGE AND ITS METHOD OF MANUFACTURE.

In a comprehensive sense, remarks the *Scientific American*, the word "cordage" may be said to include all sizes and varieties of the article, from binder twine to a cable 16 inches in circumference, but, strictly speaking, the term is hardly applicable to a rope less than half an inch in diameter.

The materials employed for rope-making are various, embracing hemp, flax, manila, sisal, jute and other vegetable fibres. Sisal from Yucatan and East Indian jute are largely used for the manufacture of cheaper grades of rope and for binder twine. Russian and American hemp are preferred for standing rigging, owing to their ability to absorb a great amount of tar. Manila hemp is more extensively used in the manufacture of cordage than any other material, as its great pliancy and strength adapt it to a multitude of uses.

MANILA HEMP

is obtained from a species of wild plantain belonging to the banana family and is a native of the Philippine Islands. Its stem has a height of from fifteen to twenty feet, is of a dark green color and very smooth on the surface. The fibre is round, silky looking, white and lustrous, easily separated, stiff and very tenacious, and also very light. These fibres, although in themselves not very large, are composed of very fine and much elongated bast-cells. The length of the cells is about a quarter of an inch, and they are not, as commonly supposed, held together by an intercellular tissue of mucilaginous substance. The characteristic roughness possessed by Manila fibre is due entirely to mechanical causes, such as, for instance, the laceration of a cell in the separtion for the leaf-stalk, or the subsequent opening out of the ends of the cells. While the fibres are weak traversely, they have great strength in the direction of their length. The tensile strength of manila fibres will average over 30,000 pounds per square inch of section. The plantain is cut near the roots when from two to four years old, and the leaves cut off just below their expansion. The outer leaf is then stripped off, and the fibrous coats are left for a day or two in the shade to dry and then divided lengthwise into strips three inches wide. They are then scraped by an instrument made of bamboo until only the fibres remain. Bundles of fibre are shaken into separate threads, after which they are washed, dried and separated according to quality and shipped in bales. From 150 to 200 trees are required to produce 140 pounds of fibre.

SISAL HEMP

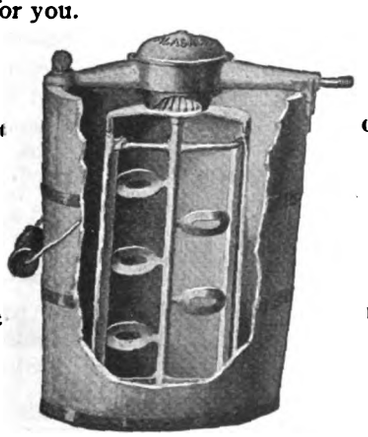
is the product of the agave, a large genus of fleshy-leaved plants found chiefly in Mexico and Yucatan. The fibre is yellowish white, straight, smooth and clean, and is about 25 per cent weaker than manila fibre. Much of the sisal hemp is prepared for export by machinery. Its consumption is fully as large as that of manila, and it is chiefly used for binder twine.

When the fibre reaches the mill, its preliminary treatment is practically the same whether it be manila or sisal. A description of one will therefore answer for the other.

THE MANUFACTURING PROCESS.

The bales of manila hemp average about 270 pounds each, and after the material has been lightly shaken apart it is placed in layers, which are sprinkled lightly with oil to soften and lubricate the fibres previous to their passage through the machinery The first mechanical operation consists in passing the hemp over roughing cylinders bristling with sharp steel prongs, or teeth, which straighten out the fibres and remove the tow and fine broken particles, dirt or other foreign substances. It then passes to the breakers, which are large frames about twenty-five feet long, consisting of two endless chains studded with steel pins. The first chain runs slowly and feeds the fibres to the second, which runs much faster, the effect being to comb or straighten out the fibres and draw them into a "sliver," or ribbon. The hemp is then hoisted on elevators to the top of the building. Following this operation comes the passage of the hemp through the spreaders and drawing-frames. These machines are similar to the breakers, but are smaller and furnished with steel pins and teeth of gradually-increasing fineness, which still further comb and straighten out the fibres, a number of slivers being put together behind each machine and drawn down to one sliver again at the end of each machine. This drawing is repeated a number of times with machines of various degrees of fineness, in order to make the sliver even, without which it would be impossible to spin fine, even yarn. The process is completed in a very fine drawing-frame called a "finisher," and from this the material finally emerges in complete readiness for spinning, having been drawn into slivers, or small, soft ribbons, in readiness for the spinning-frames.

From the finisher the sliver is carried on to the spinning jenny, which, as usual, operates two spindles. The small sliver is fed from one of the cans over the endless belt provided with needles, as in the breakers, spreaders and finishers. These needles, carrying the fibre move toward a conductor or "nipper" carrying the sliver with it. The sliver is by this time exceedingly small, and is capable of passing through a small hole in the face plate of the nipper, where it is compacted in passing through the orifice. A jaw is controlled by a spring which can be regulated, so as to adjust the size of the feed. As it leaves this part of the machine the twisting begins. The speed is 1,500 revolutions per minute. The yarn is twisted in a direction called right-handed, and feeds through the pulley, passing through the head block and moving the face piate, and is finally warped around grooved pulleys in order to give the necessary strain to pull the compacted fibres through the nipper. It is then wound upon a bobbin, about 1,000 yards being wound upon it. A special mechanism traverses the bobbin in order that the yarn may be evenly wound. The attendants see that the sliver is regularly supplied and that any accidental breakages in the thread are repaired. The yarn is placed in small cars and sent to the various rope-making departments. If a rope is to be tarred, the yarns are run through the copper tanks filled with heated tar. The yarns enter through holes in an iron plate and are drawn through the tank by machinery. As the yarns emerge, the superfluous tar is removed by means of pressing rollers and the yarn is wound on bobbins. If the yarn is to be used for binder twine, the sisal hemp is spun finer than manila, and, after being spun, the yarn, which is now on bobbins, is carried to the twine balling and packing-room, where the balling machines wind the yarn into balls of proper size.



ROPE-MAKING

is accomplished in various ways and is all done by machinery. The yarn is twisted into strands by means of machines called "formers," and the strands are twisted into rope by means of machines called "layers." If the rope is to be of moderate size, not exceeding one inch in diameter, the formers and layers are combined in one machine. The large machines are very impressive on account of their great size and the rapidity with which the finished product is turned out In the Farmer machine there are many bobbins, which are arranged in three frames, each of which revolves independently around its own axis, and they are all carried around while in motion by a large frame which supports all three smaller frames. The threads from the various

bobbins are passed through apertures in an iron plate, and the motion of each small frame serves to twist the yarn drawn from the bobbins into a strand. The three strands pass upward through a "top" at the upper portion of the machine. As the strands come together they are twisted to form a rope by the movement of the entire machine carrying the three sets of bobbins, which are each rotating separately. The result is a finished rope. The new rope is rotated around several pulleys in order that the proper pull may be obtained to draw the rope tightly through the "top," and it is then wound on one of the reels. This rope can, of course, be used for any purpose and can be made of large size. For well-drilling and other purposes where rope of great strength but little flexibility is required, cables are used Cables vary from 1,400 feet in length up, and usually measure from 1⅞ to 2½ inches in diameter. They are composed of three manila ropes instead of strands, and the ropes are twisted together with a very hard "lay," so that they will not untwist when used for drilling, and so that they will resist wear in the continuous rubbing against the side of the casing and the wall of the wells. Owing to their length and construction, cables are always made on machines and not in ropewalk.

Machines large enough to make cables fifteen inches in circumference have been made, and are in use in several factories.

The reel containing the rope that has just been made is placed on a

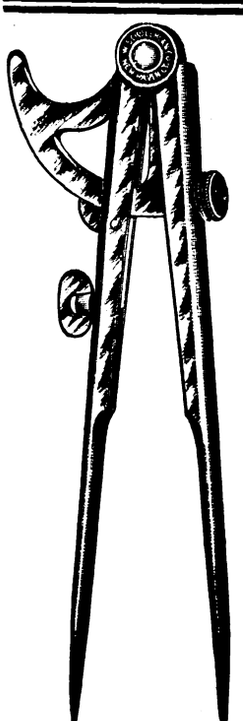
CABLE-MAKING MACHINE.

The principle of cable-making is the same as rope-making, only that actual ropes are used instead of strands. Each reel is turned around on a horizontal plane by means of gears, while it is paying out its rope. The entire machine carrying the three reels is turned simultaneously on a horizontal plane; the ropes are roved around various pulleys, and finally as they pass through a "top" at the upper part of the machine they are twisted together to form the cable, and then after being roved around grooved sheaves to obtain the necessary pull are reeled up by a power-reel. When a sufficient length of cable is obtained, it is ready for shipment. There are also large horizontal rope and drilling cable-laying machines in use in various rope factories.

Ropes of considerable size, towing lines and ships' cables of the largest dimensions are usually made on a ropewalk, which is sometimes as long as 1,200 feet.

The yarn is rewound on larger bobbins, and the number used depends on the size of the rope. These bobbins are put on a framework of wood, located near one end of the ropewalk, and the ends of the yarn are passed through holes in an iron gauge-plate, which is known as the face-plate. It then passes through cast-iron tubes, and the yarn is fastened on hooks of the forming machine, which consists of a truck which travels on a track the entire length of the walk. There are as many hooks as there are strands. As the former moves away from the face-plate it draws the yarn with it, and, at the same time, each hook revolves by means of gears, twisting the yarn left-handed into a strand. The machine is actuated by a cable which lies along the floor of the ropewalk. The cable passes over a large wheel at the left, and serves to operate the mechanism which turns the hooks, and, at the same time, winds up a cable attached to the end of a ropewalk, thus making its motion positive. When the forming machine has reached the upper end of the ropewalk, the strands are completed. They are now taken and laid over on the other side of the walk, and are then ready to be "laid," or made into rope. Two laying machines are required, one at each end of the walk, and are known as the "upper" and "lower" machines. They also give the rope what is known as a fore turn and an aft turn. As many of these strands as are required for the rope are stretched to full length, and are attached to hooks on the laying machine. The upper machine has several hooks, but only one is used. All the strands are fastened to this hook, and they turn left-handed in laying, and the lower machine has as many hooks as there are likely to be strands, and operates in the opposite direction. The strands are meantime placed in the grooves of a conical wooden block called a "top," through which is passed an iron bar which is fastened to an upright post of a car called a "top sled." Pieces of rope called "tails" are fastened on the bar and wound round the rope to be laid. They help regulate the lay and assist in giving the rope a finish-gloss. The top having been mitred between the strands as closely as possible to the top, the sled is gradually forced along as the twisting proceeds in a right-handed direction. The lower machine keeps all the strands from untwisting. The top sled finally arrives at the lower end of the walk, with the full length of completed rope behind it. It is then compactly coiled by a reeling machine, covered with burlap, and shipped to its destination.

"In our age genius has to be picked green, like watermelons, so as not to spoil on the market!"



CEMENT FROM SLAG.

The proverbial American lack of economy is well exemplified in the fact that in 1904 upwards of 10,000,000 tons of blast furnace slag was produced in the United States, of which but 10 per cent. was usefully employed for cement making and road mending purposes. Yet in Germany Puzzuolani cement is now well recognized as a trade product with a good reputation for proper strength and hardness. This cement is produced by grinding and thoroughly mixing 85 per cent. granulated slag with 15 per cent. of lime hydrate. Slag is also largely employed by Portland cement manufacturers as a substitute for marl and limestone, and the claim that cement made with this addition is stronger than ordinary cement is now recognized by authorities on the subject. New methods of quenching and granulating the slag as it comes from the furnace have further improved its qualities as a substitute for marl and limestone. It has been found that the rapid quenching of the slag produces greater binding and hardening properties in the product. By one method recently perfected two jets of water under a pressure of forty to eighty pounds to the square inch are projected, the first in line with the following slag and the second at right angles to it. The slag falls under the runner spout on the first stream of water and is carried by it in the form of a thin sheet under the second jet, which breaks up and thoroughly disintegrates it and quenches it.

EXPORTS FOR 1904.

The total value of the exports of American manufactured goods for the calendar year 1904 aggregated $502,764,729, as compared with $421,453,915 for the preceding year. For the first time in the nation's history the total of its manufactured exports passed the half billion dollar mark. This in itself was a sufficiency noteworthy showing to warrant a more extended inspection of the returns in order to discover, if possible, how the enormous gain of $81,310,814 was rolled up, in what lines American manufacturers are holding their own and where they are losing ground, and in which markets the most important gains or losses recorded occurred. Broadly speaking, it may be said that two branches of American industrial activity supplied three-fourths of the gains in our exports last year; exports of copper and manufactures thereof accounting for the largest sum, $31,000,000, while exports of manufactures of iron and steel increased by $29,000,000.

The Best Point

in a "Spring Divider" of any kind is the perfection of its points. Among adjustment devices for mechanics and draftsmen our

STOP
TAKING CHANCES

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality. Take Axle Grease for instance; if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

It's the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need.

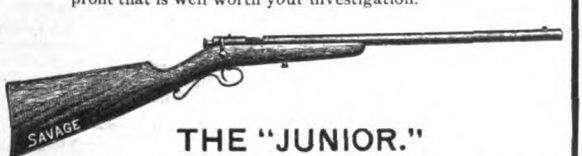
FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

A $250.00 Cash Register for
$125.00
HOW CAN WE DO IT?

The New Hallwood Leader embodies all of the up-to-date features on every make of Cash Register; it has many features which no other machine has; it meets every need of 80 per cent. of all businesses. We are thus able to bring it out in large lots and to reduce the cost of manufacturing to a minimum.

It will pay for itself in a short time.

Write for our catalogue and our booklet "SYSTEM" for a retail store.



THE INTERNATIONAL CO., Sole makers Hallwood Cash Registers.
1161 Yale Avenue Columbus, Ohio.

SAVAGE

"JUNIOR" PROFITS.

If you are selling firearms to make money, you want to make a good legitimate profit on every rifle sold.

The JUNIOR .22 calibre Single Shot will yield a marginal profit that is well worth your investigation.

THE "JUNIOR."

With the profit comes a quality of workmanship that is a business builder.

Write your jobber for prices and information on this new Savage Rifle.

SAVAGE ARMS COMPANY,
UTICA, N. Y., U. S. A.

RIFLES

Mayhew Tools

"Mayhew Thoroughness"

is a particular brand of thoroughness, which gives to Mayhew Tools a stubborn endurance in severe usage quite extraordinary, all without affecting the price, which is ordinary.

Drop us a line. It will bring you further particulars and prices.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED "REVERSIBLE HINGE" INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

The ENTERPRISE MFG. CO.
Akron, Ohio, U. S. A.

While Looking About

for a Lemon Squeezer, compactly put together, working rapidly and thoroughly—unbreakable—Look at

"The Leader"

Has no loose parts—always ready to squeeze.

Two styles—nickel plated and japanned.

MENTION "HARDWARE"

THE LEADER MFG. CO., Hartford, Conn.

TIME TO STOCK UP ON

BLACK SATIN STOVE POLISH

The **NO. 1 FIRE POT**

Is *the* Standard *of* Excellence

NO 1 FIRE POT, $6 Net.

EVEN our competitors admit it and flatter us by copying. Our ambition has been to see that only the best of material suited to the requirements entered into its construction, and that when completed it would be strong, durable and able to bear hard usage. **For this reason the tanks are made of heavy galvanized iron.** Any mechanic knows that it will stand, without injury, usage that would destroy tin or brass tanks, and that it is also easier to repair when damaged. **Our catalog is free. It tells many other reasons why our fire pots are the best on earth.** Jobbers supply at factory price.

A KNOCKDOWN ARGUMENT

on the Endurance, Stability, and other good qualities of

The Blackstone Rotary Washer

is found in the great hit it has made—the great number of them sold to thrifty housewives who usually can tell at a glance a good washer from one not as good.

Hits the dealer just right, too.

A Washer, like The Blackstone Rotary, is a steady business bringer.

Display it—point out its qualities,—the sale is made.

Give The Blackstone a trial. Circulars and catalogue on request, with prices.

WORKS FOR YOUR POCKET ALL THE TIME.

The Blackstone Mfg. Co.,

Jamestown, N. Y.

If the United States would place to-day an order for WOODEN warships, the world would ridicule us . . . . . .

PARAGON WASHER

P. S. Summer resorts are now equipping their laundries. Every proprietor of a hostelry is sure to buy a Paragon, Hotel size. Dealers, make the profits!

The dealer who handles *wooden* washers shows an awful lack of progressive spirit.

SPAIN has quite a few old *wooden* tugs, cheap and for sale; unfortunately she had not all of her stock at Manila.

Mr. Dealer! How many of those *wooden* washers that you bought before the Spanish War, are still decorating your store?

DO AS DEWEY DID!

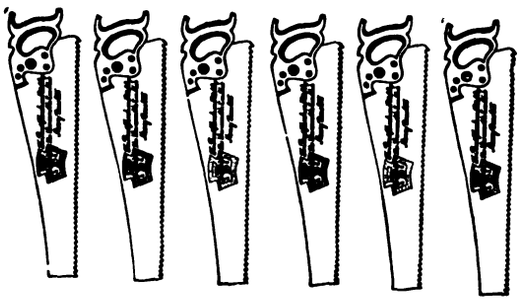
And then put in a fresh stock of *Metal Paragon Washers.*

You can safely place them near the entrance *to-day;* because *to-morrow* they will go to their future home, and act as a *free advertisement* for your store.

The PARAGON is made on the same principle (revolving cylinder) as the large power machines you see in every steam laundry and hospital.

Do you know now *why* and *how* the PARAGON does the work?

Compare the *appearance* of the PARAGON to any of the clumsy, complicated, greasy, antiquated wooden "washers (?)," and you have found the reason why you have never made a success of washing machines.



Experts predict for the PARAGON a larger commercial success than that of the Singer Sewing Machine. Dealers will find it to their advantage to come in on the ground floor now, before the agency for their city goes to a competitor.

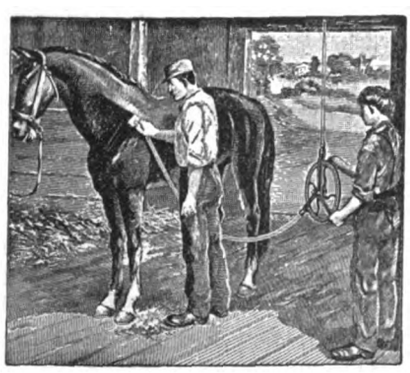
THE SCREEN DOOR AND WINDOW SCREEN SITUATION

The New "Air Line" Window Screen is rapidly making a place for itself. You should have a sample lot this season. You will buy them for your main stock next **season.**

The "Flyer" Window Screen still holds its own. Its continued popularity and large sales have been a matter of great satisfaction to us. "A good name" &c.



Screen Doors. You probably will never again buy them as cheaply as now. Advancing lumber and wire cloth forbid, but price should not be considered alone. Manufacturers are human and will try to "save themselves," unless perhaps they have a reputation to maintain, but as a rule, a cut price brings you an article that **you cannot sell at a profit.** You must sell it for what it is and for what it will bring. Quality shrinks faster than price---**always.**

Your Housefurnishing Department

is not complete without clothes racks. Let us send you prices on our old line and illustrations of our new line. We have a number of good selling articles for housefurnishing departments.

Cheswick Manufacturing Company announce their removal to their new plant at Canton, Ohio, on account of the recent fire which completely destroyed the Cheswick plant. It is their intention to continue the manufacture of all their different lines on enlarged and improved plans. Their new plant is the most modernly equipped of any plant in the country for their line of business, and is large enough to enable them to carry a large stock of goods on hand at all times which will enable them to make more prompt shipments than they have been able to do in the past.

✤

Estate of P. D. Beckwith, Dowagiac, Mich., manufacturer of the Round Oak line of Stoves, Ranges and Furnaces, in a handsome folder announces that it will be represented at the annual meeting of the New York State Association of Retail Hardware Dealers next week at the Hotel Iroquois, Buffalo, by C. B. Harris and A. E. Rudolphi.

✤

The annual meeting of the Hardware Club of New York will be held at their rooms in the Postal Telegraph Building, 253 Broadway, New York, on Saturday, March 18th, 1905, at 12.30 P. M., for the election of five governors to serve for three years, and the transaction of such business as may come before the meeting. Polls open from 12.30 P. M. to 1.30 P. M.

✤

W. H. Cole, formerly of the firm of Tower & Lyon, has formed a partnership with T. Addison Bell under the name of Bell & Cole at 52 Broadway, New York. They intend giving their attention to the buying, selling and leasing real estate, manage estates, appraise property and incorporate companies, finance industries and meritorious patents, etc.

✤

The Progressive Mfg. Company, Torrington, Conn., has recently purchased from the Bridgeport Gun Implement Company, Bridgeport, Conn., the Forstner Brace and Machine Bit business, including machinery, stock, manufactured parts, good will, etc. The Progressive Company is now manufacturing these Bits at its factory at Torrington, where all requests for prices, etc., should be addressed.

✤

By the records of the Weather Bureau at New York the winter which ended midnight Tuesday was the coldest but one since the Weather Bureau was established. In the three months of the winter 1903-4 the mean temperature was 26.4, the coldest on record—that is, in thirty-four years. This winter, for the three months the mean temperature has been 26.8. In the same period this winter the snowfall has been 53.3 inches for December, January and February, while for the corresponding period last year the snowfall was 28.5

✤

Lyon, Conklin & Co., Baltimore, Md., have just taken possession of their new and commodious warehouses, 13, 15, 17 and 19 Balderston Street, between Charles and Light. These premises put the firm in a better position than ever before to serve their customers.

✤

The annual statement of operations of the International Smokeless Powder Company for the fiscal year ended December 31 1904, showed that the net earnings for the twelve months were $615,000. This compares with earnings of about $450,000 the previous year. Three members of the du Pont Company were added to the board of directors, which now comprises W. W. Gibbs, George S. Graham, Henry C. Watts, Carl D. Bradley, E. G. Buckner, H. F. Baldwin, T. Coleman du Pont, P. S. du Pont, Alexsis I. du Pont.

✤

H. Berkele, 29 Murray Street, New York, has been appointed city salesman by the Geneva Cutlery Company, Geneva, N. Y., for the marketing in this territory of its Razor product. The company manufactures a complete line of full-concave, three-quarter and one-half concave sizes in ¾, ⅝ and ½ inch blades, which are hand forged from Kayser, Ellison & Co.'s Sheffield steel and fully warranted. A large line is made, covering a great variety of styles and finishes.

PAINT PLANTS CONSOLIDATED.

One of the most important consolidations of manufacturing interests that has ever taken place in Cleveland was effected recently when two of the city's biggest paint and varnish makers, the Billings-Chapin Company and A. B. McNairy & Co., joined forces.

Negotiations have been completed and preliminary steps taken to operate one of the largest plants in that city. The Billings-Chapin Company, which has been rapidly forging to the front within the past few years, has taken the initial steps in all the proceedings and will have active control of the new plant.

The Billings-Chapin Company's plant, which is located on Case Avenue, near the lake, and the McNairy plant on Scranton Avenue, will be operated separately, owing to the fact that both factories are being run to the limit of their capacity. The consolidation of these two houses came as a big surprise to the business interests and was the subject of much discussion. On every hand was heard the expression that the merger will be of great benefit to Cleveland in view of the fact that, with increased facilities and with such progressive, well-known men back of it, the two houses will bring considerably more business into the city.

CANADIAN FAIRBANKS CO. LIMITED.

Henry J. Fuller has purchased the business of the Fairbanks Company in Canada, says the *Montreal Gazette*, and as soon as the frost is out of the ground the new Canadian Fairbanks Company, Limited, as it is called, will build a large plant in Montreal, for the manufacture of the Fairbanks standard scales and all the other machinery and railway and mill supplies, which have heretofore been imported. Mr. Fuller said recently that the site of the new factory had not yet been selected, but that it would be of a capacity to employ about 300 men. The Fairbanks Company, which has operated in Canada for six years under Mr. Fuller's management, did not see their way to manufacture in the Dominion, so Mr. Fuller bought the business in order to reorganize it as a Canadian institution. It will be conducted from March 15, as the Canadian Fairbanks Company, Limited, with Mr. Fuller as president and treasurer. The purchase includes all the selling agencies of the Fairbanks Company, their contracts, organization and warehouse stocks in Montreal, Toronto, Winnipeg and Vancouver. The Montreal warehouse will be removed to 444-446 St. James Street, on May 1, but the old quarters on Craig Street will be retained for the present to meet the increased business.

THE NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The New England Hardware Dealers' Association will hold a convention at Boston on March 15 and 16 with headquarters at Hotel Vendome. The programme of March 15 will include luncheon and meeting of the Executive Committee at noon; members meeting commencing at 1.30, which will include the nomination and election of officers, reports of the secretary and treasurer and transaction of other business as shall properly come before the meeting.

A "smoke talk" will be held at 4.00, which will be attended by Hardwaremen of all branches, manufacturers, jobbers and retailers. During this session, the opening of the Question Box will be a feature.

At 6.30 to 7.00 a Ladies' Night Reception will be held to be followed by a banquet at 7.00.

The programme for the 16th of March will include morning visit of members and guests to the annual show of the Boston Automobile and Motor Boat Show at Mechanics' Building; and the afternoon will be devoted to social affairs of various detail.

The Board of Directors have published an elaborate convention bulletin in advance of the convention which includes a number of editorial articles by prominent persons among trade lines, also convention details and advertisements.

The guests of the convention will include Atty.-Gen. Herbert Parker, of Massachusetts; Rev. James Ells, of Boston; Geo. W. Corbin, of Corbin Cabinet Lock Co.; President Charles E. Adams, of the Massachusetts State Board of Trade; R. R. Williams, Hardware editor of the *Iron Age*; E. H. Walcott, Secretary of the Boston Merchants' Association; President Bragg, of the N. E. Iron & Hardware Association; Secretary Hayes Robbins, of the New England Civic Federation, and others.

The State Suite which opens en suite with the reception, committee and banquet rooms, will be used as exhibition rooms, where will be shown many new goods of the Hardware line, and souvenirs, etc., distributed by the manufacturers.

On the whole, the outlook is for the "greatest ever" in the Hardware line in New England.

Editorial Trade Review

The season, so far as the manufacturers are concerned, has already commenced in good earnest. Scarcely one of them but can give a good report of the way he stands on orders with everything running in the groove of a prosperous condition of affairs; with order books in such complete harmony with his wishes it only needs further advances along the line to make him contented and his customer as near the edge of it as he dares to be.

The weather has not been of the kind of late that has been satistactory to the Hardware merchant; a mixed variety meeting the view of the average buyer. The Retailers have finished their convention proceedings to a large extent; the bright and shining lights in the trade have disported their ideas before vast assemblages; proved their right to live and do business, catalogue houses to the contrary notwithstanding. Great inroads have been made upon the trade of these arch enemies of the legitimate dealer, and from all these Hardware gatherings the tocsin of war to the death has sounded, and the ways and means of how to throttle this one trouble of the trade has been shown by wise measures and undoubted grit.

Matters in that line do not look so hopeless in that quarter as they did a year ago, and the Manufacturer finds his friends the Jobbers, must be backed up by a refusal to furnish the Catalogue Houses with the sinews of war which will build them up at the fearfnl expense of sacrificing the Jobbers' best customers, the retail trade, thus finding their occupation gone.

The retail trade is also waking up to the fact that they arc assuming the importance of an industry. They are getting up to date fairly well, and find that the old fashioned scale of profits must be modified. They have been asleep in too many instances and by their inaction in important particulars have found the department stores stealing away from them all the smaller things in the business on which they had relied for a profit; and the catalogue houses, by their manner of advertising, have stirred up the larger items of the industry, but thank Heaven, they have learned that "eternal vigilance is the price of liberty," and by concert of action and organized effort they will now be heard fiom in a manner not to be mistaken.

In regard to the general market in which all are interested it remains remarkably steady; manufacturers are opposed to the policy of making advances that cannot be sustained, and so forbear doing so unless forced to by continued changes in the prices of raw material. They dont want their patrons to think they are aggressive "only for fun."

With all the complaints of a hesitating trade on the part of the retailer, when comparisons are made with sales a year ago, they are very much encouraged to find them ahead in volume in many cases. We have had a very hard winter with an unusual amount of snow, and the opportunities to add to stock have not been so prevalent among the retailers as it will be this month.

IMPORTS OF MANUFACTURERS' MATERIAL.

Manufacturers' material formed more than one-half of the total imports into the United States in the month of January, and about 46 per cent. for the seven months of the fiscal year which ends with January. The January record of imports of manufacturers' materials is exceptionally large, and shows a marked increase over January of last year. Manufacturers' materials, as classified by the Department of Commerce and Labor through its Bureau of Statistics, are divided into two groups; first, the articles in a crude condition for use in manufacturing, and, second, articles wholly or partially manufactured, for use in manufacturing. The first-mentioned group, "articles in a crude condition for use in manufacturing," shows an increase of 40 per cent. in January, 1905, over January, 1904, the total value of articles of this character imported in January, 1905, being $38,034,178, against $27,087,901 in January of last year. For the seven months ending with January an increase of about 20 per cent. is shown over the corresponding months of last year, the total for the seven months being $206,431,307, against $173,130,110 of the previous year. In the second class, "articles wholly or partially manufactured, for use in manufacturing," the increase is very slight, the amount for January, 1905, being $11,471,985, against $10,038,173 for January, 1904, while in the seven months ending with January the figures of 1905 are about half a million dollars below those of the corresponding period of 1904.

This record of January, 1905, in which manufacturers' materials actually formed more than one-half of the total entries, is a very unusual one, though the share which manufacturers' materials are forming of our imports is steadily increasing. In 1820 manufacturers' materials formed about 16.6 per cent. of the total imports; by 1850 they formed about 28.2 per cent; in 1870, a like proportion; in 1880, 37 per cent.; in 1890, 34 per cent.; in 1895, 37 per cent.; in 1900, 45 per cent.; in the fiscal year 1904, 45 per cent.; in the seven months ending with January, 1905, 45.8 per cent., and in the single month of January, 50.1 per cent.

The manufacturers of the United States, who thus imported for their own use one-half of the value of the imports into the United States during January, also contributed largely to the export record of the month, the total value of manufactures exported during the month being $40,512,915, or 33.37 per cent. of the total exports for the month. Manufactures formed but 13 per cent. of the total exports in 1850, 15 per cent. in 1870, 20 per cent. in 1890, 31.6 per cent. in 1900, 34 per cent. in the seven months ending with January, and 33 per cent. in the single month of January. Thus manufacturers are, according to these figures of the Bureau of Statistics, steadily increasing the share which their material forms in the imports and their products form in the exports of the United States. In the seven months ending with January, manufactures exported exceeded by 52 millions the total for the corresponding months of the preceding year, and in the single month of January the total exceeds that of January, 1904, by about 2 million dollars. The imports of material for use in manufacturing in the seven months ending with January exceeded those of the corresponding month of the preceding year by about 33 million dollars, and in the month of January alone exceeded those of January last by more than 12 million dollars.

Of fibers, the importations in the seven months ending with January are valued at $20,699,313, against $21,370,769 in the corresponding months of last year. Of india rubber, the imports in the seven months ending with January, 1905, are valued at $26,447,717, against $20,890,961 in the same months of last year; and of hides and skins, the imports of the seven months ending with January, 1905, are valued at $34,439,265, against $27,708,316 in the corresponding months of last year. Of tin, in pigs, bars, blocks, etc., the imports of the seven months ending with January were 43,621,612 pounds, against 39,714,841 pounds in the corresponding months of last year, while for the single month of January, 1905, the total was 6,179,983 pounds, against 4,677,339 pounds in January of last year.

TALKS WITH RETAILERS

By AMOS

The latest batch of letters on the Catalogue House question contains views that differ widely. A merchant in Ohio writes: "In regard to Catalogue House Competition would say nothing only cutting the profits on some goods will do. If the retail Hardware merchants of the country could buy goods from the manufacturers as cheap as the Catalogue Houses then we could compete in prices."

E. S. Roe, of Buchanan, Mich., believes in the plan of "Money Back if Dissatisfied." He writes: "In reply to yours of the 14th just received, beg to say that the principal thing I do to combat Catalogue House Competition, is to handle a better class of goods than these people keep, and let my people know about it. I make it a point to keep nothing but good goods, and every sale carries my personal guarantee of quality, and if there should be any complaints, they are always satisfied, so that my trade prefer to do business with me rather than take the chances with an unknown concern. This is about my only weapon, and it works." It is a safe bet that Mr. Roe's success has been brought about by a combination of the use of printer's ink mixed with gray matter and square dealing. Josh Billings once said: "I luv a rooster for tew things—one is the krow that is in him and the other is the spurs that are on him to bak up his krow with." Truly business success is based on confidence. The confidence of the consumer that the dealer has the goods to "bak up his krow with."

Uptodateness is the keynote of the letter received from C. A. Peck, secretary of the Wisconsin Association. He writes: "Pursuant to your request of the 14th inst., we will say regarding department house competition as follows: It is our experience that the best way to meet this competition is by keeping our eyes open and making prices. We are not among those who believe that competition can be met solely by State Associations and still maintaining the old times high profit. State Associations are all right, but to our mind their main virtue lies in keeping the Hardwareman posted so that he will discard some of the old vague notions and keep abreast of the times in such a manner as will enable him to fight the department stores with their own weapons. There are a few articles still left on which good profits can be made and we advocate pushing them, especially with this idea in view and making low prices on everything which the department store has."

E. M. Austin runs a Hardware department store out in Litchfield, Ill. Yes, "Runs" is a good word judging from his recent communication in which "hustle" stands out in every line. He says: "It's by persistent advertising in the leading papers within 30 miles of us and many circulars every two or three months that makes our business show a good increase every year." Copies of several circulars came with Mr. Austin's letter. One of them, in imitation typewriter style, is for newly married couples, and after wishing them a life of happiness, invites their attention to the complete line of House Furnishings to be found at Austin's store and offers a special cash reduction on purchases made. A "go cart" letter follows later when the arrival of the "treasure" is announced. To those contemplating building a letter is sent calling attention to the fact that at Austin's can be found both materials for building and furnishing the home. Still another letter is for new residents and is a cordial invitation to call and get acquainted.

The Leggett-Wisda Hardware Company of Ord, Neb., recently sent out to their mailing list a circular the introduction to which was as follows:

To our Friends and Customers:

We have a few words to say in regard to price and quality of goods. There are a great many people who are sending at the present time, or have sent in the past, their money away from home for goods, and in many instances have paid more than they would have paid at home for the same goods. No doubt there are some things which can be bought of the catalogue houses cheaper than the home dealer can really afford to sell them, but in the great majority of cases the buyer gets a cheaper article than he thinks he is going to get. He has sent the money in advance, however, and so keeps the article and says nothing rather than go to the trouble and expense of getting it exchanged. In many cases our goods are marked less than the same goods in the catalogue, and in all cases we will gladly meet the catalogue price on the same quality of goods if we have the chance. Friends, if you are patronizing the catalogue house, bring in your book, and let us compare prices, and we will surely be able to sell you goods in the future. Our interests are your own interests and your interests are surely our interests.

Another circular recently sent out by the Leggett-Wishda Company contains a list of over 60 people who have purchased the steel range handled by this firm.

I have separated into small paragraphs the following letter from T. Frank Ireland, of Belding, Mich., to give it greater emphasis. Practically every sentence in this communication could be used as the text for a long and logical business sermon. Mr. Ireland writes:

Your favor of the 14th inst. received in which you ask me "What are you doing to counteract Catalogue House Competition in your section?" Will say briefly—that:

We advertise to meet their prices.

We carry a more complete stock so as to be sure and have what people want.

We prevailed upon our Business Men's Association to send out a thousand copies of the paper, "Home Enterprise."

We patronize our friends and push their goods.

I appreciate the stand that HARDWARE has taken in this matter, your platform is a good one. I thank you for what you are doing for the good of the retailers.

GRAY & DUDLEY HARDWARE CO.'S CATALOGUE.

Gray & Dudley Hardware Co., Nashville, Tenn., and Birmingham, Ala., have issued a general catalogue of which they may well be proud. They have been working on it for about eighteen months, which of itself will prove that a good working catalogue is far from being an easy job, as they have spared no trouble or expense to make it a complete, convenient and useful book of reference for the Hardware trade and storekeepers of the South. It contains 1500 pages, is substantially bound in cloth, and printed on a high grade of paper, and is gotten up in the most attractive form for hard wear, and will prove a valuable addition to any Hardwareman's library. The book was gotten up and compiled by their Catalogue Department which is under the supervision of Frank E. Eddington. The cuts are the best to be had for the purpose, being graphic and characteristic, and more than 8,000 were used in the construction of the interesting volume. They have paid an unusual amount of attention to show their private brands of goods; care in listing, describing and illustrating them in their original colors most of the color work being by the Chromatic process. An alphabetically arranged index of 18 pages is provided for the catalogue which has also a department index embracing the following important divisions:

Mechanics' Tools.
Agricultural Tools and Implements.
Wagon and Buggy Hardware and Wood Work.
Mill Supplies, Iron Pipe Fittings, Steam Goods, Buckeye Pumps, Etc.
Builders' and Cabinet Hardware.
Store Fixtures.
Miscellaneous Hardware and Household Goods.
Sewing Machines and Fancy Hardware.
Go-Carts and Baby Carriages.
Iron and Brass Beds.
Trunks.
Clocks and Watches.
Pocket and Table Cutlery, Silver Ware, Cut Glass, Fancy Goods, Etc.
Shotguns, Rifles and Ammunition.
Sporting Goods.
Fishing Tackle.
Harness and Saddles.

To show the magnitude of the company's possessions, illustrations are given of the company's buildings at Nashville and Birmingham, including the warehouses in each city, together with its trunk, saddle and harness factories. They have published two editions for distribution to the trade, and in addition an edition of loose leaf books bound in heavy leather for the use of the traveling and house employees has been prepared for Nashville and Birmingham. The company also issue seven supplemental catalogues, which are on thin paper for mail distribution, embracing the following lines of goods: Mechanics' Tools and Supplies, Cutlery, Silver Ware and Cut Glass, Wagon and Carriage Hardware, Fishing Tackle, Guns and Sporting Goods, Harness, Saddles and Saddlery Hardware. All these catalogues were compiled by the company in its catalogue department. The printing and binding were done in Nashville, by the Marshall & Bruce Company who deserve much credit for the perfect manner in which they have performed their work.

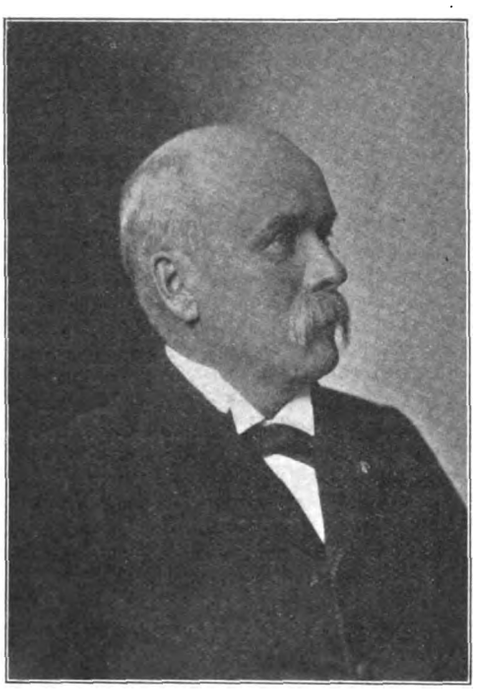
MINNESOTA RETAIL HARDWARE ASSOCIATION

The Ninth Annual Convention of the Minnesota Retail Hardware Association was held at Duluth on February 21st and 22d, the sessions being held at the Commercial Club Rooms.



The Hon. M. B. Cullum, of Duluth, delivered an address of welcome.

President A. T. Stebbins replied with equal felicity. The president then delivered his annual address, which we give in part, as follows:

President's Annual Address.

I extend to you my greeting and bid you a hearty welcome to this our ninth annual session. We have met in this anual convention to review the past, discuss the present and make plans for the future. It is interesting to go back over the history of our organization and note its growth and achievements. Nine years ago a few of us met at the Capitol Building in St. Paul, and there organized the Minnesota Retail Hardware Association. It was largely through the untiring efforts of our first president, C. F. Lander, that we were then and there brought together. The gathering was not a large one, but the dealers present were enthusiastic and fully comprehended the possibilities and needs of an organization. Under an able leadership, guided by strong minds, we have steadily grown year by year, until to-day we lead all other State associations in point of members, our present membership being about 650.

With such a membership

A. T. STEBBINS, PRESIDENT.

WE HAVE BEEN ABLE TO WIELD AN INFLUENCE,

and hence when we have asked the jobber and manufacturer to respect our rights our requests have been respected. The year just passed has been a progressive one to our State Association, yet unmarked by any special feature. Assisted by your able Executive Committee and aided by your indefatigable secretary, my labors have been made easy. The Executive Committee has met once a quarter during the year. We have carefully considered every complaint that has been made, and in most cases satisfactory explanations have been made and agreements entered into.

One complaint has been made, however, that as yet we have been unable to reach, and it is with feelings of deep regret that we are compelled to report that some retailers in this State as well as in other States, for a five or ten per cent consideration, are furnishing catalogue houses with goods made by manufacturers who refuse to sell their products to these houses. This example of disloyalty is to be regretted. We are charitable enough, however, to believe that the parties so implicated do not fully realize the possible results of their actions.

IF WE WOULD COMMAND THE RESPECT AND CONFIDENCE

of the manufacturers and jobbers and expect their co-operation we must act our part well. That such transactions are confined to a very few we fully believe, and we hope we may never again hear of a like occurrence among Minnesotians.

* * * *

The quarterly meetings of the association have been characterized by a desire to promote and protect the best interests of all the members. Peace and harmony have ever prevailed, and we express the hope that our labors and actions will meet your approval. But the work of this and other kindred associations will not cease so long as we have an existence. Clouds that have crossed our pathway have not all been dispelled and others are continually forming. Trouble seems to be about the only thing that is equally distributed in this world. * * * *

We may not be able to do all we desire, but much has been accomplished and more remains to do. The broadening influence of our convention through the Joint Committee with the manufacturers is very important. Matters that would otherwise not come up are thus brought to the attention of these different organizations, and harmonious relations are being promoted, based upon a knowledge of facts and a just recognition of the deference which must be paid to all interests. The work that is being done by

OPEN-MINDED AND PROGRESSIVE BUSINESS MEN

must redound to the benefit not only of the members of this organization, but of the trade at large.

Among the important questions that have been brought before the manufacturers by this Joint Committee is that of quantity prices. We, as retailers, contend that the manufacturer should have one price for the jobber and another for the retailer. Why should the large retailer buy his goods as low, or lower even than the jobber, to the disadvantage of the smaller retailers? The country is agitated as never before over the bill now pending in Congress relative to discriminations in freight rates. If it is a moral crime for railroads to discriminate in favor of large shippers and thus freeze out the small shippers, why is it not just as much of a crime against morality for the manufacturer to discriminate against the small retailer?

Much of the success of our association is due to the splendid work done in our behalf by the trade papers.

THEY HAVE FOUGHT OUR BATTLES

in an honest attempt to overcome some of the irregularities of the trade, have given us full and complete reports of all Hardware conventions, by which means we get all the benefit of the discussions and suggestions of the members of sister associations. The leading trade papers are represented here at this session, and I would at this time, in behalf of this association, extend them a cordial welcome, and would I had the talent to fittingly express our appreciation of their services past, present and prospective. We hope to hear from them ere this session closes on their impressions of the business of associations from two standpoints—viz., work well done and work left undone—especially the latter, for it is by just criticism that we are enabled to see ourselves as others see us, "right or wrong; when right, to be kept right; when wrong, to be set right."

It is a source of pleasure and gratification that we have so many of

THAT ARMY OF MAGNIFICENT MEN,

the traveling fraternity, with us. We consider them our allies. They come to us in our places of business with a smile and oftimes the latest story. They tell us of the new goods and new prices and advise us when and what to purchase. If depressed, they cheer us with the hope of better prospects and improved conditions. We are more than glad to have a representative on our programme, and to have you feel that you are ever welcome. Here's to your health and happiness.

MINNESOTA MUTUAL INSURANCE.

While the president of the Minnesota Retail Hardware Dealers' Insurance Co. and the Insurance Commissioner of Minnesota are to talk to us on insurance, yet I feel that I cannot close without saying a word. It is the one subject that interests us all. I take it for granted that every member is interested in this feature of our organization to the extent of a $3,000 policy. If not, just take a little friendly advice and make your peace with Secretary Mathews at once. If we had no other excuse for existence this feature would suffice. Insurance with our company is as safe as with any old line company in the world and at a cost of less than two-thirds. It has been a success from the start, and I earnestly recommend it to your careful consideration.

DATE OF MEETING.

The Winter months seem to be the best time of the year to hold our conventions, especially February, when our members are through invoicing and feel like taking a little recreation during the dull season, as evidenced by the fact that no less than thirteen associations hold their meetings in February. This makes it inconvenient for the representatives of the trade papers, and makes a busy month for the officers of the National Association, whose attendance is so earnestly desired by each and every State. Our by-laws provide for our meetings to be held the fourth Wednesday in February. I would recommend that this be changed and the date left to the Executive Board, who can arrange with national officers if deemed advisable.

The following committees were appointed:

PRESS—E. K. Evans, Princeton; H. P. Heifer, Barnesville; O. G. Hanson, Rochester.

AUDITING—Lewis Cosgrove, Le Sueur; W. H. Close, Hibbing; S. E. Hunt, Red Lake Falls.

RESOLUTIONS—W. B. Marr, Aitken; Mr. Stremell, Minneapolis; L. K. Dougherty, Duluth.

GRIEVANCES—C. A. Olson, Willmar; Mr. Deush, Long Prairie; H. A. Lervy, Alexandria; J. J. Krake, Melrose; J. E. O'Brien, Crookston.

RECEPTION—C. W. Bouck, Royalton; J. G. Pease, Superior; George Powers, Duluth.

C. W. Bouck, Royalton, was chosen sergeant-at-arms.

The secretary, M. S. Mathews, then followed with his annual report.

Digitized by Google

Secretary's Report.

In preparing the customary report from year to year it is extremely gratifying to be able at each succeeding meeting to record a marked advance in the growth and prestige of our association. Minnesota is again able to score the customary lengthening of the membership roll. In our list may be seen quite a number of names belonging to enthusiastic members who, but a year or two ago, on being asked to join the association, declined on the ground that no benefit could be derived and it was useless for a busy man to spend valuable time in any such movement. The situation now is different, and while doubtless there are members who remain with us solely for the insurance benefits the great majority are in it because the direct gains from associated effort are large, and, I may add in passing, only a fraction more than two-thirds of our Minnesota members carry insurance with our Mutual Insurance Co.

Thanks to the splendid work of the National, much ground has been gained in winning the pledged support of many leading manufacturers in standing by the retailers on the question of marketing their product along so-called regular lines of trade. Reform at the present time is most active at the point it logically should be—at the starting point and where the goods are made. But few realize the substantial progress already made and the bright outlook for the immediate future. That hustling head of the National Association, President Bogardus, has promised to be here and will show us what has been accomplished and outline the work for the coming year.

Approximately two-thirds of the Hardwaremen of the "bread and butter" State are members of their State Association, and it may be safely stated that while there are many good Hardwaremen outside the ranks, the great majority of desirable members are already on our lists. Our increase in membership continues about as in the previous year. The souvenir annual for 1904 contained 566 names. To-day the

M. S. MATHEWS, SECRETARY.

paid memberships are 644, and while there seems to be a general awakening in Hardware circles all over the land, it is hoped and believed that the Minnesota Association will remain at the head of the procession.

FINANCIALLY

we are in comfortable circumstances.

* * * *

DATE OF ANNUAL MEETING.

At the last annual meeting in St. Paul your attention was called to Article 4, Section 1, of the Constitution, which provides that the annual meeting shall be held "on the fourth Wednesday of February." Nearly all of the State associations now leave the date open and its selection with the Executive Committee. Under such a provision dates can be made less in conflict with meetings of other State associations, thus making it much easier for traveling and trade paper men to be with us, and also giving greater assurance of the attendance of one or more national officers.

* * * *

You will notice in the advertising pages of our programme many familiar and some new names. To their liberal favors much of the success of this meeting is due, and the secretary earnestly requests that where possible you show by your patronage a substantial appreciation of the same. It is also noticeable that the traveling men in increasing numbers pay us the compliment of attendance on our meetings. They are all friendly to this association, and to their missionary work in the field we are indebted for a considerable number of our membership, and we bespeak for them your courtesy and co-operation.

George M. Evenson, of St. Peter, the vice-president of the association, delivered an address on

The Advantages of Membership.

At the outset he said that the presence of so many dealers in the hall showed that they had already settled that question for themselves, and held up to scorn and ridicule the short-sighted retail Hardware dealers who willfully persisted in depriving themselves of the advantages of widening their business and intellectual horizons such as were offered by the State conventions. He narrated graphically a typical experience in which the broadening influence of the State convention brought two hostile competitors together under a bond of fellowship, resulting in the permanent reconcilement of differences, followed immediately by mutual agreements to cease ruinous price cutting, and ultimately in the formation of a splendid local association.

He told of a dealer of his acquaintance who had steadily refused to acknowledge the possible benefits to him of membership in the association until he was confronted with unfair competition from the outside which he was powerless to overcome, but which was promptly remedied by the association. He soundly scolded members present for being selfish enough to sit still and silent, always receiving suggestions, but never offering any from their own experiences. "The association," he concluded, "broadens and educates its every member, and under its inspiration our business becomes a wonderfully interesting profession rather than a round of daily drudgery."

C. F. Ladner, St. Cloud, read a letter from J. F. McGuire, of St. Paul, in which its writer presented to the president, with his compliments, a beautiful silver-plated gavel made from Minnesota metals by students of the Mechanic Arts High School of St. Paul. The same donor also presented a cleverly fashioned question box made by the students of the same school. These gifts President Stebbins took pleasure in acknowledging.

C. H. Casey read a paper on

Advertising a Hardware Store in a Country Town.

BY C. H. CASEY, JORDAN, MINN.

He said in part:

The first question is, Does it pay to advertise in small towns? The answer to this may be found in the methods of the mail order business. They do not advertise in the large cities; they strike the small towns. They describe their goods, not to the city people, but to the people in the small towns and country, and they get results. If the retail Hardwareman will take his cue from this and go at the people right, mean business in advertising and make a business of it, he will succeed. When the city graft houses stop advertising through the territory covered by your home paper you may conclude that advertising in a small town don't pay, but so long as they are getting business right out from under your noses, getting cash for goods not as good as you sell on time, you cannot say that advertising does not pay. The same people who are willing to follow their ads. will read yours if you give them something worth reading. Put in something that means something worth reading. Put in something that means something, keep it fresh, and the results will justify the statement that advertising does pay in towns large or small.

* * * *

TO START RIGHT IN ADVERTISING

requires a certain amount of "sand." To put out a goodly quantity of your hard-earned dollars that are already safe in your pocket or in bank, and seek in exchange what might be called an unknown quantity takes grit and faith, both in your ability to write convincing, pulling ads. and in the results in dollars and cents. Here is, I believe where many a merchant "falls down." He is solicited by the local newspaper man for an ad., he asks what it will cost, and, being told, hesitates and thinks of how good that money is, of the nice things he could buy with it, or perhaps of how hard he had to work and scheme to make it, but finally decides to take a few dollars' worth of space and see what he gets out of it. The consequence is he gets little or nothing in the way of benefit from his investment, because he didn't spend enough or keep at it long enough to be noticed. Very often that merchant never has the courage to try advertising again, or if he did it was in the same half-hearted way and at intervals so far between that his former efforts were entirely forgotten before the next one arrived. This man might just as well have cut out his advertising entirely and saved the little money he did spend.

Appropriate enough money to make yourself felt in your community, divide this appropriation among newspapers, circulars, calendars, booklets, novelties or anything else that appeals to your judgment as being good, but keep at it, don't let up or all you have spent in the past will soon be lost. People forget your business awfully quick nowadays with the great volume of advertising matter that is being distributed in every way, and unless you hang on with bulldog tenacity you will be "down and out" so far as results are concerned.

* * * *

MAILING LISTS.

In my own business I have, and keep up, several mailing lists, which we use in sending out advertising matter. We have one list that contains the names of the head of every family in the territory from which we draw trade. This we use for general advertising, such as circulars and booklets. We have another that contains the name of every person with whom we have done business, or with whom we feel that we should do business, which is used in distributing circulars and more expensive advertising. Then we have lists of carpenters, threshermen, wellmen, town and school officers, etc., and use them when we have anything that is especially interesting to them. One thing I have done in this line that all of you may not have thought of; that is when I get up an especially good ad., one that appeals to a certain class, I have the printer take this out (I am speaking of a newspaper ad. now), put a nice border around it and run off a few hundred of them, then mail them direct to the persons most interested. For instance, you get up a good, strong ad. on Belting and Fittings and you mail them in the manner I have described to every thresherman, creameryman or millman in your territory and the chances are you will get good results and with a minimum of expense.

* * * *

Your show windows are one of your best and at the same time very cheapest advertising mediums, and you ought to give them all the time and what little expense they require to keep them in the very best of

Digitized by Google

shape. Keep them clean and neatly arranged with seasonable and attractive goods. If you have anything new that the ordinary passerby would not understand, put a card with it explaining it.

Putting price cards in your window on the average line of goods and naming prices in your newspaper advertisements, are points in the advertising business upon which experts disagree, and you may take my opinion for just yhat you think it's worth. I have never been much of a hand for doing either, and whether I would have been more of a success as an advertiser had I done more of it has always been a question with me. In a country town, where people usually look around in all the stores before they buy anything of consequence, it has always occurred to me that you place yourself at a disadvantage by pricing your goods in a public way like this.

* * * *

The intending purchaser will naturally figure that as he knows your price on the article wanted it is proper strategy for him to see the other fellow, with the result that he may buy before you get to see him, while if your ad. had contained everything except the price you would surely have had the chance to talk to him; besides, your competitor would not have the proof of your price. Certainly lines that you control or new goods that you are just introducing may be priced to good advantage. This may work differently in different localities and under different conditions, but, generally speaking, public pricing has not been a rousing success with me.

THE WAY IN WHICH YOU KEEP YOUR STOCK AND STORE

and the manner in which you treat your patrons are points in the advertising of a business that should not be overlooked. As a rule people like to buy goods where they are kept in nice, clean, attractive style, and will go blocks out of their way to get even a small article at a store that is so kept and where they try to make you feel at home and show an appreciation of your business.

* * * *

In my limited experience I have found it pays best to advertise quality rather than price. People who buy goods simply because they are low priced are seldom permanent trade; they go where prices are lowest. Such people can almost always be fooled on quality, and they usually are. If your competitor quotes lower prices than you, such trade will go to him instead of to you, and you cannot always be quoting lower and lower prices. The store that gets trade which is drawn by the assurance and attraction of quality is likely to be the one that gets the permanent trade, and the permanent trade is the valuable trade. This fact does not require argument or explanation to any wideawake merchant, and it emphasizes the importance of talking to your people about the goods and the personality of the business. Get your reputation established as a dispenser of goods of first quality and your path will be easier, your profits more stable and your business more secure.

This was followed by a spirited, general discussion led by W. E. Davis, the editor of *Hardware Trade*, Minneapolis, which was followed by an address on

Co-operation,

By Jesse A. Gregg, Nicols, Dean & Gregg, St. Paul,

which was listened to with evident pleasure.

When the association convened Thursday morning it was turned over to the insurance section, Charles F. Ladner, president of the Insurance Association, presiding. He did not attempt to give a regular anual address, but spoke informally of the great success which had attended the officers and members of the association.

Following is the report of the insurance secretary, M. S. Mathews:

Mutual Insurance Association,

The report of the Auditing Committee showed the following:

Certificates of deposit	$22,000.00
Adjudicated judgment, St. Cloud	21,469.50
Cash balance in bank	15.32

INSURANCE SECRETARY'S REPORT.

Following was the report of Insurance Secretary M. S. Mathews:

Hardware mutual insurance is one of the live questions of the hour, and probably at no previous time has it been given such general attention as during the past Winter. Hardwaremen generally are alive to the fact that it is the only way out; that it is practical, sound and cheap. It has come to an increasing number of dealers that as they in all cases participate in losses and expenses, why not be in with the profits as well? Profits in some cases are considerable, as witness the recent report of the Hardware Mutual in the State immediately to the south of us. This report shows, with nearly 500 policies in force, that during the year 1904 losses were sustained to the amount of $2.73. With the Hardware mutuals you participate in "fat" year savings as well as "lean" year losses.

The amendment last year to "Articles" permitting the insuring of members' homes and household goods and extension of term to three and five years as desired has not been taken advantage of by members as generally as expected. You are reminded that the same proportionate savings can be made on this form of insurance as on your commercial lines.

Losses have been unusually numerous and severe the past Winter, but up to the present time of writing none has been reported for February. The volume of business is now so large and growth so steady that while an accumulation of losses cuts into the surplus somewhat the setback is only temporary, as the financial high water mark is soon reached again and passed. This company now has policies in twenty-four States, and as it is claimed that well scattered risks are a prime factor in successful underwriting, it would seem our position from this point of view is all that could be desired. The expense account is again showing the modest figures of ten per cent, and although losses reached the unusually high mark of thirty-eight per cent, the business of the company was conducted on less than one-half of the amount of premiums written. The sum returned this year to the policy holders approximates $15,000, which, in other words, is a net saving.

Although the losses were twice as great during 1904 as in any previous year, at the same time each expiring policy received a return premium of thirty per cent of original premium paid; an increase of assets shown to the amount of $12,086.15, and an increase in net surplus of $8,878.84. As showing the strength of the company, it may be stated that at the close of business December 31 the net assets were sufficient to go back and again pay every loss and every expense incurred since organization and still have money remaining in the treasury.

Treasurer's Report.

The report of H. Hauser, Minneapolis, treasurer, showed the following figures:

RECEIPTS.

February 25, 1904, balance in treasury	$37,544.38
Received 82 deposit slips	33,371.13
Received interest	1,542.27
Total	$72,367.78

DISBURSEMENTS.

Paid 272 orders	$29,149.71
February 20, certificates of deposit, Northwestern National Bank	21,000.00
February 20, judgment, St. Cloud	21,469.50
February 20, daily balance in Northwestern National Bank	748.57
Total	$72,367.78
Total balance in treasury, February 20	$43,218.07
Interest due on $11,000, February 27, 3 per cent	330.00
Interest due on $4.000, March 7, 3 per cent	120.00

DIRECTORS ELECTED.

The following directors of the Insurance Association were elected:

W. H. Tomlinson, Le Sueur, to succeed himself.

Elmer Houghtaling, Fairmont, to succeed E. H. Loyhed.

Frederick W. Lucas, Litchfield, to succeed himself.

W. J. Urbatsch, Austin, to fill unexpired term of Mr. Roell, of Owatonna, resigned.

IOWA MUTUAL INSURANCE.

A. R. Sale, of Mason City, Iowa, secretary-treasurer of the Iowa Insurance Association, addressed the convention.

The chairman told of his visit to the Iowa Association and suggested to the members that they could do no better than to place a portion of their surplus fire insurance with the Iowa Association, addressing A. R. Sale, the secretary, at Mason City, Iowa.

The insurance session was adjourned at 10.30.

A report of National Convention C. D. Decker, delegate to the National Convention at Indianapolis, who had been instructed to make a report before the present session, was not present, and in his absence W. H. Tomlinson, vice-president of the National Association, made a brief report of the work accomplished.

The following Nominating Committee, one from each Congressional District, was announced from the chair:

Nominating Committee.

First District—George Schwirts, Wabasha.
Second District—Charles Grill, Sherburn.
Third District—George Mason, St. Peter.
Fourth District—J. F. McGuire, St. Paul (chairman).
Fifth District—J. O. Roberts, Minneapolis.
Sixth District—H. A. Le Roy, Alexandria.
Seventh District—W. B. Gislason, Minneota.
Eighth District—W. B. Marr, Aitken.
Ninth District—James E. O'Brien, Crookeston.

W. H. Tobin, of the Sheldon School of Scientific Salesmanship, read a paper on the

Science of Selling.

On invitation by the president, Mr. Tobin followed this up by explaining the method of his school and the cost of scholarship.

NORTH DAKOTA HEARD FROM.

H. F. Emery, president of the North Dakota Association, was invited by the chair to the speakers' rostrum. He brought the greetings of the North Dakota Association, and said the Minnesota Association led all the rest in membership and in the force of its influence.

JOBBERS' AND TRAVELING SALESMEN'S SESSION.

At the opening of the Thursday morning session, the president announced that the meeting was thrown open to jobbers and traveling men.

P. W. Lyon, of Janney, Semple, Hill & Co., Minneapolis, delivered a fine address, from which we make the following extracts:

Mr. Lyon's Address.

The secret of American greatness is not difficult to discover when men, honest of intention and earnest in desire, gather in conventions like this for the common purpose of perfecting their equipment in life that they may be better able to wrest from the soil, the mine and the great channels of commercial life larger returns for labor expended. Your presence here to-day indicates clearly that you are not entirely satisfied with the work of the past, brilliant though your success may have been. You are here with a firm desire to put a keener edge on your weapons of warfare for the commercial strife to which you will shortly return.

In Hardware merchandising there are just three important considerations—1, buying; 2, selling; 3, collecting.

Digitized by Google

ber of lines which are subject to more or less fluctuation in price. Know these, watch them carefully, know when and how to buy, as you will find by careful analysis of your business that they constitute a considerable portion of your sales and are therefore extremely important.

DO NOT SCATTER YOUR PURCHASES.

Within the confines of your own State there are ample facilities for buying right. I say this because, in the first place, an enormous development has been in progress in jobbing stocks for the past quarter of a century, bringing them up to the point where they are fully adequate to local demands.

Second, because no commercial institution out of the State can be in the very nature of the case so keenly interested in your success as the jobber right here, who, like yourselves, is amenable to the laws of and a part and parcel of this great Commonwealth of which we are so justly proud.

* * * *

Let me hammer into a few sentences what I think about selling:

1. Advertise judiciously.
2. Insist on affability, from the head of the establishment to the lad who runs the delivery wagon.
3. Make no distinction in treatment between the meanest and best customer on the books.
4. Never let your personal trouble affect your trade manners.
5. Know the personal character of every customer and adjust your methods to his case.
6. Spend as much time as possible near the door of your establishment.
7. Remember that a customer neglected is often a customer lost.
8. Be even tempered. "The same yesterday, to-day and forever."
9. Do not sell just to be selling. Sell with a view to collecting.
10. Keep at job counter, and, when your buying judgment is at fault, put that article on that counter.

COLLECTING.

Any man of moderate ability can buy right. Any man of mediocre accomplishment can sell goods, but the merchant who in his business education has failed to appreciate the importance of acquiring both the art and the backbone to collect his bills properly is still on the off side of success and always will be until he gets right on this simple but extremely important function of the business.

* * * *

Briefly stated, the situation is this: If the manufacturer must pay his banker interest on borrowed money, to enable him to place in the hands of the jobbers such a volume of merchandise as will meet the natural demand of trade, and in turn the jobber must borrow to pay the manufacturer, and you must borrow oftentimes from the jobber, if not money, goods which are equivalent, and pay interest thereon, why is it not equitable and just to carry the proposition to its logical conclusion and charge interest to the farmer on every dollar on the books that has passed the due date—viz., sixty days from the date of purchase, note or no note? Bear in mind the fact that, although you have put the farmer's account into a note, this does not make the interest charge any more just, the obligation exists in the open account as fully. Your note, however, is a very good medium of collection, as it establishes the debt beyond dispute and make its collection easier. Now let me lay down the following principles in regard to collections:

1. The ease or difficulty with which you collect will depend largely on how you educate your debtor.
2. Make him understand that you expect him to pay just as much as you expect him to buy.
3. Be prompt in rendering statements of your monthly accounts.
4. Keep your books so you can give him his balance any time of day or night.
5. Do not approach your debtor in an apologetic fashion; let him make the excuses.
6. Never let the loss of trade deter you from collecting just debts.
7. Collect just as pleasantly and persistently as you sell.

H. D. Final, sales manager for the Marshall, Wells Hardware Co., Duluth, then briefly addressed the meeting.

R. A. Kirk's Address.

R. A. Kirk, president of Farwell, Ozmun, Kirk & Co., St. Paul, spoke substantially as follows:

He urged the members to push the sale of special brands as a valuable means for competing with catalogue houses, because such special brands are never seen in retail mail order catalogues, and for that reason they can be sold at better profit than is possible with standard manufactutrers' brands. * * * The reason that you throw away your profits when the market advances is because you are afraid the other fellow will do it, and one of the greatest advantages of this association is that it helps to stiffen up the backs of members so that they will adhere to legitimate prices, and secure legitimate profits.

* * * *

On the subject of catalogue house competition, he explained how the Joint Catalogue Committee had been able to bring the manufacturers into line only because its members knew and could declare that the retailers, through their State organizations, were squarely back of them. The latest move of the catalogue houses was to try to convince the consumer that he was being robbed in order to pay traveling salesmen their salaries and expenses, and that traveling salesmen were an unnecessary expense. While it was entirely possible for the jobbers to adopt the catalogue system for selling to the retailers if they wished it, instead of sending out traveling men, he gave many reasons why the present method was to the advantage of the dealer.

F. H. Young, general sales agent of the Hackett, Walther, Gates Hardware Co., St. Paul, read a paper on

Traveling Salesmen,

which we condense as follows:

It is no accident or series of accidents that places a man in the class of men who are spoken of as successful salesmen. At the age of 16 or 18 years a young man makes his choice of the business he wishes to follow, and secures a position in a Hardware jobbing house, in which his first three or fours years' duties will consist of laying out orders. If he is punctual, his records show it; if he is rapid, another record shows that; if he is accurate or the reverse, that, too, is shown. At the end of four years he has either made himself a candidate for promotion, or has shown that he is not fitted for that development. After that he has still from three to five years' training to undergo. After a time he is permitted to wait on the trade, and, by and by, a salesman is needed, and if he is selected he has reason to be proud, for this is a guarantee that he has earned his employer's respect. But he has still a post graduate course to take. He who would survive must be made of steel, must have a physique which will thrive on exposure and hardship, and must have a disposition which would enable him to be cheerful under all circumstances, whether good or bad. He must be able to bear bitter disappointments without complaint. He must resist temptations to do things which would incapacitate him for performing his work in the best possible manner—temptations not hard to resist when surrounded by the influence of the family and home, but which become very real to a young man when removed from those influences. If he avoids all these dangers, maintains a high average of effort, and practices the strictest honesty in all his dealings, he will within a few years be known as a successful salesman.

From the time he first makes his appearance he is worthy of your regard, and if he stands the pace for a time he deserves your respect. He is a picked man with qualifications far above the average. Let us give him his just dues. While the life of a salesman has its disadvantages, it also has its advantages. He knows that his position is due to his merit and ability, and this gives him a feeling of confidence in himself that cannot prove otherwise than comfortable. He lives a broad existence, and meets people from every walk in life, and soon learns to believe in the brotherhood of man and to appreciate the sincerity of others, no matter how much their views may differ from his own. Such a man makes friends, and he who has many friends is happy.

* * * *

Other addresses were delivered by C. H. Conner, of the Fuller-Warren Co.; W. J. Brown, representing Deere & Webber, and Thomas Duffy.

A LETTER FROM PRESIDENT BOGARDUS.

President Bogardus, of the National Association, who was prevented from attending the convention by illness in his family, sent an address, which was read by Mr. Davis. In concluding his letter, Mr. Bogardus said: "The time for action has come. With the cordial support of the jobbers and the good will of the manufacturers we stand in our own light if we fail to grasp the situation. It is up to the retail dealers to seize the opportunity and win a lasting victory over our common enemy."

The Press.

R. R. Shumann, of the *Iron Age*, addressed the convention. E. L. Miller, proprietor of the *Duluth Trade News*, delivered an eloquent address. Minnesota, he said, had enjoyed the honor of having the largest per capita consumption of Hardware of any State in the Union, and he explained the reason for this in that while some States were largely agricultural, largely industrial, or largely maritime or mining, Minnesota was in a position where its sources of wealth were divided between all these and more. It was great in agriculture, but it was great also in its mineral resources, in its timber and lumber industries, in its fishing interests, and was a great resort for sportsmen and pleasure and health seekers from all over the United States. These widely diversified interests brought trade to the Hardwareman.

Election of Officers.

The following officers were chosen for the ensuing year:

PRESIDENT—A. T. Stebbins, Rochester re-elected.

VICE-PRESIDENT—George M. Evenson, St. Peter, re-elected.

EXECUTIVE COMMITTEE—Three-year term, W. L. Tomlinson, Le Sueur; C. F. Ladner, St. Cloud; J. F. McGuire, St. Paul. Two-year term, F. W. Lucas, Litchfield.

A banquet was tendered to the association at the Spaulding Hotel by the jobbers of the State of Minnesota, the arrangements being in the hands of a committee consisting of E. A. Moye, George E. Wells, H. D. Final and B. W. How.

E. L. Millar was toastmaster. A. T. Stebbins, the president of the association, responded to the first toast, and voiced the thanks and appreciation of the members of the association for the cordial hospitality with which their stay in Duluth had been accompanied.

Jesse Gregg, of Nicols, Dean & Gregg, was asked to respond to the toast, "The Ladies," despite the fact no ladies were present.

J. Frank King gave an address on commercialism, embellished with anecdotes and character sketches.

W. E. Davis, editor of *Hardware Trade*, of Minneapolis, delivered a finished address on "Opportunity."

Judge Page Morris delivered an address on "Character in Business."

W. S. McCormick, City Comptroller, discharged a gun fire of good stories.

J. E. O'Brien, of Crookston, related the story of the birth and early struggles of the Minnesota State Association.

THE VISIT TO ZENITH FURNACE.

On Friday morning the members of the association were taken to the new Zenith Blast furnace at West Duluth. They were also shown the operation of the Bi-product Coke Ovens, where Benjamin I. Davis, the superintendent of construction, explained the means by which tar and ammonia were extracted from the gas and reduced to commercial form.

Digitized by Google

FRIDAY'S EXECUTIVE SESSIONS.

On returning from the trip to the Zenith Furnaces, the members assembled in the hall for the executive session. President Bogardus, who was to have delivered an address, was represented by a confidential communication devoted largely to a discussion of the catalogue house question.

Fred. Mason, secretary of the State Grocers' Association, delivered an address.

F. E. Muzzy, of the J. Stevens Arms and Tool Co., delivered an address reciting a history of the determined contest which his company had waged for maintenance of prices. His paper also contained some good, direct language about the duties and responsibilities of the dealers themselves.

The last session of the association convened at 2 p. m., and, like the preceding one, it was executive. It was decided that the next meeting of the convention should be held at Minneapolis, and that a decision as to the date and headquarters was left to the Executive Committee.

DELEGATES TO THE NATIONAL CONVENTION.

The following delegates will represent the Minnesota State Association at the National Convention, to be held at Minneapolis: A. T. Stebbins, Rochester; C. F. Ladner, St. Cloud; James E. O'Brien, Crookston; J. F. McGuire, St. Paul; C. H. Casey, Jordan; Leon C. Warner, Minneapolis; M. S. Mathews, Minneapolis.

THE AMERICAN HARDWARE CORPORATION.

The annual meeting of the stockholders of the American Hardware Corporation was held at the office of the Russell & Erwin Mfg. Company, in New Britain, Conn., on Tuesday, February 28. The capital stock was increased from $5,000,000 to $7,500,000. It was voted to absorb the Corbin Cabinet Lock Company. The following directors were elected:

Philip Corbin,	Howard S. Hart,
Andrew Corbin,	Sylvester C. Dunham,
Charles M. Jarvis,	Frederick P. Wilcox,
Andrew J. Sloper,	John H. Whittemore,
Charles H. Parsons,	Charles Miller,
Charles Glover,	George W. Corbin.

The directors elected the following officers:

PRESIDENT—Philip Corbin.
FIRST VICE-PRESIDENT—Charles M. Jarvis.
SECOND VICE-PRESIDENT—Howard S. Hart.
TREASURER—Andrew J. Sloper.
ASSISTANT TREASURER—Charles H. Parsons.
SECRETARY—Charles E. Wetmore.
ASSISTANT SECRETARY—Charles B. Parsons.

The annual meetings of the stockholders of the constituent companies of the American Hardware Corporation were held in New Britain, Conn., on Monday, February 20, and resulted in the choice of the following list of officials and directors:

P. & F. CORBIN.

PRESIDENT—Philip Corbin.
FIRST VICE-PRESIDENT—Charles H. Parsons.
SECOND VICE-PRESIDENT AND TREASURER—Charles E. Wetmore.
ASSISTANT TREASURER—Edward L. Prior.
SECRETARY—Albert N. Abbe.
ASSISTANT SECRETARY—Charles B. Parsons.
DIRECTORS—Philip Corbin, Andrew Corbin, John B. Talcott, Charles Miller, Charles H. Parsons, Charles Glover, Charles E. Wetmore, Charles M. Jarvis, Albert N. Abbe.

It will be noticed that Andrew Corbin retires as first vice-president and Charles H. Parsons is promoted to this position, and Charles E. Wetmore, formerly secretary, has been advanced to the position of second vice-president and treasurer.

THE CORBIN CABINET LOCK CO.

PRESIDENT—George W. Corbin.
FIRST VICE-PRESIDENT—Charles M. Jarvis.
SECRETARY—W. H. Booth.
ASSISTANT SECRETARY—George L. Corbin.
TREASURER—C. H. Baldwin.
DIRECTORS—Philip Corbin, Andrew Corbin, John B. Talcott, Charles Miller, George W. Corbin, Darius Miller, Charles Glover, Charles M. Jarvis, C. H. Baldwin.

The changes here are the advancement of George W. Corbin to the position of president, Philip Corbin withdrawing from this position.

THE CORBIN SCREW CORPORATION.

PRESIDENT—Charles Glover.
VICE-PRESIDENT—Clarence A. Earl.
TREASURER AND SECRETARY—Theodore E. Smith.
ASSISTANT SECRETARY—William J. Surre.
DIRECTORS—Philip Corbin, Charles M. Jarvis, Charles Glover, Howard S. Hart, Theodore E. Smith, Charles H. Parsons, Benjamin A. Hawley, Clarence A. Earl, Andrew Corbin.

THE RUSSELL & ERWIN MFG. CO.

PRESIDENT—Howard S. Hart.
VICE-PRESIDENT—Benjamin A. Hawley.
TREASURER—Isaac D. Russell.
ASSISTANT TREASURER—Joel H. Van Newkirk.
SECRETARY—Theodore E. Smith.
DIRECTORS—Andrew J. Sloper, Frank L. Hungerford, Charles E. Mitchell, Howard S. Hart, Benjamin A. Hawley, Isaac D. Russell, Philip Corbin, Charles M. Jarvis, Joel H. Van Newkirk.

THE CORBIN MOTOR VEHICLE CORPORATION.

PRESIDENT—Philip Corbin.
VICE-PRESIDENT AND TREASURER—Maxwell S. Hart.
ASSISTANT TREASURER AND SECRETARY—Paul P. Wilcox.
DIRECTORS—Philip Corbin, Charles M. Jarvis, Howard S. Hart, Charles Glover, Paul Peck Wilcox, M. S. Hart, Andrew J. Sloper, Robert C. Mitchell, George W. Corbin.

The changes in the Corbin Motor Vehicle Corporation are important, as Maxwell S. Hart, who has for a number of years had charge of the rolling mills of the Stanley Works, takes the position of vice-president and treasurer and will be the active head of the corporation.

HACK SAW BLADES.

By Joseph Campbell.

The hack saw blade to-day, while one of the smallest tools in machine shop practice, is, nevertheless, an important item in every shop, whether it be the small repair shop or the large manufacturing plant where hundreds of operatives are employed.

First in importance is the question of its being a great saving in labor, provided the hack saw placed in the hands of the operative is of undoubted quality and is mechanically perfect in regard to the cut of tooth, its set, and above all, to the temper of the blade.

In too many plants the extra expense incurred by the use of thin, brittle blades is overlooked because the item of saws is considered too significant to demand the personal attention of the superintendent of a large plant where the investment in plant and machinery runs up into the hundreds of thousands, yet the year's consumption of hack saws is an expense item of considerable proportions when considered by itself, and in every machine shop both time and money may be saved by giving it some attention.

The "Sterling" hack saw has been evolved after years of careful experimenting and study, and it has reached the stage where it is as mechanically perfect as it is possible for a blade to be. The steel employed in its manufacture is made from private analysis, and uniformity of quality, annealing, etc., is absolutely guaranteed by one of the largest steel mills in the world.

One of the best guarantees of the quality of Sterling hack saw blades is found in the fact that these blades are shipped in lots of from 100 to 200 gross each, consigned to London, Manchester, Liverpool, Leicester, Glasgow, Dublin, Belfast and other points in Great Britain, thus fulfilling the old adage, "Like Shipping coals to Newcastle," when these blades are sent right into the heart of the greatest steel producing center in England.

Sterling by name they are also of sterling quality and give sterling service, and as they are made from heavier gage steel and wider than other brands, having likewise a high temper without brittleness, they are thus more serviceable and last longer than thinner, narrower blades. Besides doing more work they work more satisfactorily, inasmuch as every cut they make is straight and true, thus obviating the necessity of "trueing up," and the consequent loss of time and material involved in this operation.

One of the largest consumers in the United States, who has tested every blade on the market, has decided to use Sterling hack saws exclusively, and repeat orders are received from this corporation every month in lots varying from 75 gross to 125 gross in each requisition, and we are sure that every machine shop ought to secure Sterling hack saw blades for its workmen, if the value of time and saving of material, as well as the money saved in this most important expense item is given due consideration. Sterling hack saw blades are manufactured by the Diamond Saw and Stamping Works of Buffalo, N. Y., and are sold exclusively through the jobbing trade; the manufacturers will cheerfully send samples to any machine shop interested in having its local dealer handle the best blade on the market.

RETAIL HARDWARE DEALERS' ASSOCIATION OF PHILADELPHIA.

At the annual meeting of the Retail Hardware Dealers' Association of Philadelphia, Pa., held at its warehouse, 420 Commerce Street, on Wednesday evening, February 8, the following officials were chosen for the ensuing year:

President, N. C. Engle, 1001 Ridge Avenue; Vice-President, G. R. Mitchell, 1826 Ridge Avenue; Secretary, F. A. Mitchell, Twentieth and Callowhill Streets; Treasurer, E. W. Richards, 2029 Frankford Avenue; Directors, C. W. Flood, T. C. Ulmer, A. L. Agolf, F. Berlin, John Orr, A. Kaiser, Geo. E. Driver, Paul J. Devitt; Purchasing Committee, F. A. Mitchell, chairman; N. C. Engle, Tools; E. W. Richards, Building Hardware; Geo. R. Mitchell, Electrical Supplies; Paul J. Devitt, Cutlery; John Orr and Geo. Driver, House Furnishings; Superintendent of Warehouse, H. M. Boyle; Bookkeeper, Aubrey M. Hancock.

INDIANA RETAIL HARDWARE DEALERS ASSOCIATION

The Sixth Annual Convention of the Indiana Retail Hardware Dealers' Association was held at Indianapolis on February 21st, 22d and 23d. The sessions were held in the Denison Hotel, and as the association has added to their membership nearly 200 members during the past year, it bids fair to prove the record convention of the series in point of numbers and enthusiasm.

Charles Smith, of the Charles Smith Co., Chicago, delivered some interesting remarks on

Combination Heating.

He spoke as follows:

You men in the Hardware business all know that you are up against a number of snags, and the snags are rubbing you pretty hard. In almost every article you handle you are in competition with the catalogue houses. The heating business is the only thing they don't touch you on, and it is about the only thing that is left to you on which you can get a fair profit.

Combination heating is something that fifteen years ago was not talked about or known in the United States. All the difference between indirect steam and indirect water and a combination of hot air and hot water is this: That with the steam and hot water you carry the heat over to the air, and in the other you bring the air over to the furnace. That is all the difference there is in it, and there is not a steam fitter in America but knows and admits that the best way to install a steam or hot water plant is by indirect radiation. I want to make this assertion provided you have a properly constructed furnace.

There is no other way of heating a residence as satisfactorily as with a furnace, provided the furnace is properly constructed, of sufficient size and properly installed. But a furnace has its limitations. Where the distance is too great for a furnace to reach, then the combination of hot water in connection with the hot air overcomes the difficulties caused by the limitations of the furnace.

I have not touched upon the matter of economy. A saving of thirty per cent in fuel is made by a combination. Not only this, but a combination is more durable than straight steam or water, and it virtually gives the owner two systems, for whenever the hot water part of the system becomes defective, the warm air part can still be used.

Mr. Smith then mentioned an instance down in a little town in Indiana where a gentleman had built a fine residence and desired to put in a combination plant, but after discovering it would cost him $600, felt some reluctance about incurring the expense, as he had already expended a large amount of money in other ways. Mr. Smith showed him that with an expense of $350 he could heat the principal rooms with hot water and the balance with hot air, which he said proved very satisfactory to the owner and produced almost as much profit to the contractor as if he had put in the plant originally planned to cost $600.

It is the easiest thing in the world to get a man to fall in with your line of argument when you can save him $250 by doing so.

Secretary Corey addressed the convention, referring to the good work being done by the numerous Retail Hardware Dealers' Associations throughout the country, in the course of which he remarked that Indiana had now one of the best and strongest associations in the country. He dwelt upon the fact that the National Association now comprised eighteen States, with over 5,000 members, and with harmony all along the line. He told how the National Jobbers' Association and the Hardware Manufacturers' Association had joined issues with the National Retail Hardware Dealers' Association, and that the three were working in unison. He stated that 600 Hardware manufacturers were now in accord and were assisting in controlling catalogue house competition.

On Which Item Does the Success of a Retail Hardware Business Hinge? Is It Quantity Buying, Discounting Bills, Advertising, or What?

BY A. N. SHIDLER, SOUTH BEND, IND.

In its broadest sense, success, whether it be mercantile or professional, depends on an intelligent and decisive disposition of a subject when presented. If I ask my attorney, "Is it lawful in Indiana to file a lien on property sixty-three days after the work on the house is practically completed?" and he says "No, it is not," I

A. N. SHIDLER, PRESIDENT.

E. M. BUSH, EX-PRESIDENT.

am satisfied; if he says "I am not quite sure, but will telephone you at 2 p. m.," I am satisfied; if he says "Why, yes, I think probably it would stick," I am not satisfied and have no confidence in him. He has made no decision and given me no information, not even an opinion. When I show Mr. Black a cast iron hammer for twenty-five cents, he says "This is guaranteed?" I say "No, sir, it is cast iron and you may break it in driving a 30 D nail." If Black takes the hammer, he will never return it if it breaks. If I had said in reply to the same question, "Well, I think you will find it all right," three out of six would return the hammer if broken. There is no better time to settle this return problem than at the time of the sale, and is so easy to prevent annoyance by being decisive.

Business success depends on the following items. All are of importance and in my estimation the order in which they are named. Attentiveness to business; Buying, which is divided into adherence to certain lines, selection, quantity, quality, price and keeping up stock; Marking of Goods; Credits and Collections; Display, including windows; Advertising and Cash Discounts.

This I consider of most vital importance. No battles have ever been won without a leader. If you say to your help and the public by your actions that you are at the store at 7 a. m., be there and stay there unless business calls you away (and too many men are inclined to think business calls them away when it does not), then by all means leave instructions where to be found and when you will return, then your patron knows when to call to do business, and the traveling man, who is your best friend, can depend on seeing you when he calls. You cannot drive fast horses and automobiles and conduct a Hardware business.

Buying, whether for a large or small business, deserves more attention than is generally contributed to it.

A LINE OF GOODS SHOULD BE CAREFULLY SELECTED,

giving close attention to the size, different qualities and comparative prices of a similar line, and when the line has been deter-

Digitized by Google

mined on, then buy just as much of this particular manufacturer's make as is consistent. By this I mean, buy your four and fifteen dollar mower from the same manufacturer and when you run out of a size, don't buy the same size of some other make because some one offers it for sale, but send in a mail order and establish a business on this line. You know then what you are selling, your clerk knows what he is selling.

Apply this to your entire purchases and use your best judgment in selecting quality as well as quantity. With the present opportunities to buy goods and facilities for transportation, I would say most emphatically, buy in small quantities and often. The goods are always bright and fresh and with the same investment you are able to show a much larger variety.

As to quality, I cannot express my views better than in the words of E. C. Simmons, "Recollection of quality remains long after the price is forgotten." The old adage, "Goods well bought are half sold," is true, and while it means much more than the mere price paid, the price should be given close attention and the way to secure the best price is to follow the foregoing suggestion and confine your purchases of a line to one manufacturer or jobber, and if his books show at the end of the year that your purchases have reached a certain amount, you are entitled to a rebate or better price for the ensuing year.

M. L. COREY, SECRETARY.

WE KEEP UP STOCK

in a general way—namely, by using the want book and by keeping everlastingly at the help to record what they know is short. To keep closer tab on the fellow who forgets to use the want book, his number is placed before each item which he records, and if No. 6 never discovers any goods short, the want book indicates it. In addition, if we buy Tinware, Wire Goods, Granite Ware, Cutlery, etc., we begin with page one in the catalogue, and, when through, we have noted every item the manufacturer makes as well as having noted the amount of every item on the shelf and attention has thus been given to every item we carry as well as every one we should add. Do not always wait for the salesman. It requires but a few moments to list the stock of nails, shoes, wire cloth, or wheelbarrows, as well as the paring knives, 22 shorts, and fishhooks, a few more moments to make up the order and the goods coming. You cannot expect to increase sales and meet competition at home and from catalogue houses if you do not have the stock. It is not always the price that sells the goods or establishes the reputation, but if you have taught the public to say, "You will find it at Smith's," your business is on Easy Street."

A great deal of

CARE SHOULD BE TAKEN IN MARKING GOODS.

Always keep in mind to mark them at what they will bring regardless of the percentage of profit. No more serious mistake can be made than to decide that this line must carry this percentage of profit and that line another. Goods should be marked just as soon as opened and then place the cost and selling price on every item, even to every pocketknife and the blade of each carver or butcher knife. Then you know that the new man is not selling a fifty cent pocketknife for twenty-five cents because it might be lying on a twenty-five cent box.

CREDITS AND COLLECTIONS

of any business deserve the most careful attention. You must learn to say "No" when there is a question about the customer's ability or desire to pay. Better have him angry before he gets the goods, for he surely will be afterwards. It is so easy for men to get cross when they are not inclined to pay.

On the first day of every month our bookkeeper lays a statement of every ledger account on my desk. These are assorted; part are mailed, some are handed to the collector, who is one of the clerks, who presents it in person; to some are written a request and others a demand; others are telephoned, and we always follow up the promises. In making an account we invariably arrange for a time when it is to be paid, take the party's exact name and address, and if he does not meet it as agreed we remind him of it through the mails. With this method, which has been followed two years, bad accounts have been decreased very materially.

THE PROPER DISPLAY OF GOODS

is the best advertising I can suggest. Goods must be arranged in classes and sizes, each class graded, and the smallest always nearest the entrance, with the larger in the rear; then all may be seen at a glance by the person entering.

We are at a loss to know why the department store and nickel and dime store have taken so much of our business. It is not because of the price or the stock, but because they place nearly every article on a table. Then it is kept well dusted and systematically arranged, with the price attached in plain figures, and the table becomes the silent salesman; the clerk merely takes the order. The average Hardwareman puts his on the shelf and when called for reluctantly digs it out.

An advertising value can hardly be placed on the window display It is, if you please, a constant expounder of the firm, its management, stock and general character. A window filled with vises, horse pokes, a few granite kettles, a board of pocketknives and a double-barrelled shotgun would attract the attention of neither the mechanic, farmer, small boy, housewife, nor the sportsman. The window should be changed and washed once a week. A certain day should be set apart for it, and let the help understand to do nothing outside the necessities until this is done. Begin it early in the morning and do not keep the window torn up in the afternoon.

No business man can afford not to take advantage of the cash discounts. While the amount of discount will very nearly deliver the goods and is at the rate of 12% on general Hardware, when money is worth 6%, this is not all.

YOU ESTABLISH A CREDIT

which nothing else can give. The unpaid bill file is not filled up and you know just what you owe at all times and thus lighten the burden of your business. But you say you have no money to do this. Then borrow $1,000 for sixty days and give careful attention to collecting and buying, making quantities just as small as possible. The quantities of your purchases must be regulated by your ability to pay.

WEDNESDAY MORNING SESSION.

After calling the convention to order, President Bush appointed the following committees:

Convention Committees.

RESOLUTIONS—M. L. Lewis, Marion; Mr. Townley, Terre Haute; Mr. Weaver, Ligonier; Mr. Creed, New Albany; Mr. Heidt, Oakland City.

PRESS—Mr. Jamieson, Lafayette; A. M. Smith, New Ross; Mr. Cope, Kokomo.

AUDITING—O. E. Lang, Mishawaka; S. L. Ocher, Roann; W. L. Hubbard, Scottsburg.

NOMINATING—C. A. Ellis, Carlisle; Charles New, Bourbon; Albert De Prez, Shelbyville.

BY-LAWS—Mr. Gardner, Monticello; Mr. Scott, Muncie; Mr. Price, North Liberty.

GRIEVANCE—Charles Frame, North Manchester; Mr. Shanklin, Frankfort; Mr. Slater, Argos.

President Bush then read his annual address.

President's Annual Address,

from which we make a few extracts:

Presidential Address.

BY E. M. BUSH, EVANSVILLE, IND.

I can with pleasure congratulate our association upon its progress during the past year, especially upon its increased membership—in round numbers 150—making us now about 600 strong. Very few have fallen from the ranks, which proves that the up-to-date man of to-day knows a good thing when he finds it.

A NOTABLE FEATURE OF THIS YEAR'S INCREASED MEMBERSHIP

is that it brings to us many who have just embarked in business or who have moved into new and commodious quarters. That is the kind of man who makes a good member—the man who is going ahead, reaching out, growing. He wants everything at his command which will better equip him for his business life. He recognizes his need of this association and that it is his privilege as well as his duty to join our ranks. Six hundred men of push and purpose mean something; 600 Hardwaremen alert up to date, banded together in their push and purpose means power—power for the advancement of their own business interests and the interests of the communities in which they live.

* * * *

Our trade papers are a great factor in our education. Rip Van Winkle is too fast asleep; Mr. Indifference doesn't care enough, and Mr. Selfish is a little too stingy to pay for, read and digest these papers. So much do I believe that our associations and our trade papers are the great factors in our development and training to the level we must reach to successfully combat the adverse influence in our business life; so much do I believe in these factors of success, that as your retiring presiding officer I would rather leave among you as the

Digitized by Google

impress of my efforts in your behalf growth in the direction of these two great factors for good than in any other direction. And just so far as I have done this in just so far has my labor among you made for success.

It is unnecesasry for me to give you a resume of our year's association work; that comes to you from other sources. But of a few important steps I have a word for you.

* * * *

ONE CAUSE OF THE FORMATION OF THIS ASSOCIATION,

as you well know, was the aggression, the poaching, by jobbers upon the legitimate fields of the retailer, selling in many cases directly to the consumer and to dealers in other lines goods which belong to the Hardware line. Were this small beginning the end, who would complain? But before any other than himself is aware of it that outside dealer has added one item after another, until he has a department of profitable Hardware, which he buys to sell a little lower than the legitimate dealer and so advertise his other lines. This is delicate ground I tread. The defense is made that these firms will handle these lines; that if not sold by the nearby jobber there are other sources of supply. As Hardwaremen we do not want to be picayunish, narrow minded; we do not register a very vigorous objection, but does it encourage a dealer to increase his business with the firm whose private brands of goods he finds advertised and displayed in the windows of department stores and pawnbroker shops?

* * * *

The Hardware retailer is also annoyed and hampered by those jobbers who sell staple and seasonable goods to grocery stores, building Hardware to planing mills, etc. All these things curtail the business of the legitimate Hardware retailer, the jobber's best customer, who has a just right to protest and seek to stem the growing evil. If such houses must have and will sell such goods let them be forced to purchase from others than Hardware jobbing houses, which insist that the manufacturer maintain a differential in their favor and against the interests of the legititmate Hardware dealer, yet leave him to meet and combat this outside competition, which the jobber himself has assisted in building up.

The only Executive Committee meeting since our last convention was called in July at the Grand Hotel in this city to consider the question of insurance, which is a matter of such importance that all the officers of the association were summoned, and all were in attendance except Mr. Hall, who was ill. As you are aware, it is exceedingly difficult to

FORM A MUTUAL FIRE INSURANCE COMPANY IN INDIANA

because of the $50,000 premiums. These premiums are represented by the notes of the membership applying for insurance to the amount of $40,000 and $10,000 in cash. Those present last year will recall the effort made during the convention to secure pledges for insurance. This work was vigorously followed up after adjournment by our secretary, but every effort failing to bring us in sight of success, your officers decided it was useless to push the matter farther at that time. Since, in considering the indorsement and recommendation to our members of one or more mutual Hardware fire insurance companies already in existence, the committee could come to no unanimous agreement, and we adjourned without action, referring the whole matter of insurance to this body now assembled, which must decide as to future attempts to organize an insurance company of our own. I believe I express the unanimous feeling of your officers when I say we question the wisdom of pushing the matter farther.

There are now in successful operation several mutual Hardware fire insurance companies which can write all the insurance our members will take, and is it not better to give our insurance to such companies and add our strength to theirs than to incur the expense of keeping up an insurance company of our own? Will not our savings upon premiums be greater? Is it not better to have a few strong companies than a multiplicity of weaker ones? None of these mutual companies will write a policy unless the applicant is a member of a State association, and we thus get the same results as though we had an insurance company of our own. I am informed that our membership is now carrying almost $750,000 insurance in these various mutual companies. Two or three of our members who have had policies with them have had fire losses the past year, which have been promptly and satisfactorily adjusted—more promptly than by old line companies. It is left for you to decide this matter.

While many other matters in association work have required our attention and enlisted our interest, the most absorbing topic since last Spring

HAS BEEN THE CATALOGUE HOUSE QUESTION,

this paramount cause for the formation of retail Hardware associations, the burning question in all discussions.

* * * *

I deem this a proper time and place to set aright certain erroneous and mischievous ideas which have crept into the minds of some contributors to the trade papers, whose letters, following Mr. Norvell's in *The Iron Age*, I read carefully. Remember, all I say on this subject comes from me as a retail merchant, a member of your association, not as a member of this Joint Committee, and for my words I am individually responsible. The idea which I consider especially pernicious is that of a boycott in connection with this matter.

NO GREATER MISTAKE COULD BE MADE,

for at no meeting that I have ever attended has such an idea ever been discussed. Not for one moment would it be tolerated by a body of intelligent Hardwaremen.

* * * *

When a manufacturer, utterly indifferent as to the price at which his goods are to be marketed, sells to catalogue houses, need he be surprised, has he any right to cry "boycott," when jobber and retailer cease to sell his goods which both must handle without profit? Profit in selling goods is the life blood of both wholesaler and retailer and if to keep this blood in his veins the merchant must needs change food and climate, who shall condemn him? We as merchants resent the imputation of boycott and urge that the distinction between it and self-preservation be understood and proclaimed.

* * * *

JOBBERS' PRIVATE BRANDS

have recently been receiving considerable attention through the trade press and convention discussions. It is "frenzied merchandising" for manufacturers to sell their established brands to cataloguers, who use them as leaders to exploit goods with which the public is not so familiar. The jobber in his turn is compelled to have private brands, and the retailer, glad to find goods not cut to death by the mail order houses, accepts their sale, advertises and pushes them, and there are many merchants who will testify that this brings good results and perfect satisfaction to customers. Of course no merchant could afford to sell any old private brand simply to be enabled to make a large profit. The goods must have merit before he can afford to touch them. More and more is he being forced into the use of private brands, and I hope to hear this subject thoroughly discussed by the membership.

* * * *

The retailers of this country are to be congratulated upon the fact that these three associations—the manufacturers', the jobbers' and the retailers'—have been brought into closer and more friendly relationship.

T. J. LINDLEY, VICE-PRESIDENT.

GREATER PROGRESS HAS BEEN MADE

in this during the past year than ever before. The retail members of the Wholesale and Retail Hardware Joint Committee were the guests of the National Hardware Association at Atlantic City last November, and with the jobbers were invited by the manufacturers into an open meeting for the discussion of subjects in which these three factors are interested. The Hardware Manufacturers' Association and the National Hardware Association have received from us invitations, which they have accepted, to send representatives to our national meeting in Minneapolis next month. This fellowship and affiliation cannot but be beneficial to all.

An address was then delivered by T. James Fernley, secretary-treasurer of the National Hardware Association. He said in part:

I am pleased to bring to you the fraternal greetings of the National Jobbers' Association of the United States, composed of 190 jobbers in all parts of the country—from coast to coast and from Canada to the Gulf of Mexico—an organization which is growing in influence largely because of the formation and maintenance of the Retail Hardware associations of the United States.

I want to thank you gentlemen of the retail interests of the country—Indiana and elsewhere—for having aided our association in the building up of this membership. I really believe that the presence of the gentleman who has just spoken to you here and his membership in the National Hardware Association are due more to the influence of the retail merchants of the country than probably any other one cause.

I come to you and say to you that your interests and our interests are interwoven; that one cannot suffer without the other being affected.

Mr. Fernley then referred to the proceedings of the Catalogue House Committee of the National Jobbers' Association at Atlantic City, and said that they had had the inside workings of this Joint Committee, as reported at Atlantic City, reprinted and issued in pamphlet form, and a copy would be furnished to the delegates present.

WEDNESDAY AFTERNOON SESSION.

The meeting was called to order by the president, when the report of the secretary, M. L. Corey, of Argus, was read, as follows:

Secretary's Report.

Report of M. L. Corey.

M. L. Corey, secretary-treasurer, presented the following annual report:

Digitized by Google

In many respects the past year has been the most satisfactory one in our association history. We have added more new members; we have had less complaints; our members have manifested greater interest and have given more assistance. Relations with manufacturers and jobbers are friendly, and there is a growing disposition to recognize and inquire into conditions that affect the retail trade. We have good reason to feel encouraged and can face the future full of hope and expectation.

Other States report substantial progress and a record breaking attendance at conventions. There is general harmony and individual desire to render loyal co-operation whenever called upon.

We meet again, five years old. Nearly all of the firms that voted at Evansville in 1900 to adopt our present name are with us yet. A few dropped out, but have since rejoined. A reliable list of retail Hardware dealers of our State is hard to maintain and this information can best be furnished by our own members, and if some one would report from each county the changes or items that affect the Hardware line the information would assist the secretary in doing better and more effective work.

We take pleasure in acknowledging the assistance given by many of the Indiana traveling men. Almost universally they have advocated our cause as being worthy of support and indorsement. One year ago we voted to receive these camp followers as honorary members, and while this was a new feature and no special effort was made to secure a large list, fifteen traveling men paid their dollar and have membership cards. Other States have adopted this feature and find it works well, and we recommend it to be continued and that the secretary be authorized to subscribe for the *Bulletin* for each honorary member. This will put our traveling men in position to talk association doctrine and results intelligently, as well as remove some of the friction sometimes resulting from indiscriminate selling. Up to the time of delivering this report 117 traveling men have paid their annual assessment at this session.

Some members have complained that not enough time has been given at conventions to discussions of trade matters. We have intended this year to give all a chance. Your officers are firm believers in the benefit of swapping experiences. This is your meeting, and the secretary has been authorized to take all the time that is needed in threshing out matters that may be brought before this convention. Many are here for the first time to-day, and we hope that all will feel perfectly free to express their opinions and bring up any question that you may desire discussed. In order to facilitate business the question box will be used, and you are all invited to patronize it liberally.

M. L. Corey, as treasurer, then submitted his report, which showed that a year ago there was a balance of $355.73; that receipts were $1,370; that the expenditures were $1,337.65, showing a balance on hand of $388.08.

T. J. Lindley, of Jeffersonville, then read his report as delegate to the National convention.

REPORT OF DELEGATE TO NATIONAL CONVENTION.

Sharon E. Jones, of Richmond, then read the following paper:

Does It Pay to Go Out After Business?

Going after business does not always imply searching for customers or business out on the road, but it may mean going after the customer when he calls at your store for something. I have seen men who posed as merchants or salesmen who could not sell to a customer who came into the store purposely to buy and the matter of quality or price did not enter into the case; but simply through failure to talk in the right manner at the right time they could not make the sale. So it pays first to go after the business in your own store when the customer calls. Many a customer has been driven away from the store by an incompetent clerk or a grouchy, dyspeptic merchant or salesman. And, fellow merchants, don't be too sure you are not guilty of such a thing. Complaints have been registered against several merchants of my acquaintance that I am sure do it thoughlessly.

* * * *

There are times when we have something special to offer our customers and it is impossible to see them personally or by representative quickly, as the case requires. We have used the telephone and telegraph and taken orders that would have been missed otherwise. The modern telephone is next to the personal call. You can talk into your customer's ear; he recognizes your voice and you his; you have the opportunity of approaching him. If you have his confidence your word over the phone is sufficient. If he be in the market and you tell him now is the time to buy and your price is right, you will likely get the order then and there.

Now that a large number of our customers have telephones in their houses and places of business it is coming to be a common method of reaching them. It costs on an average twenty-five cents to talk to a customer out of one's own home town, but the customer whom you call knows this and it impresses him as being important and urgent or you would not go to this expense. Of course this applies to the customer who is in need, or soon will be, of the particular goods you offer for sale at the time. I would not regard the telephone as a good medium for advertising or the finding of prospective buyers, especially among farmers.

* * * *

THE MAILS

are used, perhaps, more than any other method of selling goods, and this is done in different ways—viz., personal letters, general letters, advertising matter—and where this is well and judiciously done it has met with success. The catalogue houses use no other method, and show me the man who says they have not been successful to the extent they have been permitted to go. If this were not true the most vexing problem perhaps that confronts all retail dealers would vanish soon. I am not indorsing catalogue houses, but I do say that we would do well many times to be as persistent and explicit in going after business as they are. It is needless for me to say that it is not because they have the goods and the price that secures them the orders, but the making known of that fact to people. You may have the same goods and same prices or better goods and lower prices, but you fail to inform the people that you want to sell them to. The consequence is that the catalogue house gets the business by going after it, and I am afraid many of us are losing much business by going after the catalogue houses instead of going after the business.

* * * *

We find that personal letters do much good, and while not always order getters, they frequently are. The mail carries advertising matter and newspapers to any one who has an address in this part of the United States, and while such methods are seemingly overdone and money wasted thereon, it is the cheapest, and, when judiciously done, a good method of going after business; and regardless of how many methods you may have of going after business, this should be one of them.

There is absolutely no room for argument as to whether

ADVERTISING PAYS.

One need only look at the daily papers, magazines, circulars, etc., that are scattered broadcast, or inquire of the many advertisers as to whether it pays to go after business through the medium of advertising. Some of the largest and most prosperous concerns in the country never went out after business in any other way than by advertising. But notice how they do it. Catchy, to the point, often changed, in season, perpetual.

* * * *

I know I am speaking to more merchants who live in small towns than large towns, but many small towns have a newspaper, either daily or weekly, and recently I heard the owner of one of these papers say that he could not get merchants in his little town to advertise. They did not think it paid because of the smallness of the town. But the publisher got his advertisers from Richmond, Muncie, Indianapolis, and the consequence is these merchants were selling and shipping goods right into the little town at no better price than the merchant there could have sold them, but the people of his own town did not know the goods could be bought there.

Now, lastly, going out after business, either personally or by a representative: This, after all, is

THE METHOD THAT GETS THE BUSINESS.

Where the business will permit it the proprietor may do this more successfully than any one he could employ, and it should be done by the proprietor where conditions will permit, for the average customer would rather buy of the proprietor than of an employee. But in the larger towns this cannot always be done, for the buying and general management of the business depends on the proprietor, so that the salesman is employed to go out after business, and it has been the experience of some that the salesman can secure better prices than the proprietor. He may be "worked" as hard as the proprietor for a better price or rebate, but not having that authority he manages to land the order at his selling price, while the customer is often able to "work" the proprietor.

My experience and my observation have been that where a competent salesman has been sent out after business, whether it be to the farmer, manufacturer, contractor or any kind of consumer, he has met with success.

* * * *

THE TIME TO CANVASS

the trade for Spring goods is in the Fall; the time for Summer goods in the Spring; the time for Winter goods in the Summer. Why so far in advance? Because the average customer, especially among farmers, knows what he will need that far in advance, and if you are first to talk with him about it you find out when he will need it and if unable to sell it at the time you have him down as a prospective buyer for that article, and the next time you call you talk to him again about it or land his order for future delivery. This heads off the catalogue house, because the man will not buy from them in advance, for his money must go with the order. You have the advantage over your competitor because you are first on the ground. The chances are much in favor of the man who gets there first.

This method of going after orders is not confined to the farmers' trade. It can be used in almost every line. The fact is, this method is used by those from whom most of us buy our goods. We know that unless certain traveling salesmen called on us regularly some one else would likely get some of the orders, so that there are but a very few jobbers or manufacturers who do not call on the merchant regularly for business.

* * * *

F. E. Muzzy, of the J. Stevens Arms and Tool Co., delivered his address on

The Marketing of Well-Known Trade Mark Goods With Protection and Profit to Retailers.

Mr. Muzzy explained the position of his company and the manner in which they protected the retail dealers. He also touched on various subjects of interest to the members, such as mutual insurance, Parcels Post bill, etc.

A Mark of Appreciation.

A resolution was presented and unanimously carried presenting to M. L. Corey, secretary-treasurer of the association, $150 as a slight appreciation of the work done by him in behalf of the association.

The Question Box was taken in charge by Secretary Corey and a number of questions were thoroughly discussed.

WEDNESDAY EVENING.

The Banquet.

The banquet tendered the delegates by the manufacturers and jobbers of Indianapolis was a most enjoyable one. I. S. Gordon, president of the Indianapolis Saddlery Co., acted as toastmaster. N. A. Gladding, secretary of E. C. Atkins & Co., Indianapolis, welcomed the

RECENT TRADE PUBLICATIONS.

THE AMERICAN WINDOW SCREEN COMPANY, 404 Penna. Building, Philadelphia, Pa., have issued recently a pamphlet exploiting their product. The booklet contains illustrations, descriptions, etc., also some "Necessary Points to the Purchaser," which, if followed, will insure a perfect fitting screen. They have put on the market this season their new "American" adjustable sliding screen. They state they have spared no pains in trying to give the dealer in this, a screen that can be compared favorably with the best made-to-order screens. They are finished similar to mission furniture. A very convenient price list is given in the back of the book. Send for a copy.

THE THOS. J. ELY MANUFACTURING CO., Girard, Pa., have sent us a copy of their catalogue No. 12, an attractive pamphlet of 60 pages, descriptive and illustrative of their Hardware and Woodenware specialties. The book includes mop heads, carpet and clothes whips, horse pokes, saw handles, hay knives, carriage top dressing, anti-rattlers, wrenches, waffle irons, etc. Their improved Handy Thill Anti-Rattler is something new. No traps, lever, wrench, hammers or assistance required. It is inserted from under side of coupling without moving nut or bolt; can be attached or detached in two minutes by any one and pressure increased when required. Packed one dozen pairs in a box. Write at once for catalogue.

THE SIMMONS HARDWARE CO., St. Louis, Mo., have sent us a copy of their 1905 catalogue No. 464. It includes such articles as refrigerators, baby carriages, baskets, tricycles, ice-cream freezers, boys' wagons, coolers, etc., etc., and is gotten up in very good shape. It is cloth bound in plain black. The book contains 103 pages and is very attractive, being illustrated throughout and the illustrations are accompanied by list prices. Another catalogue gotten up in the same style but with a plain green cover, catalogue No. 466, exploits their line of fishing tackle, baseball, tennis, athletic goods, etc. This book contains a list of sporting and athletic publications which are obtainable from the Simmons Company, among which are Baseball Score Books, Indoor Baseball Guide, Boxing and How to Train, The Art of Wrestling, Curve Pitching, Football Guide, Dumb Bell and Indian Club Exercises, Etc., giving price of each, and covering every line of sports. A third catalogue issued by the above concern is like the others only with a red cover and is devoted to Laclede Bicycles and parts thereof, blow torches, lathes, Morse twist drills, anvils, vises, hammers, rules, chisels, calipers, etc., and is also illustrated throughout. This book contains 100 pages. They keep in stock at all times a full line of Laclede Bicycles and they state "You can always get Laclede Bicycles when you want them." They keep a complete stock of repairs for each model and can furnish them for years after the machine has been sold. They can give any desired equipment on any model regularly carried in stock. Any or all of the above catalogues will be sent to interested parties.

THE CLAUSS SHEAR CO., Fremont, Ohio, have issued an attractive and novel pamphlet exploiting in an amusing way the many articles of cutlery which are manufactured by them. It is gotten up on the plan of a child's nursery book, such as

"A" is America's
Flag so grand
Clauss leads with "Old Glory"
The best in the land.

And so on, continuing through the whole alphabet, each letter accompanied by an appropriate illustration, and two letters to a page. It ends with

"&" here is the end
And beginning of all
Clauss cutters are best
For all folks, great or small.

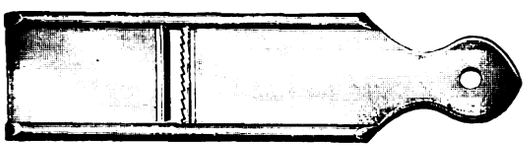
Send for one of these unique pamphlets.

THE DIAMOND SAW & STAMPING WORKS, Buffalo, N. Y., have recently issued an attractive envelope size pamphlet catalogue devoted to their "Sterling" hack saw blades and frames. A small folder accompanying the above booklet exploits several of their most popular styles, such as hack saw blades for hand use and for power machines; the adjustable frame, which takes 8 to 12 inch blade; and solid frames Nos. 10, 20, 2 and 30, made of malleable (not cast) iron, strong and serviceable. A facsimile testimonial letter from a satisfied customer reads "Without your solicitation it is a great pleasure to us to say that the Hack Saw Blades we bought of you are the best we have ever used. A 14 inch blade in our power machine has been almost constantly in use for three weeks; other popular brands would last all the way from three seconds to three hours, and very rarely we could find one that would last a day." Send for their "Sterling" literature.

THE VAN WAGONER COMPANY, Cleveland, Ohio, manufacturers of Hardware, have issued a large pamphlet catalogue, devoted to Van Wagoner ball-bearing spring hinges, made in rolled steel, brass or bronze to match all finishes; lavatory, surface and checking hinges, strikes and stops. Top O'Door pivot hinges, door checks, holdback hinges, coil and rod door springs, wire coat and hat hooks, etc. The ball-bearing spring hinges possess the merit of sustaining the weight of the door. All frictional wear of parts is thus avoided, and there is no need of lubrication. The use of balls also brings the full force of the spring into action, almost none of it being used to overcome the friction or wear of the joints in this construction. This hinge has stood successfully most severe tests, and is superior in every respect. The special advantages of the Van Wagoner Top O'Door pivot spring hinge are: They are ball-bearing both as to weight and side thrusts. No other pivot hinge is so constructed. Working parts in door away from dust and wet. Ease of adjustment of spring power. Perfect alignment of door. Saves greatly in the expense of application. Send for catalogue for further information regarding their extensive line of products.

A. TREADWAY & SONS COMPANY, Dubuque, Iowa, have sent us a copy of their Spring circular for March, 1905. This "circular" is a very large pamphlet of 112 pages. The Treadway Company on January 1st moved their office and shelf goods department to the building formerly occupied by Schrieber, Conchar & Westphal Co., whose stock of heavy and shelf Hardware they purchased. The above circular includes an extensive line of Batcheller forks, Acme churns, Wizard tools and many other items. They have also added the specialties handled by Schrieber, Conchar & Westphal Co., such as Otsego forks, Favorite churns, Hawkeye tools, Key City and Iowa brands of goods in the Hardware line. They send this circular to many Hardwaremen who are not their regular customers. If you wish to be retained on the regular mailing list and have the Seasonable Circulars which they issue very frequently sent you, kindly advise them, or send for Discount Sheet applying to above circular.

THE BUCKEYE PAINT & VARNISH CO., Toledo, Ohio, have sent us a number of envelope size circulars, each exploiting one of their many products and each containing an illustration. The pamphlets are as follows: Buckeye Carriage Paints, prepared ready for use, ground in fine coach varnish, put up in half pint, pint and quart cans. Crystal-Rock Finish, the very best of interior and exterior varnishes. Buckeye Paint and Varnish Remover does away with burning and leaves a clean nice surface, and does not injure the hands; will also clean brushes immediately. Buckeye Mixed Paints, made from pure linseed oil, white lead, oxide of zinc and highest grade coloring materials. Buckeye White Lead will give a whiter finish, go farther and last longer, they claim, than any lead on the market. Buckeye Decorative Home Paints, a paint designed for household use, put up in convenient shape both for the consumer and dealer. Send for any or all of these circulars.



H. W. JOHNS-MANVILLE COMPANY, 100 William Street, New York, N. Y., are distributing among the trade a neat envelope size catalogue in pamphlet form, of Flange Joint Gaskets for which they claim the following points of superiority: "They are more efficient and durable than any gasket cut from sheet and are cheaper and easier of application; they are superior in every respect to metallic gaskets and cost less; they will stand the highest temperature and resist the most severe pressure; they compensate for expansion and contraction more successfully than any metallic, rubber or composition flange packing; they can be furnished in any desired size and shipped promptly. Send for catalogue.

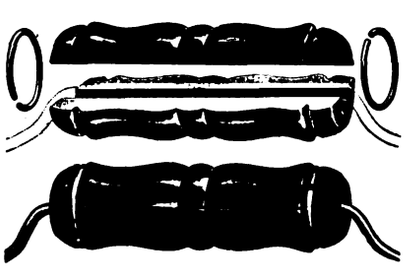
NEW GOODS AND SPECIALTIES.

THE FAVORITE CORN GRATER.

The attention of our readers is called to a new kitchen utensil of such usefulness that it cannot fail to be a good seller. We refer to the Corn Grater made by the J. M. Mast Mfg. Company, Lititz, Pa., whose advertisement appears in another page

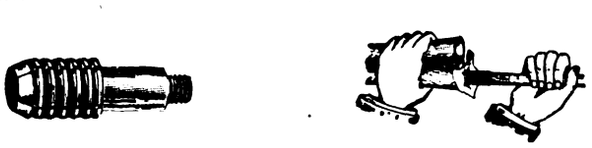


THE FAVORITE CORN GRATER.

of this issue. The cut herewith gives a good idea of its construction. The ear of corn is passed forward over the two blades shown: the toothed blade cuts the grain and the smooth blade scrapes out the kernels leaving the cob stripped of all the edible part of the grain. The parts are of fine steel and hard cherry wood and the whole is handsomely finished. With this tool, corn may be prepared readily for fritters, etc., as many toothsome dishes can be made with properly prepared green corn. Size 12 by 3 inches. They come packed one dozen in a paper box; one gross in a case.

THE LYON SLIP-ON HANDLE.

William I. Lyon, Waukegan, Ill., are introducing to the Hardware trade, the Slip-on Handle which we illustrate. It is designed to replace all broken handles on tea kettles, pails, food choppers and cooking utensils that have lost a handle and thereby made useless. In appearance the handle is a cylinder of Japanned wood, bound at either end by two wires. It is made of

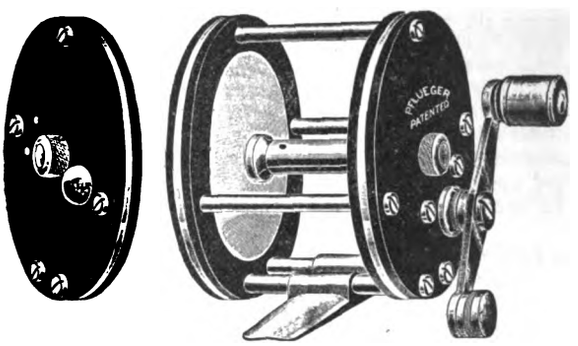


THE LYON SLIP-ON HANDLE.

maple wood. The ends of the pieces taper slightly which enables them to have rings of music wire, which is high in carbon, to give them elasticity. The cut shows the working of the device. Directions for attaching are as follows: Pry the handle just far enough apart to admit the wire ball, press the cut rings open sideways so the bail will pass through, put one ring on each side, hold the handle firmly together and slip the ring over the tapering end to the groove, with the opening in ring in the center of the wood, then slip the other ring on so that the opening in the ring will be on the opposite side of the handle.

STEVENS SHOT GUN CLEANER.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are the makers of the Shot Gun Cleaner, which is illustrated in these



STEVENS SHOT GUN CLEANER.

columns, showing the manner of its use. It is manufactured of brass and is practically indestructible, the cloth patch with which it is used protecting it from wear while at the same time it prevents the metal from touching the polished surface of the barrel. The elasticity of the cleaner holds the patches of selected cotton fabric to their work throughout the length of the barrel, leaving no portion of it untouched. This cleaner can be used in 10, 12 and 16-gauge guns, and its good features are recognizable upon the first trial. This handy little article has lately been reduced from 50 cents to 35 cents which must largely extend its sale.

HARD RUBBER SALT WATER REEL.

The Enterprise Manufacturing Company, Akron, Ohio, are the manufacturers of Pfleuger's Patent, Neutralized, Hard Rubber Salt Water Reel. This reel marks a radical advance beyond all methods hitherto employed in the construction of large reels.

HARD RUBBER SALT WATER REEL.

As shown by the cut, thin plates of aluminum are placed between the hard rubber side plates, with the two-fold advantage of a considerable reduction of weight and increase of strength. This structural feature effectually prevents the warping or splitting of the hard rubber discs. Bushings, collars, crossplate, and the various other parts, are fastened directly to the aluminum plate, which removes all possibility of their working loose, or breakage. Bearings are of phosphor-bronze, and the pivots of Stubbs Steel, hardened. Spool, pillars, crossplate and crank of German silver, with handle of hard rubber, and hand finished throughout.

COMBINATION SHELF AND TOWEL RACK.

The A. J. Phillips Company, Fenton, Mich., are introducing to the Hardware and House Furnishing Trade the Combination Shelf and Towel Rack, suitable for kitchen, bath room or laun-

FIG. 1. WHEN NOT IN USE.

dry, shown in our illustration. It is nicely made from beech wood, having small holes every inch in the shelf back for nail-

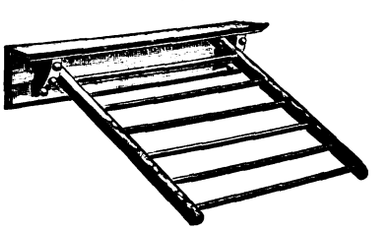


FIG. 2. RACK IN POSITION.

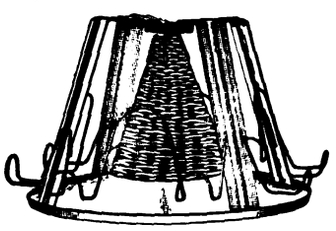
ing or screwing to the wall. It can be set at any angle. Fig. 1 shows the rack hanging under the shelf, out of the way when not in use. Fig. 2 shows the rack in position. The dimensions of shelf are 26 by 4 inches.

Digitized by Google

READ'S REIN SUPPORTER.

O. B. Read Manufacturing Company, Troy, N. Y., are the manufacturers of the Read Rein Supporter, a simple device that is the most complete of its kind now before the trade. The accompanying illustrations will give an idea how this is accomplished. It holds the reins in position on the horse's hips; the



READ'S REIN SUPPORTER.

reins are thus prevented from getting under the horse's tail or hip strap ends. It is quickly attached to any harness and with other specialties from same factory, may form a valuable addition to a Hardware stock. O. B. Read Mfg. Company make a rein holder and rein fastener that meet the approval of the trade in every instance. Send for the circulars that demonstrate their efficiency.

FIVE-SLICE WIRE CONE TOASTER.

Harkins & Willis, Ann Arbor, Mich., are the manufacturers of the new "Five-Slice Incandescent Wire Cone Toaster," which we illustrate herewith. This device is thoroughly adapted for use on any gas, gasoline or oil stove. It has a convex bottom, and will fit any stove, and has a grooved edge to catch the

FIVE-SLICE WIRE CONE TOASTER.

crumbs; the peculiar construction of the wire cone enables it to throw out heat similar to a bed of coal. The wire toaster racks have provision for four slices while a fifth may be placed on top. If desired, a tea or coffee pot, if placed on top may be readily heated. In use, the toaster is placed over the flame, and when the cone attains a red heat, the bread is toasted by putting it in the wire holders.

OLINGER'S DIBLER AND TRANSPLANTER.

John J. Olinger, 133 West 120th Street, is the patentee and manufacturer of the very simple device shown here, which is called a Dibler and Transplanter for transplanting, inserting and removing plants from one place to another, or for a handy method of inserting fertilizer with the plant, at the side of the plant roots. This novel device consists of two jaws pivoted together, to form when closed a continuous round body which tapers to a

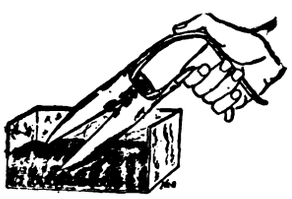


FIG. 1.

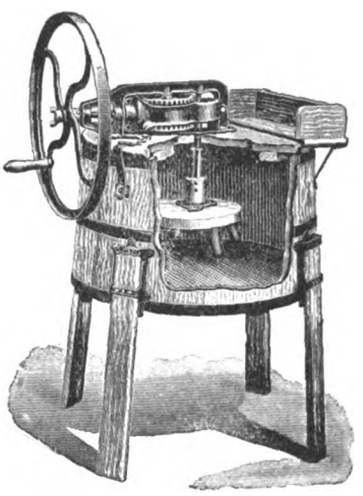
FIG. 2.



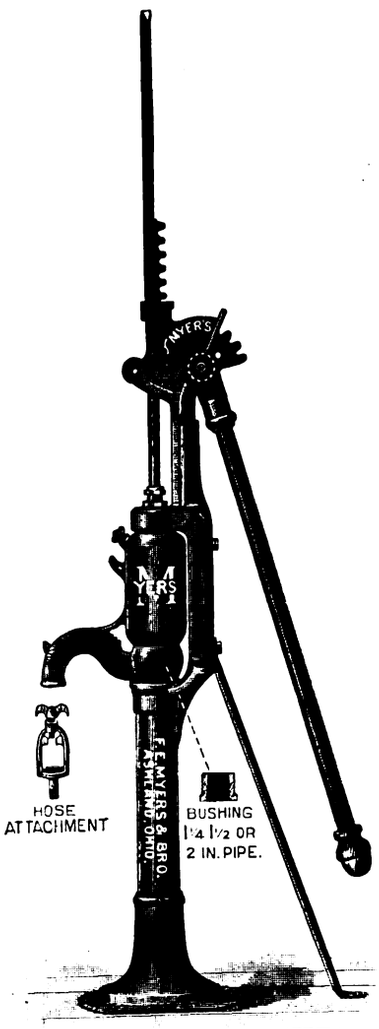
point, and adapts it for entering the ground easily. It has handles extending upwards from each jaw, but bent at right angles to the body, and capable of being grasped in a single hand. Springs secured to these handles hold the jaw in a closed position. Fig. 1 shows the Dibler when it is thrust into the fertilizer contained in box, and has been opened by pressure upon the handles. When the pressure of the hand has been relaxed, the points are closed by means of a spring inside, retaining as much of the fertilizer as may be desired. Fig. 2 shows the Dibler closed and ready to thrust into the ground. Fig. 3 shows it after it has entered the ground and been opened by pressure of the hand. The fertilizer at once drops into the hole, the amount used being easily regulated at the pleasure of the person doing the work. It will be seen by means of this tool the double process of planting and fertilizing can be accomplished at the same time, saving labor and expense. It also enables the farmer or cultivator of the soil to be economical of his fertilizer and avoid all waste.

FIG. 3.

IMPROVED "BOSS" ROTARY WASHING MACHINE.

The Boss Washing Machine Company (P. O. Station H), Cincinnati, Ohio, are the manufacturers of a high speed Rotary Washing Machine that, among its other points of superiority, is noted for the following: It claims to have the highest speed of any rotary washer; thirty-nine revolutions of the dasher to

IMPROVED "BOSS" ROTARY WASHING MACHINE.



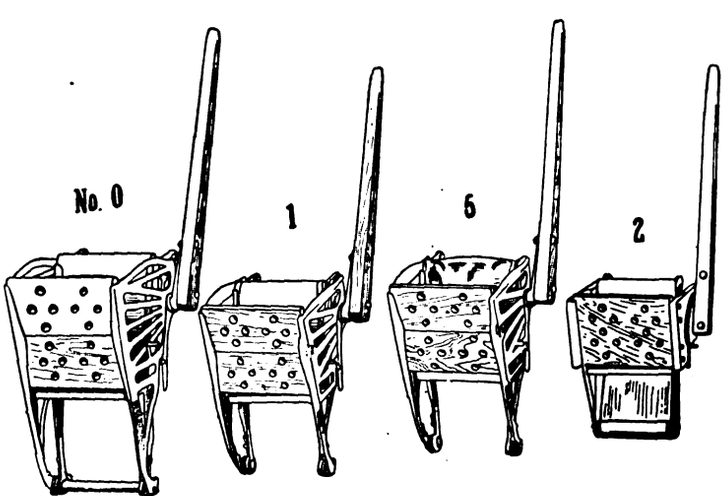
fifty turns of the fly wheel. The machine operates with perfect ease, without wear to the parts, because the gears are arranged and so proportioned in size as to gain power and reduce friction. The gears are shielded, protecting against any possible danger. The projecting of dasher post through the dasher has been eliminated, permitting the dasher to do more effective work, and preventing the entanglement of the clothing around the dasher post. The hinges to lid permit of the entire lid, with gearing, being detached from tub, for the easy convenience of washer; and thus permit the tub to be used for other purposes. All castings and bolts on inside of tub are galvanized to prevent rust. All castings on outside of tub are finished in colored enamel paints guaranteed to withstand any exposure. It is claimed any other style of finish will not stand outside exposure. This machine is finished in a natural wood finish.

THE RATCHET HANDLE TUBULAR WELL STAND.

Among the recent pumps added to the assortment of F. E. Myers & Bro., Ashland, Ohio, attention is called to the make up of their Fig. 1107 which represents the Myers Force Pump Head or Stand, as made with cog gear or ratchet handle. The advantage of this style head is that it allows the piston to move in a direct line without swaying from side to side, as is necessary with the ordinary handle. It does away with all links, friction guides, etc. The pump rod opposite the handle comes in contact with a roller bearing, which reduces the friction to a minimum. Another advantage of this style fulcrum is that it gives an 8 inch stroke with a 3 inch fulcrum, as against the 5½ inch fulcrum with the ordinary style handle. This special leverage adapts the pump to deep wells. The general construction of

Digitized by Google

this stand, with the exception of the handle fulcrum and handle, is exactly the same as their regular Myers Tubular Well Stand as shown under Fig. 831 or 900. The stand can be fitted with

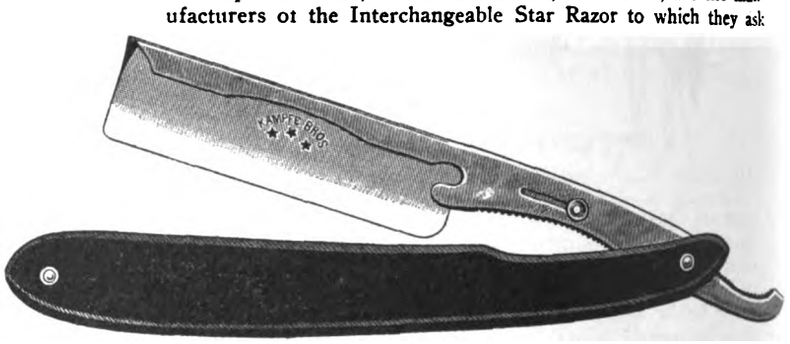


MYERS RATCHET HANDLE TUBULAR WELL STAND.

cock spout and back outlet similar to Fig. 1053. The handle is 1 inch pipe and can be lengthened by user to suit any depth well, and the pump is tapped for two inch pipe, and bushed for one and one-half, and one and one-quarter inch pipe.

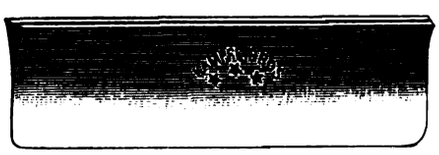
WHITE'S PERFECTION MOP WRINGER.

The White Mop Wringer Company, Fultonville, N. Y., are the manufacturers of the White's Perfection Mop Wringer, which we illustrate herewith and which possesses advantages over sim-



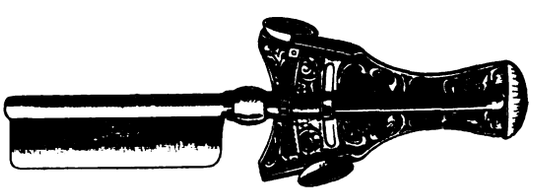
WHITE'S PERFECTION MOP WRINGER.

ilar appliances to make it one of the most salable specialties of its kind. It will fit any pail and does not require any fastening, and can be instantly removed if desired. It will fit any description of mop, either home made or commercial. The number 5 is especially made for round mops and it is claimed no other wringer is suited to this description of mop. The wringing is done by a squeeze of 25 pounds pressure placed on the handle, which places 400 pounds on the mop, which is greater than can be obtained by any other appliance. No lifting or pulling is required but simply to lean forward on handle of wringer. They are made in four sizes, suitable for every purpose they can be called for.



KAMPFE'S INTERCHANGEABLE STAR RAZOR.

Kampfe Brothers, 8-12 Reade Street, New York, are the manufacturers of the Interchangeable Star Razor to which they ask



KAMPFE'S INTERCHANGEABLE STAR RAZOR.

the attention of the trade. As will be seen by the illustrations we present it is a razor put on the market in the regular form with hard rubber handle, and with the holder made of German

REMOVABLE BLADE.

silver, so that it is made exceedingly attractive in appearance, and is made so that it rests nicely in the handle. This razor is placed upon the market because many prefer to use an old fashioned razor, and would prefer one they could keep in order. No razor can shave properly unless properly stropped, giving it the keen edge which cuts the beard and does not pull or scratch. The

SPECIAL STROPPER FOR RAZOR.

Interchangeable Razor overcomes that difficulty. It is an old style razor, improved, having interchangeable blades to be inserted in the new handle. These blades can be stropped with a special stropper made by Kampfe Brothers and they are offered in sets complete, which consist of razor and handle, Star stropper and diagonal strop. The sets are provided with two, three, four or seven blades in cases complete.

✤

W. H. ANDERSON & SONS, Detroit, Mich., are the authors of an extensive price list of cold chisels and plumbers' caulking tools of which they are the manufacturers. The book is in pamphlet form and contains 40 pages, and the quality is high grade in all details. They manufacture every article shown in their book and are also in position to make tools of special design in any quality. They list two grades of tools "Common Grade" which they state, are of the quality usually carried in stock by jobbing houses; and the "High Grade" which are intended for those wishing tools that will stand up under the most severe test. The fact that they have been making tools for over thirty-three years would seem to be an indication that they make satisfactory tools. With the above pamphlet are sent two smaller ones, one exploiting their Automobile Jack which is a powerful, quick and positive acting Jack, specially designed for automobile use and weighs eight pounds; the other is a catalogue of Adjustable Flower Stands of their manufacture which have a range from sixteen inches to five and one-half feet. They eliminate all danger of potted plants being destroyed by falling from insecure supports. Any of the above booklets will be cheerfully sent upon request.

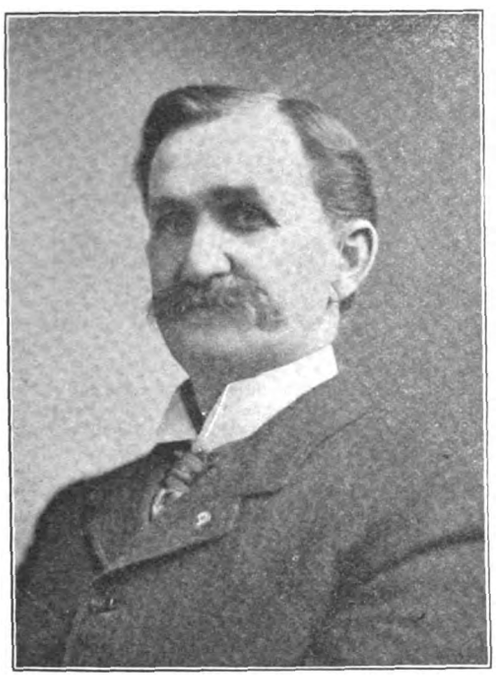
MISSOURI RETAIL HARDWARE DEALERS' ASSOCIATION

The Seventh Annual Convention of the Missouri Retail Hardware Dealers' Association was held at St. Joseph on February 21st and 22d. The sessions were held in the Commercial Club Rooms, and it was conceded to be the most successful meeting ever held by the association, the delegates present numbering over one hundred.

TUESDAY MORNING SESSION.

After the meeting was called to order D. C. Reeves, the Acting Mayor, delivered an address of welcome. This was supplemented by E. A. King, president of the Commercial Club, who, on behalf of the club, made the delegates welcome to the rooms they occupied. M. D. Ayers, president of the St. Joseph Retail Hardware Dealers' Association, made a few remarks, welcoming them on behalf of the local Hardware association.

President Taylor Frier, of Louisiana, replied to the several addresses collectively, and then appointed the following committees:



PRESS—M. D. Ayers, S. P. Johnson, Fred. Neudorff, J. S. Boehl.

RESOLUTIONS—W. T. Shoop, G. L. Phillips, F. P. Haus, F. P. Wengert, R. H. Meyers.

MEMBERSHIP—F. P. Haus, W. C. Post, G. A. Pauly, W. Hinde.

J. Erickson was appointed sergeant-at-arms.

After the payment of dues was attended to in a short recess the president read the following:

TAYLOR FRIER, PRESIDENT.

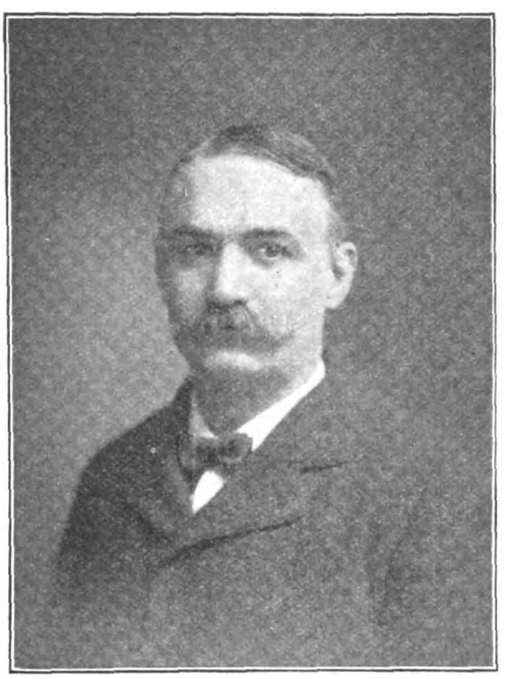
President Frier's Address.

from which we made a few extracts:

We are living in an era when if any dealer expects to keep abreast of the times, he must give more attention to organized efforts, especially when we note the progress that has been made in other lines by the same agency. We, as Hardware merchants, should take a retrospective view of the conditions of the trade that existed in this State prior to our organization and compare it with the conditions of to-day. Those of us who are members and have kept in touch with the association realize and know there has been a vast improvement, therefore it is the manifest duty of each of us who are members to assist in interesting the dealers in this State who are not members and as yet have not contributed any of their thought, energy or means to bring about this result. Those who, with myself, were present at the first organization of this association know full well that at the time we not only did not have the assistance and sympathy of the jobbers and manufacturers, but, on the contrary, we might say we were looked upon with suspicion and as a thing that should be carefully avoided.

WHAT ARE THE CONDITIONS TO-DAY

in this respect? The National Hardware Association, composed of jobbers and manufacturers, and the Southern Jobbers' Association, are working hand in hand with the National Retail Hardware Dealers' Association, of which we are part, for the common good.



The worst enemy to legitimate business that we retail Hardware merchants have to come in contact with is catalogue house competition. There was created during the past year a joint committee appointed from the National Hardware Association, the Southern Hardware Jobbers' Association and the National Retail Hardware Dealers' Association. These three committees organized what is termed the Wholesale and Retail Hardware Joint Committee, for the purpose of considering this question and at the same time to take some action looking to the co-operation of the manufacturers and jobbers in lining up all who were in favor of legitimate trade as in opposition to this incubus that has fastened itself upon the retail interests of our country.

The result of the work of this joint committee was given in a report to the National Hardware Association during the month of November, 1904. Said report discloses that by correspondence and personal visitation the committee has secured the signatures and published a list of 531 manufacturers who say they do not and will not sell their goods to catalogue houses. The jobbers also realize fully that their business is jeopardized as well as ours, and hence they are almost a unit on the proposition to eliminate the catalogue houses.

I wish to state that the trade at large in my judgment

OWES A DEBT OF GRATITUDE

to this Joint Committee for the work that they have done during the past year. I believe as an organization we should pass a resolution commending them for their work, and request that the same committee be continued from the different associations for future work along the same line. Let us not only commend them for their work, but work in harmony with this committee, giving them our hearty co-operation, not only as individuals, but as an association. In buying goods let it be the purpose of every one to buy only from such as are with us in this fight. In other words, if we know of a manufacturer or jobber who refuses to stand with us on a proposition of this kind,

FREDERICK NEUDORFF, SECRETARY.

notwithstanding his prices may be as low or lower than those who do stand with us, let us give the preference to the firm which is ready to co-operate with us in eliminating this evil.

This committee recommends that State associations use their efforts to have the members of said associations as well as all retail Hardware merchants organize committees in their several towns to investigate the quantity of goods being shipped into these committees' own towns, obtaining the names of such buyers, and then use all proper means and methods to keep such business at home. I strongly commend this to your attention, and hope that at this session we shall take steps to carry out this recommendation.

You no doubt will be pleased to know that our association has made some progress during the past year. Am glad to say that our growth in membership will show an increase of at least twenty-five per cent. While this is no doubt gratifying to you as well as your officers, at the same time we feel that it has not been what the association deserves. Strenuous efforts have been put forth by your secretary and the officers to interest the dealers in this State, and while we are glad to report the results as stated above, at the same time we feel that they are not what could be accomplished if we had the hearty co-operation of the membership. How to arouse an interest in the membership and get their co-operation is one of the problems that your officers would like to see solved by this convention.

I desire to again appeal to the membership that

WE CO-OPERATE WITH EACH OTHER

for the mutual advancement of our association and in making it one of the foremost of State organizations. This much desired end is not only mutual business interest, but implants in the hearts of our brother dealers a recognition of the fact that we do not live to ourselves in any of the relationships of life and that we are to a certain extent our brother's keeper, and should therefore work for and in the interest of the universal brotherhood of man.

Let me indulge in the hope that during the present year each of our

Digitized by Google

fellow members will take it upon himself to add at least one dealer to our growing ranks and thus confer upon such new member an opportunity to secure the benefits, satisfy the conscience, extend ease to the mind, and help to banish worry and care forever, and thus constitute a boon to his home and family. May the progress of our organization continue as it has and may Onward and Upward remain our inspiring watchword.

After the address had been referred to the Committee on Resolutions Secretary Fred. N. Neudorff, St. Joseph, read his annual report.

Secretary's Report.

Since our last meeting in St. Louis we have entered upon a new era in our association work. In the effort to establish the association on a permanent basis the best thought of all past and present officers has been given. We have all learned the lesson long ago that patriotism that pays is the dependable kind, and while the officials who were in touch with the actual work knew something of the actual results benefiting the retail Hardwaremen "one and all" in a direct manner, yet the members at large knew of it only in a general way and that was not impressive enough to hold them steadfast and loyal to the organization. So after two years of investigation and discussion enough pledges were secured at our last meeting to warrant your officers to enter upon the work of establishing an insurance department. The actual work was slow and laborious, because the field was a new one to all of us, and especially so to the secretary. Blanks and forms had to be prepared, constitution and by-laws written, and all so prepared as to be in harmony with the laws of our State which control such matters. It was a difficult task and a source of mental strain and worry. Then came the work of organization, and this was finally accomplished to the satisfaction of the insurance commission of the State, and our company was ready to write policies.

Permit me to say this in compliment to the loyalty of our members: We presented a new and the hardest problem in the insurance field that had ever been attempted, but for that very reason the safest and best plan ever devised in that realm, and they loyally stood by the organization and put it on its feet. Some other plan might have brought quicker and better results, and I trust that in our insurance meeting some quicker and easier plan may be devised and accepted that will give us the same assurance of safety. One fact is certain: We are growing too slowly and the profits therefore will not be as satisfactory as with a more rapid growth. I mention these things in my report as secretary to give you some idea of the extent of the labor performed for you by this office.

* * * *

I trust at this meeting some arrangement can be made to send out a solicitor for the insurance and association work. It is the only method whereby we can build up to the prestige we should have. We have grown nicely through the past year, but not at all in comparison with what we should have done. Our finances are in the best condition they have ever been. Results from the manual receipts last year were very pleasing, due to the great kindness shown by the trade, and especially by the Simmons Hardware Co., and you will be pleased to know that over one-half this money remains unexpended. You will also be gratified to know that this year's manual also places in our treasury an amount which enables us to greatly expand our work. I have all the work under perfect system, for without it I could never hope to fill the position. I shall be pleased to show all our members the volume of correspondence and method of carrying on their work.

There *is* one final thought I wish to leave with you and ask your consideration of, and that is the best plan to treat local competition among ourselves. To my mind that is of greater importance to ourselves in every sense than any other question. Is there not too much envy, jealousy and lack of brotherhood in our intercourse with one another? Is not the field great enough and the harvest ripe enough for all of us to allow us to reap the fruits that come with self and neighborly respect?

I confess that personally I might do much better and no doubt all of us lack something of perfection, and I wish this convention would show the way to a better understanding and more fraternal intercourse.

I have felt a great pride in the membership of the Missouri association. It is a rare thing and a happy remembrance to know that in three annual meetings such perfect harmony prevailed that not one solitary negative vote was cast after the candid talks, investigations and explanations had been given. It is a remarkable thing to record such unanimity, and we ought to be proud of this record. It has been a pleasure to serve you, and I thank you one and all for your kind forbearance and right good will towards my shortcomings of both head and heart. You would all be not only the best fellows on earth as you are now, but be sprouting wings for eternity if you would each engrave the words "do it now" upon your business escutecheon when answering correspondence from this office.

After a few laudatory remarks, the president introduced Sidney P. Johnston, of the *American Artisan*, who addressed the convention on

Impressions of Association Work.

He said in part:

After a temporary reference to the fact that a local Hardware organization or a local merchants' organization can do more effective service in the

ESTABLISHMENT OF A CREDIT BUREAU,

the regulation of prices, the cutting out of the trading stamp evil, and many similar lines, than the individual merchant, no matter how gifted he may be, we would point out the utter inability of a Hardware dealer or any other individual to cope single-handed with the fire insurance trust. Missouri may be a happy land, where the arbitrary and exorbitant rates of the insurance combine annoyeth not, but if so, it is better off than Illinois, Wisconsin, Indiana, Minnesota or Iowa to my personal knowledge.

I believe that it is worth a fixed amount of money to insure any given property. If I had the money, I would be tickled to death to personally insure every Hardware dealer present at the Board rate, for I know I would make a very good thing of it. Sixteen hundred lumbermen were scattered through the Northwest and it should be borne in mind that lumber is a more dangerous risk than Hardware; they were recently asked what percentage of the money they had paid in premiums in the last five years had been returned to them in fire losses, so to speak, and it was found that the old line companies had only paid back to these sixteen hundred men twelve per cent of the premiums received for five years.

Other statistics all point along this line, and show that if you gentlemen would allow me to insure you at old-line rates I would be getting something very good. However, I am not in the insurance business, and since human nature is selfish, if it would be a good thing for me to insure you, why wouldn't it be a good thing for you to insure yourselves?

The opportunity is presented in your own insurance association and it seems to me that a study of its annual report shows that it offers both safe insurance and cheap insurance.

The convention then adjourned until the afternoon.

TUESDAY AFTERNOON SESSION.

After being called to order at 2 p. m., the president introduced F. E. Muzzy, vice-president of the J. Stevens Arms and Tool Co., Chicopee Falls, Mass., who addressed the convention on

The Proper Distribution of a Hardware Production.

A paper prepared by H. W. Beegle, Chicago, on

Novel Methods in Advertising,

was then read by William H. Hahn, St. Louis. It was in part as follows:

We do not build health, intellect or business by leaps and bounds, but by attention to little things. In western New York is a very successful Hardware merchant who prides himself on the fact that he has never advertised. In seeking for a cause of his success I found out that he knew every man, woman and child for miles around. He had a hearty handshake and a genial salute for each. Also that same atmosphere pervaded his entire force. He has reduced it to a system, and I consider it an excellent, if a novel, method of advertising. From the fact that every man and woman, regardless of their station in life, are more susceptible to an appeal that is addressed to them personally than they are to one made to the world at large, the tongue is an excellent medium of advertising. It can give more or less emphasis as may be needed for each individual. It may put each hearer in a good humor, so that the hearer will be more receptive.

But, says some one, it is not my nature to be sociable. If any one feels that way he should forget it, and take as his doctrine that every man can be what he wants to be if he wants to be what he ought to be.

PEOPLE EVERY DAY ARE BECOMING MORE FASTIDIOUS.

A dirty, gloomy, poorly arranged store, that store where dust is on the goods and you bump your knees against the nail kegs under the counter, is patronized only because of necessity, not from preference. It should become "Warrenized" or the trade goes elsewhere. Not only do the people like clean stores, but they like clean salesmen to wait on them. They do not like to see either the collar or the finger nails in mourning. In these days of abstinence practically every woman and many men object to tobacco. Your customers are individuals frequently with peculiarities. There is money in having each of these individuals pleased. A man whose annual business runs into the millions said: "The best advertisement is in giving the biggest bunch for a dollar." That does not always mean the goods at the lowest price. You may give value in service, courtesy and attention. If the store is dirty, unpleasant, badly managed, nothing is paid for service.

"THANK YOU."

It is such a novelty for a salesman to say to me, as I pay for a purchase and am leaving, "Thank you, call again," that I appreciate it and do return when I can. This novelty costs nothing and is appreciated by ninety per cent of buyers.

* * * *

The employees in no other line of business will average as high in intelligence and ability as those found in the Hardware store. It is the boy, vigorous in body and mind, who takes to Hardware. He should understand that unless he concentrates his mind and heart on his business, so as to know it from pincers to pans, from razors to rasps, he will never get into the prosperity class.

Is space in the Hardware store too valuable for some chairs—not for loafers, clerks or drummers, but for a customer who is not in a hurry to leave? If a woman can sit down and study your washing machine as restfully as she can study the mail order catalogue she is more likely to see the points of advantage in your machine. Besides, some people like to go to stores where they are not expected to leave immediately after spending their money.

DON'T WAIT FOR IDEAL CONDITIONS.

They never come. You must make them. If a catalogue house several hundred miles distant is securing the business of your friends and neighbors, it is up to you to show more interest in them than does the catalogue house. Do you not think that a clean, well arranged Hardware store with a good stock at right prices, which is pervaded by a genial, cheerful atmosphere, where goods are intelligently and courteously shown, would have a constantly increasing number of regular customers?

I have already stated that people had many needs which they had not yet discovered. You also recall that there is a necessity for increasing the purchase of each customer. Let us meet this last necessity by discovering to the people the many needs which we can supply.

There can be two profits made out of a customer—the one on the goods he intends to buy, the other on such goods as you interest him in.

NOTHING BOOMS BUSINESS LIKE SHOWING NEW GOODS.

At a convenient location in the store, one which must be passed by

Digitized by Google

all, have each week a new article which will interest the women; also one that will interest the men. Then let the merit and utility of these articles be given in a most condensed form to each salesman. Make it a point not to let any one out without securing at least a passing notice of these new things. This may not result in immediate sales, but the people will appreciate your courtesy and attention. You establish a reputation for enterprise and having new goods.

* * * *

F. P. Haus, Iberia, made an address to the convention on

Stove Troubles Up to Date,

which was exceedingly characteristic.

O. W. Johnston, of Marshall, read an appeal

To the Manufacturers and Jobbers from the Retail Hardware Trade,

as follows:

For fear our continued, unrelenting and organized efforts against catalogue house competition may not be rightly understood by some manufacturers and jobbers and the public at large, we desire to state clearly and most emphatically our position, setting forth the principal and, we think, just and reasonable grounds for our opposition. In this land of the free and brave, living under the best government on earth, which guarantees to every citizen alike the peaceful pursuit of his chosen profession or trade, we have no desire to do violence to this sacred principle so dear to every American heart. No institution, order or association can succeed, and should not, which is guided by greed and selfishness rather than justice and truth. To question the right of any man or set of men to engage in business and solicit patronage from any section of the country in a legitimate way, either by catalogues, newspapers, circulars or representatives, would be to question the efficiency and justice of our own system of government. In our appeal to manufacturers and jobbers we do not seek to destroy or injure the men who sell their goods through catalogues, but insist upon another principle of our government—equal rights to all, special privilege to none. Can the retail dealer meet the catalogue price on an article that you charge him $1 for and sell the same to the catalogue house for 85 cents? It is this unfair and unjust discrimination that we are offering our solemn and determined protest against. Some of our jobbing friends have suggested that we discontinue selling the established factory brands and put in jobbers' or special brands on which we can get protection. We cannot accept as a practical and righteous solution a plan which places the retail Hardware dealer in a false position. Should he claim his article to be as good as the one offered by the catalogue house, when in fact it is not, how long could he hold the trade or confidence of his customer? * * * Since the solution of this question lies wholly with the manufacturers and the jobbers, we hail with delight the firm stand and interest manifested in our behalf by so many leading manufacturers and jobbers, and we call upon every loyal retail Hardware dealer to stand by those who are helping us in this struggle, remembering that ingratitude is the basest of all crimes.

In the evening, at 7.30 o'clock, A. F. Sheldon, principal of the Sheldon School of Scientific Salesmanship, Chicago, made an address entitled "Science of Salesmanship." The lecture was interesting and instructive and was listened to with close attention.

J. A. Warner, of St. Joseph, addressed the conventions as follows on

Catalogue House Competition.

I firmly believe that if the retail dealers of the country would use the same amount of energy and copy to some extent at least the methods of the catalogue houses they would be able, in a great measure, to counteract the evil effects of their competition.

IF YOU HAVE SOMETHING TO SELL

It is well to let the public know it through the medium of your local newspapers or by means of circulars. I have even thought that it might be practicable to issue a small catalogue illustrating certain lines of goods which bear a good profit and which you are desirous of pushing. You do not find the catalogue houses making a very strong talk on Nails, Barbed Wire, Rope and other unprofitable goods. They are after the profitable business, and in this respect at least their methods might be copied by the retail dealer with profit. The staple items will take care of themselves. If John Smith wants a few pounds of Nails he knows that the Hardware dealer has them and will go to him for them. However, Mrs. John Smith may not know that you have a Bread Maker, Sewing Machine or other household article which she no doubt needs, if you will only make an effort to convince her of the fact. If your goods are arranged in an attractive manner she may find other items that she is equally in need of. If you advertise in newspapers change the matter frequently and always advertise goods that are seasonable at the time. Some dealers will contract for space by the year and never change the wording of their advertisement, which is a great mistake. Advertising is expensive, and you should get as much as possible for your money by calling attention to as wide a range of articles as possible.

STUDY THE C. H. CATALOGUE.

Every dealer should have the latest copy of the catalogue house catalogue on his desk and it should be studied carefully so that he may obtain a good idea of the goods carried by these houses and the prices at which they are sold. In a great many cases it will be found that these prices can be profitably met, taking into consideration the transportation charges and the fact that cash with order is invariably demanded. In this connection it might be well to state that if you can get your business on a strictly cash basis you will find it a great help to enable you to meet catalogue house competition. Another advantage of being familiar with the goods sold by catalogue houses is that you may avoid as far as possible carrying the same lines. It is to be regretted that many standard brands of goods are sold by these houses, but we believe the time is not far distant when they will be fewer than they are at present.

* * * *

The convention then adjourned until Wednesday morning.

TUESDAY EVENING

Was devoted to a banquet given to the Missouri Retail Hardware Dealers' Association. The Hardwaremen, local and otherwise, marched into the elegant dining-room of the Hotel Metropole to partake of a banquet given by the wholesale and retail Hardware dealers of St. Joseph, where, until 1 a. m., they were entertained and edified with addresses and musical selections. Munson D. Ayers officiated as toastmaster.

WEDNESDAY MORNING SESSION.

After the meeting was called to order an extended discussion took place on the subject of the Missouri Garnishment law.

The Question Box was then taken up and the questions found in it well debated.

Secretary Neudorff said the matter of insurance was the most important one to consider; the official statement filed with R. G. Yates, superintendent, shows that the total premiums collected in Missouri during 1904 were $7,467,020.93, while the fire losses were $2,452,169.53, saying this shows that the premiums over fire losses left a balance of $5,014,851.40. Secretary Neudorff then read the following

Insurance Report,

saying in part:

An investigation of the risks we carry will show an amazing discrepancy in rates. Your secretary has been very careful in accepting risks and has rejected quite a few in your interest. We have in this State a bureau under control of the old line companies which aims to fix an equitable rate on all insurance risks in this State, and this rate is referred to in our contracts and agreements with our members as the "board rate." It is just and equitable, especially in a mutual company, that all settlements of losses be made on the basis of the amount we pay as it bears relation to this board rate. No other rule is just, right or honorable among partners. To explain more simply our proposition we will state that any member who reports his rate at $1 and pays this amount must accept payment of one fourth his loss if his true rate is $4. Personally I will state that I buy my insurance at $1.10, but I pay our Mutual $1.30, which is my board rate. I had an application from a brother member who objected to his board rate of $5 and was willing to pay $3.50. I wrote him that I would write him at $3.50, but would settle his loss in case of fire at the ratio that 3½ bore to 5. The Missouri Inspection Bureau will furnish us rates outside of St. Louis and St. Louis County at 50 cents per item, but the minimum charge would be $50 per year. The Wisconsin Hardware Mutual requires each policy holder to have at least a $500 policy with a board company and in this manner fixes the rates. Another feature about this rate matter is that risks are fixed by the nature of the surroundings, which is constantly changing, especially in new and growing towns. Many of your policies require you to notify the companies of any such changes, and should loss occur the question of non-compliance with this rule vitiates your chance of recovery.

These are some of the matters requiring your attention. We ought to get a definite basis of fixing rates. We ought to subscribe to a Mercantile Rating Agency to determine the moral hazard of our risks. The moral hazard of any risk is determined greatly by the surroundings. For instance, a risk in a range of six frame buildings would average but one-sixth of the total. No matter how honorable a man the insured is, the moral hazard depends greatly upon his necessity for money. Experience has proven that more men use the fire route to safety than is consistent with good morals. Good and careful bookkeeping is essential to the insured and an annual inventory absolutely necessary.

WEDNESDAY AFTERNOON SESSION.

Insurance Directors.

The following directors for the insurance company were then re-elected: Taylor Frier, Louisiana; F. Neudorff, St. Joseph; E. A. Demeter, Macon; F. A. Kansteiner, St. Louis; M. C. Post, Brookfield; W. T. Shoop, Richmond. O. W. Johnston, Marshall, was selected in place of J. W. Poland, of Carrollton.

Association Officers.

The election of officers for the Hardware Association developed into an ovation for President Frier and Secretary Neudorff. Mr. Frier was chosen president for the coming year by unanimous vote, and the Executive Committee, which selects the secretary for the organization, was instructed to retain Mr. Neudorff in his position. The efficient work of Secretary Neudorff has been the mainstay of the association, and the members evidently appreciated the fact.

William H. Hahn, of St. Louis, was elected vice-president in place of E. L. Wachter, of St. Louis, who expressed a wish to relinquish the office.

The committees for the coming year are as follows:

EXECUTIVE COMMITTEE—F. A. Kansteiner, St. Louis; W. T. Shoop, Richmond; O. W. Johnson, Marshall.

TRADE ABUSE COMMITTEE—O. W. Johnston, Marshall; H. J. Brunner, Kansas City. J. A. Pauly, St. Louis.

AUDITING COMMITTEE—J. G. Weber, Clayton; A. Steinmeyer, St. Louis; G. L. Phillips, Bethany.

On motion by F. Kansteiner, of St. Louis, the word "Stove" was dropped from the association's title, and the organization in the future will be known as the Missouri Retail Hardware Dealers' Association.

J. W. Poland, Carrollton, the first president of the association, was elected an honorary member for life.

Hannibal was selected as the next meeting place, the time of meeting being left to the Executive Committee.

Digitized by Google

PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION

The Fourth Annual Convention of the Pennsylvania Retail Hardware Association was held at Harrisburg on February 21st and 22d, the sessions being held at the Board of Trade Building.

Owing to the late arrivals in the morning of the 21st, President Joseph M. Seilhamer adjourned the session of the morning.

TUESDAY AFTERNOON SESSION.

Upon the opening of the convention at 1.30 by the president, an address of welcome was delivered by Mayor Vance C. McCormick, which was responded to by George L. Morton, of Brownsville.

Committees.

The president then appointed the following committees:

PRESS—W. H. Heim, E. H. Darville, of *The Iron Age*, and S. S. Bryan.

AUDITING—J. H. Bowers, J. B. Holderbaum and A. H. Kaufman.

NOMINATIONS—J. F. Howe, G. C. Kline and J. E. Digby.

NEXT MEETING PLACE—George L. Moore, U. D. Coal and J. H. Linck.

T. James Fernley, secretary-treasurer of the National Hardware Association, was invited to address the meeting. He congratulated the members on the progress they had already made and treated at some length the relations between the retailers and jobbers, along

GEORGE V. THOMPSON, PRESIDENT.

J. H. BOWERS, VICE-PRESIDENT.

which lines, he said, substantial advances had already been made and many more were desired. He observed also that the National Association is much stronger now than it was two years ago.

Then ensued some considerable discussion on the catalogue house question, which was participated in by the president, followed by S. R. Compton, of Harrisburg, and several of the members, who dwelt upon the wide dissemination of the trade literature.

President's Annual Address.

President Seilhamer then delivered his annual address, in part as follows:

It affords me great pleasure to greet you at this the fourth annual meeting of the Pennsylvania Retail Hardware Dealers' Association. I am pleased to see many familiar faces and shake the hands of those who from the organization of the association have never failed to give us their presence and good work. I am also pleased to see and welcome so many new faces. It is evidence that our work during the past year has not been in vain. Of the twelve months that have just passed since our last meeting, from a business point of view, I cannot speak flatteringly. I have no doubt the depression in the iron and steel industries throughout the country has affected most of us to a greater or less extent. But trade conditions of the country for the coming year are much more encouraging. The business of the whole nation now rests on a firmer foundation, with indications for a very busy and, I hope, profitable year.

OUR ASSOCIATION.

The details of the doings of the association for the year past I will not dwell on, as the secretary in his report will enlighten you on that subject. I shall say that the association during the year just ended has grown much in strength, numbers and usefulness. We are now beginning to feel the strength and vigor of manhood. * * * We must be united in one solid band. And if a solid phalanx of the Hardware dealers of the several States presses forward together with the same object in view there is no telling the power we will have for good and fair treatment.

Since our association has grown in numbers and strength I do not want the members to grow lukewarm and think the once infant can take care of itself. I want you to look at the strength of some of our neighboring western associations. They are not asleep. I want you to go to work and bring in new members and not leave all the work to the officers. Let us all talk to our neighbors; let us convince them that they should become members of this association, and that the brushing up against each other and the exchanging of ideas cannot help but be beneficial to all. There are none of us so bright that we cannot learn something from the youngest and least experienced among us.

After which J. E. Digby, secretary-treasurer, made his annual report.

Secretary's Report.

Following are the extracts from the annual report of Secretary J. E. Digby:

I have the pleasure to report the accession of 82 new names to our list of membership. We had 119 names at our last convention, so that at present writing our total enrollment is 201.

Your secretary only had the pleasure of remitting to the National Association for last year's per capita $82, only that many members having paid their dues. Sixty-four of the new members did not pay any dues into the association for last year, leaving 54 members who failed to pay their dues for 1904. The secretary has notified them and urged them to pay, and will ask permission to suspend all those members who fail to pay their dues.

About 2,000 communications were mailed by the secretary and he paid a visit to the insurance department and the president of the association in reference to a solicitor. In pursuance of a resolution of the Executive Committee, a solicitor was employed to canvass for members and insurance, the result being the adding of 64 names to our membership and considerable new insurance. Fourteen of the new members have paid their dues for 1905, one has died, two have resigned, and the balance I am still expecting to hear from.

All bills have been paid, as well as the secretary's salary to January 1, 1905, and our per capita to the National Association. The funds advanced by the guarantors in 1903 to pay solicitor's salary and the $50 advanced by the secretary for the same purpose have all been repaid, and we start with money on hand to meet our expenses.

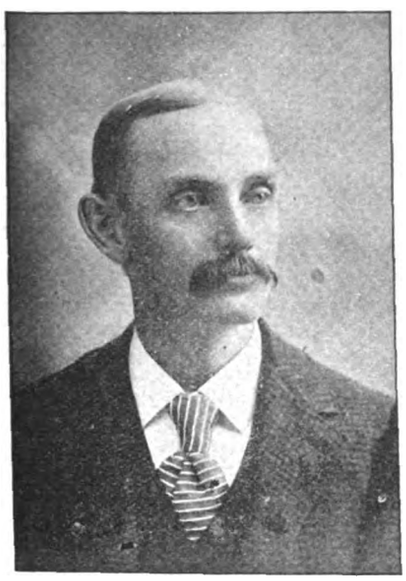
Let us strive to double our membership this year, and we can more than do so if each member will do his part. Just as soon as our membership will justify, manufacturers and jobbers will have their agents attend our meetings, and the display of articles will more than repay any Hardware dealer for his time and money spent in attending the meeting.

What Constitutes a Jobber?

was the subject announced for discussion.

The secretary said his conclusion was that at least $250,000 capital was needed to properly stock and conduct a bona fide jobbing business. The discussion covered a wide range, on the wisdom of jobbers trying to get the dealer's trade and then soliciting that of many of his best customers, such as cabinet and carriage makers, blacksmiths,

Digitized by Google



carpenters, builders, contractors, mills, factories and others, especially when buying a few articles at a time. Traveling salesmen for jobbing houses were severely criticized for seeking the trade of such people after selling the retailer.

The outcome of the discussion finally took the form of a resolution, which was unanimously adopted, that the members express themselves to the effect that "in distributing our patronage we give preference to concerns who sell goods to dealers only, and to notify the secretary of the State Association immediately upon proof of any such violation on the part of jobbers."

Jobbing House Salesmen Elected Honorary Members.

Secretary Digby, at the suggestion of a member who had noticed the great interest shown by the fraternity, moved that salesmen of jobbing houses in Hardware, Stoves and kindred lines, and all who sell goods pertaining to the Hardware trade, be made honorary members on the payment of $1 yearly dues, which was promptly agreed to. The president observed that this recognition would indicate to such allies that their efforts in furthering the aims of retail Hardwaremen was appreciated. Following this action of the convention the following salesmen, who were present at the convention, were admitted to honorary membership:

J. H. Reed, J. H. Kroberger, Pittsburgh Stove & Range Co.
George H. Diehl, Lindsay Hardware Co.
A. R. Driscoll, J. K. Thompson, W. W. Lawrence Co.
J. Welbley, Supplee Hardware Co.
John J. Haley, Jr., National Lead & Oil Co.
D. R. Branson, A. S. Bailey, E. C. Atkins & Co.
William E. Lore, Whitman & Barnes Manufacturing Co.

J. E. DIGBY, SECRETARY.

I. Minor Dreisbach, Frank L. Dershem, C. Dreisbach's Sons.
S. McCleland, William K. Paff, New Jersey Wire Cloth Co.
William G. Withers, National Stove Co.
R. P. Searle, White Lily Washer Co.
F. W. Prothero, George R. Benjamin, Peters Cartridge Co.
C. R. Tendick, Majestic Stove Co.
E. H. Darville, representing *The Iron Age*, was also elected to honorary membership.

MUTUAL INSURANCE.

The insurance feature of the association has been a remarkable success, giving to its members a safe insurance at a cost of 50 per cent below the old line companies. I believe it is conducted on safe and economical lines and is deserving of the patronage of every member of the association. * * * If I am not misinformed, all the Western States insurance companies require that policy holders be members of some State Association. If the insured Hardwaremen can save money through the work of our association, surely he should not object to paying $6 a year dues to us, especially in consideration of other benefits received. I think this amendment would very materially increase our membership.

CATALOGUE HOUSE QUESTION.

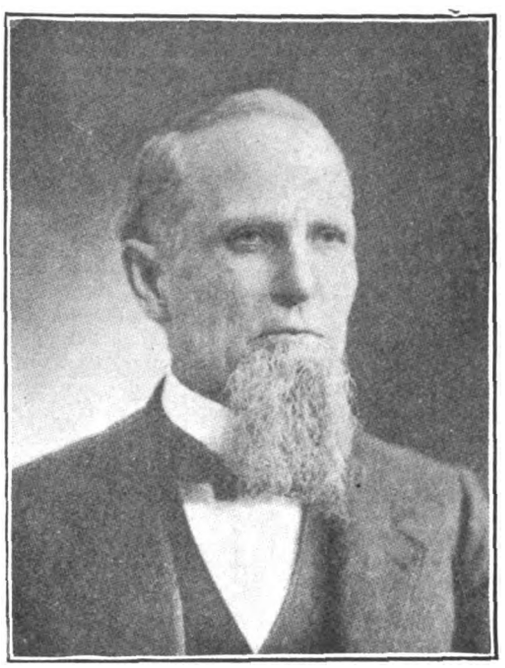
I will not take your time in speaking of the catalogue houses. No doubt you will hear much about this subject before the convention adjourns. You all know that a vast amount of work has been done by the National Association on the catalogue question and are familiar with their work through the various trade journals and through the circulars sent you by manufacturers and jobbers which call attention to the fact that they refuse to sell goods to catalogue houses.

TRADE PAPERS.

The trade journals of the country should not be passed by without a word of thanks, as they have worked faithfully for the promotion of the retail Hardware associations. They have spared neither time nor brains in writing up our cause and making plain to all dealers the benefits they can secure and advantages that are to be gained by association work.

HONORARY MEMBERSHIP FOR TRAVELING SALESMEN.

I would suggest that an honorary membership be created for the admission of traveling Hardware salesmen into the association and have no doubt that their admission would add very much to the organization. * * * In some of the Western States they are admitted to membership on the payment of $1 a year as dues. I would ask the Executive Committee to take this subject up, and, if approved by them, present it so that action may be taken on it at this meeting.



Considerable discussion took place as to what constitutes a legitimate Hardware dealer, painters, carpenters and machinists frequently masquerading as dealers for jobbing houses, when they were properly consumers and legitimate customers of the Hardware retailer. Such individuals should be exposed in the association and the complaint submitted in writing to the secretary for action direct with the National Jobbers' Association, which was pledged by its secretary to give prompt attention to all such cases.

WEDNESDAY MORNING SESSION.

This session was devoted to insurance matters, etc.

Report of Insurance Secretary.

W. B. Simpson, Huntingdon, secretary of the Hardware Dealers' Mutual Fire Association of Pennsylvania, presented his annual report, which showed a most successful year's business. The company was organized by the Insurance Committee of the Retail Hardware Association in the latter part of 1902, the first policies bearing date October 1, 1902. Its growth has been rapid, and the total insurance in force February 18, 1905, was $1,000,033, with cash on hand, or invested, $15,651.38, and no liabilities. The cost to members has been very

GEORGE L. MOORE.

low, averaging from the outset, about one-half of the cost of the same insurance in stock companies.

* * * *

It will be noted that the assessments made up at the end of the year by dividing up the actual losses and expenses incurred represent the total cost of insurance, as the deposit is returned when the insurance ends; also that the company has the cash as security for prompt payment of assessments, though the assured does not have to advance any more money than the amount he would pay at the outset if he carried the insurance in a stock company.

The by-laws provide carefully and specifically just when and how much shall be carried to or taken from the surplus, instead of leaving these very important matters to the judgment or caprice of the Board of Directors. Thus, in the year 1904 the assessments collected were $4,702, being at the rate of 49½ per cent of the deposits on the policies assessed, and of this sum $2,814 was for loss and expense account and $1,888 carried to surplus.

* * * *

At the annual meeting of the company in January the old Board of Directors was re-elected, and at the meeting of the directors February 22 the former officers were also re-elected for the ensuing year.

Officers Elected for the Ensuing Year.

Officers for 1905.

The Nominating Committee submitted the following officers for the ensuing year, who were unanimously elected:

PRESIDENT—George V. Thompson, Mt. Jewett.

VICE-PRESIDENT—J. H. Bowers, Charleroi.

EXECUTIVE COMMITTEE—J. M. Selheimer, Lewistown; J. E. Digby, McKees Rocks.

George L. Moore, of Brownsville, was chosen representative to National Association.

Next Meeting Place.

George L. Moore, chairman of committee appointed for that purpose, reported in favor of Williamsport for the 1906 convention, which report was accepted.

An address on association matters was delivered by S. S. Bryan, of

Digitized by Google

Titusville. Brief remarks were also made by S. J. Lloyd, of the Bindley Hardware Co., Pittsburgh. It was announced by the Executive Committee that they had unanimously re-elected J. E. Digby as secretary-treasurer.

The Banquet.

The usual banquet was given Wednesday evening, the guests, among whom were many ladies, assembling in a large upper room of the convention building well adapted for such purposes. George L. Moore discharged the duties of toastmaster. There were addresses by E. J. Lloyd, of the Bindley Hardware Co.; W. B. Simpson, of the Insurance Co., and James H. Reed, representing the Pittsburg Stove & Range Co. A fine orchestra gave several selections while the dinner was served and the occasion was a very gratifying one.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 21, 1905.

378,082. VISE. B. R. Clark, Union Grove, Wis.
378,090 WINDOW SCREEN. H. H. Greenman, Cortland, N. Y.
378,274. BIT BRACE. A. D. White, Buffalo, N. Y.
378,296. COFFEE POT. L. Ehrlich, St. Louis, Mo.
378,349. CAN OPENER. W. B. Williamson and G. H. Williamson, Worcester, England.
378,351. SASH FASTENER AND HOLDER COMBINED. J. D. Axtell, Santa Barbara, Cal.

PATENTS ISSUED FEBRUARY 21, 1905.

782,854. SIFTING SHOVEL. W. T. Johnson, Brooklyn, N. Y.
782,882. FISH LINE REEL. C. Stolhandske, Brooklyn, N. Y.
782,941. CLOTHES WRINGER. G. T. Willits, Atlantic City, N. J.
782,956. COFFEE POT. T. B. Ferguson, Washington, D. C.
782,974. SASH BALANCER. R. T. Lockerbie, East Invercargill, New Zealand.
783,013. SASH LOCK. D. G. Bolton, Camden, N. J.
783,023. SCREW DRIVER. M. D. Converse, Newark, N. J.
783,033. DOOR CHECK. P. Fraser, Germiston, Transvaal.
783,108. HOSE CLAMPING TOOL. R. P. Decker and H. S. Covey, Chicago, Ill.
783,169. AUTOMATIC FISHING POLE. D. F. Ball, Jeffersonton, Va.
783,184. HINGE FOR WINDOW SHUTTERS. T. F. Dwyer, Brooklyn, N. Y.
783,253. FISH HOOK. B. F. Flegel, Racine, Wis.
783,300. LEMON SQUEEZER. P. McGrath, Hibbing, Minn.
783,318. AWNING FASTENER. G. Schaefer, Chicago, Ill.

PATENTS EXPIRED FEBRUARY 28, 1905.

378,424. SKATE. E. H. Barney, Springfield, Mass.
378,488. SKATE RUNNER BLANK. E. Barney, Springfield, Mass.
378,494. BENCH PLANE. H. M. Clarke, New Britain, Conn.
378,510. WOOD SAW. A. G. Langlot, La Grange, Mo.
378,515. FASTENER FOR MEETING RAILS OF SASHES. H. J. Murphy, Lowell, Mass.
378,565. FISHING REEL. P. H. Yauman, Rochester, N. Y.
378,586. MOP HOLDER. B. F. Gilbert, Fair Haven, Vt.
378,587. WINDOW SCREEN AND FIXTURE. G. H. Goule, West Lebanon, Me.
378,649. FURNITURE CASTER. J. Berkey and W. R. Fox, Grand Rapids, Mich.
378,700. CULINARY VESSEL. H. A. Manning, New York, N. Y.
378,704. BENCH PLANE. C. L. Mead, New York, N. Y., and J. H. Traut, New Britain, Conn.

PATENTS ISSUED FEBRUARY 28, 1905.

783,468. WRENCH. H. Sasko, East Pittsburgh, Pa.
783,471. METALLIC PAIL. A. Shaynin, Oak Park, Ill.
783,492. WRENCH. F. L. Williams and E. Stultz, New Kensington, Pa.
783,525. COFFEE POT. W. S. James, Waxahachie, Tex.
783,550. MONKEY WRENCH. J. B. Smith, Aylmer, Canada.
783,640. CAN OPENER. E. K. Myers, Preston, Iowa.
783,657. DUST PAN. J. W. Walter, Battlecreek, Mich.
783,660. SAFETY RAZOR. A. Williams, Pittsburgh, Pa.
783,682. SAD IRON HANDLE. W. Cole, Kansas City, Kan.
783,763. SCREW DRIVER. J. Swan, Seymour, Conn.
783,813. WRENCH. H. D. Aupke, Sharpsburg, Pa.
783,814. WRENCH. C. M. Benson, Providence, R. I.
783,845. WRENCH. J. Munro, New York, N. Y.
783,883. SAD IRON. B. Mumby, Manchester, Iowa.

(*Continued from page 30*).

visitors. T. James Fernley, secretary of the National Hardware Association, and the retiring president of the association, E. M. Bush, both made interesting addresses. Hon. Charles W. Miller was the last speaker, "The Day" being his theme. His address was greatly appreciated.

THURSDAY MORNING SESSION.

After being called to order by the president, the Committee on Resolutions submitted their report.

H. W. Beegle, of Chicago, then delivered an interesting paper on the **Results of Friendly and Unfriendly Relations Between Local Dealers,**

which was listened to attentively.

H. H. Roberts, Chicago, representing *The Iron Age*, and Daniel Stern, of the *American Artisan*, then addressed the meeting.

The Auditing Committee reported they had examined the treasurer's books and found them correct.

New Officers.

The following officers for the ensuing year were chosen:
PRESIDENT—A. N. Shidler, South Bend.
FIRST VICE-PRESIDENT—Charles Frame, North Manchester.
SECOND VICE-PRESIDENT—Walter B. Creed, New Albany.
SECRETARY-TREASURER—M. L. Corey, Argos.
DELEGATES TO NATIONAL CONVENTION—E. M. Bush, Evansville; A. N. Shidler, South Bend; Albert Deprez, Shelbyville; W. S. Hubbard, Scottsburg; S. L. Fenner, Terre Haute; Otto Lang, Mishawaka.

Place of Next Meeting.

Indianapolis was chosen for holding the convention in 1906.

THE PETERS CARTRIDGE CO.

Five years ago the Peters Cartridge Company found it necessary to remove its offices from the corner of Third and Main Streets in Cincinnati to the Pickering Building, facing Government Square, where they leased the entire third floor, believing that this amount of space would answer the requirements of its business for an indefinite time. Its business has, however, grown so rapidly and has reached such proportions that even these new quarters were found within a comparatively few years to be inadequate. It was, therefore, found necessary to take a lease for a long term of years on a part of the seventeenth floor of the First National Bank Building, affording over fifty per cent. more floor space than the offices in the Pickering Building. The First National Bank Building is the newest, and probably the best of the modern office buildings which have recently been erected in Cincinnati, and is typical of the rapid, yet conservative, progress of the city. The first floor of the building is, of course, devoted to the banking business. Recently the Ohio Valley National Bank, and the National Lafayette Bank have been merged into the First National Bank, making it the largest bank in the city, and one of the largest in the State. The building is nineteen stories high, and was designed by Burnham & Co., of Chicago. It is of the most approved style of steel and concrete construction, finished throughout in Vermont marble and fumed quartered oak. The offices of the Peters Cartridge Company are finished in quartered oak, and mahogany, and are provided with every convenience for the quick transaction of business.

LOOK FOR MAKER'S NAME OR TRADE MARK.

In all lines of merchandise goods which have become well and favorably known are often imitated and sold to the consumer with the assurance that they are "just as good" as the articles which bear the maker's name or trade mark, while as a matter of fact such goods are often "seconds" or goods of inferior quality, for which reason the maker will not show the name or trade mark under which he has built up a valued reputation for quality.

Manufacturers usually make several grades of goods, and are careful that their best grades shall bear their name or trade mark to advertise the excellence of their products, and it follows that they are not only willing but anxious to immediately replace any raticle so guaranteed to have been made by them and which may prove defective in any way. This is especially true with articles usually sold by Hardware stores. It is a common practice with manufacturers of these lines to dispose of their inferior grades under what is known to the trade as "special brands," and also to furnish such goods to buyers of large quantities marked with the buyer's "private brand;" needless to add that private brand goods, bought from whichever manufacturer will make the lowest price on a season's quantity, carry no assurance of quality, and it behooves the consumer who desires quality and manufacturer's guarantee to see that goods bear the maker's name or trade mark.

Digitized by Google

OHIO HARDWARE ASSOCIATION

The Eleventh Annual Convention of the Ohio Hardware Association was held February 28 and March 1st and 2d at Dayton, the sessions being held in the sun parlor of the Algonquin Hotel. The convention was prefaced by a meeting of the Executive Committee in the morning at 10 o'clock.

TUESDAY AFTERNOON SESSION.

At 2.30 the convention was called to order by the president, John F. Baker. Rev. Merle A. Anderson, pastor of the Third Presbyterian Church, delivered the opening prayer. The president was presented with a mahogany gavel, accompanied by some brief remarks by J. P. Duffey as representative of the Hardwaremen of Dayton.

J. D. Clark, representing Mayor Charles A. Snyder, welcomed the delegates to the city of Dayton in a brief address, which was responded to by Vice-President C. S. Johnson.

Upon calling the roll it showed an unusual attendance for an opening session of nearly 200 members.

JOHN F. BAKER, PRESIDENT.

President W. P. Bogardus, of the National Association, was unable to be present on account of the severe illness of his son.

The president then appointed the following committees:

RESOLUTIONS—Henry F. Rahe, G. W. Wiley, J. J. Ewing, John Henne, J. W. Lingo.

NOMINATIONS—F. W. Ingalls, P. E. Coffman, C. C. Heller, W. W. Osborn, E. F. Wineland.

QUESTION BOX—H. C. Wiseman, J. E. Good, L. G. Church.

LAWS RELATIVE TO THE HARDWARE TRADE—W. W. Crumrine, Albert Bobinger, R. W. Goodard, Isaac Ullery, J. D. Giselman.

MEMORIAL—B. W. Ricket, M. A. Griffith, D. L. Lefever.

The Question Box being opened, the several questions it contained were read and discussed.

M. L. Corey, secretary of the National Association, was called upon to say a few words. He spoke briefly, referring to the growing importance of the annual sessions.

Sharon E. Jones, Richmond, Ind., who was a guest on this occasion, spoke briefly in favor of the formation of local associations in towns of any size.

The National Cash Register Co., of Dayton, invited the wives of members to visit their extensive factory on Wednesday afternoon, a number of Dayton ladies acting as escort.

Tuesday night was laid out for the Hardware merchants of Dayton to entertain the members at the National Theatre.

Up to 9 o'clock Tuesday night 350 members had registered at the Information Bureau.

WEDNESDAY MORNING SESSION.

After the meeting had been called to order Secretary Frank A. Bare, of Mansfield, read his

Secetary's Report.

One of the serious problems that confront this organization to-day is the question of getting new members. I believe there is more enthusiasm in this State to-day than at any time before. This is because the association idea is growing all over this country. A great deal of our inspiration has been derived from the National Association. This body has done such magnificent work that the progressive dealer sees it is to his interest to identify himself with the movement.

Since last April the secretary has mailed to dealers in this State, members and non-members, over 12,000 pieces of mail matter. With the exception of mailing out *The Iron Age* reports and the members asking them to give some of their time and influence to interesting non-ship lists very little was done until after the first of the year. We then commenced an active campaign and have tried to keep at it steadily ever since.

We have asked a great many of our members to do some personal letter writing as well as telephoning, and we found both of these methods very satisfactory. After a man has been called up by 'phone by some friend he is, I find, much more apt to read over carefully the letters sent out by the secretary. I have asked at least one member, and sometimes more, in every county in the State to telephone some of the dealers in his counuty. A large number of these members responded to the request. Seventy-five new applications had been received by the secretary up to the time of the convention.

THE TRAVELING MAN HAS BEEN VERY LOYAL

to our association. Early in January the secretary addressed letters to 265 of these gentlemen who call on Hardware dealers in this State, members in our organization. In about three weeks this letter was

C. S. JOHNSON, VICE-PRESIDENT.

followed by a second letter. I wish to express my appreciation of the hearty responses received to this request. A number of dealers have written me concerning the interest the traveling representatives have taken. A traveling man meets the dealer face to face and is in position to state the strong points of our organization in a very emphatic and convincing manner. This association must not forget the help and assistance constantly given us by traveling salesmen.

I wish to especially thank those dealers who have taken the time to write personal letters in the interest of the association. A large number of responses have been received to the request sent out by the secretary asking members to write to two non-members. Outside of personal solicitation, I regard personal letters as the most effective way of getting new members.

* * * *

Our State organization is under great obligations for the constant assistance afforded us by the national organization. It is through the National Association we are able to handle larger affairs.

MUCH WORK REMAINS TO BE DONE.

In closing, I wish to say there is a great work to be done by this association. But this work will never be accomplished until our organization is truly representative of the retail Hardware interests of Ohio. It can never be truly representative until its roll of members includes the great majority of the Hardware dealers of the State. When we can go before a manufacturer or jobber not representing 400 dealers, but representing the Hardware dealers of Ohio, we shall be able to convince the manufacturer or jobber that it is to his best interest to be loyal to the retailer.

The dealers of this State are now thoroughly interested and aroused, and it is the opinion of your secretary that the time is now ripe for an active State campaign that shall so greatly increase our membership as to enable us to bring about the results we have so long worked for. This campaign cannot be carried out except by the individual and determined efforts of every single member of this association. The responsibility of future success rests not upon president, secretary or any other officer alone, but upon each and every member of this body.

After which, President John F. Baker, of Dayton, read his annual address.

President's Address.

Since last we met one more year has passed away, and now we stand on the threshold of another new and, may we hope, prosperous

Digitized by Google

year, which is bright in prospect and opens auspiciously, bidding fair to surpass its predecessor in mercantile and commercial pursuits. As we review the year that is gone, it is safe to say with the majority of our members it was a disappointment. The reports as gathered by the various trade journals from trade centers indicate that the volume of trade in 1904 was not equal to that of 1903. The fact that it was a Presidential year, and also that in the opinion of many a financial panic was surely due, made it the part of wisdom to prepare for some depressing influence. All this conspired to build up a wall of uncertainty and hesitation which did not confine itself to our own branch of trade, but to all lines of industry. But now, the feeling of doubt has passed away and we stand at the very threshold of the bright, promising and prosperous year of 1905.

* * * *

Let us then be optimistic rather than pessimistic, and, putting forth our best efforts, go forward to meet the promising year with confidence and courage.

PROFITS AND EXPENSE ACCOUNT.

But whether we have the full measure of prosperity or not, the days that are to come call for the exercise of our best judgment, for you and I have made the discovery that as the years come and go we find this one feature, our profits are gradually diminishing and our expense account perceptibly increasing. This is the experience of all. Competition grows more and more severe, and with all the system and method we may employ, our expense account does not diminish.

FRANK A. BARE, SECRETARY.

* * * *

MEMBERSHIP.

Regarding our membership, I am happy to say that

PROGRESS IS STILL THE WATCHWORD.

We do not, however, increase as rapidly as we should, but our growth is healthy and of good substance, and if it so continues we shall in the near future include all the dealers of our State. At times the officers of our association have wondered why the growth was not more rapid, but if they will refer to one of my reports while secretary some seven years since they will note that the officers at that time were similarly perplexed.

* * * *

Now, since that time our association has grown from 100 to 350 members, and I have reason to believe that at the adjournment of this session we shall have a membership of 400.

The Ohio Hardware Association has done much for the dealers of Ohio. I venture the assertion that under its beneficent influence its members are

DOING BUSINESS UNDER PLEASANTER CONDITIONS

now than in the days that have gone before; that our stores are neater and brighter; that our modes of transacting business are better, and that we employ more system than at any time in the history of our establishments, all of which is due to the influence of and affiliation of our fellow-tradesmen. And, best of all, these advantages and benefits that have come to us are the tangible returns that we have received from the organization of our Mutual Fire Insurance Co., and not only have these benefits come to us, who are members, but they have been most generously shared with other dealers in the State, who have not as yet joined our association.

* * * *

PARCELS POST LAW.

Regarding the Parcels Post law, which we have been so successfully fighting for a few years, I find by Congressional reports that the friends of this iniquitous measure have put it in a new dress, and give it a new name; but let me warn you do not be deceived; it is a delusion and a snare. The voice is the voice of Jacob, but the hands are the hands of Esau. You should, therefore, take decisive measures before we adjourn and lose no opportunity to notify our Representatives in Congress of our action.

It is not necessary that I should prolong this paper farther than to express the personal wish that this shall be the best convention in the history of our association; that, from a business point of view, it shall be the most profitable. As stated before, let us make the business part of it predominant.

* * * *

As your president, I am unable to express in words my appreciation of this kindly, fraternal spirit, because it is one of the cardinal principles of our great organization, which we seek to inculcate among Hardware dealers in every village, town and city in our State.

M. L. Corey, Argus, Ind., secretary of the National Retail Hardware Dealers' Association, on invitation of the president, then made a few remarks:

We are standing to-day confronting a serious problem. To go back a year or two, I will say that I was authorized to go to Washington, and make arrangements for you in Congress in parcels post legislation, and other matters in which the retail trade are interested, and I believe my informant there is trustworthy. As you are aware, Assistant Postmaster-General Bristow recommended that rates on merchandise be reduced to eight cents per pound, ostensibly in your interests. This matter is now before Congress. I have received a telegram from my correspondent that a Senate bill on this matter is being strongly urged, and that the vote will come this afternoon. I think we should telegraph Senator Penrose, Representative Overstreet and the Ohio Senators in this matter. This bill asks for an entering wedge, and is a dangerous proposition. I have with me a copy of the *Orange Judd Farmer*, a paper which is widely circulated among the farmers. A recent issue contains a lot of rhodomontade about the happiness of the home, the perpetuity of the nation, the fact that the farm is the cornerstone of the republic, etc. It urges government control over railroad rates, the parcels post, the local post with still lower rates, and also post checks. Some of the measures we are fighting are thus linked with measures of which we approve. Among the signers of this document are a number of secretaries of labor organizations and granges, and Governors of various States, including Myron T. Herrick, of Ohio. This is a serious matter to me, and I regret to see the name of your Chief Executive upon this list. I believe there must be some mistake. His endorsement will go far. You should send messages to Washington to defeat this measure. We must do what we can in the matter. We wired our Senators and Representative Overstreet in Indiana last week, and wired to Minnesota to wire her Senators concerning the matter. You are up against it, and should defeat the bill before it is passed.

L. F. STAHLER, TREASURER.

After which the following telegram was prepared and sent:

On motion the corresponding secretary was instructed to send telegrams to Senators Boies Penrose and J. B. Foraker, to Representative Jesse Overstreet and to Gov. Myron T. Herrick, of Ohio, the latter to urge the Governor to rescind his recommendation of the bill. The telegram read as follows:

> The Ohio Hardware Association in convention assembled, representing 1,400 Hardware dealers, earnestly protest against the passage of the Senate Parcels Post bill. We desire you to represent our interests in this matter.

It was urged by Mr. Corey that each member of the association telegraph his Congressional representative immediately after adjournment and during the noon hour.

A. F. Sheldon, of the Sheldon School of Scientific Salesmanship, was called upon to deliver an address on

Scientific Salesmanship,

which was an eloquent and closely presented article on the subject.

WEDNESDAY AFTERNOON SESSION.

Catalogue House Competition.

The Wednesday afternoon session was called to order at 2 o'clock and President Baker at once introduced Mr. S. Norvell, of St. Louis, chairman of the Joint Catalogue House Committee. Mr. Norvell opened his address by giving a history of the present fight against mail order competition. He reviewed the work of the Joint Committee from the time of its appointment less than a year ago, and his audience was agreeably surprised at what had been accomplished. Mr. Norvell stated that over 600 of the most prominent Hardware manufacturers in the United States have gone on record that they will not sell catalogue houses, and that not a Hardware jobber of any standing will fill an order from these houses. In St. Louis two catalogue houses have gone out of business and others are badly crippled because of their inability to get goods. A most important result of the present agitation is the bringing out into the open of the policy of leading jobbers and manufacturers.

Among other important statements made in this address were the following:

It has developed in the experience of more than one manufacturer that the idea of controlling the prices of catalogue houses on well-known brands is a failure. The constant struggles and misunder-

S. NORVELL.

standings which have existed between prominent manufacturers and the catalogue houses on this question is evidence of this fact. When they do not directly cut prices they have a system of offering gifts or prizes which actually cuts the price on all these lines of goods.

It has been claimed by some that this campaign by the united jobbers and retailers against catalogue houses was initiated by this recent movement. It should be distinctly understood by all that the jobbers and retailers are simply acting upon the defensive. For years past the catalogue houses have been educating the consumer of the country to believe the retail Hardware dealer is a robber and that there is no reasonable excuse for the jobber to be on earth. The time has simply come when they are beginning to reap what they have sown.

We all must realize that if manufacturers, jobbers and retailers are sincere in this movement and will stick together shoulder to shoulder, the catalogue houses will soon become weary of the unprofitable pastime of obtaining goods indirectly and sacrificing their profits on them.

Let me bring to your attention the fact that it is admitted all the catalogue houses in the country combined do not sell over five per cent of the Hardware consumed in the United States. Ninety-five per cent of the goods in which we deal is distributed through the retail trade.

THE GREAT HARM OF THE CATALOGUE HOUSES

is not so much in what they sell as in the demoralization of prices. Is it not hard to understand why a manufacturer who sells ninety-five per cent of his product through jobbers and retailers should stand out for the trade of a certain class of customers who take only five per cent of his output when it is made clear to him that this class of customers is demoralizing all others who sell ninety-five per cent of his goods?

I find most proprietors of retail stores who have several clerks do all the buying themselves—they seem to consider the buying of the greatest possible importance. They entertain every salesman who calls. They allow this salesman to consume just as much time as he wants. Probably three-fourths of their time is devoted to entertaining salesmen and to buying, and one-fourth of their time to everything else. The salesman gives his talking points to the buyer, the buyer seldom sells any goods and seldom gives the talking points to the retail salesman who sells the goods. Therefore, the talking points never reach the clerk.

I recommend proprietors in retail stores devote three-fourths of their time to selling and to meeting their customers, and one-fourth of their time to everything else. I recommend you have the salesmen who visit you give the talking points to the men who sell the goods. I recommend higher education for Hardware clerks, especially along the lines of selling.

THE WASTE OF TIME

in this country on the part of proprietors of retail stores and their clerks is something prodigious. They think they are busy simply because they put in long hours at the store. But there is a vast difference between being simply at the store and using their time to the best possible advantage. I have known what traveling men call "mean merchants." They sometimes cut the traveling man rather short. But I have seen these merchants succeed because they saved their time and used it where it would count the most. I, of course, believe salesmen should be treated with courtesy, but a wise salesman should know when it is time to quit.

I count your show cases and your show windows as salesmen. I count the appearance of your store as being in the selling department. I count the proper keeping of your catalogues, circulars and price lists as being part of the selling system because you use them in taking orders from your trade and you miss orders when you cannot find the proper catalogue. I count the proper answering of the telephone as selling. To this I also add the proper use of the rural free delivery system.

The salesman is more interested in this catalogue house question than anybody else; it is of more vital importance to him. If the catalogue houses predominate then it is a comparatively simple thing for large jobbing Hardware houses to add to their lines and turn into catalogue houses. It probably would mean simply the loss of profit for a year or two while the change was taking place. This would eliminate all salesmen.

Even if catalogue houses were in all the large cities in the land there would still be some retailers left. The number of retailers existing to-day might be reduced from fifty to seventy-five per cent and these dealers would have to seek their livelihood in other vocations. But as long as there is an immediate demand for goods and as long as some trade are compelled to buy on time, there will be retail dealers left.

But the general prevalence of the catalogue house means the absolute death knell of the system of selling goods through salesmen. Therefore it behooves the salesmen of to-day to use their very best efforts not only to sell goods and to be profitable themselves, but to do everything in their power to help their retail customers to be better salesmen and to keep better stores and thereby command a larger share of the business.

The convention adjourned at 3.15 in order to have a convention photograph taken, after which they took a special train to the National Cash Register Co.'s works, where they were welcomed by the secretary and general counsel of the company, and had a collation.

WEDNESDAY EVENING SESSION.

The convention met in the evening and were addressed by A. A. Thomas, secretary of the National Cash Register Co. The president responded to Mr. Thomas's greeting in a few brief remarks. After a few short speeches by H. C. Wiseman, S. Norvell, W. R. Belknap and M. L. Corey, W. P. Bogardus, of Mount Vernon, president of the National Retail Hardware Association, delivered the following address: He said in part:

Address of W. P. Bogardus.

It is a privilege to rejoice with you over the advancement that has been made in the last eleven years. When we were but a group of thirteen we had hardly hoped for the things that have already been accomplished. Our first efforts at organization were looked upon with suspicion. Both jobber and manufacturer who noticed the movement at all viewed it as a move antagonistic to their interests, and only by the lapse of time and careful and conscientious work have we been able to get, as we now have, the confidence, respect and hearty co-operation of the jobber in our efforts to better our conditions. I regard it as

AN OCCASION OF GREAT REJOICING

that we are so closely allied with the jobber in the work; to have their sympathy and help, to have their advice and encouragement, and to be able to meet them in committee, to discuss common interests, and that they are ready to second our efforts and uphold us in our work, when we strive to better our conditions by blocking the schemes of the catalogue houses to ruin our business and permanently cripple us as retailers; I say, to have all this is a greater stride than we had hoped for. We owe a debt of gratitude to the jobbers for their loyal support in helping to defeat the parcels post legislation last year. We should remember with a long memory the willingness of manufacturers to cut off sales to catalogue houses at the joint request of retailer and jobber.

While our annual gatherings are sources of information and pleasant memories, the great work done is by the committees that are appointed at the several association meetings. To have arrived at a point where we can meet both jobbers and manufacturers in conference and in a quiet way discuss the troubles and vexations that are incident to our business, is a condition not dreamed of at our first meeting eleven years ago. All these

ADVANCES HAVE COME FROM ORGANIZATION.

Whatever of success we may have must come from organized effort. An organized effort made by a few has not the force that numbers give. Therefore, to be completely successful, all must help on the

Digitized by Google

work, and the measure of our success will be the unanimity with which we present our views.

A potential factor in the control of men and measures is public opinion. Can we not, and is it not our duty, as citizens, to help form public opinion that is

OPPOSED TO SPECIAL PRIVILEGES

for any class—that is opposed to the government going into the transportation business in competition with its citizens; that is opposed to the practice of giving to large shippers of freight rebates and favors that are denied to the small shipper; that is opposed to the parcels post legislation that will build up the catalogue house and ruin the retailer in the small towns; that is opposed to the practice of railroads demanding and collecting demurrage on goods not taken immediately by the consignees, but refusing to consider any liability for goods that are needlessly detained by them while en route; a public opinion that will demand and be satisfied with nothing less than fair play for everybody and favors to none? These are possible things that come from our organization. Shall we fail to improve our opportunities?

W. P. BOGARDUS.

The keynote of our success is a united effort on the part of us all. We shall not fail. From the north, from the east and south and west comes the cheering news of increased membership and of an enthusiasm that bids fair to sweep every Hardware man in the country into the ranks of the associations, and Ohio, the oldest of them all, shall not be a laggard in the race.

THURSDAY MORNING SESSION.

Was devoted to insurance matters. George M. Gray, secretary of the Ohio Hardware Dealers' Mutual Fire Insurance Co., read his report, which included a detailed statement of the business done during the year. Addresses were delivered by W. P. Duffy, of Greenville, and others.

After the adjournment of the Committee of the Whole from the discussion of insurance matters, the Question Box was taken up and a number of questions were discussed.

At the

THURSDAY AFTERNOON SESSION

a continuance of the Question Box discussions were had until the matters were finished.

The Committee on Resolutions reported as usual, which were resolutions of thanks to all those who had helped to make the meeting a success.

THE ELECTION OF OFFICERS

resulted in the following:

PRESIDENT—John F. Baker, Dayton.

VICE-PRESIDENT—C. S. Johnson, Barberton.

FINANCIAL SECRETARY—A. L. Shearer, Dayton.

TREASURER—L. F. Stahler, Waverly.

SECRETARY—Frank A. Bare, Marshfield.

MEMBERS EXECUTIVE COMMITTEE—Will M. Crumrine, Salem; A. Roblinger, Cincinnati; John S. Spoerl, Hamilton; W. L. Jacobs, Youngstown.

GRIEVANCE COMMITTEE—J. K. Mulligan, Bellfontaine; J. J. Ewing, Lima.

DELEGATES TO NATIONAL CONVENTION—C. S. Johnson, Barberton; Frank A. Bare, Mansfield.

Canton, Columbus and Springfield were candidates for the next convention, the former city being unanimously chosen.

The convention adjourned at 3.30 p. m.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Citizenship.

QUESTION: Is a child born in the United States, whose parents are British subjects, residing within this country, and who has himself lived here, a citizen of the United States, or is it necessary for him to take out naturalization papers?

REPLY: He is a citizen of the United States. The Constitution provides that all persons born within the United States and subject to its jurisdiction are citizens thereof and of the State where they reside. This provision was construed by the Supreme Court of the United States a few years ago in the case of United States against Wong Kim Ark, reported in 169 U. S. It was there held that a child born of Chinese parents who were subjects of the Emperor of China and domiciled within the United States was himself a citizen of the United States and entitled to the protection of its laws.

Public Hospital—Liable for Malpractice.

QUESTION: Can a person who obtains free treatment at a public hospital and is injured by the carelessness of the surgeon who attends him, recover anything against the hospital for malpractice?

REPLY: He cannot unless he can show that the trustees or governing body of the hospital were negligent in the selection of the surgeon who treated him. The general rule that an employer is liable for the carelessness of his servants has no application to charitable institutions—the courts deeming it contrary to public policy to subject the trust funds by which they are established and maintained to diminution from such causes. But it is always recognized that a charitable corporation may be held responsible for the negligence or malpractice of its agents or servants, provided its governing body do not exercise due care in their selection and employment.

Fraudulent Assignment of Mortgage.

QUESTION: On August 2, A being the owner of a mortgage, assigned it to B for its face value. This assignment was not recorded until November 12. In September A, for a valuable consideration, executed a second assignment of the bond and mortgage to C, and such assignment was recorded on October 1. The mortgage effects real estate in New York. Who is the owner of the mortgage?

REPLY: Under our recording act a purchaser of a mortgage in good faith and for value may rely upon the record as to the title of his assignor. It follows that if C was a bona-fide purchaser for value, he had a right to assume that A was the owner of this mortgage, because B's assignment was not recorded until after C took and recorded his assignment. For B's neglect in failing to record his assignment until four months after he took the same, and the fraud which A was thereby enabled to commit, B, not C, should be responsible.

Liability for Lost Baggage.

QUESTION: I bought a ticket from Summit, New Jersey, to New York City, and checked a traveling case, telling the baggage master that it contained goods and samples. The baggage master checked it, but the traveling case was never delivered. Its contents were of the value of $250. The railroad company refuses to pay on the ground that the case contained merchandise and not baggage. Can I recover anything?

REPLY: The failure to deliver the case in itself unexplained is sufficient to establish a prima-facie case of negligence against the railroad company. If the traveling case contained what is usually known as baggage, the company would be liable for its loss and we do not see why it is not equally liable if in consideration of the fare paid it undertook to transfer you and the case with notice of its contents. In other words, a carrier is liable for goods checked, although not baggage, if knowing their character, it accepts them as baggage. As to the extent of the liability, the statutes of New Jersey permit the railroad company to limit its liability for baggage to one dollar per pound to the extent of one hundred and fifty pounds. If proper notice was given to you of this limitation of liability, we think your recovery will be limited to one hundred and fifty dollars.

A SIMPLE REQUEST.

"Oh—er—Jarvis, would you mind pretending to pick a quarrel with me, and just giving me a push, you know? I want to test the pluck of this big dog of mine."—*Tit-Bits.*

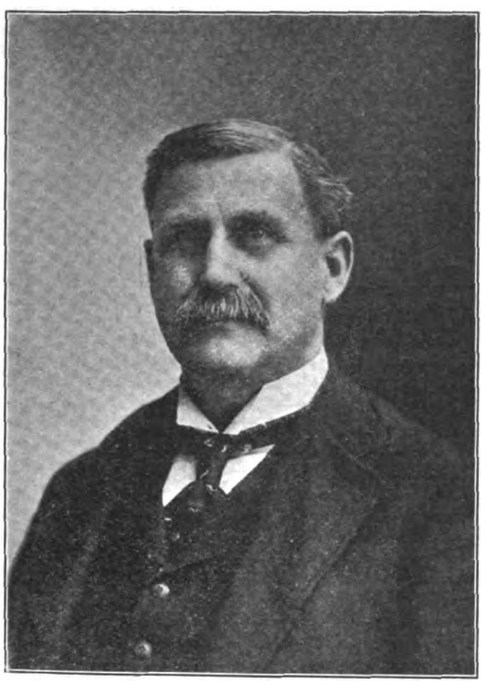
NEW YORK STATE ASSOCIATION OF RETAIL HARDWARE DEALERS

The New York State Association of Retail Hardware Dealers held their third annual convention at the Hotel Iroquois, Buffalo, on March 7th, 8th and 9th, and in point of numbers and importance was the most successful gathering they have yet held, over 200 members and guests being present.

TUESDAY AFTERNOON SESSION, 2 O'CLOCK.



After the meeting was called to order by President John G. Ferres, of Johnstown, Thomas Stoddart, the Acting Mayor of Buffalo, delivered an address welcoming the delegates to the city of Buffalo, which was felicitously responded to by President Ferres.

The president then read his annual address.

Presidential Address.

BY JOHN G. FERRES, JOHNSTOWN, N. Y.

This is practically a business meeting for business men, to exchange practical and tried plans and ideas, and to consider and devise methods that will improve and protect our business as retail Hardware dealers. Everyday business life reveals to us the fact that we are dependent on each other for protection, for trade, for pleasure, for happiness. In coming together at this time we virtually—if not in words, by the act—indicate that we feel a mutual reliance, a fraternal feeling. We must stand and work together, earnestly and faithfully, to combat any and all encroachments and maintain and vindicate our right to exist as a separate and distinct trade, that of retail Hardware dealers.

J. G. FERRES, PRESIDENT.

ORGANIZATION.

This naturally leads us to the question: How is all this to be accomplished, what methods are we to inaugurate, what system to establish, that will bring us into closer relationship with each other, having, as it were, one object, one thought—protection to our business? It is fair to assume that every member of this association will agree that only by thorough organization and aggressive work can we wield the power and influence necessary to protect our trade and better its condition.

I believe that a great effort should be made to have dealers form local associations. By forming an offensive and defensive alliance they would be brought into closer relationship, learn what influences are at work to injure their trade, and, having frequent and regular meetings or conferences, would be thereby able to take prompt and concerted action on various matters in trade that we find oppressive and aggravating, and from which we now suffer for want of a good understanding with our neighbors. Quick information is needed in regard to interferences with our trade, and the local associations would be in position to examine into such matters at once, and if not able to bring about reform lay them before the State Executive Committee, and if they are unsuccessful an appeal can then be made to the National Association, and the whole subject referred to them.

I am aware that it is a difficult matter for local dealers to come together of their own accord. There are old animosities, deep-seated resentments, but which are in the majority of cases purely imaginary, and I believe could be overcome by a friendly meeting and exchange of views. We therefore need an intermediary, some person who can devote his time constantly to association work. I submit to you that none of your officers is able to give the time and attention necessary to devise a plan or system to carry out this work. Therefore I present for your consideration the proposition to employ a competent person at a salary, whose business it would be to make a thorough canvass of the retail Hardware dealers, visit every dealer, no matter where located; solicit his membership, and carry out the work on lines similar to those that I have presented. In the performance of this duty he would constantly be in contact with dealers, exchanging views, hearing their complaints, giving advice, trying to heal differences between dealers, and would soon become so conversant with conditions in different localities that he would in a short time be able to render efficient aid, and you would soon be convinced that his services would be invaluable.

There is another thought in conection with the subject of organization, and which applies to retail dealers' associations generally, and also to our National Association, and I refer to it at this time for the reason that we have an official of the National Association present at this meeting; I believe that all the State associations should have a closer and more binding relationship; that we should be organized upon the plan of a federation or league, with the National Association as a grand or central body, and the State associations subordinate bodies, charters to be issued by the National to the State associations, and they in turn issue charters to local associations. There should be uniform constitutions and laws, each State association pledging loyalty to the national body. I am not prepared to go into the details, for the system would have to be worked out very carefully.

So important have I considered the matter of State organization that I appointed a special commitee to consider the whole question and devise some plan that would be practical and that you would approve.

* * * *

CONSTITUTION AND BY-LAWS.

Our present constitution and by-laws were adopted at the first meeting of our association, held in Syracuse in 1902. The work was done rather hurriedly and a form of constitution and by-laws of some other association, with some slight changes, was adopted. It would seem, therefore, that after three years' experience some changes could be made that would be desirable and beneficial. The list of committees could be enlarged and possibly the number of directors increased. By increasing your committees you divide the association work and a greater number are interested.

* * * *

JOBBERS OF HARDWARE IN NEW YORK STATE.

Generally speaking, I believe jobbers are taking a great interest in our association work and are doing all in their power to help us. I have before me a circular letter authorized and sent out by the New York State Jobbers' Association stating that they stand ready to assist us in every way possible to successfully meet the competition of the mail order houses. In this circular letter they offer some excellent suggestions to merchants to successfully meet this competition. They also offer to supply dealers with pamphlets for distribution among our customers, giving strong "reasons why your customers should patronize the home dealer instead of sending their cash to a distant city." These pamphlets they furnish without charge. It is very evident that the jobber realizes, as well as the retailer, that the mail order houses constitute desperate competition, and is aware that all goods sold by those houses represent a loss of profit to the jobber as well as to the retailer. I am extremely gratified that our friends the jobbers are working with us.

A short recess was then taken for the enrollment of new members and the payment of dues, after which R. R. Williams, Hardware editor of the *Iron Age*, opened the discussion in Trade Topics.

W. P. Bogardus, president of the National Retail Hardware Dealers' Association, was unable to be present on account of severe illness in his family, sent an important letter, from which we give the following extracts:

MT. VERNON, OHIO, March 3d, 1905.

Mr. President and Gentlemen of the New York Hardware Convention—That I am not able to be with you, on account of sickness in my family, I very much regret. But providences arise over which we have no control, so I must needs be content.

* * * *

It is well said that times have changed and men have changed with them. No longer is it possible to do business as our fathers did. Neither is it wise to put our stocks on the shelves of our stores and sit down and wait for trade. But in the evolution and business methods, and as one of the results of the spirit of organization and consolidation and greed, and the consequent lowering of the moral tone of business men there has arisen a class of men who seem to think that their success is dependent on the failure of somebody else, and the larger the number of failures by others the greater their success. And so we have with us a class of so-called merchants whose great argument for trade is that they sell cheaper than any one else, and that all the balance of the retail trade are extortioners and robbers, and to justify themselves they quote some standard and well-known goods at very low prices, hoping to carry the impression that all the goods they sell are at correspondingly low prices, and the astonishing thing is that until lately both jobber and manufacturer have done all they could to help this unfair competition to grow, and so help to break down ninety per cent of their trade.

* * * *

Eleven years ago thirteen Hardware men gathered at Columbus, Ohio, to form an association to oppose the inroads of catalogue house competititon, the first effort ever successfully made to form a State

Digitized by Google

Hardware association. From this small beginning we have grown so that now we are bound together by a National Association that is backed by thousands of retail dealers who have seen a reason for the step, and have put their money in the movement with a hope of ultimate success.

What have we done? We are not drifting. We are organized and are receiving the consideration and attention that as individuals we might never have hoped to receive.

Years ago the jobbers thought it a great advance for them to sell to and help build up the catalogue houses, and they continued this policy until the organized Hardwaremen of this country succeeded in showing them the error of their ways. To-day they are with us, and we have a permanent committee of jobbers and retailers who are looking after the interests of both jobber and retailer. There was a time when our State associations were looked upon as antagonistic to the jobbers. We are now in friendly unison for our mutual advantage, and the protection of our mutual rights. Is that a gain? A few years ago we were denied admission to a meeting of manufacturers and jobbers. During the past year the retailers' association have been asked to present their views, first at Atlanta, at the meeting of the Southern jobbers and manufacturers, and second at the meeting of the manufacturers and Northern jobbers at Atlantic City. And the greatest courtesy was extended to them. In 1903, at Atlantic City, the vigorous presentation of the retail Hardwaremen's views on the post parcels question was instrumental in deferring action on that vicious measure.

And further, we shall have the pleasure of entertaining committees of both jobbers and manufacturers at the meeting of the National Retail Hardware Dealers' meeting at Minneapolis next week.

* * * *

And one of the most pleasant things about the work has been that as soon as the attention of the jobber and manufacturer was called to the questions there was a prompt, hearty and almost universal turning to join forces with us to put down some of the evils under which we struggle. This unity of effort means ultimate success. Another thing that we hope to accomplish is to get the retailer to understand that his "long suit" is to be friendly with his competitors, to learn that the other fellow has as good a right to live and do business as he has, and that the interests of Hardwaremen in the same town are not antagonistic, that the height of successful merchandising is not in cutting prices or seeking to run out competition, but in a friendly strife for trade. No one man can sell all the goods. No one firm can supply the wants of any community. So it is better to be at peace than at war with your competitors.

Other things have been accomplished, I cannot stop to enumerate them. But this we may know, that in these days of organization the individual is swallowed up, and, to be a force that hopes to accomplish things, we must organize, and the more perfect the organization the more hope of final success.

Gentlemen, with the greetings of the National Retail Hardware Dealers' Association and my best wishes for your success, I beg to sign myself,

Yours very truly,

W. P. Bogardus.

E. A. Towne, of Saratoga Springs, who was unable to be present, sent a valuable paper on "Credits," which we give in part.

Credits—The Necessity of Curtailing Them.

How to keep his business on a paying basis is the problem which confronts every Hardware man. This means a constant struggle with the leaks which drain away his profits; most of these he has learned to control, but one of the largest and most troublesome of all he has not satisfactorily staunched, and that is credits.

* * * *

Merchants can make better prices for cash than for credit. The buying public knows this. Others using this fact for a foundation have built up enormous mercantile enterprises whose competition is felt throughout the country. I refer to catalogue houses and department stores. These institutions deal strictly for cash. With no part of their capital tied up in book accounts they always have ready money for

THE AGGRESSIVE PUSHING FORWARD OF THEIR BUSINESS.

By having many leaders they create for themselves enviable reputations as price makers. How can merchants, loaded down with a burden of credits, expect to meet such competition? All that merchants and others have done so far to protect themselves is slight in comparison to what can be done by keeping their credits down to the lowest possible point, thus being able to go into the fight armed with their big competitors' most potent weapon.

A high commercial credit is a most valuable asset and it should be carefully guarded. To meet his bills promptly and to be good for whatever he buys is necessary to maintain his commercial character or credit; besides, it makes smooth many places that otherwise would be rough. Ability to pay is directly affected by the way goods are trusted out and collections made. It is imperative then to

KEEP CREDITS DOWN AND COLLECTIONS UP,

for it is easy for the merchant to get all his available cash on his books and thus diminish his ability to pay his debts. Our surplus thus loaned out draws no interest, and, say what we will, profits do not cover this loss in a satisfactory manner. Often the capital thus loaned out prevents the merchant discounting his bills and the discounts, were he able to take them, would every year add substantially to his profits. Anything that will honorably build up our profits is desirable, and no way is easier or surer than by saving discounts. It takes cash to do it and short credits, and few of them will help us to the cash.

* * * *

OVER-ZEALOUSNESS TO SECURE TRADE

and the consequent fear to say "No" put many bad accounts on our books. It is difficult to refuse credit to a customer who has spent more or less money in your store and who may also have brought you other trade, but if he is not deserving of credit he should be refused. By so doing a customer may be lost, but if he is trusted both the customer and his account are lost. There are a great many such people in every community and their patronage is worth just as much as anybody else's so long as they pay. But few of such customers are lost by refusing to trust them. Here, then, is an incentive to insist on cash with the goods, for cash customers are what we want. Slow pay customers are much the same, for when asked to settle they are very apt to leave you until such time as they feel like paying.

* * * *

Cultivate those who pay; they remain one's customer and friends; of all who deal with us they are most easily pleased. They are the principal ones whose kindly recommendations bring us new trade. They are not the ones who accuse you of trickery and dishonesty. They are not the ones who put you off a year or more on their accounts, using their valuable cash in the meantime to pay for large bills of goods bought from catalogue houses. Those customers who pay as they go "Grapple to thy soul with hoops of steel."

* * * * *

A STRICTLY CASH BUSINESS,

were it possible, would relieve us of our greatest source of loss, and, though it would not make the Hardware business one "Grand, sweet song," it would bring about a more satisfactory condition. If we cannot deal strictly for cash we can at least get close to it. Short credits can be insisted upon and we can limit it to those who are good pay. To follow this out to the letter and at the same time push our business industriously and intelligently spells success. Let us get into line.

The Banquet.

Members and guests to the number of about 250 were given a banquet on Tuesday evening by the manufacturers and wholesale merchants of Buffalo. E. C. Neal acted as toastmaster and gave the toast, "Our Guests," which was responded to by Sidney Detmers, of Sidney Shepard & Co. Addresses were also made by J. G. Ferres, R. R. Williams, H. A. Hull and John D. Taylor.

WEDNESDAY MORNING SESSION.

Much of both sessions this day was taken up by the jobbers, manufacturers and their traveling salesmen, to whom it was devoted, and W. P. Ladner, treasurer of the National Hardware Mutual Fire Insurance Co., delivered an address on "Mutual Fire Insurance," which was of great interest to all present.

At the Wednesday afternoon session an address on "The Science of Successful Salesmanship" was delivered by R. U. Conger, general manager Sheldon School of Scientific Salesmanship, which will be published in a later issue as a special article. Then followed an address which was read by E. C. Neal, of Buffalo.

Mr. Edgar C. Neal,

of the Buffalo Wholesale Hardware Co., selected as his subject, "Unity of Forces." We regret that lack of space prevents our printing his address in full. He said in part:

We are living in a progressive age; times and conditions are changing. The trend of trade is being diverted to a greater or less degree into other chanels than through the regular retail Hardware dealer. The idea that predominated yesterday is forgotten, and the thought of to-day is but the password for to-morrow. Profits are waning. * * * As a result the Hardwaremen of to-day find themselves confronted by many serious problems.

* * * *

Ten years ago it became apparent that the Hardware jobbing interests of the country were in a very unsatisfactory condition. Appreciating this fact, a number of gentlemen met in the city of Cleveland in a conference, out of which grew the National Hardware Association of the United States, which when born had twenty-seven children. This family has grown until to-day there are 190 good, healthy, wide-awake boys, and they are all eligible to sit down to the table together. To-day there are only about ten other jobbing Hardware houses in the United States who are eligible to membership.

* * * *

The belief is quite general that all combinations and consolidations are organized to stamp out competition and advance prices unduly. Without doubt, many consolidations have been organized with that end in view, but in my judgment, a large factor in making industrial consolidation a necessity was ignorant, unequal, even dishonest competition, and the manufacturers were willing to listen to plans or to any schemes which gave promise of even partial relief.

Next we have the American Hardware Manufacturers' Association. This was formed seven years ago. Its present membership is 225. This association, as you know, has met in recent years at the same time and place of the National Hardware Jobbers' Association.

I have simply referred to these larger interests to bring to your notice that the best men in the country, those who have large interests at stake, have deemed it wise, and good business policy, to unify their forces in order to meet existing conditions. But some may say these men knew each other, and there was a feeling of confidence. Do not mistake. I could name you several men, who were very bitter enemies, and who would not go into the same room with each other, to say nothing of breaking bread at the same table; but it was not a question of sentiment with them, it was to prepare a haven into which to cast anchor and be saved from the wreck, which to some houses was sure to come.

WAS THAT GOOD JUDGMENT?

As you look upon the picture to-day, and see the changed faces, does it not convince you that the brains of the country are in the Hardware trade?

* * * *

Digitized by Google

Men, never was there greater need for associated effort than to-day. Not only should you feel the inspiration, but you should appreciate the necessity. If the evils from which you are suffering are to be cured, it must be done through united, determined co-operation, each with the other. Pardon me for the statement, but I must say many of the retail dealers are their own greatest enemies, and that nothing stands so much in the way of their success as themselves.

* * * *

Do you know that it takes a man of broad mind to get out of a rut and change his point of view? It is always the fellow who has the narrow mind that makes the trouble. One of our greatest difficulties to-day is, that the mercenary spirit to a large degree predominates. There is no way of doing without money. It is essential to our business, comfort and happiness, but the desire for it does not give us the right to lie, or steal, neither does it give you or me the right to sell goods below cost to make our competitors squeal, or try and close him out of an honest and honorable business. He has a right belonging to him, given him by his Creator, and when we try to crush him out, we trifle with his God. As much of the trade in your community as you can get legitimately, profitably and honorably, belongs to you, the balance to your competitor, and vice-versa. If you cannot sell your wares at as high a price as your neighbor, quality for quality, there is something wrong with you. If he cannot do the same there is something needs mending there. No matter what either of you do you cannot get all the business, and each one best make a fair profit on what goods are sold. It is no crime, gentlemen, to be unwilling to sell goods at a loss or without profit. But you say, tell us how this can all be brought about. By unity of forces.

Let me call your attention to the largest institutions that we have to-day, known as catalogue houses and department stores. They have a large force of shrewd business men. These men are in charge of departments, each one will have a larger stock or greater volume of business than most retail merchants here to-day. There would be, for example, the following departments: Tool, Stove, Crockery, Hardware, Sporting Goods, Grocery, Boots and Shoes, etc., each one a store in itself. The men of these stores, if you please, are called together for consultation very frequently, and discuss plans and devise ways of handling their business.

WHY DO THEY DO IT?

Because the management want their ideas, the concensus of opinion, and will govern their methods accordingly. This, gentlemen, is nothing more nor less than your association will do. It is a very essential feature in the trade to-day. The difference is simply this. You are obliged to leave your homes for a few days, entrusting your business to partner or trusted head clerk. You do this once a year, and during the intervening time you are struggling alone, working out your own salvation. These other gentlemen are at one central point every day, and can be summoned at a second's notice. Do you think, men, that you can in this twentieth century do without comparing notes with your neighbor, when concerns whose business runs into the millions need conference? Go to your competitor and say to him that you can see where you are both wrong. Show him where you are both doing a lot of business for glory. Get on friendly terms with him, and when a customer tells you that he can buy Nails at $2.10 base, when they cost $2.15 base at the mill, or Conductor Pipe at 3c. per foot, when it costs 3½c. per foot, or a steel shovel at 50c., when you sell it for 75c., 'phone the merchant, or go over and ask him before you say he is a damn fool, anyway, that he always was and always will be. If he is a member of your association he will tell you what is true, and perhaps you can fix it up and thus avoid foolish competition.

* * * *

Competition is commercial war. Unrestricted competition carried to its logical conclusion means death to some of the combatants and injury for all. Even the victor does not soon recover from the wounds of the conflict. There must always be competition. To stamp it out, were such a thing possible, would mean stagnation and death. It would mean that there was to be no further progress. If there were no prizes to be obtained, men would cease to put forth the effort which makes for progress and growth. If there were no larger prizes ahead of a young man than a mere office boy, or drayman, the likelihood is that few would put forth the effort to advance, but because there are prizes to be gained by competition, men are willing to become practically slaves to their business or profession, and in gaining those prizes for themselves they make large contributions to the sum of human progress and happiness. We need competition if we would grow, but it ought to be honest and intelligent competition, and that is not what is being had under conditions which prevail in many lines of trade at the present time. Have a system in your business, buy the best goods, know what they cost, put your prices on them intelligently, sell them at a fair profit.

THURSDAY MORNING SESSION.

This session was an executive one and intended for members only, devoted to the

Annual Report of Secretary.
Annual Report of Treasurer.
Report of Auditing Committee.
Report of Delegate to National Convention.
Report of Nominating Committee.
Election of Officers.
Report of Other Committees.

The afternoon session was entirely devoted to a general discussion of Question Box topics.

KOREAN HARDWARE.

Korea offers a good market for American goods, according to the report of Gordon Paddock, Consul-General at Seoul. The country is undergoing progressive changes consequent upon the Russian-Japanese war. American interests are getting a strong foothold there, and are bound to develop trade if they pursue such a purpose. So says Mr. Paddock.

Apparently, there is a good market in Korea for Hardware. An inspection of Korean Hardware in the Peabody Museum, in Salem, Mass., shows that primitive Hardware is in use in Korea. This collection, by the way, is the finest in this country. Besides, American interests in Korea, chiefly mining, are importing American machinery, which will naturally open the way for other American manufacturers.

The Koreans are, however, quite skilled in working brass and copper. In the Peabody Museum are some very fine brass bowls and other articles, and, also, specimens of copper working. The relics of a copper bowl, taken from an ancient grave, shows that the Koreans early had knowledge of that metal. It is probably that the Koreans acquired knowledge of metal working from both the Chinese and the Japanese, for both of these nations have several times invaded, or conquered Korea during the three thousand years of Korean history.

A glance at a photograph of a typical Korean house shows to the Hardwareman wonderful opportunities for the introduction of such common Hardware as door latches, knobs, modern hinges and locks, blind fasteners, and a hundred and one other little articles common in this country. The typical Korean house is only a little more than a hut.

Korean cutlery is also crude, though the Koreans have some excellent swords. One Korean meat knife in the Peabody Museum looks like a poorly shaped American cleaver. It is oblong in shape, with square corners, 20 inches long and four inches wide, and apparently, it was sharped on its three edges while its fourth was thrust into a crude wooden handle. Other Korean meat knives have curved blades, but they look very crude.

An idea of the simplicity of Korean Hardware may be gained from a description of an iron for ironing cloth; it looks something like an American spoke shave. It is all of iron, the flat ironing surface being in the centre and handles, each about six inches long, being on either side. Apparently, the Korean laundress grasped the handles with both hands, and went to work ironing cloth much as a carpenter goes to work with a spoke shave.

Korean scissors also are clumsy. They look as if the Korean grasped them with his whole hand, so big are the handles. The Koreans have knowledge of soldering, and some of their blacksmith pincers look like those seen on country forges to-day. But their hammers look like old-fashioned flat heads used by cobblers, and a Korean plane consists of a metal blade driven through a hard wood block at an angle, and fastened with a wooden wedge.

A Korean spade is a fairly modern looking instrument, and Korean brass candlesticks are artistic. Korean pots and kettles look primitive. Indeed, the Korean depend a great deal upon pottery for their cooking utensils.

But a Korean chair of State is a gem. It is a unicycle, and antedated the present railroads which American and European capital is constructing in the country. The chair has a single heavy iron wheel about two feet in diameter. Its solitary seat, upholstered in yellow as a sign of high rank, is about five feet from the ground, it being supported by a wooden framework upon the axis of the wheel. Motive power is supplied by man power in the shafts which stretch five feet to the front and rear. This power at the same time keeps the chair, and its passenger, on an even balance.

This brief sketch of the crude Hardware used by them may give to progressive American firms an idea of the remarkable possibilities for trade that will follow a re-awakening of civilization and progress in the Orient. F. A. G.

KAFFIR HARDWARE; NOVELTIES WANTED.

As our readers in South Africa are aware, says the South African *Export Gazette*, the Hardware department for Kaffirs is an exceedingly important one, and in most up-country stores forms no inconsiderable item in the turnover. This is so generally recognized by enterprising importers of these goods that standing instructions are invariably given to their European buyers, if they have such, or to the coast houses supporting them, to include in their parcels any likely novelties in this line which are calculated to appeal to the native taste. This is extremely changeable, and therefore capricious, so much so, indeed, as to render special attention to this branch of Kaffir trade imperative, especially if it is of moment to retain the native as a customer.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

THE MOST STUPENDOUS ADVERTISING CAMPAIGN EVER INAUGURATED BY A VARNISH MANUFACTURER

As we have previously informed you, we are going to spend

SIXTY THOUSAND DOLLARS

exploiting JAP-A-LAC during the coming Spring months. This will be the largest amount of money ever expended for advertising by any Varnish Manufacturer in pushing a specialty.

Our JAP-A-LAC business has assumed such proportions that we feel justified in this immense expenditure, and *want every dealer in the country to realize just what there is in it for him.*

Whether you are selling some varnish stain or other line of goods, claimed to be similar to JAP-A-LAC, makes no difference. JAP-A-LAC is bound to have the call this year. *You can make big money if you get in line now.*

In order to interest all of the dealers, we have arranged a contest for the best window displays and advertisements of JAP-A-LAC produced by the dealers during "JAP-A-LAC WEEK." We will soon inform you fully regarding "JAP-A-LAC WEEK" We will give

ONE THOUSAND DOLLARS IN PRIZES.

The contest will be divided into three classes and promulgated on the following lines:

CLASS "A." *Cities of more than 50,000 population.*		CLASS "B." *Cities under 50,000 and more than 10,000 population.*		CLASS "C." *Towns of less than 10,000 population.*	
1st Prize	$100.00	1st Prize	$50.00	1st Prize	$30.00
2d "	50.00	2d "	25.00	2d "	15.00
2 Prizes of	25.00 each	2 Prizes of	15.00 each	2 Prizes of	10.00 each
10 "	10.00 "	5 "	10.00 "	20 "	5.00 "
*Special 20 "	5.00 "	10 "	5.00 "	*Special 16 "	5.00 "
		*Special 10 "	5.00 "		

*Special: For the best letters describing the effectiveness of the window display; letters to accompany photograph of display.

In addition to the above prizes, we purpose giving 10 prizes of $5.00 each for the 10 most original window displays; also 10 prizes of $5.00 each for the best advertising phrases on blank pointers.

All those who compete in each class will have an opportunity to win one or both of these extra prizes.

The blank pointers are part of the make-up of free window display, which we propose furnishing to all dealers who enter the contest. The free display matter, which we will furnish, is made up of 1 large Cut-out; 6 Card Hangers, printed on two sides; 1 Set of 6 Educational Signs; 1 Reproduction of our four-page, colored advertisement, which is to be run in the *Delineator, Designer* and *New Idea*, issue of May, at a cost of $15,000; 12 Printed Hands, pointing to various interesting statements regarding JAP-A-LAC in the *Delineator, Designer* and *New Idea* advertisement; 4 Blank Hands on which the dealer may print some good advertising point regarding JAP-A-LAC, and 1 large JAP-A-LAC Strip, 49 inches long by 11 inches high.

It is absolutely necessary that all dealers who enter the contest have a good supply of JAP-A-LAC. If you are handling JAP-A-LAC, we would urge sending us a re-order for enough to make a large window display, unless you have a sufficient quantity. If you are not handling JAP-A-LAC, we want you to put it in stock. We believe we can convince you that there is big money in it.

Ask for full information regarding special introductory asortment of JAP-A-LAC.

It is only a question of time when every dealer in the United States will find it to his interest to handle JAP-A-LAC, and the sooner you take hold of this profitable and well-advertised article, the sooner you will commence to receive the profit which otherwise is sure to go to some other energetic dealer in your town.

There is more to follow; keep track of us for the next few months.

ADDRESS 641 WILLIAMSON BUILDING,

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

CLEVELAND, OHIO

Many manufacturers, however, may not know to what huge proportions this trade has attained, and we are convinced that those who make a specialty of Kaffir Hardware might do worse than lay themselves out for the production of occasional novelties. Merchants are constantly on the look out for such, and would readily buy anything which has the slightest chance in their expert judgment of appealing to those for whom the novelties are intended.

Yet, in face of this undoubted demand, we often hear merchants complain of the almost utter dearth of Hardware novelties coming on to the market. Take Kaffir cast-iron pots, for instance. These are practically the same in design as they were 20 years ago, despite the fact that they are one of the leading lines, the trade in which has grown enormously of recent years. Except in Rhodesia and remote Kaffir kraals, where the natives still continue to make crude cooking pots of clay, most Kaffirs now use modern utensils, and we incline to the view that if the latter were embossed with, say, native figures of either men or women, or other suitable subject, they would prove good sellers. Kaffir knives, again, whether retailing at 3d., 6d., or 1s., are a splendid line, and although the average native is now sufficiently enlightened to discriminate between a good or bad blade—which by the way, must always be broad—he will frequently give a better price for an article that takes his fancy, provided he is satisfied as to quality. Most Kaffirs show a decided preference for knives the handles of which are of malleable cast-iron, of which they are very fond, and the stamping of a taking pattern of novel design leaves much scope to the ingenuity of cutlery manufacturers. Axes are another important item of this trade, but little scope is left for novelty in these. Those of American pattern are generally preferred, mainly for the reason that the blades are brightly polished, half being a brilliant navy blue, the mirrored glass. As a general rule, the English axes are not so treated, and the more taking article therefore commands the greatest sale.

THE TIN PLATE PRODUCTION.

At the present time the production of tin plates is about 20,000,000 boxes and the production of tin close to 90,000 tons. In the years 1893, 1894 and 1895 the manufacture of tin plates in England and America reached 10,000,000 boxes, and about that time the production of tin in the Straits and from all other sources reached about 75,000 tons. It is therefore evident that while the production of plates has actually doubled, tin has only increased about 20 per cent.

Messrs. D. H. Burrell & Co., Little Falls, N. Y., will erect a factory at Brockville, Ont., for the manufacture of dairy supplies. The town council will grant the company an appropriation of $1,000.

REVIEW OF THE MARKETS.

WIRE NAILS: There has been only a moderate demand for Wire Nails, which is improving with the weather, and this month is expected to furnish an increased volume of trade. The future is looked forward to as furnishing an increased business under the present healthful conditions. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. Jobbers are complaining of the delays in transportation, which, however, is hoped will end with pleasanter weather. Quotations are as follows, for this market:

Single carloads $1.99
Small lots from store 2.05

CUT NAILS: The market, which has been fairly dull the latter part of last month, is now becoming more brisk as a big trade is anticipated in the immediate future. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

F.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York. A fairly good demand is affecting the local market and an increasing trade may be expected. It is expected the amount of building already in sight being projected in the future, will affect the Cut Nail favorably. Quotations are as follows:

Carloads on dock $1.94
Less than carloads on dock..... 1.99
Small lots from store .....$2.00 to 2.05

BARB WIRE: Weather conditions only have prevented the large Spring demand which was anticipated, and which already shows its eagerness, the market being strong and the mills well occupied. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers carload lots $1.95		$2.25
Retailers carload lots 2.00		2.30
Retailers less than carload lots..... 2.10		2.40

SMOOTH FENCE WIRE: The market for Fence Wire is firm and strong, the mills being full of orders, and the business looking to a busy future. That there will be a satisfactory market goes without saying. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.65
Retailers, carload lots 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

BUILDERS' HARDWARE: Orders have been received by the leading makers that emphasize the strength of the market. The Associated Manufacturers advanced their prices 10 per cent. on March 1st, and from the amount of building in sight throughout the country, it was not surprising to find the trade taking full advantage of advance orders.

ROPE: The following quotations represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger.....	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger.....	10
No. 2 Sisal, 7-16 and larger.....	8¼

Less ¼ cent to the large trade.

BINDER TWINE. General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9¼ to 9¾
Standard (500 feet to the pound)..... 9¼ to 9¾
Standard Manila (550 feet to the pound)....10¼ to 10¾
Manila (600 feet to the pound).....11¼ to 11¾
Pure Manila (650 feet to the pound).....12¼ to 12¾

Less than carload lots quarter of a cent extra.

LINSEED OIL: The following advanced quotations were announced March 1 on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....48 cents per gallon.
In lots of 5 barrels or more.....47 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE PHILADELPHIA TRADE.

Winter still has us in his "Grippe," and the signs of Spring are few and far between, but we have not given up hope. The snow is beginning to disappear, and although the country is still ice-bound, there prevails a belief that the almanac may be limited and that a warmer sun is due in the near future. Orders are coming in in fair volume, and a few bright warm days are all that is needed to make trade active. Outside work has hardly begun, and, of course, no great demand can be expected until farmers and mechanics are once more able to get to work. Prices remain without many changes, although the material market is very strong, and the curious situation is presented that the largest production of iron and steel on record is coupled with an advance in prices. This rather reverses the usual order of things and makes a firm and steady market. Collections are very slow, and like everything else depend on the weather. We are all sun worshippers yet, and trust our next letter will report a general improvement.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

Notwithstanding the large demand for pig iron there is disappointment with jobbers in the amount of February trade. The feeling prevails that the advance in pig iron has been too radical in view of the large production, and unless consumption keeps a lively pace a decline is likely to follow. Conservatism is not pessimism. It often proves of great value. If we wish to avoid depression, we must not create booms. In this section the farmers have little income and large expense at this time of year. Soon, however, stock feeding will be over and milk and eggs will add to the income, and the sugar bushes will bring some revenue, and the demand for farming utensils will make retailers busy. Building will be renewed. Our expectations probably have been too optimistic. If the leading railroad men accept the request of the president to serve on a commission to prepare a bill to prevent rebates, it will allay apprehension that the business of the country is to be injured by legislation. The people of the country are in hearty sympathy with the president in his determination to correct this abuse. If the best railroad men oppose all legislation to accomplish this, they alone will be responsible for unwise action. They could prepare a bill that would be of mutual benefit to the railroads and the public. They now have an opportunity to serve the interest they represent and at the same time serve the public.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

The most interesting event this week in a business way, was the voluntary increase of ten per cent in wages of employees in the Coke Region. This affects some 18,000 men and adds just ten per cent. to their purchasing ability from the merchant. The increase shows the strong condition of the Coke and Steel Industries in comparison with last year, when wages were cut down and every saving possible made. Spring weather has not made itself felt very markedly as yet, but we have had some forerunners. The ice gorge in the Ohio near Cincinnati has moved out taking a large number of coal craft with it. The upper rivers have not moved and it will take considerable rain to start them. Our usual Winter and early Spring freshets have not yet appeared. Manufacturers are quite busy in all heavy goods, tools and etc., and a few days of sunshine will bring a rush of orders from the retailers, which the jobbers will do their best to satisfy. We note with pleasure, the preamble and resolution passed by the Indiana Retail Hardware Association at their recent State Convention, wherein they commend the position of the National Hardware Jobbers' Association, in working for the best interests of the retailers, and express the wish that all jobbers should belong to and work with the Jobbers'

Association. When each department of trade, manufacturer, Jobber and retailer, does its part and all work together for the common good there will be some pleasure as well as profit in doing business. Logan-Gregg Hardware Co.

THE ST. PAUL TRADE.

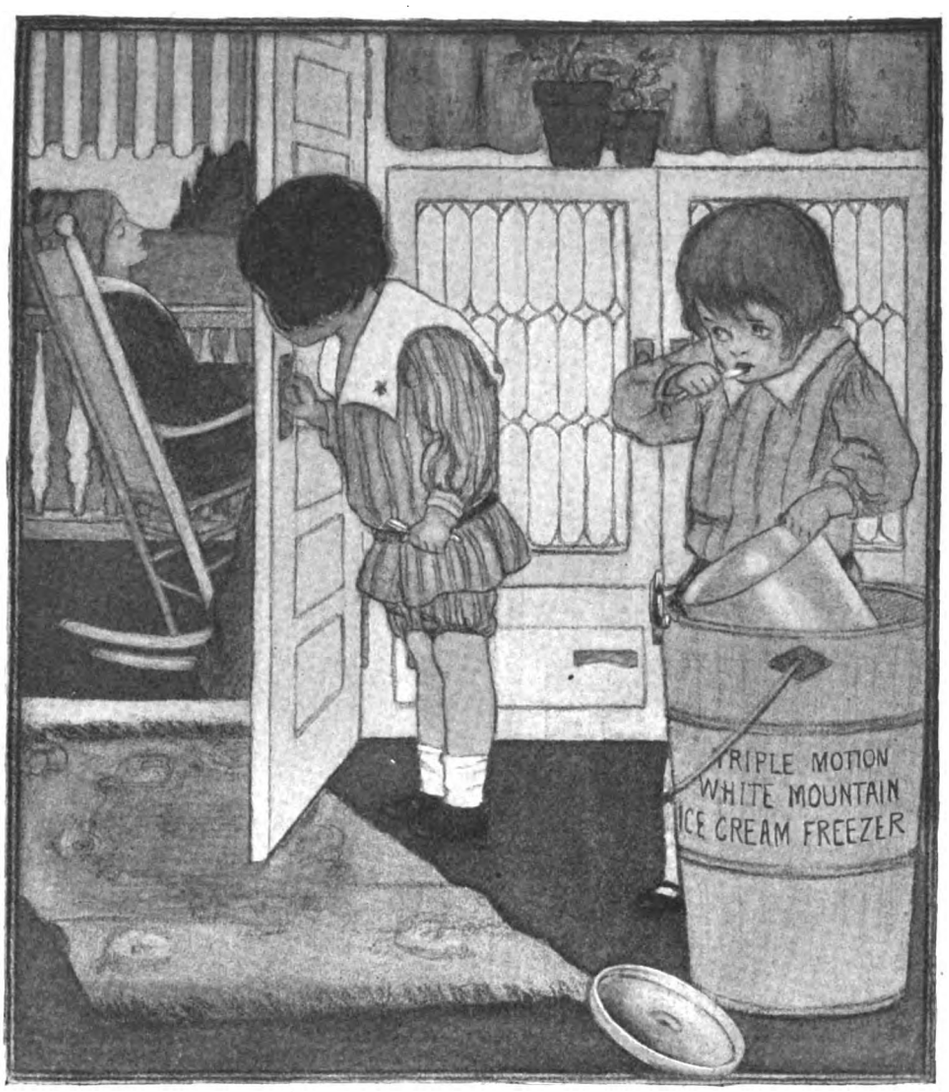
The beautiful Spring weather we are having so early is opening up business in good shape. Orders are coming in rather larger than usual at this time of year. We attended the retail Hardware association of North Dakota and Minnesota and can say that the meetings were of much benefit to all who attended. We believe that every man in the Hardware business should be a member of his State Association and should attend the annual meetings. He will be surprised at the benefits received by rubbing up against his competitors. He will get a whole lot of new and valuable ideas and may also give away some of his own good things, but, he will get more than he will give.

Hackett, Walther, Gates Hardware Co.

THE SAN FRANCISCO TRADE.

The status of trade conditions in the three Pacific Coast States are in perfect accord with the situation we hear of, relating general business expansion in the Eastern and Western States, where it is reported the regular barometers, such as the clearings and the iron and provision trades, show a general forward movement, with iron and steel leading all other staples in point of activity and the mills and furnaces are fully employed. Thus far copious rains in the coast States insure abundant grain crops for the current year, and with the agricultural outlook thus propitious confidence naturally prevails all over this section of the country, and the average citizen feels that there is nothing to worry over except death and taxes, which come along with their old-time regularity. Something, of course, may turn up later on in the season to damage trade conditions, but it is not yet in sight.

The inspiration from all this, and maybe from other animative causes, appear to have revivified the elderly members of the local Hardware trade yet in harness and vigorously pulling onward, causing remarks from some who severally are near the chloroform age announced by Dr. Osler, to observe that California's longevity climate was lost sight of by the medicine man, else he would have prescribed 80 or 90 instead of 60 years for the retirement period of mundane life. Our 57-year-old youth in the San Francisco trade hazarded this remark: "I expect to be weighing out nails to customers, and horseshoe and wagon iron, many years to come, and feel that I'm in the prime of life when I shall hear Dr. Osler has reached his 60th year and not only refused to take chloroform but strenuously trying to upbuild his system by taking a decoction of iron three times a day."



Since it is yet fresh in memory that the country east of the Rocky Mountains has just recovered from the grip of one of the most diabolical winters on record, it may be considered in better taste by the people over yonder if we stop tooting our own horn about California enjoying an ideal winter, with abundant rainfall to insure the prosperity of all crops during the coming season, interspersed with much fair weather and with only now and then a frosty snap to make the prevailing mild temperatures more enjoyable, and give some other fellow from the outside a tooting chance. For instance, Henry C. Atkins, from over the mountains where, at Indianapolis, Ind., he has his headquarters as president of the "Always Ahead" E. C. Atkins & Co., was recently in this western territory, where his company enjoys a large trade, to thoroughly acquaint himself with current and possible future conditions in our industrial and commercial circles. Mr. Atkins said he considered this coast one of the most remunerative sections of his company's zone of influence, and expressed the thought that the Pacific Coast offered perhaps better inducements than any other section of the country. "The enormous forest interests combined with the agricultural factors, afford great inducements to our company, and our saws are buzzing midst a large amount of this Western business. Yes, I like San Francisco and hope some day to be able to live here. The climate is a working climate all the year round and here everyone seems to be on the go, and that is what pleases me. When others work, one feels that there is no excuse for his not laboring too, and that is where your city derives its commercial strength. It does not advertise, except by its record of bank clearances, but that is far better than yards of newspaper clippings. I found the North Pacific cities about the same in their policeis and I have yet to visit Los Angeles. Taken as a whole I am pleased with the Western metropolis and hope to visit it again before long."

As this issue of Hardware goes to press the California State Retail Hardware Association will be in session in San Francisco, holding its fourth annual meeting. The superb arrangements being made for the event by Vice-President Guttman and Secretary Gracey is intermingled with much regret, based in the fact that the association's strenuous president, Mr. Sites, of the Palace Hardware Company of San Francisco, is unavoidably absent and will be unable to attend the meeting. This popular president of the association left this week for the East, responsive to a sudden call involving business of prime importance to his company. Although he will be thousands of miles distant from the convention, and left word with solicitous fellow tradesmen that the growing responsibilities devolving upon him in connection with his company's increasing business, he would, as a workingman, consider it "unfair" should his name be presented for reelection, yet the writer predicts that Mr. Sites will be reelected as the third-termer President of the California State Retail Hardware Association.

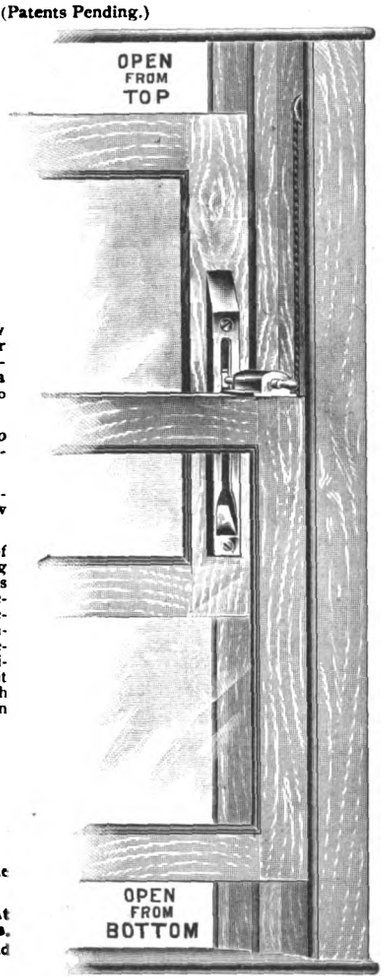
WHAT'S THE USE HE CAN'T GET IN

BECAUSE THE WINDOW IS PROTECTED BY

Rosenberg's Perfection

Burglar Proof



SASH LOCK and VENTILATOR

(Patents Pending.)

Permits the sash being raised from the bottom or lowered from the top from one to six inches, without sacrificing security.

Draws sashes tightly together, preventing rattling and draught.

It is impossible to unlock the opened window from outside by any means.

Simplex Lock shown in operation.

The window when locked either open or closed cannot be raised with a crowbar by 2000 lbs. pressure.

Not necessary to cut sashes to attach.

Anybody can attach it with a screw driver.

This lock is one of the fastest selling of all counter goods as it quickly demonstrates its usefulness to customers. Women, especially, are enthusiastic over it as it affords them such complete protection in the home.

Retail Price: 25c., 35c. and 50c.

According to style and finish.

Samples sent free to dealers, with prices and terms.

SAFETY WINDOW LOCK & VENTILATOR CO.

17 QUINCY ST. CHICAGO, ILL.

Salesmen Wanted.

Perfection Lock ⅔ original size.

THE SAGINAW TRADE.

We are inclined to believe that February, which is always a quiet month in this district, was fully as quiet as usual this year. However, the month of March starts out with unusual brightness; every one is expecting an early Spring, country merchants are asking to have their Spring orders shipped at earlier dates than originally specified; the weather has been bright and clear, warm during the day and freezing at night, and if this only continues there will be no danger from high water this Spring. Generally speaking we believe the manufacturers are well supplied with orders, and there seems nothing to prevent a heavy Spring business. Morley Brothers.

OPPOSITION TO TRADE SCHOOLS.

In his recent inaugural address Governor Douglas of Massachusetts strongly advocated the establishment of trade schools in connection with the various industries of the State as a substitute for the apprenticeship system, which, in the course of modern industrial development, has practically fallen into desuetude. He pointed out that, under present conditions, there is but little opportunity for young men to learn a trade, and that to-day most workmen understand but one small part of an industry, instead of gaining that practical knowledge of a trade as a whole and of the scientific principles upon which it is founded that is necessary to enable them to secure advancement. Thus many bright young men, through lack of the broader training, are compelled to work indefinitely at the machine or bench. Mr. Douglas expressed his emphatic approval of the principal of State aid for trade schools, as a means for keeping Massachusetts at the front in the industrial world. This attitude of the chief executive of their State—himself one of the largest employers of labor in the Commonwealth—has been positively condemned by the labor unions of Massachusetts. At a meeting of the Executive Committee of the State Federation of Labor in Boston last week a resolution was adopted in the following terms: "We are opposed to trade schools in the shoemaking industry or any other trade, as objectionable, because they never learn (? teach) the practical parts of a business, only giving a smattering of theoretical knowledge that makes its victim a poor workman, incapable of getting a good job, and yet a menace to every other man in the craft." It was also decided that the Federation should present its views to the Massachusetts Legislative Committee on Labor, with the object of checking any indorsement by the Legislature of the Governor's recommendations in the matter.

The fallacy of the above statement of the Massachusetts labor leaders is obvious to those who have given any study to the trade school question. The beneficial results achieved by these institutions in Europe—notably in Germany—and to an unfortunately limited extent in this country, have amply demonstrated the value of trade school training in the industrial advancement alike of the individual tradesman and of the entire trade. In short, it is becoming more clearly apparent that the country, the State, or the community that neglects the trade and technical training of its youth will inevitably lose ground industrially, and the business it should secure will go where such training is encouraged and fostered. The opposition of labor unions to trade schools is founded ostensibly upon the allegation that trade schools turn out poor workmen, who are a menace to others in their trade. That such a charge is unfounded can very readily be proved by the records of one such institution in this country—the New York Trade School—which is yearly turning out, not fully equipped and skilled journeymen, but young men so thoroughly grounded in the theory and practice of their craft that they are able in a comparatively short time to become full fledged journeymen, of a type, as to knowledge, skill and intelligence, that readily secures for them steady employment wherever they may locate, and facilitates their advancement to positions of responsibility and profit. Many such young men have been enabled at a comparatively early age to embark in business for themselves, an achievement that would not have been possible had their trade school training done them the injury the Massachusetts labor leaders would have the public believe that it does. It is unfortunate that the opposition of labor, of which the Massachusetts instance is but the latest example, founded on a selfish misconception, should have so successfully impeded the spread of the trade school movement in this country up to the present.—*Metal Worker.*

SERVANT GIRL PROBLEM.

"This servant girl problem will make me old before my time!"

"Bothers you, too, does it?"

"Indeed it does. If I have an ugly maid my husband is away all the time, and if I have a pretty one, he is at home all the time, and I daren't go away; so there it is."—*Houston Post.*

WHAT DYNAMITE IS.

Probably there is no article in more general use in the development of new countries than dynamite. In mining and in excavation, and in a hundred other fields it has superseded the old blasting powder and other explosives in use a generation ago. Many persons, however, have little idea of what dynamite really is and of how it is prepared. Even those who use it constantly know very little of its composition and its characteristics, and to this ignorance no doubt are due many of the accidents attributed to it.

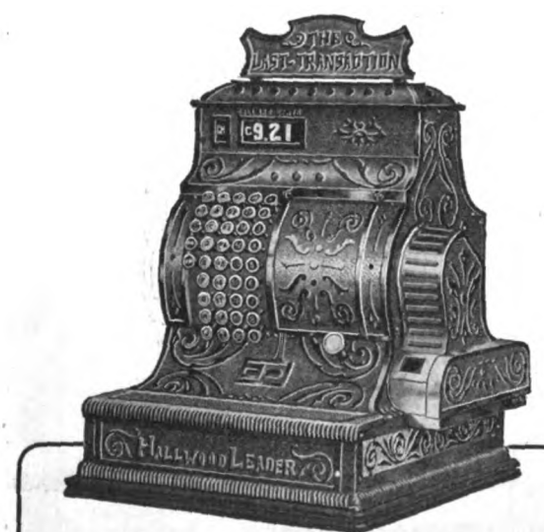
The chief point of difference between dynamite and powder is that it is not an explosive, but a detonator, a difference in degree only perhaps, scientifically considered, but having a wide difference in effects.

An explosion is caused by the generating or liberating of gases from a solid, liquid or gaseous substance so quickly that the gases formed cannot be confined in the space of the original substance—a more or less slow process; whereas detonators liberate their gases almost instantaneously. The greater bulk must find an outlet at once, and does not have time to seek the place of least resistance, but must find space immediately. A detonation is, in round numbers, 1,000 times quicker than an explosion. A strong concussion and a spark in combination will cause it.

Dynamite is not quite the dangerous substance that most people suppose it to be. It can be handled with impunity, and even recklessly, if one knows just how this should be done, and will not detonate, except under certain well-defined circumstances. The marketable article, in order to fit into drill-holes, is generally in the form of sticks varying from half an inch to 3 inches in diameter, and in length from 2½ to 12 inches. These sticks are formed by packing dynamite into oiled paper cases of the required size.

Dynamite, according to the best authority of those familiar with its manufacture, is nitro-glycerine held in an absorbent, such as infusorial earth, wood-pulp, coal dust or other material that will hold the nitro-glycerine tightly and not allow it to settle at the bottom. It is a powder of rather a sticky, resinous nature, varying in color with the absorbent used. The strength is commercially designated by the percentage, by weight, of the amount of nitro-glycerine absorbed by the carrier, running from 20 to 80 per cent. It probably is more generally used at or around 40 per cent. With the absorbent are certain other ingredients so combined as to obtain perfect results in absorption and to guard against the danger of any free acid left in the nitro-glycerine. The nitro-glycerine is the only detonating property; the absorbent neither helps nor retards this property.

For commercial purposes stick dynamite usually is packed in twenty-five or fifty pound cases, together with a liberal allowance of sawdust, and it then can be handled, carted, freighted or stored without appreciable danger, providing ordinary intelligence and due care be used.



RECENT TRADE PUBLICATIONS.

The Keyser Manufacturing Co., Chattanooga, Tenn., are sending out a 1905 catalogue which takes the place of all previous issues. This catalogue is devoted to the "Odorless" refrigerators of their manufacture. They claim for the Odorless greater economy in the consumption of ice and for food saving qualities than any other refrigerator. In applying the word "Odorless" the company explain that they do not mean they destroy the odor of articles placed in the provision chamber, but that the circulation of air is so perfectly arranged that the odors from meats, fish, poultry, cheese, etc., are carried off and out of the refrigerator, not back to the ice—the food remains sweet and fresh. Many valuable suggestions as to "How to use the Odorless" are given in the above catalogue. To make yourself satisfied with your purchase, you must have the best results, and by following the above mentioned suggestions, you will have no trouble. Write at once for a catalogue.

The American Hardware Manufacturing Co., 371-373 Seventh Street, Buffalo, N. Y., manufacturers of refrigerator and special Hardware have recently distributed a new catalogue in pamphlet form, containing 32 pages. They state they are one of the largest manufacturers of refrigerator trimmings in the country, of which their catalogue comprises only a very small part. They have made an unusually extensive line of trimmings original in design and mechanism, and for assortment, they claim unequaled by any manufacturer in this class of work. They are fully equipped to take care of special trimmings, in fact they make this class of work a specialty. Goods are made in bright (cheapest brass, bronze and roman gold), polished brass, bronze, roman gold and nickel. All finishes can be had. If this line of goods interests you, send for catalogue.

STEVENS

RIFLES — PISTOLS — SHOTGUNS

SELL THEMSELVES AND STAY SOLD

STEVENS TRADE AIDS..

WE CONTINUALLY ASSIST THE DEALER

in facilitating the sale of the "Stevens" with advertising matter in the way of booklets, circulars, electrotypes, etc. A valuable adjunct to our advertising campaign is

The Stevens Part Envelope

which we furnish FREE to dealers, imprinted with their firm name and address. These envelopes are issued in quantities of 250, 500 and 1000. Will be sent anywhere on application, the DEALER DEFRAYING THE EXPRESS OR FREIGHT CHARGES ON SAME.

A judicious distribution of this advertising matter invariably redounds to the interest of the retailer and is a permanent advertisement for him.

These envelopes consist of a durable, good stock of manila paper, open at the upper end The flaps are gummed, thus permitting their being sealed.

Our Part Envelopes are very useful for sending out small parts, etc.

Upon receipt of advices designating quantity wanted and shipping directions, we shall take pleasure in forwarding any number you desire.

THE STEVENS HANGER

¶ It is the consensus of opinion among the retail trade, that the STEVENS THREE-COLOR ALUMINUM SIGN is the most artistic and beautiful creation that has appeared for a long time. These signs are ornamented with very neat and attractive frames, and we would be pleased to mail one to any dealer requesting same.

Our Abridged Catalog—is another important advertising auxiliary which we supply to Dealers, the latter in turn, judiciously distributing this matter among their consuming trade. These catalogs illustrate and describe in detail all our popular, staple numbers, and are sent to Dealers in lots of 250, 500 and 1000, duly imprinted on front cover with Dealers' firm name and address.

Our Abridged Catalog—consists of 24 pages with cover, the contents being printed in two colors on first-class quality white paper. Cover is green and attractive in appearance. These booklets measure 6 inches by 3½ inches, making them particularly adaptable for enclosures in outgoing mail, and also handy for individual distribution among customers who call at store. We will gladly honor your requisition for any number of these catalogs that you are in a position to avail yourself of—our only exaction being, that the CONSIGNEE BEAR COST OF TRANSPORTATION—either freight or express.

SEND for 140-page Catalog describing our complete line of RIFLES, PISTOLS, SHOTGUNS and ACCESSORIES.

SPECIAL TELESCOPE CATALOG mailed free upon request.

All Leading Jobbers handle our goods and are in position to supply your wants at the lowest market figures.

Be sure to specify the STEVENS when ordering. THERE ARE NO SUBSTITUTES.

THE DEMAND IS FOR ADVERTISED GOODS

BISSELL'S "Cyco" Bearing SELLS ITSELF, through recognized superiority of mechanism, and through force of advertising. Consider what it means to advertise an article of merit in magazines having a combined circulation of over 12,000,000 with not less than 60,000,000 readers, besides extensive advertising in newspapers, booklets, circulars, etc. This is the way the

BISSELL'S

Sweeper is advertised, with the natural and inevitable result that there is practically no demand through the consumer for any other sweeper to-day. An article of merit **well** advertised, always brings more money than a similar article **not** advertised, and justly so. The advertised article sells easily, practically sells itself, whereas in the case of the unadvertised commodity, you have got to spend a lot of valuable time trying to convince customers that the article is "alright," "just as good," etc., and **then** it doesn't sell. The time is past when an inferior article, little known or advertised, can gain serious recognition merely through the inducement of lower prices. You might better pay double the price for the article of reputation that sells easily, and pays you a good profit. The BISSELL is the only sweeper ever sold on the market under a sound sincere policy of fixed retail prices that make the dealer's profits always good and secure.

Minneapolis, Minn.—The North Star Implement Company has been incorporated; capital stock, $25,000; incorporators, Charles Catlin, Peter Dahl and James F. Gibb.

New York, N. Y.—E. Rosenbaum has opened an office at 88 Chambers Street, as manufacturers' agent and Hardware Specialties.

New York, N. Y.—American Dish Washing & Sterilizing Machine Company has been incorporated. Capital $100,000. Directors: Joseph Hummel, William Hirsch and W. A. Reville, New York.

New York, N. Y.—New York Tool Co. has been incorporated; capital, $25,000. Directors—John D. Gould, Herbert D. Montgomery, and Henry L. Washburn, New York.

North Easton, Mass.—Thomas H. Roach has started a factory for the making of tacks, the building being situated on Lincoln Street.

Pittsfield, Mass.—The business of C. C Henry has been incorporated as the C. C. Henry Co. The purpose of incorporating was to include R. J. Brooks and T. E. Clark, who have been associated with Henry & Blain and later C. C. Henry for 10 and 8 years respectively.

Rochester, N. Y.—The Pierce Wringer Company has been incorporated to make and deal in wringers and household contrivances with $5,000 capital. The directors are J. C. Pierce, Spencerport, and Benjamin C. Battey and A. Frank Warren, of Rochester.

Rochester, N. Y.—The Rochester Lamp Company has been incorporated. Capital, $55,000. and directors: A. Pomeroy, Plainsfield. N. J.; C. Strange, Jr., Herman Meyer, New York.

St. Louis, Mo.—Eberle Lock-snap Company has been incorporated; capital stock, $15,000, full paid. Incorporators—John A. Eberle, Mrs. John A. Eberle and Joseph Ponneney.

St. Louis, Mo.—Wayne Manufacturing Company has been incorporated by Benjamin A. Suppan, Leo S. Rassieur, M. W. Feuerbacher, O. E. and G. A. Buder and Bert W. Evans, to manufacture and deal in washing machines, etc.; capital stock, full paid. $50,000.

St. Louis, Mo.—Safety Signal Company has been incorporated by James H. Bevington, Dorsey A. Jamison and Nelson Thomas: to deal in railway and other signals and to manufacture novelties, Hardware specialties. Capital stock, full paid, $5,000.

Toronto, Ont.—Curtis & Neff Screw Co. has been incorporated; capital, $30,000; directors, F. O. Curtis, J. A. Neff, E. A Neff.

Westfield, Mass.—The A. J. Cook Whip Co. has been established with $30,000.

Changes.

Beaver, Pa.—The Keystone Woven Wire Mat Company have purchased two lots on which they will erect a new factory. The present quarters are not sufficiently large for their increasing business.

Fremont, Ohio.—The R. J. Christy Co. will commence immediately the manufacture of the Christy Hoe Safety Razor, invented by Mr. Christy. It will be made for the present at the Christy Knife Works. It is probable that in the Spring a new factory will be built.

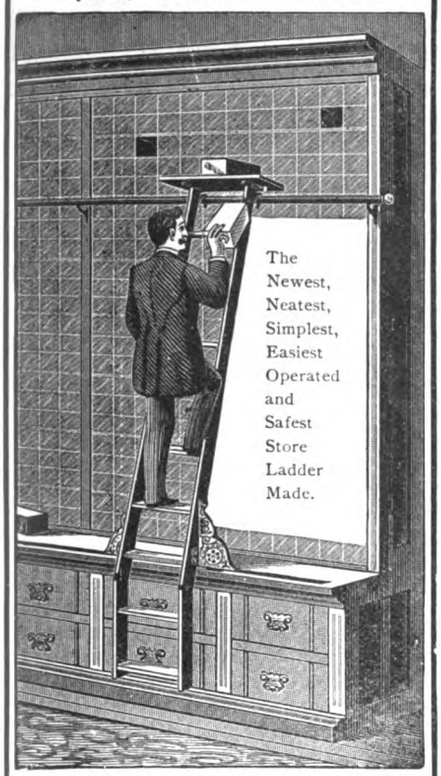
Kalamazoo, Mich.—The Kalamazoo Stove Company has increased its capital stock from $200,000 to $315,000.

Kingston, N. Y.—The Herbert Brush Manufacturing Company, which has been making brushes for more than a third of a century, has opened a local office in No. 105 Chambers Street, in charge of J. F. Herbert, Jr.

Louisville, Ky.—The plant of the Louisville Bolt and Iron Company which has recently passed into the hands of A. F. Baumgarten & Co., will be opened in a few days. The plant has been idle for the past year. More than 300 men will be employed in the works, which are located in South Louisville.

Manitowoc, Wis.—The name of the Gunnell Tool Company has been changed to the Gunnell Machine Company.

Portsmouth, Ohio.—The Neill Stove Manufacturing Company is preparing to increase its capital stock from $20,000 to $50,000. New men have been interested in the concern and it is planned to triple the capacity of the plant at Seventh and Market Streets. The company will branch out in the manufacture of ranges.



Miscellaneous.

Providence, R. I.—At the annual meeting of the stockholders of the American Screw Company officers were elected as follows: President, Samuel M. Nicholson; vice-president, Marsden J. Perry; treasurer, George W. Thurston; secretary, William A. Cranston; general superintendent, Benjamin Thurston; agent, James A. Nealey.

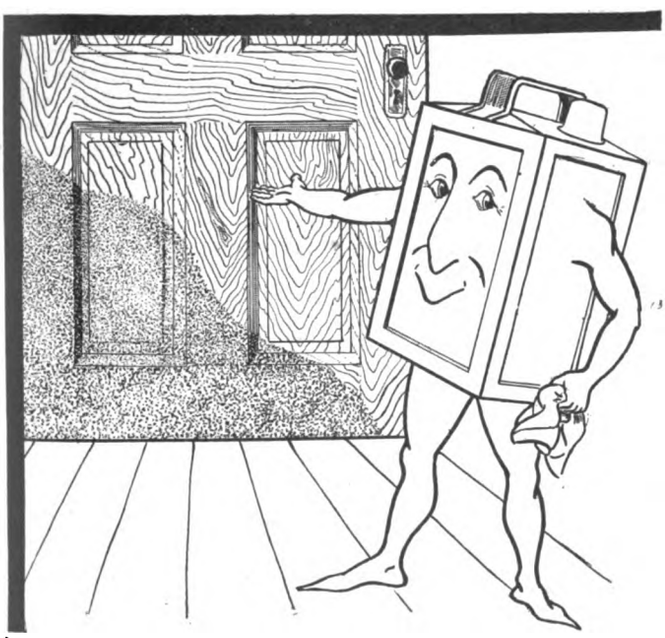
Highest award World's Fair.
WRITE US.
THE BICYCLE STEP LADDER CO.,
65 Randolph St., CHICAGO, ILL.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer



—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

Here's Scrubber Bill
Who Quickly Cleans
From Door to Sill
The Paint That's Worn,
And Leaves the Surface
Clean and Bright
For Another AD-EL-ITE

AD-EL-ITE PAINT
— AND —
VARNISH REMOVER

Is being more extensively advertised this year than ever before. Every paint dealer should carry it, because we aid you in getting new customers by referring all inquiries from your vicinity to you. This not only helps you sell Ad-el-ite Paint Specialties but also makes permanent customers for you on your other goods.

Ad-el-ite Paint and Varnish Remover is not only the best advertised article of its kind on the market, but it is also the best in every other way

It is free from disagreeable odor.
It contains no alcohol, acid or water.
Does not injure the grain of the finest woods.
Will not injure any finish that may be applied after its use.
Removes more square feet of old finish, and does it quicker and better than any other Remover.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Augusta, Me.—The Atlantic Co. has been incorporated for the purpose of manufacturing boats, automobiles and sundry specialties. Capital stock, $50,000.

Baltimore, Md.—The Frank W. Wagner Company has been incorporated for dealing in photographic supplies, etc., by Walter A. Mason, Frank W. Wagner, Arthur C. Macy, James D. Brown and Edward A. Gault. The company was organized to succeed the F. W. Wagner Company, and is capitalized at $12,000. The new company will do business at 29 West Lexington Street on a more extensive scale than has been done heretofore.

Bangor, Me.—The J. Bert Baxter Company has been incorporated with a capital stock of $10,000, to deal in guns, ammunition, fishing tackle and camping equipment and to carry on the business of taxidermy.

Bay City, Mich.—The Brooks Boat Mfg. Company are planning the erection of a new factory in the early Spring.

Cuba, N. Y.—W. A. Bates Mfg. Co. has been incorporated to make minnow traps. Capital stock, $2,000.

Des Moines, Iowa.—The Des Moines Park Swing Co. has been incorporated by Milo G. Cummings and others. Capital stock, $10,000.

Detroit, Mich.—A branch factory of the Wilson-Hayes Co., Detroit, Mich., is to be established at Lansing for the manufacture of sheet metal parts for automobiles.

Detroit, Mich.—The Stirling Automobile Company has been incorporated. Capital stock, $25,000.

Jersey City, N. J.—The Aluminum Crown Stopper Co. has been incorporated to manufacture all kinds of bowling supplies; capital, $25,000.

Lawrence, Mass.—Titus Berry has embarked in the bicycle and sporting goods business. He will carry a fine line of bicycles in stock. He will occupy the store at 309 Common Street.

Meriden, Conn.—The Meriden Firearms Co. has been incorporated with $125,000 capital stock.

New York, N. Y.—The Charles J. Godfrey Company has been incorporated with a capital of $50,000; directors: C. H. Godfrey, C. H. Godfrey, Jr. and Grace N. Godfrey. The concern will deal in general sporting goods.

Northville, Mich.—The Hall-Carr Mfg. Co. has been incorporated with a capital stock of $60,000. The concern will make baseball bats, games, novelties and metal or wood mechanical devices.

Rockford, Ill.—E. L. and A. M. Burr is the name of a new concern who will deal in sporting goods.

Salem, Ore.—A new sporting goods house has been opened by Hauser Bros.

Topeka, Kan.—Owing to the limited amount of room, Mr. Harding has moved his bicycle stock from 841 to 838 Kansas Avenue, which will enable him to handle the large trade he expects this season.

Changes.

Akron, Ohio.—The B. F. Goodrich Co. is to add rubber boots and shoes to its factory output, being advantageously equipped for this branch of production and also in a position to profit by heavy purchases of crude material. The new department will be in charge of W. E. Hemnover, who has had 24 years' experience in the manufacture of rubber footwear—first with the Goodyear and National Companies, and later superintending the construction of the plant of the Monarch Rubber Co., now the Banner Rubber Co., of St. Louis.

Baltimore, Md.—On the first anniversary of the big fire, the sporting goods house of A. G. Alford has reopened at their old location 212 East Baltimore Street.

Cleveland, O.—The American Sportsman Supply Co. will shortly occupy new quarters at 165 Prospect Street.

Elkhart, Ind.—The plant of the National Mfg. Co. has been sold for $28,000 to Alfred Marshall and Charles G. Stevens of Chicago, who will engage in the manufacture of automobile accessories.

Gladstone, Mich.—The Marble Safety Axe Company has recently enlarged its factory and installed a dozen new and modern machines, to enable an increased production of its line of front and rear rifle sights, rifle cleaners and joined rods. New and larger offices and shipping departments have also been constructed, so that the orders may be more speedily handled.

Hartford, Conn.—The executive offices of the Pope Mfg. Company will shortly be transferred from New York to Hartford, Conn., business policy dictating the removal.

Little Valley, N. Y.—W. R. Case & Sons, cutlery manufacturers, are negotiating for the location of a factory at Bradford.

New Haven, Conn.—Preliminary certificates of dissolution have been filed by the Buell Cycle and Auto Co.

Seneca Falls, N. Y.—The work of placing the buildings of the National Yeast Company, on West Fall Street, in good repair and adapting them to the requirements of the Iroquois Automobile Company, has been commenced, and will be completed with all possible dispatch. The company will begin moving its machinery and tools from Syracuse at once with a view to commencing operations as soon as possible. The buildings contain some 90,000 feet of floor space, with a frontage on Fall Street of 150 feet, and are three and four-story structures, ample for all the needs of the company. All the stock required by the company has been readily subscribed here. The company officers are: President, Thos. Pelham; vice-president, J. S. Leggett; treasurer and secretary, Charles H. Fox.

South Bend, Ind.—A prospectus of the proposed Worden Sporting Goods Co., a combination of the Specialty Mfg. Co., of Goshen, Ind., with the Worden Bucktail Bait Co., of South Bend, has been received. The respective concerns have been in business for several years and have each built up a very good demand for the anglers' specialties they produce. The present idea is a corporation capitalized at $60,000 fully paid, which will manufacture and sell these specialties, the incorporators valuing their property at one-half of this sum and the remaining stock to be subscribed by investors.

Swanton, Vt.—The Robin Hood Powder Co. is planning extensive alterations at its plant, to include the remodeling of buildings now occupied and the erection of others, more room being required in handling the company's constantly increasing business.

A REFLECTION ON THE PAST.

William Pinkerton, the detective, was praising the various cash-registering devices that have come of late years into world-wide use.

"These machines," he said, "have undoubtedly diminished crime. They have saved many weak persons from a daily, an hourly temptation hard to withstand. They have also saved employers a great deal of money, for they have driven the dishonest out of a field of work wherein they loved to labor in the past.

"I heard of a clerk in a grocery the other day who was getting $8 a week. He had to be on duty at 7 in the morning, and he was not through till 7, and sometimes 8, at night. The poor fellow had no time for anything but work and sleep.

"He found time, though, to get married, and the week after the ceremony he asked his employer for a raise.

"'Why, Horace,' the employer said, 'you are getting $8 a week. What ails you? When I was your age I kept a wife and two children on $8 a week and saved money besides.'

"'They didn't have cash registers in those days,' said Horace bitterly."—*Cincinnati Enquirer.*

WANTED—A good line to sell on commission. Well acquainted with New York trade and vicinity. Hustler, care HARDWARE.

PRICES CURRENT

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

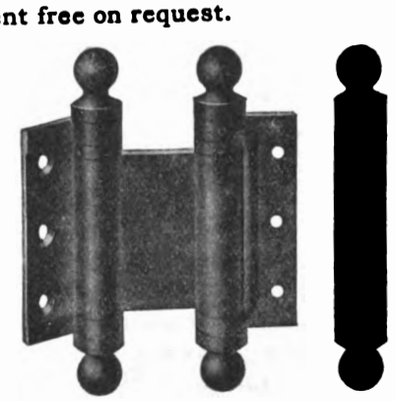
"Nothing Succeeds Like Success"

A STORY OF SUCCESS

The History of

"COLUMBIAN"

Wrought Steel Spring Hinges



¶ It is the same old story of keeping everlastingly at it, casting aside something good and adopting only the best; carefully searching for weak points and avoiding them; and finally, in absolutely perfecting an article before placing it on the market.

¶ The "Columbian" Spring Hinge as it leaves the factory to-day is a serviceable, simply constructed, and long lived, wrought steel spring hinge whose merits alone have earned for it the rank of "peerless." Can you afford to experiment with inferior makes which cost as much? We claim that the best is none too good.

HARDWARE DEALERS

NEED our valuable Catalog, "Builders' Hardware," No. 12, which contains information about hinges of all kinds, screen door sets, door springs, coat and hat hooks, etc., etc.

¶ Sent free on request.

THE ONLY CLEANABLE REFRIGERATOR

SEE HOW IT'S MADE ?

THE "GURNEY"

The "Gurney" can be kept absolutely pure and clean because of its Removable Galvanized Ice Compartment.

The "Gurney" is packed with MINERAL WOOL and constructed in the best possible manner, and will show, by actual test, the lowest average temperature with the least consumption of ice.

The "Gurney" is leader in style and finish, and first class in every particular.

MADE WITH ZINC OR ENAMEL LINING

COLD FACTS

THAT MAKE WARM TRADE

A Refrigerator is no longer considered a luxury but a necessity.

A good Refrigerator is a source of economy, a poor one an extravagance.

The best is the cheapest; you can't afford to sell a poor Refrigerator.

A poor Refrigerator consumes ice but does not refrigerate.

A poor Refrigerator is a delusion and a snare with nothing to recommend it but price.

The price is soon forgotten, the quality never.

A poor Refrigerator cheats both the dealer and his customer.

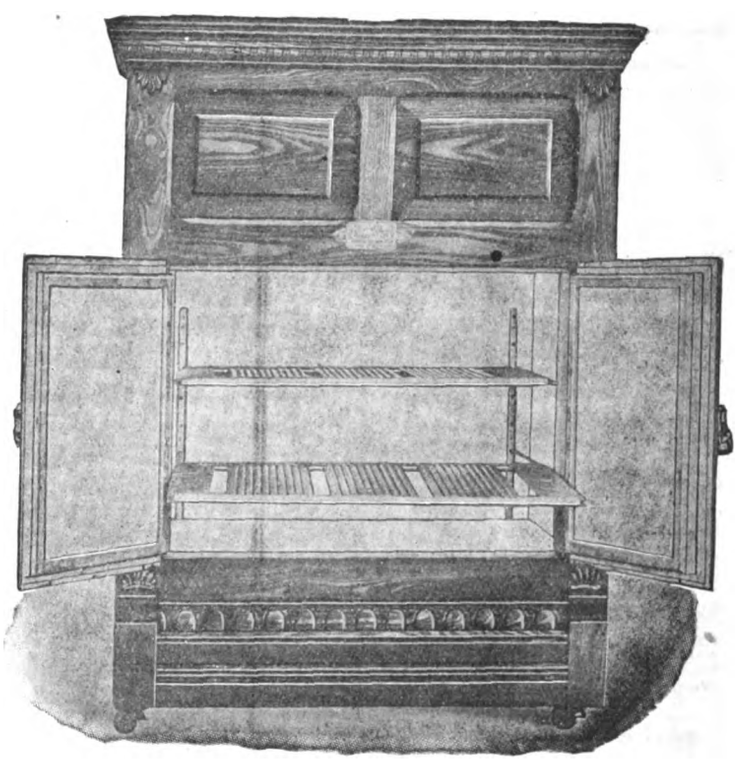
A low priced piece of furniture may answer the purpose for which it was made as well as more costly.

This is not true of Refrigerators.

In buying a Refrigerator the first cost is not the last cost.

A Refrigerator to be satisfactory must be so constructed as to be economical in the use of ice and in the preservation of food.

A profitable and satisfactory refrigerator trade can be built up only by handling high grade honest goods.



The "Gurney" is the best.

The La Belle is the highest grade refrigerator of its class.

The Gurney Patent Chinaline Refrigerator is the height of refrigerator perfection.

The Gurney Refrigerator Co. leads the world in the manufacture of Refrigerators because the "Gurney is the Best."

The Gurney is sold on the exclusive agency plan. One dealer every town.

CRONK'S

VERY BEST PRUNING SHEARS

That they are, indeed, the very best obtainable for the price, is common talk among users everywhere.

Have we others? Yes—twelve different kinds. Name any kind of a Pruning Shear and we can furnish it to you by the tick of the clock, and when you receive it you'll find it all right.

This applies to our entire line of Tools and Hardware Specialties fully described and illustrated in

Our Catalog—Have You Got It? You Cannot Afford to Be Without It.

The Cronk & Carrier Mfg. Co., Elmira, N. Y., U. S. A.

THE BEST IN THE WORLD

Hauthaway's Harness Dressing

Gives a beautiful polish that DOES NOT CROCK OR SMUT.

And will make any new or old harness look fresh, clean and handsome

Hauthaway's Axle Oil

THE BEST WEARING AXLE OIL IN THE MARKET. It never fails to give supreme satisfaction in every resp ct to every user.

Hauthaway's Harness Oil Blacking

BLACKS AND POLISHES ALL HARNESS PERFECTLY

These three stable requisites never fail to give perfect satisfaction to every user. They have been daily sold for over 50 years in every civilized country, and are ESPECIALLY PREPARED AND PACKED FOR EXPORT TRADE. Once tried, they will always be used.

We also make a full line of unequaled Shoe Polishes of every description. These goods have been sold in South Africa for years with unfailing success. SEND FOR CATALOGUE AND PRICE LIST.

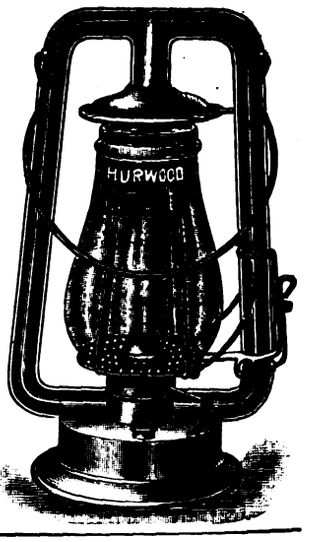
Bishop Lanterns



Have proved themselves to be up-to date goods for up-to-date dealers.

If you are looking for a lantern that is most easily filled, lighted and trimmed; one that gives a clear white flame and is wind and jar proof.—Buy the Bishop.

It puts all others in the shade as a seller. Drop us a line.

Mention HARDWARE.

The Hurwood Mfg. Co.
Bridgeport, Conn.

STOP TAKING CHANCES

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality. Take Axle Grease for instance; if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

It's the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need.

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

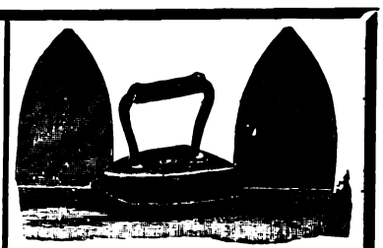
made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

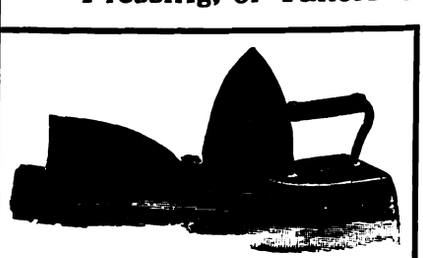
PFLUEGER'S PATENTED REVERSIBLE HINGE INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING



NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

The ENTERPRISE MFG. CO.
Akron, Ohio, U. S. A.



SAD IRONS . . .

Unsurpassed in Finish or Shape

Always ready for shipment. We carry a large stock from 4 to 10 pounds inclusive. Finished in Black, Bronze, Aluminum or full Nickle.

Pressing, or Tailors' Irons in sizes from 14 to 26 pounds.

Our Newest is the Sleeve or Flouncing Sad Iron, made with a blunt-nose to insure perfection of work and freedom from snags, in two sizes, 3 and 4 pounds, bodies coated with heat proof aluminum; face, toe and heel highly polished or nickle plated.

ASK FOR CATALOGUE.

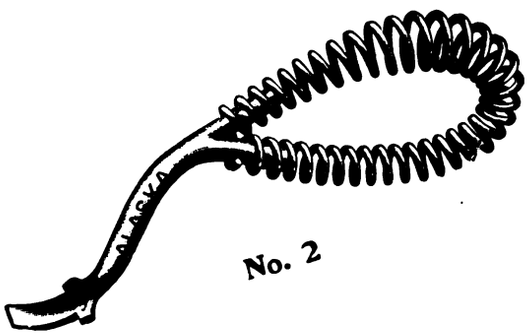
THREE-QUARTERS
OF
A CENTURY
ON THE MARKET

It is no longer a question whether our Edge Tools are the Best.

That question has been settled long ago by the largest users of Edge Tools.

The question for you to decide is: How can you, in justice to yourself and your customers, afford to handle any other but the Best—

White's Edge Tools



Search the world over—you will not find their equal in quality, workmanship, nor as ready sellers—at any price.

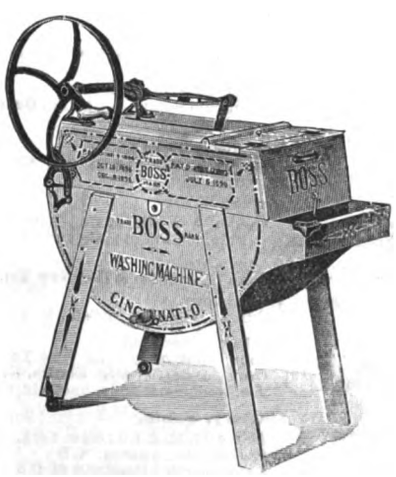
Think this over—then write us.

L. & I. J. WHITE CO.
Buffalo, N. Y., U. S. A.

"Alaska"
Stove Lid Lifter

The final test is wear. To investigate our "Alaska" Line of stove accessories means to buy.

THEY ARE FAULTLESS
In this respect the "Alaska" Line differs from all others.



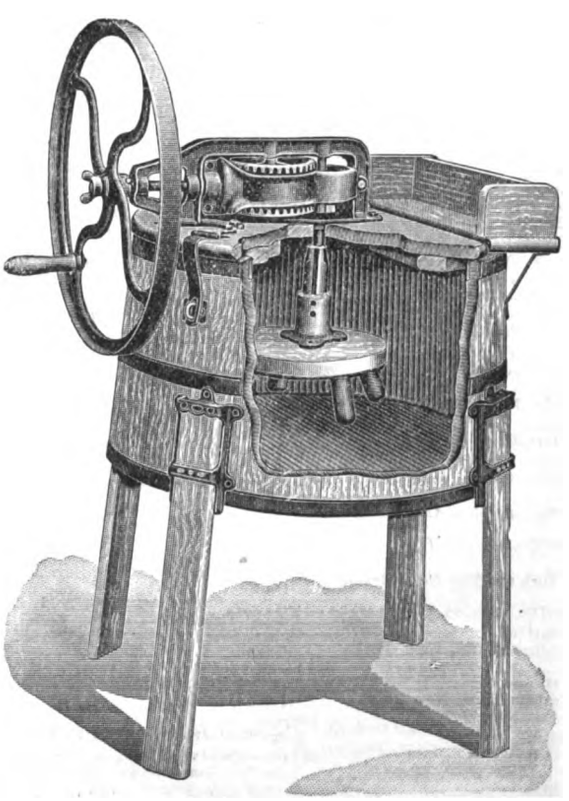
Troy Nickel Works
Albany, N. Y.

"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.



The only line of Washers not found in the catalogues of Catalogue Houses, therefore appeal to every dealer for support.

ADDRESS

Boss Washing Machine Co.

CINCINNATI, OHIO

BOSS DOUBLE ACTION

This machine is built on the true principle of rubbing clothes, similar to rubbing them on the old fashioned board, only that it just rubs a quantity at one time, and without the slightest injury to the finest of fabric including laces.

IMPROVED BOSS ROTARY

Has gears protected by shield or cover.
Has Telescopic dasher post.
Has large cypress tub and rub block.
Has either stave or detachable legs.
Has Highest Speed of any rotary.

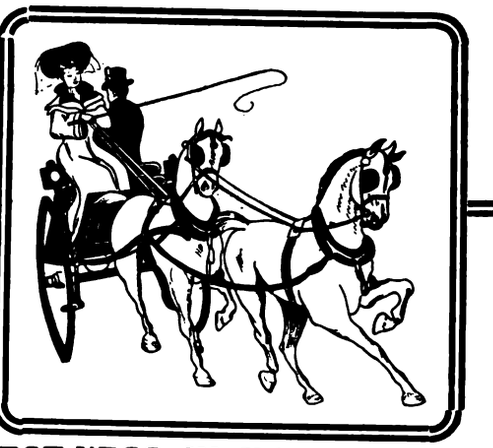
Peerless No. 7 Screw Driver

Ducharmes Tools

H and D No. 5 Screw Driver



WE make a specialty of Hand Forged, Hardened and Tempered Screw Drivers, using positively none but the highest grade stock in both steel and handles.

We guarantee each driver to the trade, and will replace free of charge any that break, bend or are not perfect in all respects,

Each driver is tested to break a screwhead in its size.

Send for our latest catalog and discount sheet. We know you'll be interested.

Ducharmes & Co.
Shelburne Falls, Mass.
U. S. A.

BEST-NESS IN HORSE NAILS

We make only one grade of Horse Nails—The Best—

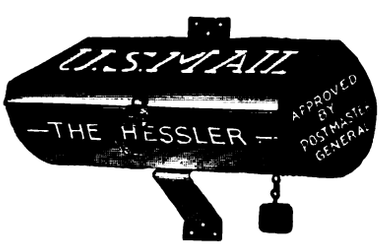
The New Putnam (W) Horse Nail

It will not crimp, break nor sliver, will not cut off, will hold in the clinch. Drives most easily. Has stood the severest practical tests. It has stood the highest test for tensile strength, elongation and elastic limit.

1¼c. per horse is the difference in price between the cheapest Horse Nail and The Best—The New Putnam.

Say that last over out loud—slowly.

PUTNAM NAIL COMPANY
Neponset, Boston, Mass.



A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

Rural Mail Boxes

THE HESSLER

BEST KNOWN. BEST MADE.

Most durable as well as the cheapest fully approved Rural Mail Box on the market. Do not be deceived by manufacturers who claim to have a Box similar in appearance to the "Hessler." Just compare the Boxes and convince yourself. The Hessler Box is storm and dust proof, has the only signal that will not get out of order. It costs you no more than the cheaper made boxes. Write for full description and prices.

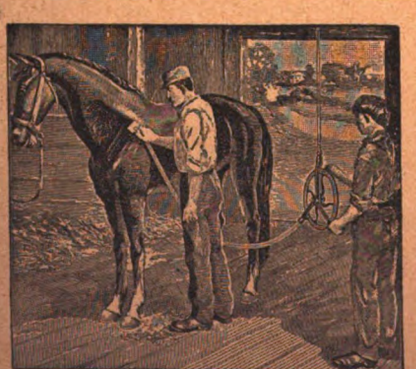
GOOD AGENTS WANTED TO SELL



THE MAGIC ELECTRIC CLOCK

is a most remarkable little timepiece. Needs no winding but runs itself and keeps fine time. Three tiny batteries in the base will keep it going for months and may be renewed at a moment's notice. It is 9 in. high, has a 3 in. dial and the base is 7½ in. in diameter. Intensely interesting to watch, yet thoroughly practical and useful.

Also Frying-pan, 60 day and Calendar Clocks.
Send for Catalogue No. 585.

THE PRENTISS CLOCK IMPROVEMENT CO.,

MEASURING TAPES.

We beg to announce that our line of Measuring Tapes has been made complete by the addition or

"Favorite" Cotton Line Tapes (Ass skin)

"Tip Top" low-priced Steel and Linen Pocket Tapes.

Our assortment of Tapes should now meet every demand as it comprises a greater variety than any other maker's. Each grade represents the highest standard of its kind.

The Stewart Iron Works Company

Hardware Dealers Make Big Profits as Agents

Here's a line of goods that ought to be in the stock of every Hardware store with any pretentions toward up-to-dateness. They sell with little effort, provided samples are properly exhibited.

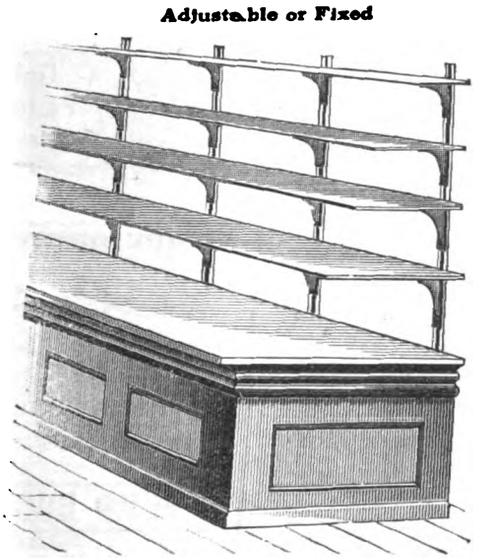
Our Goods are Guaranteed. Our **Vases** are not only ornamental, but made of the best material. Our **Settees** are pleasing to the eye and stand the wear. Our **Tree Guards** sell at a small price, but they last because they are made right—of steel rods.

WE WANT AGENTS

—Hardwaremen who want goods that will suit their customers. Ask for Catalogue No. 26 of our full line of **Iron Fence, Gates,** stall guards, mangers, etc.

HIGHEST AWARD ST. LOUIS, 1904

Office and Factory, CINCINNATI, O.



Increase Your Shelf Capacity

Without enlarging your building by using

BAINES SHELF BRACKETS

Adjustable or Fixed

Made in Cast Iron, Japanned Black and will hold **any weight that can be placed upon the shelves.**

Our Catalogue "H" is for Hardwaremen; it will tell you just how to estimate the number of brackets required and much other interesting information.

PIQUA BRACKET CO., Piqua, O.

Are you prepared for the coming Water-Cooler Season?

It's high time you considered your purchases of these Summer Necessities.

We make Water Coolers,—a wide variety of styles and sizes,—attractively finished,--*and they keep the water cold!*

Our extensive lines of Water Filters,---just the thing for Spring Sales,---Water Coolers, Chafing Dishes, Table Kettles, Baking Dishes, Crumb Trays and Scrapers, Urns, Cuspidors and Bath Room Fixtures are illustrated and described in our interesting catalogue.

Shall we send our catalogue—and discounts?

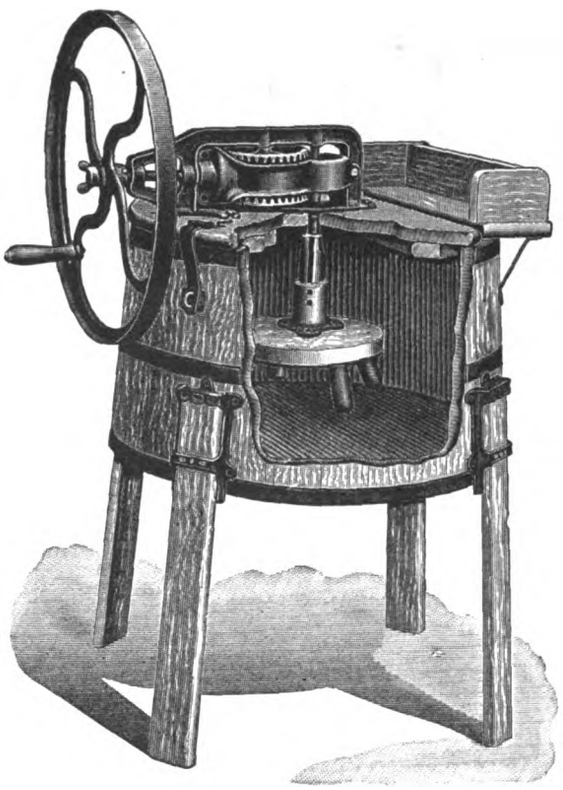
"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.



The only line of Washers not found in the catalogues of Catalogue Houses, therefore appeal to every dealer for support.

ADDRESS

Boss Washing Machine Co.

CINCINNATI, OHIO

BOSS DOUBLE ACTION

This machine is built on the true principle of rubbing clothes, similar to rubbing them on the old fashioned board, only that it just rubs a quantity at one time, and without the slightest injury to the finest of fabric including laces.

IMPROVED BOSS ROTARY

Has gears protected by shield or cover.
Has Telescopic dasher post.
Has large cypress tub and rub block.
Has either stave or detachable legs.
Has Highest Speed of any rotary.

If the United States would place to-day an order for WOODEN warships, the world would ridicule us . . . . . .

PARAGON WASHER

P. S. Summer resorts are now equipping their laundries. Every proprietor of a hostelry is sure to buy a Paragon, Hotel size. Dealers, make the profits!

The dealer who handles *wooden* washers shows an awful lack of progressive spirit.

SPAIN has quite a few old *wooden* tugs, cheap and for sale; unfortunately she had not all of her stock at Manila.

Mr. Dealer! How many of those *wooden* washers that you bought before the Spanish War, are still decorating your store?

DO AS DEWEY DID!

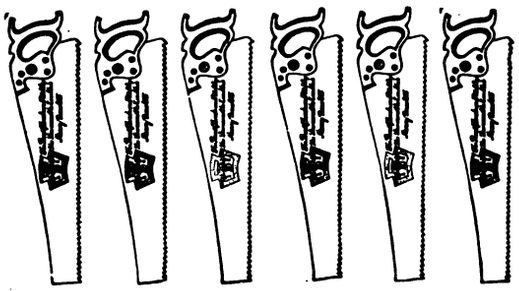
And then put in a fresh stock of *Metal Paragon Washers.*

You can safely place them near the entrance *to-day;* because *to-morrow* they will go to their future home, and act as a *free advertisement* for your store.

The PARAGON is made on the same principle (revolving cylinder) as the large power machines you see in every steam laundry and hospital.

Do you know now *why* and *how* the PARAGON does the work?

Compare the *appearance* of the PARAGON to any of the clumsy, complicated, greasy, antiquated wooden "washers(?)," and you have found the reason why you have never made a success of washing machines.



Experts predict for the PARAGON a larger commercial success than that of the Singer Sewing Machine. Dealers will find it to their advantage to come in on the ground floor now, before the agency for their city goes to a competitor.

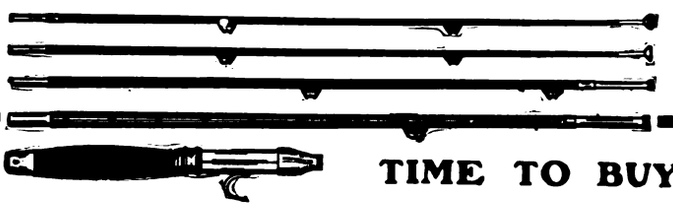
Do You Want a Partner?

Warren's **TWELVE** Silent Salesmen.
Required **TWELVE** Years to Perfect.
Will Work **TWELVE** Hours Every Day,
For **TWELVE** Years to Come,
After First **TWELVE** Months—for nothing.



In order to learn the opinion of merchants employing these, a circular letter was mailed to every firm that had tried them, thus reaching stores in large cities, county seats and sequestered communities. The average of replies received contained the following gratifying results:

Increased Sales	25 per cent.
Less Capital Required	25 " "
Goods Saved from Injury	33 " "
Goods Saved from being Misplaced and Lost Track of	30 " "
Time Saved in Serving Customers	35 " "
Customers preferring them to the old way	99 " "
Number of months in which they will pay for themselves	11 7-12 mos.

These answers show definitely what they accomplish.

Colored Illustrations of the Twelve will be mailed to any one writing for No. 120 Portfolio.

HARDWARE

In the recent big fire in Hot Springs, Ark., the Hardware stock of Hamp Wiliams was destroyed. The insurance was $17,500.

For the two months, January and February this year, production of pig iron increased 1,246,820 tons as compared with the first two months of 1904, and 736,723 tons in the first two months of 1903.

The New York Cordage Company is moving into their new offices at 80-86 Wall Street, New York. R. D. Borden of Fall River, Mass., is now representing the company in New England, while J. J. Hundley of this city is traveling for the company in the States of New York and Pennsylvania.

The Hamilton Emery & Corundum Company, Chester, Mass., is sending free to the trade who apply for it, a case containing 24 samples of Turkish and Naxos emery. The case measures 4 by 12 inches and has a leather finish. It holds 24 vials containing samples of the different numbers of emery which the company manufactures. Besides showing samples of its Emery it assists the dealer to become familiar with the different grades of Emery and their corresponding numbers. The company makes a specialty of Turkish and Naxos Emery of a superior quality.

Plans and specifications have been prepared in Philadelphia for an operation of 960 model dwellings to be erected at Bethlehem, Pa., to cost in the neighborhood of $1,500,000. The recent award of large contracts for armor plate to the Bethlehem Steel Company is responsible for this. The plans show two-story brick houses with porch fronts and the latest dwelling equipments. Each dwelling will measure 15 by 40 feet and will contain seven rooms. About 5,000 additional men will be employed by the steel works when the new buildings are completed.

During February permits were taken out in twenty-five leading cities, according to reports to *Construction News*, for the construction of 4,902 buildings, aggregating in cost $22,502,806, against 4,203 buildings, at an estimated cost of $14,517,065, for the same month a year ago, an increase this year of 699 buildings and $7,985,741, or 55 per cent., in cost. The increase for January was 83 per cent. on a total of 5,187 buildings, involving a total cost of $24,964,651. Only eight cities show decreases.

BEALL BROTHERS' CATALOGUE.

Beall Brothers, Alton, Ill., have sent us among other literature a catalogue having reference to their line of Shovels, Spades and Scoops. The book is in large pamphlet form and contains 35 pages. In this catalogue they give complete price lists as well as illustrations and dimensions of the line of plain back (Antrim) and hollow back (Cleveland) shovels, spades and scoops. They state their experience of nearly half a century in manufacturing has enabled them to put on the market a high grade steel tool unsurpassed in finish and quality. Another of their catalogues is devoted to Miners' tools and Miners' supplies. This is the same style book as above, but contains 51 pages. Of this line they claim to be the largest manufacturers in the United States, and perhaps in the world. They make some nine different patterns of coal drills, including the old wooden post machine and can furnish machines complete, and parts for most all the different drills manufactured in the United States. They use nothing but the best grade of material, warranting every article they send out. Send for either or both of the above mentioned catalogues if you are interested.

BROKE THE RECORD.

With all the exhibitors well satisfied with the results, the National Motor Boat and Sportsman's Show came to a close March 9 at the Madison Square Garden. The official figures show that the exhibition was favored with a larger attendance than was ever drawn by any show in the Garden, as during the fifteen days more than 125,000 spectators came to see the boats and the other exhibits. The results in sales were equally gratifying to the exhibitors. Many thousands of dollars' worth of boats were ordered, and the sport of auto boating promises to become a lively one during the coming season. Arrangements have been made to have an annual show for the next four years.

THE COLUMBIAN WROUGHT STEEL SPRING HINGE.

The Columbian Hardware Company, Cleveland, Ohio, have achieved a remarkable success with their wrought steel spring hinge known as the "Columbian." In getting this article ready for the market they drew on their years of experience with their well-known hinges the "Gem," "Oxford" and "American" with the result that the "Columbian" had proven from the start a trade winner. It is claimed to be absolutely reliable and high grade in every respect and it sells at a very reasonable price. The Columbian Hardware Company have one of the most complete factories in the country for manufacturing hinges of all kinds in steel, brass or bronze, all of which are finished in a great variety of useful and beautiful styles. Besides making Builders' Hardware this firm is producing a complete line of blacksmith's, machinist's and Oval slide vises, anvils, wall and joist hangers. Every Hardware dealer should have the three artistic catalogues issued by this concern. In them will be found much valuable information along these various lines.

CALIFORNIA RETAIL HARDWARE DEALERS' ASSOCIATION.

The first regular session of the fourth annual convention of the California State Retail Hardware Dealers' Association was held at the St. Francis Hotel, San Francisco, on March 8. In the absence of President O. F. Sites, who is in Washington, D. C., Vice-President G. A. Gutman occupied the chair and read the president's address, the main feature of which was a recommendation in favor of a salaried organizer to assist in the work of bringing each one of the 2,200 Hardware dealers of the State into the membership roll. At the session March 9 the following officers and members of the Executive Committee were elected: President, H. C. Bennett, San Francisco; vice-presidents, J. E. Jansen, Eureka, and P. W. Devore, Ocean View; secretary, Henry Gracey; treasurer, George H. Smith, Oakland. Executive Committee: M. M. Brown and C. H. Phillips, of San Francisco Association; J. H. Stevens, St. Helena, and H. C. Mailer, Santa Rosa, North Coast Association; George H. Ismond and Frank K. Mott, Oakland, Alameda County Association; John C. White, Marysville, and George A. Legg, Nevada City, Pacific Association; C. W. Barrett, Fresno, and D. C. Wood, Modesto, San Joaquin Association; H. E. Robinson, Gilroy, and C. M. Brown, Hollister, Central Association; J. C. Barth, Corona, and C. W. Bammarel, Los Angeles, Southern Association; H. E. Reid, Eureka, Humboldt Association, a second member from Humboldt to be named later.

NEW YORK STATE ASSOCIATION OF RETAIL HARDWARE DEALERS.

At the recent convention of the above association the report of Secretary J. B. Foley, which was presented on Thursday in executive session, showed that the association had made a material gain in membership, 52 new members being added up to March 1, with a further increase of 40 during the convention. The total membership is now 217.

In accordance with the report of the Nominating Committee the following officers were unanimously elected for the ensuing year: President, C. P. Sherwood, White Plains; First Vice-President, Louis J. Ernst, Rochester; Second Vice-President, L. G. Mattison, Newark; Treasurer, F. E. Pelton, Herkimer; Secretary, J. R. Foley, Syracuse; Directors for three years, John E. Larrabee, Amsterdam; William Stark, Saranac Lake; Thos. Hobbs, Utica. John G. Ferres was elected also to fill the unexpired term of L. G. Mattison, who was promoted to a vice-presidency, and George B. Allen was chosen to fill the unexpired term of C. E. Hills of Oneonta, who has retired from the Hardware business. Binghamton was selected for the next place of meeting for the association. The date will be determined by the Executive Committee.

THE GLIDDEN VARNISH CO.

We have received the following:

IMPORTANT NOTICE.

To the Trade: We are not selling, and do not intend to sell our Jap-a-lac and Dealers' Specialties to mail order houses, for we realize the fact that it would not only be detrimental to the retail dealers, but very detrimental to ourselves indirectly. Some of our competitors are representing to the trade that we are selling such houses, which is an injustice to us, and we wish to correct reports of this kind which are being circulated.

The Glidden Varnish Co., Cleveland, Ohio.

Editorial Trade Review

Reports from the trade centers throughout the States are of the most encouraging character as relating to the business of the immediate future, and the first continued evidence of a let up in the conditions of Winter will give the Hardwaremen plenty to do in supplying the wants of the consumer in which the presence of a full stock of goods will be found an important factor. The Retailer already finds the demands crowding his amount of stock to the limit, and the anxiety about his future supplies, looms up on the horizon with alarming urgency.

The stocks now in the dealers' hands are of far greater importance in point of supply than is generally supposed, the bulk of purchasing having been made as prices advanced during the later months of the past year, and these goods being at lower costs than can now be obtained, it has needed only the bracing atmosphere of the Conventions that have recently taken place, to know how unwise it would be to throw such profits away by unnecessary cutting of the prevailing price on anything. That is a business that can be left to the more restless jobber, with his larger, and more greatly assorted volume of goods to distribute.

The catalogue house question as it appears at present may safely be left by the Retailer to the National Association to attend to. Already the attitude of the manufacturers is sufficiently manifested by the fact that nearly 600 have placed themselves on record as not supplying this class of trade with the goods they want, at any price; while others, whose relations are of greater intimacy with the catalogue houses, insist upon the prices at which they must be sold so as not to interfere with the retail trade. At any rate the retailer who buys through his accustomed channel of supply, will have one thing less to annoy him in retaining the trade he has already secured, over the conditions of affairs a year ago. The Retailers will find it comparatively plain sailing if they don't find it of importance enough to their well being to get up a local fight of their own on account of a competition which even the influence of an Association cannot down.

On Builders' Hardware the indications point to a large trade in the Spring and Summer, as the plans for that industry are of a most exhaustive character, which will be felt in every branch of trade connected with it as soon as settled weather can be assured in order to prosecute the several projects that are already promoted.

The movement of stock orders we hope will be found so regular as to check the fear felt in some quarters that in the consolidation of the plants under new arrangements, the closing of any of the original ones will not carry with it a shortened production, which in the failure to deliver promptly at prearranged periods might be supposed possible to an economical output.

The conditions of the markets for raw material, and the Manufacturers' quotations are firmly held, and yet no abnormal advances need be apprehended. Where as in a few instances seems to be the case—the movement of an augmented production is slower than could be wished for, manufacturers have no hesitation about heaping up stock; feeling confident that the trend of trade when in full blast, will carry away anything which now partakes of the character of an excess. The general belief is so very optimistic about the future of trade, that in every direction preparations are being made to prepare for it in no half hearted manner.

In the conventions this year a number of papers have been read in which the gray matter of those participating, have contributed good advice and the most solid instruction. Each succeeding year finds the Hardware man more fully equipped in this particular and he prepares himself to impart the greatest information to his brother workman in the trade, with more than the usual unselfishness. This is one of the benefits of organization, a disposition to distribute methods of application as fast as they are acquired.

DEATH OF HENRY T. WAKEMAN.

Henry T. Wakeman, who for fifty-five years has been in the Hardware business in New York City, died at his home, 192 Prospect Place, Brooklyn, Monday, March 13th. He was born in 1827 in Greensfarms, Conn., where he spent his early life working on his father's farm. After a short period of teaching he entered the Hardware business which pursuit he followed uninterruptedly till two years ago when he was forced to retire on account of illness. During this long and successful business career he has become well known for his sterling honesty and fair dealing, strict attention to business and cheerful disposition, which no annoyance could baffle. He has been a great traveler throughout this country, having done business in nearly every State in the Union, as well as in parts of South America. It was his delight to rehearse to his friends the many interesting experiences he encountered while traveling through the West in the early seventies before railroads were built there, sometimes going five hundred miles by stage without stopping to rest. As much as he enjoyed the rough life of the West, he was always glad to return to his home in Brooklyn, where he has resided for the past thirty-eight years. The strict principles installed in him by his Puritan training he has always adhered to and retained a broad sympathetic feeling for all classes of men, extending a helping hand to many a one in trouble. In 1875 he joined Plymouth Church where he has been a regular attendant up to the time of his death. He is survived by a widow and only daughter. In his connection with the Hardware business he has been associated with Hoyt, Busick & Company, Quackenbush, Townsend & Company and Patterson, Harral & Gray; his special line of work being the furnishing of supplies on contracts with the City Government of New York through its various departments, in which branch of the Hardware business he had become an expert of such advanced merit his place will be difficult to fill.

DEATH OF ROBERT J. ALEXANDER.

Robert J. Alexander, of the firm of Sperry & Alexander, 300 Broadway, New York, died suddenly of heart failure Sunday, March 12, while South on business, at Jupiter, Fla. Mr. Alexander was about 42 years old, and was well known in the Cutlery trade with which he was identified.

MAINTAINING THE PRICE

By A. EUGENE BOLLES

THE RESULTS OF A YEAR'S WORK AND SEVERAL INTERESTING OPINIONS FROM DEALERS AND MANUFACTURERS.

Almost every one in the trade seems to be interested in the question of "Price Maintenance," judging from the large number of letters on that subject that are daily coming into this office. This agitation will have been worth while if it accomplishes nothing more than the waking up of those in the various branches of the Hardware business and getting them to come out in the open with opinions. The strongest association on earth, in any line of business would soon go into an "innocuous desuetude" without something having a tendency to keep the members at attention. Differ, though the opinions may, the discussion now going on in the Hardware world will have the effect of drawing Hardwaremen together into closer business fellowship. And if there ever comes a time when the now over 6,000 association members in this country grow to a score of thousands, each one standing firm in the ranks and looking out for his own part of the fight, the Hardwareman's troubles will have turned to pleasures.

It is reported that over six hundred manufacturers of Hardware have adopted the policy of refusing to sell goods to Catalogue Houses at any price, and that others are only selling these houses under an ironclad price maintenance contract. Surely this is a magnificent result from a discussion that has been going on for barely twelve months. It is another demonstration of the value of live association work, of getting together, of coming out frankly and "calling a spade, a spade." The work is not finished—never will be—but manufacturers, at least a large number of them, have shown their willingness to help the cause of Hardware even at the sacrifice of big orders. They have proven

FRIENDS OF THE RETAILERS.

Over six hundred have fallen into line and more are coming. It is now up to the retailer to take care of his end of the fight, to get after his trade with a vim, to get the right goods and convince his customers that he has got them. The manufacturers can't settle the matter alone. It's a case of "everybody in line" —and the stragglers will be the ones to suffer most.

The president of the Arkansas Association, Hamp Williams, ever ready to help when the editor calls on him, writes a very interesting letter on this subject. He says:

"Maintenance of prices no doubt will help the retail merchant some, and if the manufacturer was in a position to name prices to be maintained all the way through, no doubt that would solve the proposition amicably, but unfortunately, or fortunately, I don't know which, they can not do it. Thousands of articles, that under the Hardware trade have no descriptive name and are only known by a general term, for instance, nails, iron, tacks, lead, shot, etc., and many items which have a descriptive name, manufacturer's brand, for instance, that are in demand but each have competitors in other manufacturers' brands claiming superiority, so if one manufacturer should demand a maintenance of prices on his line the probabilities are that his competitor, another manufacturer, who makes the same item under another specific brand might reduce his price and capture the trade. To make it plain, if Henry Disston sold a hand saw for $1.25 and restricted the retailer to get no less than $1.50, Atkins might offer a similar saw for $1.00 and restrict the price to $1.25. But if Henry Disston was the only man manufacturing saws, he could have the price maintained. My experience has taught me that

THERE IS GENERALLY A SUBSTITUTE,

and we can even up some way without absolutely confining ourselves to one brand. If flour is too high we can get corn bread. If pork is too high, we can eat beef. A little man said to the larger one, "God make us unequal, but Captain Colt came later and put us upon an equality." In my opinion the manufacturer can have prices maintained only to a limited degree and if the manufacturer who told you that he had sold more of one article to a Catalogue House in one year than he had to the jobbers in twenty previous years, prefers that medium of selling his products, he should by all means confine his sales to the Catalogue Houses, and if he fears to refuse to sell the Catalogue House, because the Catalogue House threatens to manufacture, he is wrong, from the fact that if he refuses at any future time to sell them the article at their price, they will begin to manufacture anyway. The probabilities are that the jobbers reasons for not selling more of that article were that it had little merit and cheap price, a big looker and little value, a thing that most Catalogue Houses are looking for. If the Catalogue Houses are more powerful than all the manufacturers, jobbers and retailers in this country combined we might as well quit and all vote for the Parcels Post bill and begin to order our daily bread from the Catalogue Houses by mail."

* * *

A prominent association official, who for reasons wishes his name withheld, writes as follows: "I have read with great interest the article which appeared in the last issue of HARDWARE, on "Maintaining the Price," and feel that a full discussion of this subject through your columns will be helpful to all branches of the trade. Unrestricted competition leads in many cases to a gradual lowering of the prices to such an extent, that interest is lost by those whose attention it is absolutely essential to hold to the utmost extent, if the commodity is to be properly marketed. If any good article is wanted by the consumer, the retailer will buy, when the opportunity is presented. There must, however, be a desire on the part of the consumer to be possessed of the article, in order that it may be put into consumption. How is this desire on the part of the consumer to be satisfied, if when he goes to the storekeeper, the article is not to be found in his stock? The same motive which actuates the consumer to call for the goods, induces the retailer to place them in his stock, namely: "Want." But why should the retailer want the article in question? The answer is very simple. He wants to carry the same, because in supplying the wants of consumers he makes a profit. Now, if through competition of the Catalogue House, the retailer is placed in a position where he cannot make a profit on the article in question, he does not "want" tha goods, and the craving of the consumer cannot be satisfied. Assume that the consumer wants the goods, and the retailer finds that he has a desire to sell the goods to the consumer, is it not essential that he should be in a position where his wants can be quickly supplied through the jobbing trade? But if the jobber has found that through unrestricted competition the price has been brought to such a low level that he cannot make a profit on the line in question, then the retailers' wants cannot be supplied by the jobber. What is the result? In thousands of instances, the product of the manufacturer remains unsold. If it is important that those who produce goods should make them in such a way as to be pleasing to the consuming public, is it not equally as important that those who produce the goods should see to it that the retail merchant as well as the jobber shall have an active and earnest interest in the distribution of them? I therefore believe that

A MANUFACTURER WHO WILL PROTECT

the price on his goods, so that those who handle them are assured a proper margin of profit, will find that the consumption of the same will increase, while the manufacturer who is indifferent as to whether the retailer or jobber make any profit or not, will find that his goods will not be called for. In your article you seem to lay great stress on the fact that the catalogue houses may become manufacturers. I really feel that the American manufacturers need give themselves very little anxiety on this subject. It is true one of the prominent catalogue houses has gone into the manufacture of stoves and buggies, either directly or by agreeing to take the output of a certain small factory. Necessarily, a manufacturing plant being compelled to distribute its entire product through one house, will find a serious difficulty in producing goods in quantities which will be sufficiently large to reduce the cost of production to a minimum basis. Further, you must realize that it is not every man who knows how to sell goods who has the ability to successfully manufacture them. Another point which must be considered is that the catalogue houses have not unlimited capital and it would take a score of millions of dollars to enter into the manufacture of any small portion of the goods which they are illustrating. Therefore, I do not believe that the manufacturers need be exercised on this point.

* * *

W. A. Church, President of the Connecticut Association writes: "Answering your letter of the 10th would say that I have carefully read the article on maintaining prices, and find it full of interest. The writer has treated the subject in a broad and comprehensive manner and in my opinion with the utmost fairness. The problem of dealing with Catalogue House Competition is a very complex one, and I am frank to admit that I do not see any practical way to eliminate the evil. Doubtless something may be accomplished by concerted action to minimize the danger of this kind of competition, but that it will ever be entirely eliminated, I very much doubt. The Catalogue House I fear is here to stay. They are strong financially, splendidly organized, and full of fight. Our Hardware organizations will, I believe, in time be able to check them at many points and make their road a hard one to travel, but I doubt very much that they will ever cease to be a dangerous competitor. The suggestion that manufacturers be induced to maintain prices thereby giving the Catalogue

Digitized by Google

House no advantage over other buyers is all right when the manufacturer is in a position to maintain his stand, and would doubtless work well in some lines, but an attempt to apply this policy in a general way would in my opinion simply force the Catalogue House to become a manufacturer of his own goods. It is true that they would hardly be in a position to make all the lines that they stock and sell.

THIS WEAK SPOT IN THEIR ARMOR

will enable our organization to circumscribe the danger of their competition. I believe that the average manufacturer is friendly to the dealer, and that he will in most cases be found ready to co-operate with him for mutual benefit, when he can do so without actual jeopardy to his business, but there is a limit beyond which he cannot be expected to go. His position in relation to this trying controversy is a very difficult one, and his co-operation should be sought with some regard to the safety of his business. Personally I do not believe that any permanent good is to be gained by an attempt to maintain prices on all lines, neither am I wise enough to suggest any practical policy for dealing with the question, I believe however that ultimately our organizations will be able to work out a policy that will meet this form of competition."

* * *

Another leading association man asks us to withhold his name, much to our regret. His letter is as follows:

"Recent court decisions give the seller an undeniable right to regulate the re-selling price on their product. Demoralizing cut prices injures any line of goods and the manufacturer owes it to himself and to his other customers to take arbitrary measures to discipline any offending parties. When a manufacturer arranges a line of prices which affords a fair profit to the jobber and protects the retailer he should be supported in his good work. Local associations can depend upon the manufacturers' help in many lines which they control. Where dealers have little regard for their competitors they will listen to the manufacturers from whom they draw their supply. Maintaining of prices is an up-to-date way of getting proper returns for the strenuous work involved in doing business to-day."

* * *

The secretary of the Wisconsin Association, C. A. Peck, gives his views briefly in the following letter:

"In reply to yours of the 10th inst. I would say that I think your article in February 10th number on maintaining prices covers pretty nearly the whole ground, yet I think it is a question for each manufacturer to settle for himself, whether he prefers to market his product through Catalogue Houses or legitimate trade. I look hopefully forward to the time (and judging by the past, it is not far ahead) when he will have that query to meet. Loyalty to the principal of dealing with your friends, instead of your enemies, is growing and the interest in, and wonderful growth of the several State Associations show this to my mind very plainly. I understand that ten per cent. of the Hardware is sold by Catalogue Houses and ninety per cent. by the regular dealer, and with sufficient loyalty inculcated into our membership, it will go a long way towards making large Catalogue House orders less attractive."

* * *

The New York State dealer who wrote the following, evidently believes that "All things come to him who hustles while he waits."

"I believe that any attempt to maintain selling prices (except in isolated cases) would be futile, and that the Hardware trade can ill afford to be too insistent in its attitude toward manufacturers who sell mail order houses. I think most of us are too much inclined to be like the dog in the manger—

WE DON'T HUSTLE TO GET BUSINESS

and we howl when the other fellow gets it. The agitation on this subject, however, is beneficial because it is awakening Hardware dealers to the fact that the way to sell goods is to hustle for business. We have passed the stage when it will come to us by waiting."

* * *

From W. H. Underwood, Secretary of the New Hampshire Association, comes the following:

"I have your letter of the 10th. Your article in the HARDWARE is interesting to me. I believe in the maintenance of prices made by manufacturers as far as possible. I know the policy is repugnant to many merchants, who have paid their good money for goods and claim an indisputable right to sell their property at such a price as they please, but on patented articles or goods sold as brands that have a special value from the efforts manufacturers have made by advertising or otherwise, they have a deep interest that their goods should be placed with the consumer in a way that will not be detrimental to the continuance of their value, he owes this to himself and to the middle man, who will not always help himself."

* * *

O. J. Darling, secretary of the Detroit & Suburban Retail Hardware Dealers' Association, handles the subject in a masterful manner in his letter which reads, in part, as follows:

"That prices must be maintained if the small retailer expects to live in the future is sure, but the way to best accomplish this is a question. This I believe can only be done by the manufacturer. As retailers I believe we have the right to and should demand of the manufacturer that he see to it that the prices on his goods are not cut below a fair living profit, as he is in a position to do more along this line than both the retailer and jobber combined. It has been carefully estimated and asserted as a fact that legitimate Hardware dealers sell over ninety per cent. of the Hardware sold in this country, yet while the Catalogue Houses and Department Stores are selling the remaining ten per cent., they by the cut rate quotations of standard goods are succeeding in demoralizing both the prices and business of the retailer. If this is a fact and such I think you will find it, haven't we as retailers who are handling ninety per cent. of their goods, the right to demand of them that they see to it that the prices are maintained, or refuse to sell those houses who are cutting the price any more goods. It is impossible for the retailer to maintain the price without the support of the jobber and manufacturer. It matters not how perfect our Hardware Associations may be, or how much we may desire to keep up the price to a living profit, we do not and

CANNOT CONTROL THE SELLING PRICE

of Hardware that is sold by the Catalogue Houses and Department Stores without the support of the manufacturer and jobber. That this can be done we are sure is agreed upon by all who have given the matter any attention or investigation, as we have firms who have been doing it for years and it has proven of great benefit to them as well as to the retailer. It may be true as some manufacturer has stated that if they did not sell the Catalogue Houses the goods, that they would soon be making them in their own factory, but I am sure that you will find that this will be a rare exception instead of the rule, as there is scarcely an article sold by any one house in large enough numbers to warrant the establishing of a plant or factory for the making of the same, and even allowing that this might be done, in some cases the goods at the best would only be substitutes which in time the people would refuse to accept for the standard makes. The little any manufacturer would likely lose in this way will be more than repaid by the increased sales of the retailer who by having a fair margin of profit on standard makes, will feel inclined to push the sales of those goods, which he will not do if the margin of profit is so small that it does not pay him for the time spent in doing so. It is human nature to sell the goods that bring the best returns. You often hear a manufacturer say that it is unjust to ask them to attempt to dictate to their customers as to what they shall sell their goods for, as that is a matter that they have no right to interfere in. This may seem unjust if the facts of the case are not taken into consideration, but when we remember that the houses that are doing the cutting are only selling a small portion of the entire amount of goods sold, but by buying these goods in large orders at a time, are given such a low price by the manufacturer that they are able to undersell all of the retail dealers, it is not unjust to ask of the manufacturers to either compel those houses to maintain a fair price, or to give the retailer a price that will enable him to meet this competition on equal grounds. It is true that some of the jobbers are selling the Department Stores and Catalogue Houses at a much less price than they are giving the regular retail dealer, who is a steady customer. This they excuse with the plea that they buy in

LARGER ORDERS THAN THE RETAILER.

Such may be true if you compare a single order of the Hardware dealer with that of these houses. This method of doing business is on a par with that indulged in by several jobbers of selling goods at retail, at wholesale prices to the consumer of the city in which they are doing business and then expecting the support of the local dealers. I am well aware that all retail dealers are not angels and that some of them do cut prices, but they are not in a position to do great harm or to affect any but in the small locality in which they are doing business, and when the necessity for meeting outside competition is removed, this practice will stop. In closing I would like to say that too much credit and support cannot be given the firms who have loyally consented to the request of the retail dealers, and are now doing all within their power to put a stop to this unjust practice. It is up to the retailer to show these manufacturers that we are grateful for this loyal support by pushing the sales of the goods made by them with all the energy possible, and I am sure that they will feel well paid for trouble."

* * *

Among the letters received from manufacturers on this question are the following:

From the Ithaca Gun Company, Ithaca, N. Y.:

"In reply to yours of the 10th inst. would say that we have carefully read the article in your issue of February 10th, on "Maintaining the Price," and we think you have the right idea in regard to selling Catalogue Houses. We have studied the question carefully, and only a few weeks ago we were informed by one of the large catalogue houses that one of the prominent rifle makers of the East had refused to sell them; that they had been maintaining prices on those goods, but that in view of the fact that they could not buy them from the factory, they had already purchased from other parties a three years' supply of these goods and were about to cut prices on them, in fact sell them at very near cost. We were told of another instance where a shot gun manufacturer had refused to sell a catalogue house and were informed that at the same time the catalogue house were able to buy the goods in a roundabout way and expected to

Digitized by Google

slaughter prices on that line. On account of one Western Catalogue House being unable to get what they wanted in the gun line, they have been making guns themselves in a very large way and selling them at a price which the dealer cannot meet on this or any other line. We cannot see how any of these moves have benefited the manufacturer. It is very plain to us that the dealer whom you try to protect and whom every manufacturer should protect, has been injured, and our solution of the problem, has been this. We sell a very few of the catalogue houses, using a rebate system, so we usually have from $500 to $1,000 of their money which we agree to refund only in case prices are maintained, which we dictate. We frequently send letters from consumers to see if prices are being maintained, and we have had no trouble in holding the catalogue houses to prices, which enables the small dealer to meet prices and make a handsome profit. This will be our policy until we discover a better one, and we are always open, in fact, anxious for suggestions through your valuable paper or any of its readers."

* * *

From the Carpenter-Morton Company, Boston:

"Replying to your favor of the 10th inst., I have read your article on maintaining the price. It seems to me that the case of the Catalogue House that purchased a factory and went to making a certain article because the manufacturer of that article would not allow them to cut the price, is a very exceptional one. If a manufacturer should cite this case I should feel that he was seeking to justify himself for selling to concerns who buy with the avowed intention of cutting the price. The manufacturer who does not use every effort to have the price of his product maintained is certainly

STANDING IN HIS OWN LIGHT.

Nearly all wholesale houses employ their salesmen on a salary and commission basis. In our business, which is both manufacturing and jobbing, I have often noticed the sales of some one article drop off and upon inquiry, find that the salesmen are not pushing the sale on that article because the price has been cut to such a degree that they feel they can put in their time to better advantage in other ways. Now, very few articles can retain their hold upon the market unless the salesmen keep a pushing. One house with a cut price cannot sell the amount that could be disposed of were all houses (in the line to which the article belongs) pushing the sale which they are certainly likely to do if the price is maintained. Trade agreements, or understandings between manufacturers and dealers, to maintain a price, are absolutely necessary, without them the wholesaler would be obliged to reduce his expenses to such a point that he could not pay living wages to his clerks and salesmen. These agreements protect the store employee much the same as the Labor Union protects the mechanic. They are made necessary by present business conditions."

* * *

From the Sherwin-Williams Co., Cleveland, Ohio:

Regarding our own stand on this question, we would say that we consider the maintenance of price to be probably the most essential factor of our success in business. It has never been the policy of this company to cater to the price cutter in any way, in fact, we have on a number of occasions taken our line entirely away from a dealer who had insisted upon reducing the selling price below a figure which would allow him a reasonable profit. From the manufacturer's standpoint, we look upon it in this way: That just as soon as a price reduction is made, a quality reduction usually follows. The quality reduction causes dissatisfaction with the trade. To smooth over this dissatisfaction, the natural course is a still further cut in price. This probably brings us back again to another reduction of quality, and in this See-Sawing manner business may be brought to the lowest possible level. It is a very difficult matter to build up a business to a profitable basis after a reputation for poor quality has once been made. From the standpoint of the dealer: It seems to us that

THE MERCHANT WHO CUTS PRICES

below the point allowing him a fair profit shows a lack of judgment which must eventually materially effect his success. Just as soon as a business man places his stock for sale and "hangs out his shingle" as we might say, he announces that he expects to make a fair profit on everything he sells. His fellow townsmen know that he is not in business for pleasure and they would be the first ones to criticise his good judgment if they actually knew that he might be selling goods at cost or even lower as some price cutters do. In summing the entire question, we can only say that maintenance of price and maintenance of quality go hand in hand. A cheap price is bound to bring cheap quality."

* * *

From the Gibford Manufacturing Co., Adrian, Mich.:

"We have always been great believers in the maintaining of prices by the jobbing trade and in fact it seems to be the only salvation for the retailer and customers being assured that they are getting a first class article of manufacture, whether it is in Razor Strops or in any other line of business. It largely remains with the manufacturer to produce the goods which will command a fair price or an article which is sold at almost any price the manufacturer can get. We have had little or no trouble regarding the maintaining of prices by the jobbing trade on our line of razor strops but we believe in having an established price for the sale of our product to the retail trade for several reasons. The most particular reason would be, if one jobber would ask more for any pattern of razor strop which we manufacture, than the other fellow, it would certainly cut our sales in that direction, because his prices would be too high; on the other hand should his competitor offer the goods at a lower price than they should be sold for, it only disgusts the other jobbers and the result is they feel very much inclined to drop our line of goods.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Promissory Note—Remedy.

QUESTION: I have had an account against one of my customers and he gave me a promissory note, with interest, in settlement of the account, which I placed in the bank (The bank didn't discount it, but held it for collection for me) the note came due and my customer said he didn't have the money to meet it, but would pay fifteen ($15.00) dollars on it and for me to lift the note (he thought the bank had discounted it) and he would settle the balance in a short time. He has failed to do that and I have written him a number of letters and tried every method I know to obtain the money, but it is without avail. I understand the party has nothing in his name, but thought maybe there was some catch in the law that we could make him come to time.

REPLY: Your only remedy is to bring an action against your customer on the note. We see in the facts as you state them, nothing more than a promise to pay the balance of the note. This, even if unperformed, does not constitute false pretenses or form the basis for any criminal liability. We think an action at law against the customer on the note is your only available remedy.

House Owner—Liability for Falling Snow and Ice.

QUESTION: A party owns a dwelling house with slanting roof. After a snow storm a part of the snow that had accumulated on the roof, slid off, and damaged the windows of a neighboring house. Is the owner of the house from whose roof the snow was precipitated, liable for the damage to his neighbor's windows, and can he be sued and a judgment be obtained therefor?

REPLY: We think the liability of the owner of the house from whose roof the snow was precipitated is clear. While a person may erect a building upon the line of his land, yet he is bound at his peril to do it in such a manner that the water or snow and ice from its roof shall not fall upon his neighbor's land or buildings. This has been the law for centuries. Thus in an English case decided three hundred years ago, it is said: "A man shall have an assize of nuisance for building a house higher than his house and so near that the rain which falleth upon that house, falleth upon the plaintiff's house." This liability does not depend upon negligence. It is of no avail to the house owner to show that the building was of usual construction and that the inconvenience complained of was one which with such a roof as his, nothing could prevent or guard against. As was said by the Court of Appeals in a recent case: "He must at his peril keep the ice or the snow that collects upon his roof within his own limits; and is responsible for all damages, if the shape of his roof is such as to throw them upon his neighbor's land, in the same manner as he would be if he threw them there himself." (Davis vs. Niagara Falls Power Co., 171 N. Y. 336).

Employer's Liability—Defective Machinery.

In the case of Buey's Administratrix vs. Chess & Wymond Company, recently decided by the Kentucky Court of Appeals, it appeared that the plaintiff's intestate, who was employed by the defendant company, told the foreman that his machine was out of level, and needed new appliances; that he made the repairs the night before the accident, and that when he went to oil the machine he took precaution to keep the belt from running over on another pulley, so that it would not be started. The court held in this case that it is the duty of an employer to furnish an employee with reasonably safe machinery for his work, not that such machinery may not be dangerous in its use even when it is properly used, but that it must be in reasonably fit condition for the use in which it is employed and must be kept in reasonable repair, and that the employee is not bound to increase the hazard of his employment by working at machinery or with tools to unfit condition, but that where he knows of the danger and continues without complaint, or without bringing it to the employer's attention, he assumes for the time the increased hazard in addition to the ordinary risks of his employment.

CONNECTICUT STATE RETAIL HARDWARE DEALERS' ASSOCIATION.

The Second Annual Convention of the Connecticut State Retail Hardware Dealers' Association was held at Hartford on Tuesday, March 7th. The sessions were held at the Hotel Hartford.

The lateness at which the morning trains arrived delayed the arrival of the delegates so much that the association was not called to order before noon. It was suggested by Mr. Church that two or three days had better be given to these annual meetings, and this will probably be the rule in future.

President Church, in calling the meeting to order, congratulated the association on the work that has been accomplished and the influence exerted directly and indirectly during the past year. Secretary James De F. Phelps, Windsor Locks, read his report of the year, and it was accepted, together with that of the treasurer, Lewis B. Crosby, New London.

NEW OFFICERS.

The following Committee on Nominations was appointed by the chair to bring in a list of officers for the ensuing year: H. T. Clark, J. J. Lyon, F. T. Terry, George J. Bassett, Eli C. Birdsey. The committee presented the following list of officers, who were unanimously elected:

CHARLES G. AGARD, PRESIDENT.

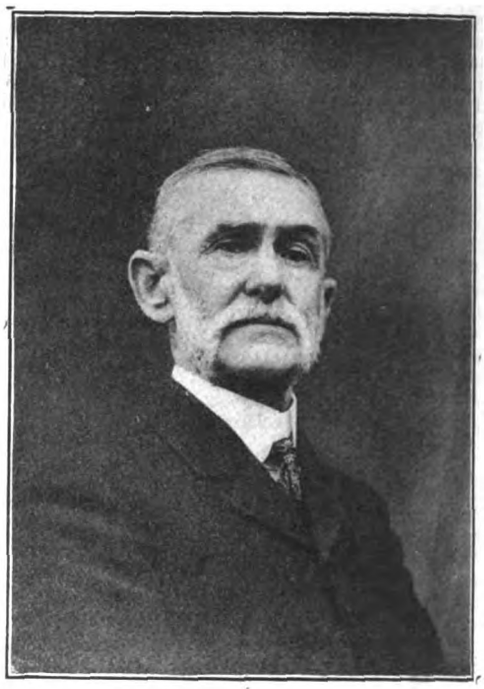
President, Charles G. Agard, Torrington; First Vice-President, George J. Bassett, New Haven; Second Vice-President, Irving C. Treat, Hartford; Secretary, James De F. Phelps, Windsor Locks; Treasurer, Lewis B. Crosby, New London; Directors for three years, W. A. Church, Derby; Eli C. Birdsey, Meriden; D. B. Wilson, Waterbury; A. W. Davenport, Stamford.

On motion of A. H. Abbe a vote of thanks was extended Mr. Church, the retiring president, and on motion of Mr. Church a similar vote was passed in appreciation of the work accomplished by Secretary Phelps.

HARDWARE MUTUAL FIRE INSURANCE.

Mr. Birdsey, as chairman of the Committee on Insurance, repeated, on request, something of the report read at the summer meeting on Hardware mutual fire insurance, and A. H. Abbe joined him in warm indorsement of the economy and safety of those institutions.

D. N. Clark, I. C. Treat and A. H. Bishel were appointed the Auditing Committee for the year.



A resolution was introduced by Mr. Abbe, and unanimously adopted, protesting against the passage of a bill which he stated had received favorable action in committee, lessening the responsibilities of common carriers for merchandise in Connecticut. The resolution follows:

Resolved, That the Connecticut State Retail Hardware Dealers' Association protest against the passage by the Connecticut Legislature of any measure relieving common carriers from responsibility from danger or loss of merchandise while in transit, and that the chair appoint a committee of two to co-operate with the State Business Men's Association and the State Board of Trade in appearing before the legislative committee in opposition to such legislation.

President Agard appointed L. L. Rosenberg and G. I. Clapp to act with the secretary in this matter.

THE SIZE OF CATALOGUES.

George J. Bassett spoke of the inconvenience resulting from the wide variation in size of catalogues ranging from the size of a small card to that of a standard dictionary. He agreed that the large catalogues could not take the standard size, but considered that manufacturers generally would do a great kindness

W. A. CHURCH, EX-PRESIDENT.

to the trade by adopting a uniform size. He presented the following motion, which was accepted:

Voted, That this association is in favor of a uniform size, approximately 6 by 9 inches, for all unbound Hardware catalogues, and that we recommend this size to all Hardware manufacturers through the columns of the trade journals, and that this recommendation be also sent to the National Hardware Association and the National Retail Hardware Dealers' Association.

GEORGE J. BASSETT, FIRST VICE-PRESIDENT.

PARCELS POST.

The matter of proposed changes in the postal laws was briefly touched upon by L. L. Rosenberg and A. H. Abbe. The latter spoke of the fallacy contained in the prevailing idea that a saving in postal charges to retail merchants would be an important one when as a matter of fact, a change in existing laws to ac-

Digitized by Google

complish such saving would mean great loss through catalogue house competition everywhere. As a result of the brief discussion Connecticut Senators and Congressmen will undoubtedly be informed of the association's stand in the matter.

Dinner was served at 1:30 o'clock, after which there were brief remarks by Mr. Church and a talk by R. U. Conger of the Sheldon School of Scientific Salesmanship, on "Salesmanship as an Applied Science."

BUSINESS IN AND AROUND THE HUB—OUTLOOK GOOD—TRADE ACTIVE.

Business in Builders' Hardware in and about Boston is good—Spring season, although somewhat backward, is bringing the usual demand for building materials and the outlook for Summer trade is even better than a year ago. The winter all through New England has been of the old fashioned "snug" kind, with a very severe January and February; this, of course, has somewhat tied up country trade, and country collections have been rather slow.

One of Boston's best retail Hardware stores is that of Chandler & Barber on Summer Street. The store has been re-modeled during the Winter and a new front been put in, making the entire store very light and bright and adding much to the general appearance. In speaking of business conditions M. A Chandler said: "Our business is constantly enlarging, and we are looking closely after the builders' trade—also are adding new lines of goods, which we find pay well. One of the best paying side lines recently put in is fishing tackle. It is a line that is especially adopted to the Hardware store and has been found most satisfactory." D. F. Barber of the firm is secretary of the New England Builders' Association and is one of the best posted Builders' Hardwaremen in the East.

Another of the up-to-date Hardware stores on Summer Street is that of J. B. Hunter & Co. For many years Hunter & Co. have been located at 60 Summer Street and have built up a good business in general Hardware and make a specialty of fine cutlery and tools.

Joseph D. Jewett of the J. D. Jewett Company, when seen by your correspondent, said that business was good. This concern carry a large line of Builders' and general Hardware as well as machinists' fine tools and electrical goods. The store is large, facing on Washington Street and running through to Devonshire Street.

Another progressive retail Hardware concerns is S. H. Davis & Company, with store located at corner Portland and Sudbury Streets. A big line of mechanics' tools is carried and a large business is being done in electrical supplies. The arrangement of Davis & Company store is especially good—double plate glass show cases around the sides as well as in the middle of the store—and solid shelving from the floor to the ceiling.

Builders' Hardware is the special business of H. M. Sanders & Company, located at 27 Eliot Street, although a good business is also carried on in paints and oils. Cutlery and sporting goods are also being pushed and a large trade is being developed in this department under the management of Mr. Graves.

In referring to business conditions Mr. Lotts of the firm of Allen & Lotts, 169 Summer Street, said: "Our business is largely in antique and colonial furniture trimmings, which goods we manufacture and sell throughout the Eastern States. In handles alone we have constantly in stock over 200 varieties. Lately we have been doing a large business in trimmings for hall clocks and find a steady demand for these brasses." A complete catalogue is issued of these specialties and this end of the business is followed up closely by Allen & Lotts. A good business at retail is also carried on in general Hardware and cutlery.

An attractive store is that of Burditt & Williams Company, located at 4 High Street, at the junction of Summer Street, in the very heart of the business section of Boston. The Burditt & Williams Company make a specialty of fancy Hardware and have the goods exceedingly well displayed.

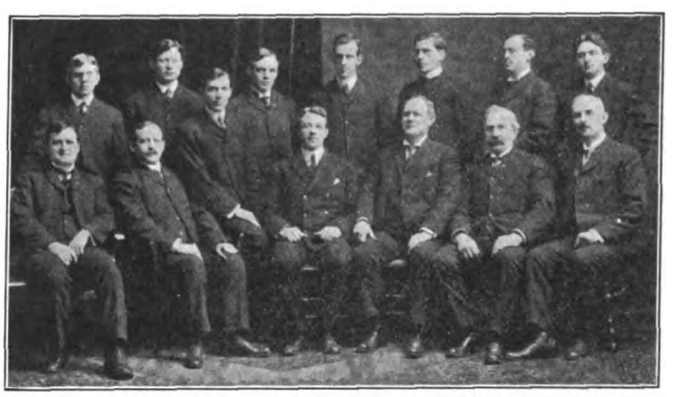
Making a special leader of automobile and electrical supplies A. J. Wilkinson & Company at 180 Washington Street are doing a large retail business in these lines as well as general Hardware and tools. The store is well stocked and goods are well displayed.

One of the oldest established retail Hardware and cutlery stores on Washington Street, is that of George Saunders & Company. For many years this firm have had the cream of the business in fine cutlery and tools. If a man wants a good razor "he goes to Saunders," which saying is proven to be true.

Among the wholesales of Boston few changes have taken place during the past year. Baldwin Robbins & Company are still pushing forward and now have salesmen reaching out for trade in New York State. This concern work all of New England very closely and cover much of their trade every three weeks.

Another exclusively wholesale Hardware concern is Frye, Phipps & Co., with stores and warehouses at 23 and 25 Pearl Street. This is one of Boston's oldest Hardware houses, the business having been established away back in the days of the war of 1812. The concern, however, is up-to-date in its business methods and A. M. Wiley said Spring trade was coming on in good shape.

Closely identified with the Hardware trade is the business of the Iver Johnson Sporting Goods Company, operating stores in Boston, Worcester and Fitchburg. In all these stores complete lines of sporting goods are carried, including guns and gun goods. It is interesting to note the increased demand that has been made for the Iver Johnson Safety Revolver since the manufacturers of this splendid fire-arm began their campaign of advertising. When a man thinks of a revolver now, he is apt to carry in his mind this one which is so well advertised, "Hammer the Hammer."



A leader among the up-to-date New England concerns is the Fitchburg Hardware Co., of Fitchburg. This concern is constantly pushing out to enlarge its field, and is now recognized as one of the leading Hardware jobbers of New England—and in some lines handling larger quantities of goods than any one Boston jobber. Robert D. Gould, who is the treasurer of the concern, said that business was very satisfactory, and the outlook good for Summer trade.

From interviews with many of the leading Hardwaremen of New England your correspondent cannot but see better business ahead. The advancing prices in many lines of Hardware is having a good effect on buyers and this general upward tendency is restoring confidence all along the line. Most of the New England mills are running full time and labor is being well paid.

HAMMERNAIL.

A STAFF OF HUSTLERS.

"Hustle for business" is indelibly stamped on the countenance of each of the fourteen men in the accompanying illustration. who make up the outside force of The Buffalo Wholesale Hard-

ware Co., Buffalo, N. Y. This firm started two years ago with six men and have increased their force to fourteen, a good indication of the success this concern has met with. They sell at wholesale only.

THE KLIP KLIP.

The Klip Klip Co., Rochester, N. Y., are introducing to the trade an article that is immensely popular and forms an admirable addition to the Hardwareman's stock of novelties. It is a combination of nail cutter, cleaner and manicure file, and is shown full size in the engraving herewith. It is made of solid German

KLIP KLIP.

silver, which does not rust or tarnish, and will be found the handiest appliance to trim around the corners and prevent the annoyance of hang nails. The makers are good advertisers, thereby greatly assisting the dealers in the disposition of it, and urge dealers who are unfamiliar with selling merits to send them a trial order.

SALESMANSHIP AS AN APPLIED SCIENCE

BY R. U. CONGER,

of the Sheldon School of Scientific Salesmanship, Chicago, Ill.

Socrates once said that any man was eloquent upon a subject with which he was thoroughly familiar. I have had an introduction to this subject and have had an opportunity to become very well acquainted with it, and therefore, gentlemen, if I am not eloquent to-night you must blame Socrates, and not Conger.

Aside from a few small classes there are but two methods of earning a living—acquiring or accumulating wealth; one through the production of commodities, and the other through the distribution. The producer must distribute his product and therefore, in analysis, we are all distributors—all salesmen.

Success in business life, as it is to-day carried on, is entirely a matter of trade—the exchange of products at a profit. Permanent and increasing success is not a matter of luck or chance. It is governed by natural laws—laws that are immutable and unchangeable. Methods of application change, but the laws never. A correlation of these laws constitutes a science of business life.

R. U. CONGER.

Authorities are agreed upon the definition of the word science. Simply organized knowledge, pertaining to any branch of thought or industry, constitutes a science.

The world is a little confused as to the distinction in the meanings between the words "science" and "art."

We practice the art of music when we seat ourselves at a piano, but underlying that art of music, is the science of harmony, and that science of harmony underlies the art of playing all instruments—violin, guitar, mandolin, flute and every other instrument, just as the science of salesmanship underlies the selling of all things, railroads, ribbons, rifles or anything else. In other words, the knowledge pertaining to the laws of sale, to the truths, principles, pertaining thereto, when correlated, systematized, and logically arranged, become the science of salesmanship. All knowledge is not scientific—knowledge becomes scientific only when it is organized. Before we had any such a science as chemistry, we had a mass of chaotic facts, truths and principles pertaining to the vital properties of existing matter, known as alchemy, but when these facts, truths and principles were correlated, systematized and logically arranged, they became the science of chemistry. This same evolution has taken place in the formation of every science.

I wish to present to your minds, an analysis which will evidence the classification of knowledge pertaining to trade, upon which a basic science has been formulated. We will begin this analysis with its object: Success is that object, and this success rests upon trade. Trade, in turn rests upon confidence.

The individual must have the confidence of the individual buyer, and the business house must have the confidence of the buying public. Even our banking relations are based upon confidence.

Why was it that Marshall, Field & Company sold over a half a million dollars worth of goods on the Monday before Christmas? It was because they had the confidence of the Chicago people that they sold honest goods, and that they would have the fairest kind of a business relationship with the company in buying from them.

Underlying confidence comes personality. It is through personality that confidence is born. Every individual has a personality; a corporation has personality which is made up of the blending of the personalities of its various employes. Personality rests upon the two foundation stones of character and health, broadly defined. If we improve the character and health we improve the personality. This naturally begets confidence which, eventually, magnetizes trade, and our object—success—is attained.

Character and health stand firmly upon the bed rock of true education, and by true education is meant, the drawing out process of man's latent faculties and qualities, plus the filling in process of useful knowledge—with great emphasis upon the useful. We have endeavored to formulate a system of education for business people, which truly educates—a system of education which is both educative and instructive. Educative by presenting the world with a science of character building, and instructive by presenting it with the organized knowledge which makes men able to meet, successfully, the ever arising conditions which confront them daily.

In the intensity of competition, with its ever increasing concessions, rebates and narrowing margins of profit, there is a loud call for every man at the beginning of this Twentieth Century to make himself "genuinely fit" and the beginning of education should, unquestionably, be eductive.

It is a fact that if you make the man right business will be right. It is a fact also that men are made all right and that all that is necessary is to bring out the almighty allrightness, yet I realize that this is a very simple thing to say and a very difficult thing of accomplishment. It is impossible for any man to make another man right. He can only help that man to improve himself. He can show him, by introspection, analysis and comparison, how to find out for himself, what his lame-side, his weak spots, his negative qualities are which, in a way that he either does not understand or has never measured, now prevent him doing the fullest justice to himself.

Pope said: "The proper study of mankind, is man."

When it comes to studying man the only one of whom we know very much and whom we can study properly is oneself. In this case we have sound premises to study from and can draw correct conclusions.

I occasionally have sessions with Conger, and I have found that the only thing I could do with him, was to begin by analyzing him, and we lend ourselves easily to this analysis.

In the first place we can divide ourselves into three parts, our bodies, our minds and our souls. You can call the last the subconscious side of the mind, if you prefer, but there is something which is absolutely independent of reason and judgment, and the soul is as good a name, and possibly a little better, than any other. Of course from a physical sense, our bodies are made up of blood, bones and tissues, but, in an abstract sense, are all made up of faculties and qualities. Our minds have the faculties of reason and judgment; our bodies health and strength and vigor; our sub-conscious side—the soul—love, in the sense of brotherly kindness, loyalty, honesty, patriotism and many other qualities.

There is a quality which runs all through nature. We have the positive of heat, with its negative cold; positive light, with its negative darkness, and this duality runs all through these faculties and qualities. Our minds have the positive of reason, with its negative irrationalism, positive judgment with its negative injudiciousness. Our bodies the positive health and negative sickness, positive strength, negative weakness. Our souls have the positive love with its negative hate, positive loyalty, negative disloyalty, positive intuition and negative obtuseness, and so on.

Now if we will only be honest with ourselves, if we will only get away from the sin of self-justification, we will find we have many of these negative qualities, as well as the positive ones, and

Digitized by Google

we will find, also, that these negative qualities are our weak spots; they are the things which hinder power.

In an abstract sense salesmanship is the power to persuade others, and if we would develop this power to persuade people we must eradicate the negative qualities from our make-up and build up and develop the positive ones.

We must develop a great power plant of sterling character. A man will succeed who has some of the positive qualities developed to a marked degree, and it is the marked-degree conditions which count. It is this which makes him stand out in front of the other man. I know that men succeed who have some of the negatives developed to a marked extent, yet they succeed not because of this fact, but absolutely in spite of it.

You have all known men who have had some of the negative qualities, such as intemperance or licentiousness developed to a marked degree, who were successful men, yet you will agree with me, they succeeded not because, or on account of their licentiousness or intemperance, but absolutely in spite of them.

It is possible to develop every one of these positive qualities, and develop them to a very high degree, just as we can develop the muscles of the arm, by exercise. If we bind the arm, what happens? It withers and becomes useless. That within us which we do not use becomes dead for all practical purposes.

To give a faint insight into this subject of the science of character building I will be obliged to challenge your attention to the law of suggestion and its application in this connection.

Scientists are well agreed to-day that the mind of man is a dual affair; that it is divided into two distinct parts.

Our objective mind is made up of the knowledge we obtain through our five physical senses. I see you, I know you are present. I hear the street car and I know it is passing, and so on. Then we reason things out by eductive or deductive reasoning and come to definite conclusions. This also makes up a part of our objective mind; thus knowledge, plus reason and judgment, constitutes our objective mind.

The subjective mind is the storehouse of memory and the finer qualities, and faculties, such as love, loyalty, patriotism. It is a scientific fact that the subjective mind is amenable to suggestion, that is, it will obey suggestion from other minds, or from environment, or we can suggest from our own objective to our own subjective mind, and our subjective mind will obey suggestion. This is called auto-suggestion, and it is this auto-suggestion that serves in character building.

If we say to ourselves when we get up in the morning, "I will be more courageous to-day," knowing it to be a scientific statement of fact, that we have the germ of the quality of courage and can develop it, if we say "I will be more loyal to-day, more persevering to-day" and then do those little things which require courage, this constant suggestion backed up by constant exercise —we can develop every one of these qualities and develop them in a remarkable manner.

Benjamin Franklin practiced this a great many years ago, undoubtedly without knowing the scientific principle behind it, yet he practiced it and no one will doubt that he built up one of the most magnificent personalities which America ever produced. You are no doubt familiar with the little chart which he began with "honesty," "courage," "loyalty," and so on, which he read over every morning, suggesting to himself that he practice them during the day, and most of you who are familiar with his autobiography, will recall this chart.

The mystery of the greatness of great men, decreases with the nearness of our approach to them, and why? It is simply because in close association we recognize which of these positive qualities they have developed to such an extent that they stand out in front of the other men.

If we will look around us we will find every incentive to man building at a glance in the progress of nature's own work.

When Luther Burbank can make a fadeless rose; when he can make a pear orchard raise two crops of luscious pears a year, instead of one; when he can make a cactus grow without thorns, so that cattle may feed upon it, and the Western deserts become productive; when he can make a pitless plum—all through the application of his knowledge of the laws of vegetable growth, I cannot believe that man should go through life, just as God made him, without any improving growth. It is, therefore, a matter for each of us to consider seriously, if we would progress, and the eductive process of education should be given its full share of our time.

Now then the filling-in process of useful knowledge, or the second process of true education, for business people, should naturally begin with the knowledge of the other man—a knowledge of human nature.

I realize that a great deal of this knowledge of human nature we can derive from the school of experience. One of our greatest living philosophers recently said that Harvard College was all right, Yale College was all right. Columbia College was all right and Knox College was all right, but that in the dear old "college of hard knocks" we got a great deal of this knowledge of human nature, and we were all privileged to take several post graduate courses in that institution.

I do not have very much faith in the long-haired cranks in phrenology and physiogomy, and I doubt if any man would allow us to feel the bumps on his head, to find out what kind of a man we were doing business with, when we went into sell him goods, but there is a great deal which can be learned from a study of basic and decided types, and, as large-headed business men, we can not afford to lay aside the researches of scientific men along these lines. Then, too, the quality of intuition is one which often tells us, though we don't know why, the kind of a man we are dealing with, and this quality of intuition, it is a scientific fact, can be developed to a marked degree.

Many people think that the women have a corner on this commodity, but they have not. Undoubtedly women are more highly developed intuitively than men, but there is a scientific reason for it, and men can just as well be highly developed intuitively, if they will only make the effort. It is a psychological law that the quality of intuition develops in direct proportion with the development of the positive qualities, moral and spiritual. There is no doubt that women are more highly developed morally and spiritually than men, and, naturally, are highly developed, intuitively.

The quality of intuition is a wonderful commercial asset, and its development is well worth the time that is required.

The next step in this filling-in process of useful knowledge, should naturally pertain to that which we have to sell, and science does a great deal for us, in this connection, especially the science of logic. Of course we are all logicians, and the illogical salesman, is of little service to any one. When we stop to think that all in the world which really constitutes logic, is a combination of analysis and synthesis, of mentally dissecting a thing by analysis, mentally picking it to pieces and then putting that analysis together again, all through synthesis, in such a way that it will naturally appeal to the minds of our customers, we realize how simple, and yet how valuable a scientific knowledge of logic is.

We should first analyze that which we have to sell from the standpoint of its salient selling features, so that we know them all, then we can construct our arguments in such a way that they cannot be refuted.

There are only a certain number of reasons why any man should buy any particular thing, but it is possible, through a scientific method of analysis to know them all, and also to have them in our minds in their proper relations to each other.

The next step in this filling-in process should be a study of the mind. Emerson once said: "Not he is great who can change matter, but he who can alter my state of mind." To consciously, understandingly and rightfully influence the mind of the buyer is the great desideratum of every salesman, and it is in the study of psychology that we obtain this influence.

I realize that there is much we will probably never know about this finite mind of ours, but there is much, also, which has been taken out of the category of hypothesis and placed in the columns of demonstrated facts. We have sound premises to build upon.

In this connection I will merely take up one of the laws which will give an insight into the far-reaching nature of this study—the mental law of sale. Has it ever occurred to you that we never any of us acquire anything that our minds do not pass through certain definite processes? As an illustration of this fact. My wife picks up the morning paper; her attention is attracted to a big head line—"BARGAINS"—attention is a mental process. She reads a little ways and takes an interest in it—interest is a mental process. She reads a little farther and desires it. This desire is a third—a little farther and she resolves to possess it, and this resolve to possess is a fourth mental process. Now these may be so rapid in their action that they seem simultaneous, but there is a dividing line, and it is the duty of every salesman to carry his customer's mind through all four of them. Advertising, which is salesmanship by a literary method, very often accomplishes this result, but, as a general rule, it only carries customers through the process of attention and then it is up to the salesman to lead them through the other processes. In retail stores, advertising brings the people into the establishment, and attention is thus secured. Sometimes interest does this. If the customer's mind is already made up and all the salesman has to do is to wrap up the goods and hand it to them, the salesman has merely taken an order, he has not made a sale. If, on the contrary, the salesman should call the attention of the customer to something which he did not intend to buy, and then, by a logical presentation of the value, bring about resolve to buy, the salesman becomes a salesman and not an order taker.

(Concluded in our next issue.)

NATIONAL RETAIL HARDWARE ASS'N

The Sixth Annual Convention of the National Retail Hardware Association was held at the city of Minneapolis on Tuesday, March 7th and the two succeeding days. The sessions were held at the West Hotel and delegates representing eighteen different associations were present, the rule prevailing that each State association was entitled to two delegates for the first 100 members or less, and one extra delegate for each 100 members additional, seated about seventy delegates in all.

To give the officers time for the collection of credentials and statistics from visiting delegates, the morning session as laid out was eliminated, with the exception of a meeting of the Executive Committee.

TUESDAY AFTERNOON SESSION.

Upon assembling in the afternoon, after calling the roll, the president delivered his report as follows:

President's Address,

by W. P. Bogardus, of Mt. Vernon, Ohio.

Gentlemen of the National Retail Hardware Association: We have gathered once more to consider the conditions that surround us, the

W. P. BOGARDUS, PRESIDENT.

progress we have made, and to lay plans for the future. As the years go by we are confronted with new conditions, and new problems that require from us some solution. To do this wisely and well, means more for our children than for ourselves. And while we may reap a partial benefit from the solving of the questions, we may not expect to reap it all, for those that come after us will get some of the benefit if we solve justly and well.

These new questions that are coming to us for solution are different from what we anticipated when first we helped to organize Hardware associations.

OUR HORIZON HAS BROADENED AND WE SEE FARTHER.

At first, under the galling competition of the catalogue house and department store, we felt that if these nuisances could be abated there would be less to contend with, and we could get on better. But over our horizon comes many more clouds, and the blackest is the effort to get the government to prostitute the Post Office Department to a merchandise carrier, and so help build up the larger store to the detriment of the small country merchant. We had hoped at first to help the merchant of the small town and village to understand the equity and the decent ethics of business; that successful salesmanship was not in cutting prices, but in sharpening wits. That while it is said that goods well bought are half sold, yet if they are sold without a decent profit, it were better that they be not sold at all. And while we are discussing these problems another cloud comes, unseen at first, but growing with years until even the government takes cognizance of it, and public opinion is loud in demanding its abatement. The great railroads are yielding to the temptation to give favors to some that are denied to others, and the big shipper has a very great advantage so that the tendency is to centralization and concentration and the

FAVORS GIVEN THE LARGER SHIPPER

help to throttle legitimate competition, and to place at great disadvantage the small shipper. So as our horizon broadens we must needs look beyond our stores into the world beyond and take up our duties as citizens. For in the proper discharge of our duties as citizens comes back to us the reward, and as merchants we reap the benefit. And so we fight for equity in our treatment from the great railroad systems of the country.

That the railroads shall quit giving rebates; own half their cars, receive their franchises from the government and be inspected by the government, as to their treatment of the public.

That private cars shall not be allowed; that the railroads shall supply the shippers their own cars, and not a private corporation. That railroads should furnish prompt transportation and be responsible for prompt delivery of goods.

* * * * *

He commended the Joint Wholesale and Retail Committee for the valuable work it had done, and gave a resume of the labors and accomplishments of that committee. By the agitation of the catalogue house question particularly and by correspondence and interviews with jobbers and manufacturers the president said that the retail dealer had at last secured recognition of the fact that he was the distributer, that manufacturers and wholesalers of Hardware owed it to the retail dealer that he should be protected and that all retailers should be treated alike.

M. L. COREY, SECRETARY.

The immediate duty before the dealers was that of perfecting their associations and bringing into membership the sleeping ones by awakening them to a sense of their danger. Of equal importance was the organization of local associations and the inculcation of the idea that retailers were in business for a living and not for the purpose of killing each other. Said he: "The new conditions that confront us are pregnant with results for good if we are wise; we have the confidence and help of the jobbers. We have the sympathy and support of the manufacturers. They are represented at this convention by a committee who are here to confer with us. We must show them how thoroughly we appreciate the conditions and how ready we are to do the things that are necessary for our mutual benefit."

* * * * *

This was followed by the

Secretary's Report,

by M. L. Corey, of Argos, Ind., which was a very full and complete report, from which we select the following extracts:

* * * * *

We believe the time has come when we should formulate some system of encouraging and creating public sentiment favoring home enterprise and home buying. Whether this can be most effectively accomplished through the local press, by means of booklets distributed by mail and from our stores, or by both, should be carefully considered at this meeting.

The January *Bulletin* contained a page asking our members to tear it out and hand it to their editor and ask him to start the campaign in his community. We have received fifty or more marked copies of local papers as a result. Merchants in some towns have united in a public declaration over their own signature, saying they would meet the price.

We believe this is an important matter and the decision or consensus of opinion of the delegates here assembled will be of advantage. Should we indorse any publication it will give our members confidence in some and lead to a greater number being distributed. Also advantage in price could most likely be obtained.

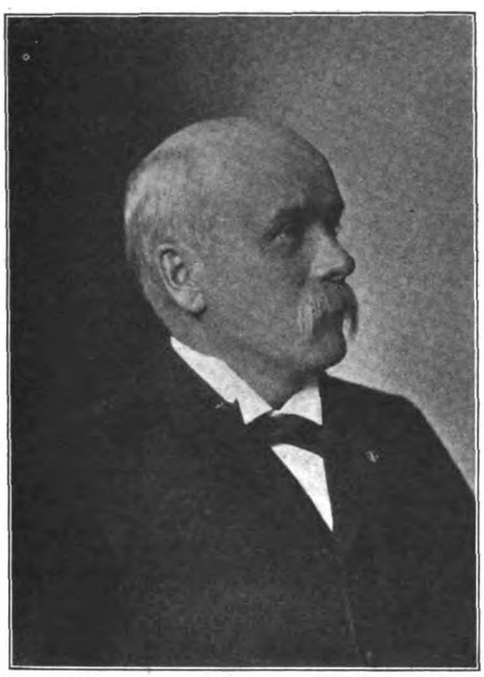
THE PARCELS POST.

The last session of Congress our parcels post friends were very active and succeeded at the last in giving us quite a scare.

Most of you know that while in Washington two years ago we arranged with a party to give us timely notice whenever danger threatened. We had several letters in January stating the advocates of this measure were very active. The Postmaster-General in his report recommended a local domestic parcels post. The plan of consolidating third and fourth class matter was also favored. Under the head of merchandise this would practically reduce the expense of mailing goods one-half.

Bills were introduced in both House and Senate and the Senate finally passed one tacked on the appropriation bill, but this was turned down in the House.

All who have attended our recent convention must have been impressed by the



INCREASED NUMBER OF DISPLAYS MADE

by manufacturers and jobbers. The headquarters' hotels have been taxed beyond their capacity in some cases and many complaints were made. Some members fear this will eventually injure our meetings and some manufacturers say they stay away because of this. We have watched this development carefully and fail to see that any harm has been done, but it is already a problem requiring some consideration.

The National Retail Hardware Association has the confidence of the manufacturers and jobbers of the country.

We have increased in size, importance and influence very rapidly. Suppose that we should rent the Coliseum or some large hall in Chicago and hold a national Hardware exposition for one week under the management of our organization, inviting manufacturers of all kindred lines to attend and display their products.

Low rates could be secured, that would bring thousands of dealers.

A. T. STEBBINS, TREASURER.

Our convention could be held during the week. A programme could be carried out. Perhaps the Illinois convention could be held during the time. It would certainly interest any Hardware dealer and give manufacturers a chance to meet their customers and show new products.

I haven't had the time to figure out the details nor consider the objections, but am confident that

SUCH A FEATURE UNDER GOOD MANAGEMENT

would be immensely attractive and successful from a financial view.

I do not believe that this would interfere with the success of any State convention. Every dealer entering the hall could be required to register and a chance thus given to secure his membership. The evenings could allow of public admittance. This is offered as a suggestion for you to think about, and if it looks good a committee could be appointed to investigate and report later on.

In December I had a letter from a large Eastern manufacturer stating that he had tried without success to interest several large jobbers in selling their perfect handle screwdriver—that they were offered a large and attractive order from a catalogue house. They wanted to sell through the jobber and dealer, but under the circumstances what should the manufacturer do? At my suggestion they sent samples to distribute at our State conventions. Whether this will create a demand that will cause the jobber to stock the goods depends entirely upon action taken by our members.

Many manufacturers tell us they first sold catalogue houses because they failed to interest jobbers. Others say they have to go out and first canvass the retailers and thus create a demand and after they do this they might as well continue to sell direct. It is a problem and it is mentioned to give you an idea of how complex such matters are liable to become. Also if any plan for the manufacturer to follow suggests itself as better, we would like to hear of it.

We have at all times endeavored to show good, logical reasons for any request we have made of manufacturers. Sometimes we have had to strongly insist and firmly adhere to disputed points. Notwithstanding this, we are not aware that we have made any enemies for our association. The field is in excellent shape for future effort. Much of the credit for this condition is due our worthy president and counselor, President Bogardus.

The work has been difficult and exacting in the past, but this year has been a deluge. We have not worried him with all our troubles, but I am sure he will admit it was a plenty. His answers have been prompt and his position safe and conservative. Our ideas have harmonized on every important question.

The friendly assistance he has given has made the work lighter, more pleasant and more effective. His administration has been a credit to the retailers' cause and honors the man who has so ably and conscientiously accepted and carried the responsibility.

Committees.

The following committees were appointed:

FINANCE: A. T. Stebbins, Rochester, Minn.; O. E. Lang, Mishawaka, Ind.; F. C. Moys, Boulder, Colo.; C. S. Johnson, Barberton, Ohio; Clark Bloss, Dunkirk, N. Y.

RESOLUTIONS: F. B. McKenney, Rockford, Ill.; H. L. McNamara, Janesville, Wis.; H. S. Vincent, Fort Dodge, Iowa; James De F. Phelps, Windsor Locks, Conn.; C. H. Casey, Jordan, Minn.

INSURANCE: Charles F. Ladner, St. Cloud, Minn.; S. L. Fenner, Terre Haute, Ind.; L. Lindenberg, Dubuque, Iowa.

GRIEVANCE: J. F. Doty, West Liberty, Iowa; J. Frank Barr, Lincoln, Neb.; G. W. Wolbert, Bismarck, N. D.; M. S. Mathews, Minneapolis, Minn.

LEGISLATION: A. R. Sale, Mason City, Iowa; E. H. Ramm, New London, Wis.; J. F. McGuire, St. Paul, Minn.; F. Neudorff, St. Joseph, Mo.

CONSTITUTION AND BY-LAWS: H. J. Hall, Lincoln, Neb.; C. N. Barnes, Grand Forks, N. D.; J. E. O'Brien, Crookston, Minn.; George L. Moore, Brownsville, Pa.; L. Lindenberg, Dubuque, Iowa.

NOMINATIONS: A. N. Shidler, South Bend, Ind.; C. S. Johnson, Barberton, Ohio; J. R. Sower, Frankfort, Ky.; J. E. Digby, McKees Rocks, Pa.; C. N. Barnes, Grand Forks, N. D.

PLANS AND SUGGESTIONS: E. M. Bush, Evansville, Ind.; Charles H. Williams, Streator, Ill.; A. R. Sale, Mason City, Iowa; W. G. Johnston, Oklahoma City, Okla.; H. J. Hall, Lincoln, Neb.; S. R. Miles, Mason City, Iowa; A. H. Abbe, New Britain, Conn.; A. N. Shidler, South Bend, Ind.; Frank A. Bare, Mansfield, Ohio.

TO CONFER WITH JOBBERS: Leon C. Warner, Minneapolis, Minn.; J. R. Sower, Frankfort, Ky.; L. D. Nish, Elgin, Ill.; C. E. Haas, Le Mars, Iowa; T. W. Stevens, Oneonta, N. Y.

TO CONFER WITH MANUFACTURERS: S. R. Miles, Mason City, Iowa; George W. Rockwell, Horseheads, N. Y.; A. J. Scott, Marine City, Mich.; W. L. Hubbard, Scottsburg, Ind.; Frank A. Bare, Mansfield, Ohio.

PLACE OF MEETING: Ralph M. Burtis, Oshkosh, Wis.; H. F. Emery, Fargo, N. D.; Emil Tietgen, Manitowoc, Wis.; Albert De Prez, Shelbyville, Ind.; Charles P. Sherwood, White Plains, N. Y.

The members of the Executive Committee were designated to act as an Auditing Committee.

In the evening the delegates and their friends, nearly 200 in all, were guests of the Commercial Club at dinner. Fred. W. Salisbury, president of the club, delivered an address of welcome, which was happily responded to by President Bogardus. The day's entertainment ended with a theatre party at the Orpheum.

The entertainment of the delegates while in Minneapolis is in the hands of a Joint Committee of Arrangements, consisting of the following members: For the association: W. H. Tomlinson, Le Sueur, Minn.; J. F. McGuire, St. Paul; M. S. Mathews. For the Minneapolis Retail Hardware Association: L. C. Warner, H. O. Roberts, C. F. Stremel, William K. Morrison, Frank S. Lane, Jacob Stoft.

WEDNESDAY MORNING SESSION.

The Wednesday morning session was given up to a discussion of the Parcels Post bill, which was defeated at the last session of Congress, and which is expected to be pushed forward at the present session.

Chicago was decided upon as the next meeting place for the convention.

Addresses were made by C. W. Asbury, of the Enterprise Manufacturing Co., of Pennsylvania, and W. M. Pratt, of the Goodell-Pratt Co., Greenfield, Mass.

The delegates visited St. Paul Thursday morning as the guests of the St. Paul Hardware Association.

On Thursday afternoon the meeting was given over to a visit from the committee representing the National Association of Hardware Jobbers. R. A. Kirk, Maj. Walther, H. Marshall, S. R. Norvell, T. J. Fernley and Mr. Hill formed the committee.

At a meeting of the Executive Committee it was decided to amend the constitution by changing the name of the association from The National Retail Hardware Dealers' Association to the National Retail Hardware Association. It was also decided to amend the constitution by having the Executive Committee composed of the president, the two vice-presidents and six members.

The usual resolutions were reported by the committee appointed.

Insurance Report.

Charles F. Ladner, St. Cloud, Minn., reported as follows in behalf of the Insurance Board:

The National Retail Hardware Dealers' Mutual Fire Insurance Co. was organized through the efforts of the National Retail Hardware Dealers' Association, but the National Retail Hardware Dealers' Association is in nowise responsible either financially or legally for any acts of the insurance company, as the latter is organized and chartered as a separate corporation under the laws of the State of Pennsylvania. We believe that the relations of the association and the in-

Digitized by Google

surance company should become closer, and in order to accomplish this we suggest that the president of the National Retail Hardware Association should be elected vice-president of the insurance company and that the officers of the insurance company pay the vice-president such salary as in their judgment will be wise and just for services rendered.

Banquet.

Wednesday evening was devoted to a banquet at the West Hotel, where A. T. Stebbins, acting as toastmaster, introduced the speakers. Speeches were made by D. P. Jones, Mayor of Minneapolis, which was one of welcome, and was responded to by F. C. Moys, of Boulder, Colo.; E. L. Miller, Duluth, Minn., on "The State of Minnesota;" A. H. Abbe, New Britain, Conn., on the "New England Hardware Trade," and on "Hardware from the Viewpoint of the Press," by James Gray; "The Influence of Associations," by H. G. Cormick, Centralia, Ill., and on "Shop," by W. P. Bogardus, president. Impromptu remarks were made by M. L. Corey, Argos, Ind.; H. C. Marshall, Duluth, and Col. Enders, of St. Louis.

Officers.

At the Thursday afternoon session the following officers were elected for the ensuing year:

PRESIDENT—W. P. Bogardus, Mt. Vernon, O.
FIRST VICE-PRESIDENT—E. M. Bush, Evansville, Ind.
SECOND VICE-PRESIDENT—H. F. Emery, Fargo, N. D.
SECRETARY—M. L. Corey, Argos, Ind.
TREASURER—A. T. Stebbins, Rochester, Minn.
EXECUTIVE COMMITTEE—T. Frank Ireland, Belding, Mich; S. R. Miles, Mason City, Iowa; A. H. Abbe, New Britain, Conn.; Frank A. Bare, Mansfield, Ohio; A. T. Stebbins, Rochester, Minn.; C. H. Williams, Streator, Ill.

FIRMS WHO HELP THEIR DEALERS.

In these times of stiff competition, the Hardware dealer has learned to keep his eyes open for those firms who offer to assist him in selling goods; in fact, it is getting to be quite the custom for manufacturers of Hardware to supply all dealers with advertising matter, suggestions for talking goods, window cards and the like, and it is to be hoped that this custom will become even more general.

Voss Brothers Manufacturing Company, Davenport, Iowa, manufacturers of the "Ocean Wave" Washer have recently sent out 250,000 copies of a neat little drawing book, three pages of which are devoted to a description of the "Ocean Wave." These booklets will without doubt assist very materially those dealers who are handling Voss Brothers machines.

The Bissell Carpet Sweeper Company have always been very heavy general advertisers and this, no doubt, is responsible in a great measure for the popularity of the Bissell goods. This firm is offering at the present time a special combination assortment of their different lines of sweepers with which they are sending a large amount of very attractive advertising matter, including an easel for displaying the sweepers, poster cards, show cards, street car cards and electrotypes. Particulars concerning this offer can be had by addressing this firm either in New York or Grand Rapids.

The Glidden Varnish Company, Cleveland, Ohio, manufacturers of "Jap-a-lac," report that they will spend $60,000 for general advertising during the months of April, May, June and July. Particulars concerning this campaign are exceedingly interesting and it would be well worth the while of any dealer to ask concerning it, and, at the same time secure particulars concerning the list of prizes for best window displays to be made during "Jap-a-lac week," beginning April 10th. In the competition, $1,000 in prizes will be distributed. The Glidden Varnish Company deserve to be congratulated for their great enterprise exhibited in planning this extensive campaign.

The White Lily Washer Company, of Davenport, Iowa, are assisting dealers with a very cleverly written circular which contains a long list of good talking points concerning the White Lily Washer. All dealers in these goods will be greatly benefitted by making a careful study of this circular.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C, and St. Paul Building, New York City.

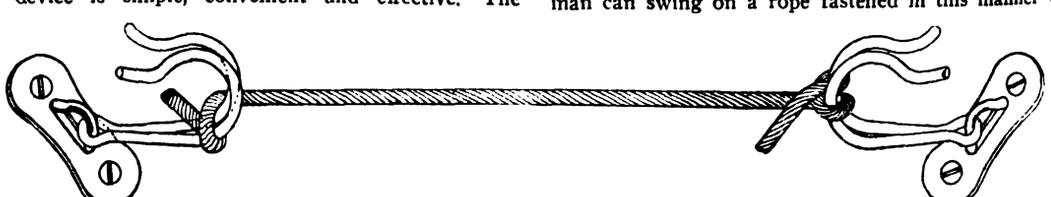
PATENTS EXPIRED MARCH 6, 1905.

378,946. NAIL HOLDING ATTACHMENT FOR HAMMERS. J. H Baker, Aurelius, N. Y.
378,949. MOP WRINGER. H. Blake, Worcester, Mass.
378,951. CLOTHES WRINGER. J. J. Brinkerhoff, Auburn, N. Y.
379,044. SAD IRON WITH REMOVABLE HANDLE. J. F. Bless, Newark, N. J.
379,141. SOLDERING TOOL. C. L. Wagandt and J. S. Hull, Baltimore, Md.
379,167. COFFEE MILL. St. Louis, Mo.
379,200. SCREW. J. P. A. Hanlon, Somerville, Mass.

PATENTS ISSUED MARCH 6, 1905.

784,039. SAD IRON. M. E. Fallon, Spokane, Wash.
784,057. WINDOW OR DOOR FASTENER. C. D. Lovelace, Hereford, Texas.
784,069. SHEARS. J. Polkowski, New York, N. Y.
784,085. BLIND FASTENER. T. A. Upson, New York, N. Y.
784,092. LAMP BURNER. A. P. Woodward, Franklin, Mass.
784,093. DOOR CHECK. A. S. Adam, Washington, D. C.
784,113. SAW. J. H. Miner, Lumberton, Miss.
784,151. WRENCH. W. E. Gilchrist, Rockford, Ill.
784,155. COMBINED ADJUSTABLE WINDOW SHADE AND CURTAIN BRACKET. C. A. Haas, Pittsburgh, Pa.
784,190. COMBINED IRONING BOARD AND STEP LADDER. J. E. Stoneking, Bertram, Iowa.
784,200. WRENCH ATTACHMENT. J. C. Zumwalt, Clay Center, Neb.
784,215. DINNER PAIL. J. E. Humphrey, Aberdeen, S. D.
784,243. WRENCH. W. Whaley, Lafollette, Tenn.
784,282. COVERED RECEPTACLE. J. J. Schuler, Rome, N. Y.
784,398. ARTIFICIAL FISHING BAIT. W. Heckeler, Meadville, Pa
784,424. CAN OPENER. A. Peterson, Kane, Pa.
784,467. JAR OPENER OR CLOSER. C. Braunschweiger, Toledo, Ohio.

PATENTS EXPIRED MABCH 13, 1905.



379,205. DOOR HANGER. A. A. Barker and W. Bennett, Worcester, Mass.
379,322. ASH SIFTER. J. A. Murphy, Holyoke, Mass.
379,323. STOVE HOOD. U. B. Newman, Greenfield, Ohio.
379,345. EARTH AUGER. T. Tow, Miles City, Mont.
379,346. PLANE. J. J. Tower, Brooklyn, N. Y.
379,348. SEAL LOCK. W. B. Waldron and G. C. Boller, Folsom City, Cal.
379,350. LAWN MOWER. J. F. Watermolen, Green Bay, Wis.
379,354. COOKING STOVE OR RANGE. E. W. Anthony, Brookline, Mass.
379,416. DETACHABLE HANDLE FOR SAD IRONS. J. Sabold, Boyertown, Pa.
379,445. WRENCH. M. C. Campfield, Pittsburgh, Pa.
379,504. WRENCH. J. Byrne, Sharon, Wis.
379,519. PIPE WRENCH. T. F. Krueger, New York, N. Y.

PATENTS ISSUED MARCH 14, 1905.

784,637. DOOR SECURER AND ALARM COMBINED. D. N. Stewart, Detroit, Mich.

NEVERSLIP CLOTHES LINE HANGER.

Charles E. Culver, 2271 North Paulina Street, Chicago, is offering to the trade the patented clothes line hanger as shown below. The device is simple, convenient and effective. The

hangers are fastened to the post or to the side of a building by means of two screws. In placing a clothes line in position, the first end of the rope is passed between the prongs of the hook and then wrapped once around it. On the other end of the rope the operation is reversed, the line being wrapped once around the hook, pulled as tight as possible and then the end of the rope pushed down between the prongs of the hanger. The tension of the rope binds the prongs of the fastener together on the end of the rope and as the weight on the line is increased the grip of the prongs on the end of the rope is correspondingly increased. The "bulldog" tenacity of the grip is shown by the fact that a man can swing on a rope fastened in this manner without pulling the rope loose. The article appeals to the trade on account of its simplicity, usefulness and ease of operation. The rope can be put up with one hand, and if the housewife should go out with an armful of clothes to put on the line and find when she got there that she had forgotten to put it up, she could easily put the line in place on these hangers with one hand and without putting down the armful of clothes.

RECENT TRADE PUBLICATIONS.

JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have issued a four-page folder of more than ordinary merit on the cover of which is elaborately printed "The Protection of Steel." This, they claim, can be secured by paint, as proof of which they state they can furnish records of its durability in all climates. Time tests the efficiency of a paint, and Dixon's Silica-Graphite Paint has been on the market for forty years.

HOHLFELD MANUFACTURING CO., Eighth and Dauphin Streets, Philadelphia, Pa., have distributed for the season of 1905 a large and most elaborate catalogue of their "Eclat" hammocks. Their line is replete with new patterns and colorings, and they are offering a larger and better assortment than ever. They claim the distinction of being the first and only manufacturers to introduce hammocks of such high art as Navajo, Oriental, Bagdad, Japanese, Persian and Rug effects, and also in particular their popular line of Savoy hammocks. They are now introducing a new novelty under their 700 Majestic style, having a handsome square pillow with a perfect design of an Indian's head and a horse's head. The illustrations in the book are all in original colors enabling a purchaser to select one intelligently without samples. If you are interested in high grade hammocks, apply for catalogue.

A. J. PHILLIPS COMPANY, Fenton, Mich., are the authors of a neat and attractive catalogue being their catalogue "B" exploiting their Custom Made Fly Screens, which they make to order neatly, promptly and at reasonable cost. In their catalogue they give condensed information on all matters pertaining to fly screens. They will mail to all applicants who are possible patrons, samples of wood, finishes and wire cloth. The "Suburban" is their highest grade of work and indicates a type of frame in which the inner edges are beautifully moulded or carved, the effect at the inner corners being curved or circular. Frames are ⅞ inch thick. The screen is held in place by flat steel springs in the groove at the edge, which hold the screen at any desired elevation. The wire cloth is fastened with closely driven tacks and further secured by mouldings covering the tacks and edges of cloth. For extra hard usage samples are used. Either method permits renewal of wire cloth. Three pages of the catalogue are devoted to illustrating and describing the Hardware used on their screens, and one page to wicker work and guards. An extensive list of woods and finishes is given, besides which they will match any desired color or finish. Several pages are devoted to testimonials as to the merit of the Phillips screens, also photographs of residences and other buildings which have been equipped with them, from any of whom information regarding the quality and satisfaction may be obtained. Write at once for catalogue.

AMERICAN TOOL CHEST CO., 200 West Houston Street, New York, N. Y., have sent us a copy of their illustrated catalogue No. 19 of Tool Chests, which they make in all styles adapted for the use of boys, youths, housekeepers, carpenters, farmers, planters, railroad and mines, fitted up complete with a superior quality of tools; also machinists' and pipe fitters' empty tool chests. All of their chests are made with either patent locked or hand dovetailed corners, and from selected hard woods. All chests shown in their catalogue for use of youths, gentlemen, carpenters and others from No. 2 and upward, have "tumbler" chest locks, and strong lifting handles, and are fitted with Disston & Son's hand, panel and ripping and back saws, and in all this higher grade chests they use none but good quality cast steel tools. Among a number of circulars exploiting special chests is one devoted to the "Eureka Tool Cabinets" Nos. 1, 2 and 3. They are made of chestnut and have brass lifting handles, giving a list of the contents of each, also list prices. Another circular exploits their Handy Tool Chest No. 1903 for house and farm use. Send for their Tool Chest Literature.

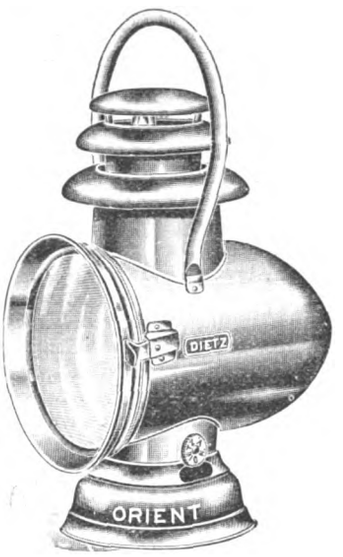
WESTCOTT CHUCK CO., Oneida, N. Y., in their Catalogue "A" exploit their line of "Westcott's Patent Lathe Chucks and Little Giant Drill Chucks," of which they are the manufacturers. The Westcott's Patent Combination Lathe Chuck will give all the movements and conveniences obtainable in both the Independent and Universal chucks at a much less cost than for both. The movements are independent, universal and eccentric. The jaws of all the Westcott's lathe chucks are reversible which saves all the expense of buying an extra set of jaws, but can use the same set for all purposes by reversing them, which is quickly and easily done. Screw heads do not project beyond the diameter in any of Westcott's chucks. They claim the following points of superiority: strongest grip, greatest capacity and durability, most perfect adjustment, cheapness and accuracy unsurpassed. The above mentioned catalogue is exceptionally well gotten up as regards printing, paper, binding, illustrations, etc., and will be sent to those interested in this line of goods, upon request.

DUCHARMES & CO., Shelbourne Falls, Mass., manufacturers of high grade tools, have issued a handsome new catalogue, it being their No. 2. This concern makes a specialty of high grade tools which are specially hammer forged, hardened and tempered, using nothing, they state, but the highest grade stock in both steel and handles. They guarantee their tools to the trade, and will replace free of charge, any that break, bend or are not perfect in all respects. Each driver is tested to break a screw in its size. They direct special attention to their Perfect Nail Set, and request that it be given a severe test which they claim it will stand. It is made of the finest Sanderson steel, hammer forged, cup point corrugated grip and warranted to stand harder usage than any other made. They state that their trade mark, which is an open hand with a large "D" upon it is a guarantee to the Hardware trade that their tools are made from the very best stock. Their catalogue is finely printed on heavy coated paper and is illustrated throughout. A convenient price list is also given. A copy of their catalogue will be gladly sent in response to a request for same.

AMERICAN AXE & TOOL CO., Glassport, Pa., have sent us a copy of their 1905 price list of scythes, hay knives, bush hooks, hedge trimmers, corn knives, grass hooks, etc. The book is gotten up in large pamphlet form and is very handsome throughout. The above concern are the makers of the famous "Blood" and "Hubbard & Blake" brand of scythes which they claim are the standard of merit by which all others are judged. They maintain the old process of manufacture, using three qualities of steel reinforcing the back and inserting the finest quality of crucible steel for the cutting edge. This, they claim, has been demonstrated and is acknowledged as the only method whereby the maximum of strength and stiffness with the minimum of weight may be obtained. All of their scythes are hand-made from the finest material. For description of their other productions, send for catalogue.

TUCKER & DORSEY MANUFACTURING CO., Indianapolis, Ind., are distributing Catalogue No. 42 of Hardware and Woodenware Specialties, which include Tucker's alarm tills, adjustable stove trucks, saw bucks, vegetable cutters, kraut cutters, towel rollers, knife and fork trays, lemon squeezers, combined step-ladder and chair, Tucker patent casters, etc. The book is illustrated and contains list prices on all goods, also an extensive list of freight rates on the different articles of their make, to all of the principal cities in the United States and Canada. Particular attention is called to the Tucker Skewer Drawer for butchers' use. It is made with oak front varnished, woodwork oiled, size over all 4⅛ by 18 by 19 inches wide; weight 9 pounds. The tray has four spaces 3½ by 6 inches, four spaces in drawer 3⅛ by 8 inches, space each for long skewers, needles and twine and each drawer is fitted with twine cutter. Lock has thirty-two changes but no alarm. Send for their catalogue No. 42 for further information regarding these goods.

ANN ARBOR AIR LIGHT BURNER.



The Ann Arbor Air Light Burner will prevent your throwing away your old gasoline lamp, for by the purchase of one of these burners you will make your lamp worth twice as much as it was before when new. By the invention of a so-called "air hole" globe, this now becomes a possibility. This "air hole" glassware was first invented for gas burners but when applied to a gasoline burner, its success has been phenomenal. It is manufactured by the Superior Manufacturing Company, Ann Arbor, Mich., who will send you further particulars if you are interested in having the novel and brilliant light obtainable.

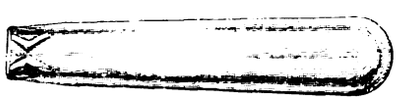
NEW GOODS AND SPECIALTIES.

THE ORIENT BULLET LAMP.

The Dietz Orient Bullet Lamp is made in a new and popular shape pattern. The body is solid drawn from heavy gauge brass and the aluminum reflector is also drawn from a solid sheet of heavy gauge aluminum. The reflector is easily removable for

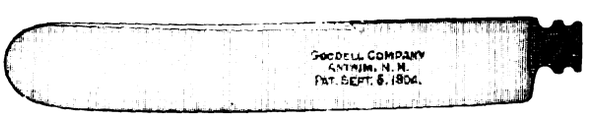
THE ORIENT BULLET LAMP.



cleaning. The shape of the reflector is unique and an improvement on any other made before, giving a better effect for the amount of light given by the burner than any other shape. The top and bottom of the lamp are double seamed to the body which is the strongest construction possible for this part. This lamp which is manufactured by R. F. Dietz Company, New York, has all of the other good qualities that distinguish the Dietz lamps, and is guaranteed to burn properly.

A NEW LINE OF CUTLERY.

After a long series of tests and experiments the Goodell Company, of Antrim, N. H., have perfected and placed on the market an entirely novel line of cutlery. The particularly new feature of these goods is in the construction of the handle which is made of special glass. Before placing these goods on the market several articles were made with these glass handles and given a



SILVER BOLSTER.

GLASS HANDLE.

thorough test. Mr. Goodell showed the writer a few days ago a handle that had been used in the roughest kitchen work for 11 months and which was still in good condition. These knives are practically unbreakable. One very severe test that was given them was the cooling of a handle to a low temperature and then pouring a thin stream of boiling water on the middle part of the handle; no cracks or breaks appeared even under this severe test.

The illustrations given herewith show the method of attaching the handle to the blade. It will be noticed that the inner end of the handle is corrugated to give a grip to the metal which fastens it. In putting the knife together the ferrule is pressed over the ends of both blade and knife and the melted metal is forced through the hole in the ferrule under high pressure so as to guarantee its being filled entirely and to make a perfectly rigid handle. It will be seen that this process makes of the knife practically one solid piece. These knives are protected by three patents and it is safe to prophesy that they will meet with a large sale. Several designs are ready for the trade, a number of them being exceedingly handsome.

GREATER SHELF SPACE.

The average Hardware dealer is very often confronted with the actual necessity of increasing the amount of shelf space in his store, even to the point of it being necessary to enlarge his building. By the use of Baine's Shelf Brackets a very large increase in shelf space can be obtained without increasing wall space. This is brought about by the fact that the shelves are free from obstructions from props in front of and among the

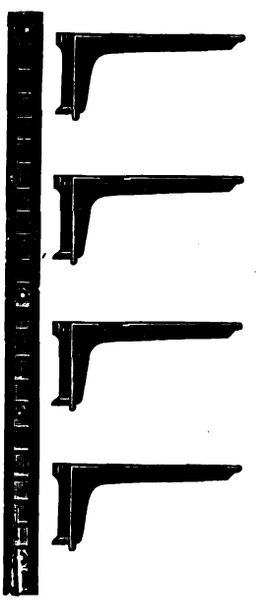


FIG. 1.

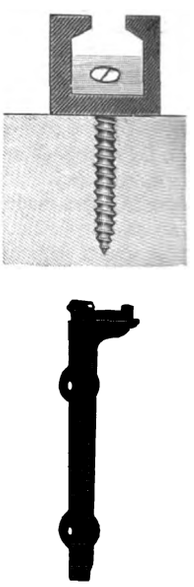

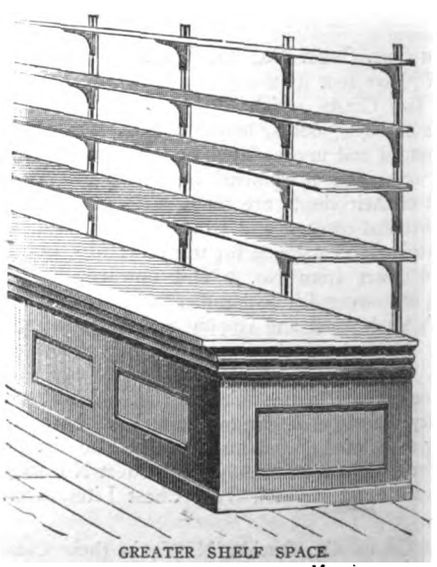

FIG. 2.

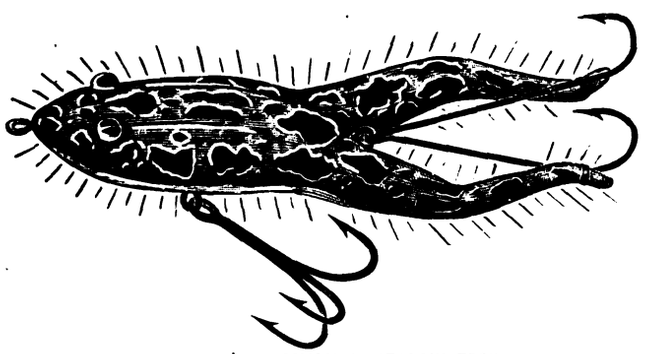
goods, forming a clear continuous line the entire length of the shelf section. These brackets are especially adapted for certain lines of Hardware as it is practically an impossibility to break them, in fact it is claimed that it is not possible to place

GREATER SHELF SPACE.



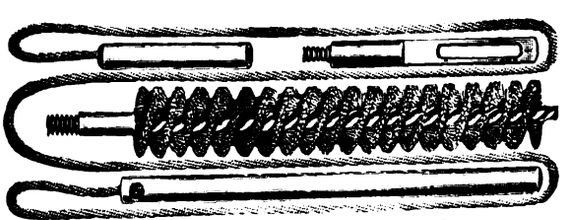
enough weight on the shelves to break the brackets. This may seem like a broad statement, but its truth has been demonstrated by actual experience. Figure 1 of the illustration shown herewith shows the wall bar, how it is attached to the wall, and how

Digitized by Google

the brackets are attached to the bar. The upper part of Figure 2 is a cross sectional cut showing how the bar is screwed into the wall, the lower part showing the details of the bracket itself. Where the building is of brick, drills are furnished for drilling the holes, and plugs for inserting and properly fastening the wall bar. It will be seen by these illustrations that these brackets can be attached to the wall of the store without damage to the wall and it will also be seen that the depth of the shelves can be easily changed. This is a particularly convenient feature for Hardware stores where it is often desirable to have shelves of different depth. Another advantage is that the shelves put up with these brackets can be removed to another building or to another part of the room without the slightest injury. Baine's brackets are manufactured by the Piqua Bracket Company, Piqua, Ohio. This firm issues a very handsome catalogue profusely illustrated which gives complete instructions for estimating the number of brackets required and for their installation.

PFLEUGER'S LUMINOUS MEADOW FROG.

The Enterprise Manufacturing Co., Akron, Ohio, manufacture among the many artificial lures known as Pfleuger's Luminous Baits, the Luminous Floating Meadow Frog, made of satin cork and pure rubber, which is considered one of the most deadly

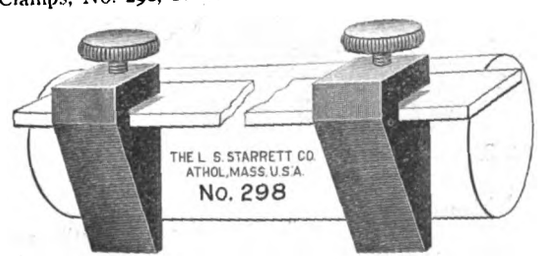


PFLEUGER'S LUMINOUS MEADOW FROG.

of the whole line, and is especially excellent for casting. It possesses the characteristics of diving after a fashion so peculiarly froglike, and then returns to the surface in such a highly probable manner that the bass and pickerel are utterly fooled by its superdeceptive tactics. They come in threes, sewed on a bronze printed card, and packed two cards in a fancy box.

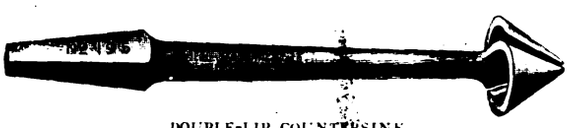
U. S. GOVERNMENT RIFLE CLEANER.

J. Stevens Arms and Tool Co., Chicopee Falls, Mass., is making the United States Government rifle cleaner here illustrated. It consists of a bristle brush and slotted wiper with detachable cord and weight for dropping through the rifle barrel. A separate



U. S. GOVERNMENT RIFLE CLEANER.

slotted wiper is also supplied for pulling through a dry cloth and for oiling the inside of a barrel. The cleaner can be furnished for .22, .25, .30, .32, .38 and .44 calibers, and additional calibers not mentioned to .50, inclusive, but no larger, with a delay of two to four weeks, all regular and special at a uniform price.

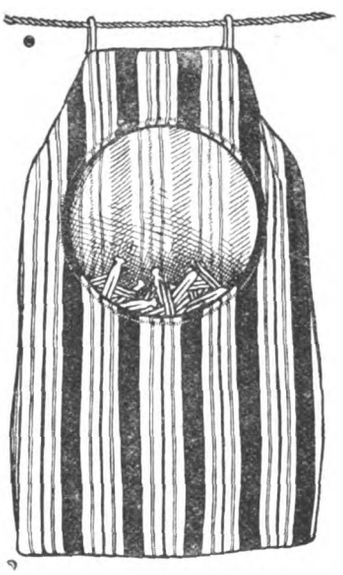


KEY SEAT CLAMPS, No. 298.

L. S. Starrett & Co., Athol, Mass., are the makers of the Key Seat Clamps, No. 298, of which we give an illustration. They are

KEY SEAT CLAMPS.

designed to transform any common steel scale into a Key Seat Rule. They are made from steel, case hardened and ground accurately; a pair weighs but one ounce. They can be put on or off almost instantly and are a complete substitute for a more costly tool. They may be used with their Combination Square Blades, or with any straight rule, with accurate results. They

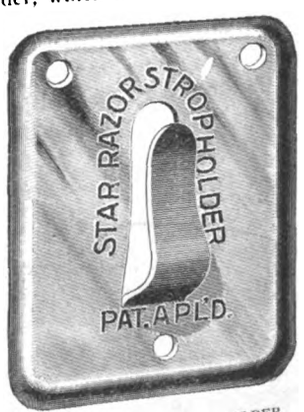


DOUBLE-LIP COUNTERSINK.

also make the Double-Lip Countersink, No. 195, shown herewith. This is the only double-lip, self-centering wood countersink that has a keen cutting edge, and the only one made on the true principle for a wood-working tool. It will clear itself of its shavings in any kind of wood and will cut a smooth, round hole. It is made from the best of steel, forged, twisted and tempered. It can be sharpened from the inside with a file.

GLENNY'S CLOTHES PIN BAG.

W. H. Glenny & Co., Rochester, N. Y., manufacture, among numerous specialties of a household character, a Clothes Pin Bag, which has become exceedingly popular. It is made of heavy, good quality fancy striped ticking, with non-rusting wire frame. Will



GLENNY'S CLOTHES PIN BAG.

slide on line ahead of clothes as they are hung and can be drawn on line after clothes as they are removed. They are made in two sizes, No. 10 and No. 20, holding six dozen and twelve dozen pins, respectively. They come packed one dozen in a bundle, with a colored display card furnished with each shipment.

"STAR" RAZOR STROP HOLDER.

Davis & Davis, 7 Warren Street, New York, are introducing to the Hardware trade a little specialty in the shape of the "Star" Razor Strop Holder, which makes it unnecessary to select some

"STAR" RAZOR STROP HOLDER.

little make-shift, like a doorknob, bedpost or gas bracket to act in the same capacity. It is manufactured from heavy sheet metal, struck up into proper shape and very nicely nickel plated. It is of the size of cut shown in this, and for a simple novelty is meeting with considerable favor.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

THE MOST STUPENDOUS ADVERTISING CAMPAIGN EVER INAUGURATED BY A VARNISH MANUFACTURER

As we have previously informed you, we are going to spend

SIXTY THOUSAND DOLLARS

exploiting JAP-A-LAC during the coming Spring months. This will be the largest amount of money ever expended for advertising by any Varnish Manufacturer in pushing a specialty.

Our JAP-A-LAC business has assumed such proportions that we feel justified in this immense expenditure, and *want every dealer in the country to realize just what there is in it for him.*

Whether you are selling some varnish stain or other line of goods, claimed to be similar to JAP-A-LAC, makes no difference. JAP-A-LAC is bound to have the call this year. *You can make big money if you get in line now.*

In order to interest all of the dealers, we have arranged a contest for the best window displays and advertisements of JAP-A-LAC produced by the dealers during "JAP-A-LAC WEEK." We will soon inform you fully regarding "JAP-A-LAC WEEK." We will give

ONE THOUSAND DOLLARS IN PRIZES.

The contest will be divided into three classes and promulgated on the following lines:

CLASS "A." *Cities of more than 50,000 population.*		CLASS "B." *Cities under 50,000 and more than 10,000 population.*		CLASS "C." *Towns of less than 10,000 population.*	
1st Prize	$100.00	1st Prize	$50.00	1st Prize	$30.00
2d "	50.00	2d "	25.00	2d "	15.00
2 Prizes of	25.00 each	2 Prizes of	15.00 each	2 Prizes of	10.00 each
10 "	10.00 "	5 "	10.00 "	20 "	5.00 "
*Special 20 "	5.00 "	10 "	5.00 "	*Special 16 "	5.00 "
		*Special 10 "	5.00 "		

*Special: For the best letters describing the effectiveness of the window display; letters to accompany photograph of display.

In addition to the above prizes, we purpose giving 10 prizes of $5.00 each for the 10 most original window displays; also 10 prizes of $5.00 each for the best advertising phrases on blank pointers.

All those who compete in each class will have an opportunity to win one or both of these extra prizes.

The blank pointers are part of the make-up of free window display, which we propose furnishing to all dealers who enter the contest. The free display matter, which we will furnish, is made up of 1 large Cut-out; 6 Card Hangers, printed on two sides; 1 Set of 6 Educational Signs; 1 Reproduction of our four-page, colored advertisement, which is to be run in the *Delineator, Designer* and *New Idea*, issue of May, at a cost of $15,000; 12 Printed Hands, pointing to various interesting statements regarding JAP-A-LAC in the *Delineator, Designer* and *New Idea* advertisement; 4 Blank Hands on which the dealer may print some good advertising point regarding JAP-A-LAC, and 1 large JAP-A-LAC Strip, 49 inches long by 11 inches high.

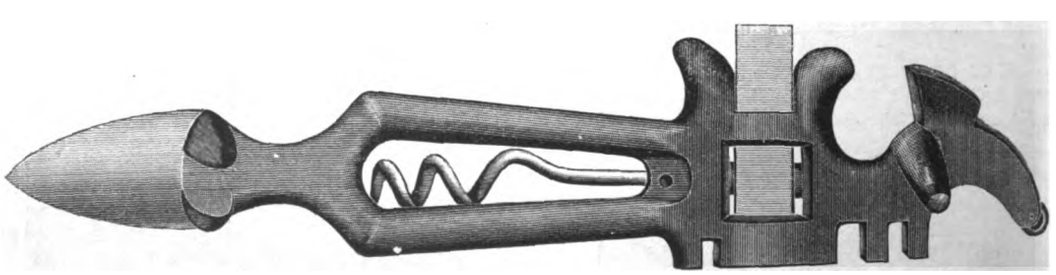
It is absolutely necessary that all dealers who enter the contest have a good supply of JAP-A-LAC. If you are handling JAP-A-LAC, we would urge sending us a re-order for enough to make a large window display, unless you have a sufficient quantity. If you are not handling JAP-A-LAC, we want you to put it in stock. We believe we can convince you that there is big money in it.

Ask for full information regarding special introductory asortment of JAP-A-LAC.

It is only a question of time when every dealer in the United States will find it to his interest to handle JAP-A-LAC, and the sooner you take hold of this profitable and well-advertised article, the sooner you will commence to receive the profit which otherwise is sure to go to some other energetic dealer in your town.

There is more to follow; keep track of us for the next few months.

ADDRESS 641 WILLIAMSON BUILDING,



THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

CLEVELAND, OHIO

BARRETT'S GLASS CUTTER NO. 8.

W. L. Barrett, Bristol, Conn., is the manufacturer of the useful combination of glass cutter, can opener, knife sharpener and cork-screw, an illustration of which is presented herewith.

BARRETT'S GLASS CUTTER NO. 8.

It is a very convenient article and one that has met with an extended sale and achieved a popularity of its own, meeting a ready market in nearly every country on the globe. It fills the demands of the trade and is invariably bought to be sold at a profit. Send for his latest catalogue.

FAILED TO CATCH THE SCENT.

Horace T. Eastman, the inventor of the locomotive pilot, said the other day:

"This morning I was sitting in a drug store waiting to get a prescription filled, when a young Irishman entered.

"The Irishman pointed to a stack of green castile soap and said:

"'Oi want a loomp o' thot.'

"'Very well, sir,' said the clerk. 'Will you have it scented or unscented?'

"'Oi'll take ut wid me,' said the Irishman."

REVIEW OF THE MARKETS.

WIRE NAILS: Trade is assuming more regular proportions, taking into consideration the opening of Spring trade. More moderate demands are made from the mills to apply on contracts. Stocks are being kept up by the jobbers in more complete conditions ready for the usual demand which is made of them when business commences. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. The Spring-like weather we have had favoring us, has brisked up to the prevailing demand from out of town, and the retail trade has been more active than usual. Markets are in firm condition in anticipation of a further advance. Quotations are as follows:

Single carloads $1.99
Small lots from store 2.05

CUT NAILS: The new business springing up has not been sufficiently strong to make the market unusually active. Spring trade has only awakened from the Winter's lethargy. Large contracts are still to arrive at Mill. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York. A slight improvement is noticeable in the local demand which is accounted for improved demands from nearby trade. Market is a firm one, with quotations as follows:

Carloads on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: The Western market, getting the bulk of sales in this line, has been unusually brisk and transactions have been in large volume, which the trade believes will continue. Nearby trade is picking up very nicely and prices are firm. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers carload lots	$1.95	$2.25
Retailers carload lots	2.00	2.30
Retailers less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: A satisfactory trade is being done in this line with a demand that will improve in the immediate future. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

CARRIAGE BOLTS, MACHINE BOLTS, &c.—At a meeting of the manufacturers of Carriage Bolts, Machine Bolts, etc., held March 15, an advance of 2½% was made along the whole line. The new discounts are as follows, there being the usual extra discounts to large purchasers:

Common Carriage Bolts, ⅜x6 and smaller and shorter, rolled thread	75 and 5 %
Common Carriage Bolts, ⅜x6 and smaller and shorter, cut thread	75 %
Common Carriage Bolts, longer and larger than ⅜x6,	65 and 10 and 7½%
Machine Bolts, ⅜x4, or shorter and smaller	75 and 2½%
Machine Bolts with H. P. or C. P. plain nuts	70 and 2½%
Machine Bolts with C. and T. nuts	65 and 7½%
Bolts without nuts, 6-inch and shorter	10% additional
Bolts without nuts, longer than 6 inches	5% additional
Machine Bolt Blanks	70 and 2½%
Bolt ends, with H. P. or C. P. plain nuts	70 and 2½%
Bolt ends, with C. and T. nuts	65 and 7½%
Gimlet Point Coach Screws	75 and 12½%
Cone Point Lag Screws	75 and 17½%
Skein Screws	75 and 12½%

NUTS.—The manufacturers of Cold Punched and Hot Pressed Nuts, at a meeting held March 14, advanced Cold Punched and Hot Pressed Nuts 1-10 cent, and in addition made 1-10 cent differential on Hot Pressed Tapped Nuts. The new prices are as follows, beyond which are the usual concessions for large buyers:

	Cents Off.
Cold Punched Plain Blank Square Nuts	4.80
Cold Punched Plain Blank Hexagon Nuts	5.80
C. T. and R. Blank Square Nuts	5.00
C. T. and R. Blank Hexagon Nuts	5.70
Cold Punched Plain Tapped Square Nuts	4.80
Cold Punched Plain Tapped Hexagon Nuts	5.30
C. T. and R. Tapped Square Nuts	5.00
C. T. and R. Tapped Hexagon Nuts	5.70
Hot Pressed Square Blank Nuts	5.30
Hot Pressed Square Tapped Nuts	5.20
Hot Pressed Hexagon Blank Nuts	5.70
Hot Pressed Hexagon Tapped Nuts	5.60

ROPE: The business is improving and is a satisfactory one thus far in the season. The following prices represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....48 cents per gallon.
In lots of 5 barrels or more.....47 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE ALBANY TRADE.

Business conditions here are as usual at this time of the year. A good report is made by retailers, and although Winter still holds on, it is very evident that when the breaking up comes, which means the opening of the roads and the resumption of navigation on the Hudson River, an unusually active Spring will start. Dealers have been purchasing largely in the past and will realize a good margin, owing to the higher rates that have recently gone into effect. There is great activity in building and contract work on the railroad and trolley lines, and a great deal is being done by the State in the way of road improvements and work on the large canal, so that a general condition of activity will undoubtedly be prevalent all through this State during the coming Spring and Summer months. Continued firmness in prices and occasional advances of a few points on leading goods are noticed and at the present time all staple goods are not high compared with a few previous seasons. With prosperous conditions all around us, the consumer is willing to contribute his tax in slightly higher prices on some of the goods he uses, as he is getting it back in the line of business in which he is engaged. One month from now will undoubtedly see us all very busy, and at that time we probably can send a letter that will be of greater interest to the trade at large.

Albany Hardware and Iron Co.,
Charles H. Turner, President.

THE PITTSBURGH TRADE.

Spring weather still leans towards the Winter side and while there have been a few days of sunshine, the temperature has been in the 20's and 30's all the first half of the month. This does not thaw out the country merchant trade as rapidly as we could wish. A letter from a mountain town this morning says the snowdrifts are so deep that teamsters are afraid to take out their horses. In the larger interests, however, business is booming. Furnaces, mills, and shops are pushed in their capacity, running double turn, while railroads are not able to supply cars for all the freight offering. There is good buying in the coke region where the recent advance in wages is felt to the advantage of merchants. Every one feels that this is to be a big business year and orders from the large trade are gauged on this expectation. We learn that Pittsburgh is to be honored by the Spring meeting of the Executive Committee of the National Hardware Association. The association is yearly growing in importance and power and its actions are guided by some of the wisest and best men in the business. Logan-Gregg Hardware Co.

Digitized by Google

THE PHILADELPHIA TRADE.

The middle of March has brought us a few days of sunshine, and the effects are already seen in an increased demand for goods, especially for seasonable articles. As usual, these are already scarce, and hard to get, and this is particularly true of Forks. Hoes and Rakes, for which there is a heavy demand and a very small supply. It is difficult to make the trade understand why this shortage should have occurred regularly for the last two or three years, but it is all due to the action of the Steel Goods manufacturers, who have closed two out of the three factories in Philadelphia, thereby throwing the entire burden upon one factory, which seems totally inadequate to meet the demand. Jobbers are doing their utmost to keep their customers supplied with such goods, but indications point to a marked shortage in the near future. Wire Cloth and Window and Door Screens and Poultry Netting are now moving in good volume, and there seems to be every reason to expect a large trade in the next few weeks. Incoming customers report good building prospects, as a large number of buildings have been projected, and apparently there should be an active demand for Locks, Knobs and all goods in the building Hardware line. Prices on this line advanced 10% about two weeks ago and are quite firm. On some lines there seems to be an upward tendency in price, particularly in goods which are near the raw material. An illustration of this was seen last week in an advance of about 10% in Door Hangers and Rail. Carriage and Machine Bolts have also scored a small advance, while Registers were put up about 10% on the 15th. The one discouraging spot in the outlook to-day is collections, which have been languishing for some time. A marked improvement in this respect is looked for, however, as soon as trade fairly reopens.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

The large number of trade conventions indicate a gain in respect and good will among competitors. Every man for himself and the devil take the hindmost seems to be losing its popularity. All who attend these conventions are impressed with the value of conferring together on improved methods of business. The conviction that such gatherings are conspiracies against the public has not entirely abated. While such conventions are being held to modify the evils of the competitive system, State legislatures and Congress are legislating to protect it. As a public we favor it and as individuals oppose it. We call it commercialism and suppose that civilization depends upon it. These gatherings are doing something to mitigate its evils, it adulterates our food and medicine, puts shoddy in our clothing, cuts down wages, and, yet we idolize it as the life of trade. The law of an eye for an eye and the survival of the fittest still survives. Trade is feeling the effect of improved weather. Orders are more liberal and goods previously ordered are being hurried forward. Notwithstanding the extreme cold weather wheat is looking well, a good blanket of snow has protected it the most of the winter. The farmers have been able to get out timber, so the hard winter has brought some compensation. We are not sure to want what we need. Advances still continue in pig iron and the demand seems to be in excess of supply. Indications point to an early close of the Eastern war, and it will take the resources of the world to replace the immense waste it has caused, and in this this country will be a large factor.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. LOCKWOOD, President.

THE SAGINAW TRADE.

Business is very backward this Spring, on account of the severity of the weather. Some of the time it was so cold, and the roads in the country so blocked with snow, that there was not any business doing. However, the backbone of Winter is broken and trade is picking up. A very large ice crop has been harvested. The fish business has been very good this season, and it might be interesting to your readers to know something regarding it. About fifteen miles from Saginaw, out on Saginaw Bay; there are about 250 fishermen's shanties built on the ice, with no floors. They cut a hole in the ice and spear fish from within their shanties. Their catch varies all the way from 50 to 200 pounds a day to the shanty. It is a regular little settlement, and they have stores there selling supplies to the fishermen, and buyers of fish go out there and buy their catch. Although it is now the 16th of March, they are still out on the bay spearing. Last year the ice broke away from the shore, and the fishermen were out on the bay several days before they were rescued. The people in your city who have these fine fresh lake fish served to them in your restaurants little know of the danger, skill and uncomfortable times the fishermen have to supply their wants. The sugar beet companies have made more contracts for beets with the farmers than last years. The coal mines have been working to their full capacity, and the coal brought good prices. The lumbering tool, portable house and horse collar factories are working full handed, and have a good many future orders booked. The railroads were badly blocked and freight got badly mixed, which caused long delays in shipments, but they have now straightened out their blockade and are delivering goods as promptly as usual. With good Spring weather we anticipate a fair business.

MORLEY BROTHERS.

THE DAVENPORT TRADE.

The ice has departed for the sunny South and the Mississippi River navigation has opened, we trust for the season. This always has a stimulating effect on business, especially to river points. General Hardware trade is improving with good weather, and every indication points to an improvement over Spring of 1904.

SICKELS, PRESTON & NUTTING CO.

THE COLUMBUS TRADE.

It looks very much like Spring is here to stay, but that terrible warning about March, "Come in like a lamb, go out like a lion," is as Uncle Remus puts it, a "Hant." No doubt we will have an occasional bad day, but it looks like an early Spring. The writer was out in the country a short time, and it was certainly inspiring. Birds singing, frogs croaking and small boys trying to tempt a chub or shiner with a nice fat worm. Trade is all one could ask for, namely, all we can do; but it is an outrage how some manufacturers are treating their customers this year. Goods that were promised in January and February still not furnished. The snow blockade played havoc if we were to believe all the delays that are charged against it. The trouble is the same each year, and is caused by manufacturers not quitting when they have all the orders they can take care of, but they will keep their salesmen out until they cover their entire territory, even if they sell their average output the first week. Of all the provoking things we know of, it is to have a manufacturer write you a month or two after date of promised shipment, when you have written and wired repeatedly, and sweetly say: "We expect to ship your goods in about a week, and trust it will be satisfactory." They know well enough it will not be satisfactory but we have to bear it. Did you ever move a stock of Hardware? If so, you can sympathize with us. We are just through and getting nicely shaped up, but what a job! This has certainly been a banner year for maple syrup, judging from the extraordinary demand for syrup cans. This harvest costs nothing but labor, and comes at a time when farmers are not busy, and is profitable both to the producer and consumer. One buckwheat cake with maple syrup is worth a dozen with any other kind of lasses. If the penalty for adulterating could be extended to reach the landlord it would be a good thing. The bill of fare says maple syrup, but we old farmers know it has been monkeyed with. The outlook seems to be very bright for a good Spring business. Columbus will keep up her record for new buildings again this year. We need a lower tax rate, and if the grafters could be eliminated, we would get it. Any old city or county office is a bonanza, as the salaries (with side dishes) amount to twenty to forty thousand dollars a year. One of our local papers is now exposing the system daily, and it is startling how the public is fleeced year after year. It is what might be termed honest stealing under the fee system. It would be better to have a fixed salary for all county offices. It might not remove the barnacle entirely, but it would put a crimp in it. We hope for the crimp.

THE SMITH BROS. HARDWARE CO.

THE SAN FRANCISCO TRADE.

This is St. Patrick's Day, and although good Irish blood is not traceable in every Hardware dealer, yet an all around observation has disclosed the fact that about all the trade, like almost everybody else, is to-day wearing a boutenniere of the latest novelty in floriculture—a green rose. And this is a reminder of another fact, that one week ago to-day the California State Retail Hardware Association, not only closed its successful fourth annual convention in this city, held in the St. Francis Hotel, but considered the advisability of adopting an association lapel badge of more enduring quality than a green rose.

It was a great convention for this comparatively young State of America, which still has some years coming for history-making before it reaches the Oslerarian period, and two-thirds of the association's 500 membership was in attendance. Owing to the absence in the East of the strenuous president, Major O. F. Sites, his annual address was read by Vice-President G. A. Gutman of the Hochheimer Hardware Company of Orland. The address was characteristic of the president, in that it strongly advocated strenuous association work for this year, a principal recommending feature that won longest applause favored the employment of a high grade man to travel the State in the great assistant work of enlisting every one of the 2200 Hardware deal-

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT. ARCADE, AMERICAN. GREAT WESTERN, McCLELLAN. EAGLE, J. B. SMITH. "X. F.", GOLD MEDAL.

ers in California into the membership of the association. Not only, as said, did this urgent suggestion of President Sites win prominent applause, but on the third and closing day of the convention, under "Good of the Order," fully half the amount that would probably be required for a year's service of a high grade traveling man, was voluntarily pledged by less than a score of members, and the matter was passed with favorable recommendation for early action on the part of the executive committee.

Other annual reports, from Secretary Henry Gracey and Treasurer H. C. Bennett, were severally presented in so acceptable a shape that subsequently in order of business, under election of officers for the ensuing year Henry Gracey, of Henry Gracey Hardware Company, San Francisco, was further honored by election for a fourth term as secretary, and Treasurer H. C. Bennett, of the Bennett Bros. Hardware Co., San Francisco, had thrust upon him during temporary absence from the convention hall the highest promotion honor within the gift of the association, a unanimous vote for president.

The other officers elected were, first vice-president, J. E. Janssen, Eureka; second vice-president, W. Devore, Ocean Park; treasurer, George H. Smith of Pierce Hardware Co., Oakland; executive committee, San Francisco Association, C. H. Philpot and M. M. Brown; North Coast Association, J. H. Steves, St. Helena, and J. C. Mailer, Santa Rosa; Alameda County Association, Frank K. Mott, Oakland, and George H. Ismond, Oakland; Pacific Association, John C. White, Marysville, and George A. Legg, Nevada City; San Joaquin Valley Association, C. W. Barrett, Fresno, and D. C. Wood, Modesto; Central Association, H. E. Robinson, Gilroy, and C. M. Brown, Hollister; Southern Association, J. C. Barth, Corona, and C. W. Damarel, Los Angeles; Humboldt County Association, F. J. Reid, Eureka, the remaining members to be appointed by Vice-President Janssen, of Eureka.

Of other matters that received convention attention, less in importance of course than the election of efficient officers, it is mentionable to note that an amendment to the constitution, providing for the admission to the State Association of any reputable storekeeper who carries Hardware stock, whether a member of his local Hardware dealers associations or not, was adopted.

Also did the convention appoint a committee consisting of S. E. Ellis, C. H. Philpot and M. H. Brown to formulate plans for the organization of an insurance company to be managed by the State Association for the benefit of its members.

And, thirdly and lastly, as the convention delegate from Modoc County said his preacher has a termination habit of announcing his approach to the sermon's end, it might be added that the local wholesalers, as usual, responded to a call to appear before the convention to say what they might have to say touching trade matters of importance. The charge embraced two instances, relating that two interior small town general storekeepers, non-association members, had severally bought, at prices and on terms accorded regular dealers, less than a half dozen stoves and a small bill of agate and tinware. The jobbers in these lines, as usual, expressed great gladness on having had their attention called to this "unfair" business, and promised to investigate, and henceforth be more watchful of their ambitious traveling salesmen. Hence all was amity, and in amity wholesalers and retailers, with their wifes and sweethearts, finally mingled at the grand annual banquet, the closing feature of the convention.

INDUSTRIAL PRESS ASSOCIATION.

THE NEW ORLEANS TRADE.

Spring trade has opened in a way surprising the merchants who were doubtful, even one month ago, of the trade conditions that would mark the coming of the new year. Despite the very slow improvement in the price of cotton, credit conditions are good, and the tone of the market and the reports from all sections argue well for the purchasing power of the cotton districts during the coming Fall and Autumn. This, added to the fact that the cane planters are in an exceptionally prosperous condition; and that the sawmill activity continues high, has resulted in a Spring opening surpassing by many points the best anticipation of the conservative members of the Hardware business as expressed four or six weeks ago.

Summed up, the total volume of trade is just about even with what it was at this time last season. Some houses declare their business is a trifle less than it was one year ago. Others assert that they are doing a little more work. The average would seem to make the business about the same. There has been, furthermore, a continuation of the movement to build up the out-sea, trade, that to the Spanish Americas, and to South Africa, along the lines noted a month ago. A number of incidents have occurred that have borne directly on this development, and have served to increase the general interest in extended markets.

HOW THE LINES ARE RUNNING.

Local trade, both retail and wholesale is exceptionally good, because the building activity in the city surpasses anything in the history of the municipality, both actually and comparatively. These local lines are chiefly in Builders' Hardware, Builders' Supplies, and prospective orders in fittings and furnishings, etc.

To the out-of-town trade, Builders' Supplies and Hardware are leading, and are going chiefly to the timber and cane districts. All the pine section is extending its activity, and increasing the scope of its work. A number of Northern settlers have occupied the waste lands for truck farms, and are giving extensive orders for homes, etc. Mill supplies to the same district are

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN., U. S. A.
Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

Digitized by Google

going steadily and consistently, although the mills are too busy to stop work for the usual early Spring repairs.

Into the cotton country there has been within three weeks a remarkable quickening of the implement demand, that has somewhat shaken the confidence of the cotton operators in the promises of the planters to reduce their acreage. These orders are more for the old-time standard implements, and less for the high class utensils that have been so extensively bought by the cotton men for several years. Mill supplies have practically ceased going to the cotton country, for the gins are shut down, and the work of the season over. The repairs are postponed until the following autumn.

Sugar planters are buying everything possible—implements, building supplies, vehicles, household Hardware—everything that a prosperous man would purchase to make up for the stinting he has undergone through three or four years. Builders' material is going less to the cotton section than is usual. Into the rice country there is the very smallest possible trade. Bare necessities alone are being sold. Taken in all, it appears that the existent volume of trade is being kept up, largely by the exceptionally large orders to local dealers, by the heavy buying of the cane lands, and by the increased sales to the timber country and to the Spanish Americas.

EVENTS OF THE TWO FORTNIGHTS.

The recent establishment here of one of the purchasing agencies for the Panama Canal Commission has served to increase the interest of local dealers in that opening; and the local commercial bodies are striving to build up interest even more, and to capture for New Orleans all possible trade. Recently, it appeared that several specifications for bids for sanitary fittings and household Hardware, etc., were issued c.i.f. New York, without the option of shipment via New Orleans. Both the Progressive Union and the Board of Trade immediately took the matter up with the Canal Commission offices in Washington, and with Major B. M. Harrod, the New Orleans member on the commission. By telegram, the commission rectified the error, and said that the specifications had been issued by mistake, and that the policy of the commission would ever be to give both ports an equal showing for all the supplies of a Hardware or other kind.

BIG ESTABLISHMENT TO BE ERECTED.

Stauffer-Eshleman & Co., one of the largest establishments in the city, recently purchased a site for $65,000 adjoining their present location in Canal Street within easy reach of the proposed Belt Road, and three trunk lines. On this property, and on the site they already hold, covering half a square, the firm is to erect a modern wholesale Hardware store that will equal if it does not surpass anything of its sort to be found in the South.

The plans are already being drawn, it is understood, and the intentions of the corporation will soon be made public. The site is within a half-square of the historic Custom House, near the river end of Canal Street.

Captain T. J. Woodward, one of the founders of Woodward-Wight & Co., was installed as postmaster of New Orleans several days ago, his appointment having been announced in the issue of the Hardware one month ago.

REMARKABLE BUILDING DEMAND HERE.

It is estimated that fully $10,000,000 is to be spent in building operations in New Orleans during the present summer—of which 5,000,000 will be invested by the Frisco-Southern-Rock Island in the Chalmette terminals, and by the Illinois Central Railroad in replacing the recently destroyed Stuyvesant Docks Terminals.

This is twice the most active season yet passed by the city. This does not include about $2,000,000 worth of building that is as yet solely in a tentative stage, with the chances favorable to materialization. The announced policy of all the contractors holding jobs, is to favor the home material men, and as a result the outlook for the building material suppliers is better than ever before. With two great elevators to be constructed, and nearly two miles of docks to be built, with a great ship-slip to be dug and faced and braced, those who deal in such supplies are more than pleased.

IN A NEW YORK COAL OFFICE.

Telephone Clerk—Dr. Depew just ordered ten tons of coal sent up to his house, but he didn't say what size. I shall have to call him up and ask him.

Bookkeeper—Nonsense! He wants chestnut coal, of course. —*Somerville Journal.*

ECLIPSED.

Helen—Was your bitterest hour the time you discovered that your fiance was flirting with some one else?

Elsie—No, it was when he discovered that I'd been doing the same thing.—*Detroit Free Press.*

POPULAR TALKS ON LAW.

RIGHTS AND DUTIES OF COMMON CARRIERS.*

There are two great classes of common carriers recognized by the law, namely, common or public carriers, and private or special carriers. It is with common or public carriers that we have to do in this talk.

A common or public carrier is one who makes a business of carrying for the general public; a private carrier, on the other hand, is one who carries only on occasion by special agreement. The most familiar classes of common carriers are railroad companies, stage-coach proprietors, expressmen, truckmen, shipowners, steamboat lines, lightermen and ferrymen.

The law holds public or common carriers to a different degree of responsibility than it does special or private carriers. It is usual to say that common carriers are held to be insurers of that which they carry. This nearly expresses the law, for they are liable always for the safety of what they carry, excepting for losses occasioned by an act of God or a public enemy, or unless a special exemption has been agreed upon; and this is so even if the carrier can prove that he was not negligent. A private carrier, however, is not held to so great a responsibility and is only required to give that degree of care which an average person can reasonably be expected to take of his own property; and if he takes this degree of care and a loss comes he is not responsible. An instance will make this more clear. If one who is not in the business of carrying, in passing my house is requested by me to carry a package, for a consideration, and taking it, loses it, he is not liable to me unless I can prove that he did not take the care that a reasonable person takes of his own property, or, as it is sometimes called "reasonable care." If, however, I employ an expressman who is in the business of carrying for the public, and the expressman loses the package, he is liable to me, generally speaking, even although he can prove that he was not negligent at all.

A common carrier is bound by certain other rules of the law. He cannot accept the goods of one customer and refuse those of another, unless upon a reasonable excuse, such as that the goods offered are not of the kind that he professes to carry, as where a tray of diamonds is offered to a truckman, or a boat load of coal to an express company, he can refuse to carry goods beyond his own line or to points not in his route (with some exceptions), as, for instance, an expressman at the depot cannot be held responsible for refusing to carry a trunk beyond the city limits, when he does not hold himself out to the public as covering so wide a territory; he can refuse to carry a dangerous or suspicious article; he can refuse goods known or suspected to be diseased; he can refuse goods where he has not the facilities for handling them, though in general he is held liable if he does not furnish reasonable facilities for handling ordinary business; also where freight charges are not paid in advance, on his requiring them to be so paid. Outside of these exceptions, and perhaps a few others, a common carrier is compelled by the law to accept goods up to the limit of his capacity, from any one who offers them.

A common carrier is a carrier for hire. If he carries goods gratis he is not a common carrier as to those goods. It need not be shown that he receive compensation directly for the service, if in fact a consideration was given, even though it be indirectly.

It is not necessary to one being a common carrier that carrying be his only business, or that the carrying be continued without interruption. It is only necessary that when he does make the offer to carry, it be to the public generally. On the contrary, the law in Pennsylvania seems to hold that even where one not in the business of a common carrier carries goods for hire, he is liable as a common carrier.

An interesting case as illustrating that common carriers cannot be compelled to carry what they do not profess to carry was that in which the Great Northern Railway was sued for refusing to carry a dog. It made the claim that it did not profess to carry dogs for people in general. The court held that as to dogs the company was not a common carrier and could not be compelled to carry them.

In another talk we shall discuss the liability of a common carrier to a passenger for the loss of his baggage.

* Copyrighted by William C. Sprague, president of the Sprague Correspondence School of Law.

HAD HAD EXPERIENCE.

"Now, then," said Mrs. Polk after dinner, "how shall I dress for the theatre this evening?"

"In time to see part of the first act, dear," replied her husband, mildly.—*Philadelphia Press.*

NEW ENGLAND HARDWARE DEALERS ASSOCIATION

The New England Hardware Dealers' Association held its Twelfth Annual Convention March 15th and 16th at Hotel Vendome, Boston. The attendance was large and enthusiastic. In the evening 160 members and guests participated in a banquet at the Vendome. Hospitality being a New England characteristic, the occasion was rendered unusually interesting by it being Ladies' Night, many of them gracing the tables with their presence.

The Wednesday session commenced with a meeting of the old Board of Directors, who laid out the work for the meeting, which at 2.30 p. m. was called to order by President John H. Sayward, of Haverhill, who delivered an address, which the following embodies a part:

President Sayward's Address.

It is with a great deal of pleasure that I extend to you my kindest greetings and bid you welcome to our annual association meeting. I trust that when we return to our several homes we may all feel that much good has been accomplished and

MANY FRIENDSHIPS FORMED

which will lead to the satisfactory adjustment of many differences now existing in our business conditions.

I believe these annual gatherings can be made a source of great benefit to us all, but it depends on you whether or not each is willing to do his share. You all remember the old saying, "In union there is strength," and that applies to us. I want you all to take an active interest in this meeting and feel free to bring up for discussion such matters as may confront you from day to day in your own business, and if there are those present who have successfully solved some of these problems I trust they will gladly give us the benefit of their experiences.

There is a spirit of rivalry between us all, to some extent, in a business way, and it will always remain so until all engaged in the retail Hardware business become members of this association, and in that way become acquainted and

TRY TO WORK TOGETHER.

After becoming acquainted with your competitor you may discover that he is not such a bad fellow as you thought and you may find he is willing to do the right thing when you have talked the matter over together. As a rule, it is the getting together to talk things over where the trouble comes, but get him into the association, where all these things are brought up for discussion, and I think you will find everything sailing along in a very satisfactory manner.

Our association is steadily increasing its membership, but we want the name of every Hardware dealer in New England on our list, for the larger we are the better it will be for us in many ways.

I must not forget to mention the trade journals, for they certainly merit our thanks for the very able manner in which they have tried to promote all association work. The suggestions and criticisms regarding subjects in which we are all interested are certainly an inspiration and help to us and no doubt they are read with much interest by you all.

In closing, I want to say that those Hardwaremen outside the association do not know what they are missing. Tell them about our meetings and get them interested in the work. Perhaps before the next meeting each of us can bring in a new name, and that would mean doubling our present membership. Let us all try and see what we can do along this line.

Secretary F. Alexander Chandler followed with a report showing the association's growth was on the increase, the active membership having almost doubled the past year.

The treasurer, Henry M. Sanders, made a report of the condition of the finances and reported there was shown to be a good balance in the treasury, where last year there had been a deficit.

After a discussion having reference to the great importance of so doing, on motion of J. B. Hunter, it was carried that the New England Association become a member of the National Retail Hardware Dealers' Association, which decision was immediately telegraphed to the national body, which were holding their convention at the same time at Minneapolis.

Officers.

The following officers were elected for the ensuing year:

President—J. B. Hunter, J. B. Hunter & Co., Boston.

First Vice-President—H. P. King, King & Dexter Co., Portland, Me.

Second Vice-President—S. H. Thompson, Thompson Hardware Co., Lowell, Mass.

Secretary—F. Alexander Chandler, Chandler & Farquhar Co., Boston.

Directors—D. Fletcher Barber, Chandler & Barber, Boston; Charles E. Adams, Adams Hardware Co., Lowell, Mass.; Bion C. Pierce, Pierce Hardware Co., Taunton, Mass.; Calvin M. Nichols, the Hoyt Co., Boston; Frank E. Peirson, Peirson Hardware Co., Pittsfield, Mass.

D. Fletcher Barber read a paper on

Why Should I Belong to a Hardware Dealers' Association?

as follows:

In the first place, I should say, because I am a man who lives and works among men and do not wish to be a hermit.

Second, I am in busines to stay, and consequently want to make all I can in a legitimate way.

Nearly every one of us can cite instances of some one in business who does not belong to any association. His favorite statement is, "I have always conducted my business myself and to suit myself, and I think I'll keep on doing so." Look at this man's stock and methods and compare them with some of the men who take the most active part in the work of association, "then choose ye." Why is it that these bright, aggressive, capable Hardwaremen who value their time as nothing else take the time and go to the expense of going to committee meetings and conventions, and by their voice and pen work for the welfare of the association to which they belong? It is because they realize that

CONDITIONS IN BUSINESS LIFE ARE RAPIDLY CHANGING

and that they must use every avenue open for the strengthening and improving of their business. They seem to be more unselfish than the "Stay-at-Homes." Why is this. It is because the more broad-minded a man becomes the more unselfish he will be. The selfish man is the narrow man and looks only at the present. He cannot build a good foundation for his business that will stand the stress of hard times.

Some of these avenues are the getting acquainted with men—manufacturers, jobbers and his brother retailers—learning their ways and

PROFITING BY THEIR SUCCESS AND FAILURE,

brightening up dull ideas and generally sharpening up the whole faculties, helping the association for the general good in matters covering the larger questions affecting the trade in general, such as postal regulations and conditions, credits and insurance, freight rates, rebates and other matters relating to common carriers, general laws affecting all or a particular locality, suggestions and requests to jobbers and manufacturers relating to matters directly affecting the retail trade. These are numerous and will come to us all.

Some of the subjects which appeal to the writer are: The selling by manufacturers or jobbers to the consumer, the simplifying and unifying of the same kinds of goods, finishes and numbers; the lessening of designs, and perhaps kinds, of Builders' Hardware; catalogue house competition, the discussion of stocks, their arrangement and care; help, window display, advertising, side lines, credits, etc.

When the wide-awake dealer has given careful thought and study to these subjects, and rubbed up against several score of bright men, he will return to his store with new thought and energy, and it will be strange if his business does not partake of his spirit of new ideas and spring into new life.

A smoker followed in which manufacturers joined to some extent in the discussion which ensued.

The catalogue house question was brought into play to be talked over. D. Fletcher Barber believed the best way to control the evil was that the manufacturer should sell direct to the catalogue house. F. E. Muzzy of the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., made a few remarks giving his company's experience of the question, and said:

"The catalogue house cannot be driven or legislated out of business, and will illustrate and price well-known Hardware brands. I asked one catalogue house to keep our goods out of its catalogue, and was told that they couldn't do it, for they could get no substitute for certain numbers of our goods. It is for the interest of the jobber and the retailer that the manufacturer sell direct to the catalogue houses and thus control their

Digitized by Google

prices, so that the retail dealer can meet the catalogue house at a profit to himself. The catalogue house would be only too pleased to illustrate and price certain well-known factory brands and sell them at a loss and charge the loss to advertising. The manufacturer cannot block entirely their means of obtaining goods. The minute the prices are cut by the catalogue house, even if the manufacturer is trying to prevent it, the retailer, instead of co-operating with the manufacturer when he most needs the help, will discontinue handling the line until the trouble is adjusted to the retailer's satisfaction. The retailer will not stand behind the manufacturer during his fight. But after the manufacturer has spent his money then the retailers are ready to come to him.

Further discussion followed, in which Mr. Muzzy contended that competition was felt in small towns and suburbs of cities rather than in the large centers of trade.

The smoker was adjourned early to give the members an opportunity to prepare for the reception and dinner. After dinner which followed, President Sayward welcomed the guests and introduced D. Fletcher Barber as toastmaster.

The first speaker was

President Samuel A. Bigelow

of the National Hardware Association who spoke in part as follows:

There never was greater necessity for such an association and there was never more important work at hand. Catalogue house competition and Parcels Post bills in Congress go hand in hand. They are both born in the same brain and are supported from the same funds. The Parcels Post bill has been fought by both the National Jobbers' and Retailers' Associations. It received a temporary defeat in the last Congress, but its supporters are persistent. Every dealer throughout New England should be interested in this work and use his influence to defeat an evil that threatens his very existence. Individual work can do much, but associations can do more.

ASSOCIATION WORK PROMOTES THE TRUE MASONIC PRINCIPLES

of friendship and brotherly love. Meeting your competitor at these social gatherings you can often settle old piques and misunderstandings that have long been a menace to the profits of your business. To be up to date and progressive one needs to mingle with others having similar interests. New thoughts and new ideas will be exchanged to the mutual benefit of both.

It will be granted that the successful Hardware merchant must be possessed of more than average intelligence. To be alert, active and progressive is necessary for the conduct of business as it is done to-day. Bringing these bright minds together and discussing matters of mutual interest must necessarily elevate the standard of business methods.

A MERCHANT WOULD BE VERY DENSE

who could attend a Hardware convention and not carry away new thoughts and new ideas that would add materially to his happiness as well as to his financial benefit. Associations are necessary for mutual protection. Like the United States Navy, which we are told is necessary to insure our peace, so our associations stand as guardians of the rights of their members. Evidence of our united strength keeps away the enemy and exerts a powerful influence.

There never before existed a better feeling between the manufacturer, the jobber and the retailer. Each acknowledges his dependence on the other and works

IN HARMONY TO PROMOTE EACH OTHER'S WELFARE.

New England retailers have been backward in giving an active and earnest support to their association, while in the West new associations are being formed and old ones are prospering and rapidly increasing their membership. The evils the West is fighting are spreading to the East. Complaints are more and more frequent of the encroachment of the catalogue houses.

The remedy is in the hands of the Retail Hardware Dealers' Association.

YOUR ONLY SAFETY IS TO JOIN THE RANKS

and do your share in the fight. An able committee, composed of retailers and jobbers, is thoroughly organized and has your interests in charge, and deserves your hearty support.

It has been said that New England lacks many sources that make nations great. We have neither coal nor ores. We lack a very fertile soil, but we do have a people of lively genius, whose application has made New England prosper marvelously. Let us hope that a little more of this lively Yankee genius may be applied to develop a new interest in the New England Hardware Dealers' Association, and that its membership will soon include every retail Hardware dealer in New England.

The next speaker was H. P. King of Portland, Me., who read a paper on

How to Fit up a Retail Hardware Store

which possessed considerable interest for all present, and was in part as follows:

The most important suggestion in fitting up a Hardware store is this: Make your fixtures fit your goods. Don't buy shelving by the running foot and expect it to be as well adapted to 21-inch Wrenches as it is to 6-in slim taper Files.

First make a plan of your available floor space, then a complete list of goods to be kept in this space. In dividing the space to fit your goods bear in mind the idea of using different methods of keeping different classes of goods and thereby utilizing every available space. For instance, Car Bits will fill a shelf its full depth, but Gimlet Bits, faced up, will waste much room behind them. In such instances, and many others easily thought of, the use of drawers will be found very advantageous, particularly the galvanized iron drawers, sub-divided for small wares, like Bright Wire Goods, Wrought Goods, Etc. Not only does a drawer save space, but it brings to the customer at once numerous sizes from which to select, and avoids the necessity of opening boxes and the possibility of mixing covers in replacing, and also keeps the goods as clean and free from dust as if in their original packages.

One recommendation for drawers not to be treated with slight consideration is the improved appearance they give to the store.

ALL OF OUR BEST STORES IN EVERY CITY

attain much of their reputation and rank by the impression they make on the eye of the general public by their neat appearance, systematic arrangement, and up-to-date fittings. Even the color scheme is not lost, and the difference between a nicely finished natural wood drawer front, with a pull and label holder, and the old style box covered with green paper with a sample of the contents wired on the front is striking.

Wasted space is not the only objection to facing up small boxes on shelves;

IT OFTEN RESULTS IN GOODS BEING MISPLACED,

stock reported out and not found until inventory. In caring for heavy goods not boxed or wrapped by manufacturers, drawers and shelving are not adaptable; bins are more available, either with or without sliding doors, preferably the former. In deciding upon space to be used for shelving, drawers or bins there are these considerations:

1st. Classification of goods; tools, house trimmings, miscellaneous Hardware, etc.

2. Location of goods for convenience in handling and selling, as for instance heavy goods near the floor; goods most often called for nearest at hand.

With the various kinds of rolling ladders now in the market every store can use entire wall space, but light goods would naturally take the top shelves.

Quite as important as the system in the arrangement of goods is the system of sampling them. Any line of goods which includes many sizes or styles ought to be displayed for two reasons —your convenience and the customer's satisfaction.

AS A CONVENIENCE IT SAVES TIME AND LABOR OF THE CLERKS;

as a satisfaction to the customer it furnishes an opportunity for him to see all that you have, and avoids his having a feeling that he might have bought something more satisfactory if he had been shown the full assortment.

A sample with the price attached (marked in plain figures) is also an advantage in aiding the customer to decide quickly on the style of article wanted.

Method in sampling goods is in itself a subject that is worthy of discussion; but one principle ought to prevail in every method —place the samples where they can be easily seen and examined by the customer. Goods on drawer fronts 18 feet from the floor make a display, but of what use are they to the customer unless brought within reasonable distance?

A traveling man with a line of samples is more entertaining than one who shows only a catalogue—the goods speak for themselves, but what persuasive power is there in woodcuts? Why do all Hardware stores sample their line of Pocket Knives and Scissors? How much business would be possible if a few samples were displayed and the other patterns shown only on request of a customer? The principle

APPLIES TO ALL LINES OF GOODS WITH EQUAL EFFECT,

but the execution of the idea may be extended more or less according to the space to be used.

Customers waiting to be served often see articles that interest them and buy the same, having had no intention of making such a purchase when coming into the store. In cities having a foreign population some customers can only make their wants

Digitized by Google

known by pointing to the article wanted; they have no knowledge of Hardware terms and often cannot speak our language.

We all know the value of window displays and some one has referred to show cases as "silent salesmen." The public like to look; give them a chance, and provide show windows, wall cases, floor cases, sample boards, either hung like doors or arranged as slides in cases; floor stands and other special devices for displaying particular lines of goods. Here is the opportunity for one to show ingenuity and individuality, to bring into action the result of observation and study, and to produce the best that can be provided under the circumstances, be they restricted or otherwise.

The subject of fixtures for show windows deserves much careful thought, for upon these fixtures depends largely the success and attractiveness of the display. The windows are used for such a variety of goods that many devices are necessary, such as hanging shelves, shelves or brackets that may be adjusted to different heights and angles, swinging wall brackets and various forms of false bottoms to be used as the window dresser may see fit. Mirrors add much to the attractiveness of any store window, and may be used with good effect in displaying certain lines.

Show cases for wall or floor are very important adjuncts to the list of fixtures, and the interior fittings of these cases are of endless variety, and should be selected for their adaptability to the many changes in the goods to be shown in the case from time to time.

ONE OF THE ELEMENTS OF SUCCESS

in the modern department stores is the fact that they have extensive floor space and numerous counters with goods exposed, so that the customer may examine them and the clerk can make a sale without climbing a ladder, reaching down behind the counter, or going into the cellar or some other part of the store to get the goods wanted.

Does it pay to fit up a Hardware store?

CONVENIENCES IN A STORE ARE LIKE COMFORTS IN A HOME.

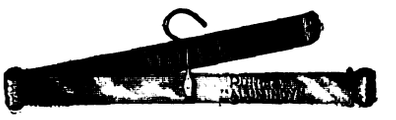
Why is it not as necessary to have one as the other if you are to enjoy life? As to the results financially, there is no question of success; time proves it in various ways—larger sales, better profits, the commendation of the public, the congratulations of your regular customers, greater interest among your clerks and a feeling of conviction in your mind that the Hardware business is not altogether a grind, but is really worthy of a man's best thought and furnishes many an opportunity for indulging in higher aims and loftier ambitions.

A lady orchestra played during dinner, and also between the speeches.

Regrets were received from Hon. Herbert L. Parker, Attorney-General of Massachusetts; R. R. Williams, Hardware editor of the *Iron Age*; President Charles E. Adams, of the Massachusetts State Board of Trade, and George W. Corbin, of the Corbin Cabinet Lock Co.

The dinner was kept up till 10:30 P. M.

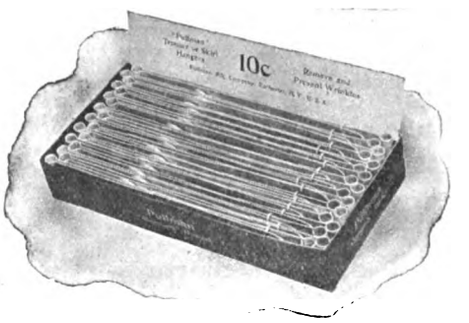
The proceedings on Thursday were given over to the social side of affairs, one of the features being a visit to the Automobile Show as the guests of the management.



THE MASTERY OF DETAILS.

Among the factors counting for much in the business world is detail. Subordinates who have an eye to the future and to an improvement of their present condition, says The New York *Commercial*, should not underestimate the value of painstaking service. While there is only one right way of doing things, employers are often forced—for a time, at least—to accept and pay for unsatisfactory work on the part of employees. It ought to be borne constantly in mind that the moment an employee enters the realm of industry he comes into active competition with others who probably are his equal in ability, while others undoubtedly excel him in many directions. To rise from the ranks of the great industrial armies of to-day the ambitious subordinate must display qualities that distinguish him from the average employee.

In speaking recently of the worth of detail as a rung in the ladder of success, a man who now occupies a commanding position near the top in the administration of a great life insurance company had this to say: "When I began as a clerk at a small salary I endeavored to perform my routine with such care that every paper leaving my desk should be in perfect condition—no omissions or anything wrong that would necessitate the return of the paper to me. After a time I earned a reputation for exactness that soon resulted in my advancement to a more desirable position. From one grade to another I studied details; I have made that my hobby, if you please; and I feel sure that my success, in part at least, is due to my superiors' appreciation of this element in my business make-up. My advice to subordinates who want to climb up the ladder is to make the "detail" habit a conspicuous one. Let everything you do be thorough, so that nothing is left to be desired in whatever line you are engaged."

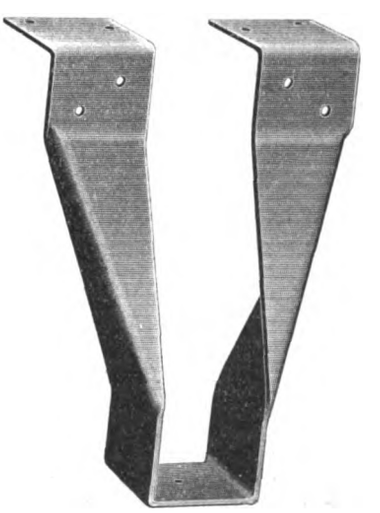


NO. 7 "PULLMAN" TROUSER AND SKIRT HANGER.

The Pullman Manufacturing Co., Rochester, N. Y., are placing upon the market the No. 7 "Pullman" Trouser Hanger which

NO. 7 "PULLMAN" TROUSER AND SKIRT HANGER.

we illustrate herewith. This useful appliance is made from a new metal called Alluminoy which will not rust. It is a flat hanger, taking up the smallest amount of space possible. It is made in one piece and will carry the heaviest garments. In



BOXED FOR COUNTER DISPLAY.

traveling, it can be carried in a dress suit case or bag and is always ready for use. Takes the bag out of the knees and creases the trousers properly, while for skirts it is well adapted for holding them without wrinkling, as the weight is evenly divided at the band. The No. 7 hanger is boxed for counter display.

LANE BROS.' CO. JOIST HANGERS.

Lane Bros.' Co., Poughkeepsie, N. Y., are adding Joist and Timber Hangers to their product this Spring, bringing out a full line of the design illustrated herewith. As may be surmised the hanger is made from mild steel bar stock of uniform width and thickness and is therefore of uniform tensile strength

LANE BROS.' CO. JOIST HANGERS.

throughout its length. It is formed of comparatively wide stock, to give broad bearing surfaces, by merely folding the metal, no part being twisted or stretched by the process of manufacture. The hanger fits snugly against the sides of the joist and beam and affords good nailing surfaces on both. The supporting hooks are parallel thus lending themselves to various convenient modifications of this part of the hanger, such as upwardly turned ends for setting in brick work, downwardly turned ends for hooking over timbers or "I" beams, or joining together to make double hangers as when a joist is supported on each side of a beam.

OUR BRITISH LETTER.

(From Our Special Correspondent.)

London, March 13, 1905.

THE I. F. A. AND ITS PRESIDENT.

The officials of the Ironmongers' Federated Association have been busy during the past month carrying out several important matters affecting the welfare of the trade at large. It is pleasing to be able to note that the association movement in Great Britain is kept fully alive by the enthusiasm of several active and intelligent Hardwaremen, who have sufficiently large minds to recognize that while promoting the best interests of the Hardware trade in this country, they are also bettering their own positions, and improving the conditions under which they carry on retail trading. Unfortunately, the work of the Central Board has been somewhat clouded by the precarious health of the venerable president of the I. F. A., who at the present moment is lying dangerously ill at his residence, in the quaint old town of Poole, in Dorset. W. J. Bacon, who has had a life-long experience in the mysteries of Hardware, has, during the last few years, shown remarkable enthusiasm on behalf of the association work, and much of the progress which has taken place during recent times is owing to his untiring energy, and the initiation of schemes which have been so well carried out and engineered by Secretary Smith.

ASSISTANTS' EXAMINATION IN LONDON.

The scheme of the examination of assistants which was inaugurated last year at Manchester, by which the I. F. A. arranged to grant certificates of merit to ironmongers' assistants who were able to pass a certain standard, has proved very successful, and has already been beneficial to the nineteen candidates who carried off prizes and awards at the first examination. On March 2nd the second annual examination was held in London. Alderman Arthur Pond, the president of the London & Suburban Ironmongers' Association, was successful in obtaining permission to use Ironmongers' Hall on that occasion, and thus once more the ancient Guild of Ironmongers has been brought into touch with the Hardwaremen of the present day. The old Court Room of the hall and the Beadle's Long Parlor, which rooms were placed at the disposal of the association, were appropriate places for the apprentices and assistants of the present day to undergo a test of competency in the trade with which they have thrown in their lot. The examination was conducted with due decorum, the three examiners being, Councillor H. S. Timpson of Ealing, H. Haward of Tunbridge Wells and Percy Reed of Brighton, three men well acquainted with the different branches of Hardware, having a wide experience of the peculiar conditions under which retail ironmongery trade is conducted, making them well fitted for the post of examiners. The compulsory subjects included sixteen questions, eight of which had to be attempted, four, which were supposed to incorporate the chief vital features which go towards making up a competent assistant, were obligatory. In addition to the paper examination, the candidates were put through a severe test as to their knowledge of Hardware trading, by the examiners, in a somewhat lengthy *viva-voce* examination. The results of the examination which was entered into by twenty candidates, all of whom exhibited a smart appearance, and showed keen appreciation of the advantages of winning the coveted certificate, will be made known in due course.

IRONMONGERS AND THE CYCLE TRADE.

From time to time efforts have been made to induce ironmongers to take greater interest in the sale of cycles with more or less success. Unfortunately when the manufacture of bicycles became one of the standard industries of this country the Hardwaremen of the day took but little interest in this particular branch of the trade, and allowed an entirely new class of traders—cycle agents so-called—to spring up. However, during the last few years there has been a marked tendency towards taking over the cycle trade shown by retail ironmongers; and at the present time manufacturers, many of whom appear to be tired of selling to agents, so many of whom are of but mushroom growth, and have no fixed location, are making a strong bid for ironmongers' trade, and are appealing to retail Hardwaremen, pointing out to them the importance of this particular branch, and showing the advantages of coupling the cycle business to Hardware, especially in country districts. The sale of cycles includes much besides simple machines; indeed, the numerous accessories now considered necessary by cyclists embrace many side lines which naturally fall in with the general ironmongery business. The widespread use of motor cars and the employment of motor vehicles for commercial purposes by traders in all parts of Great Britain, has opened up a wide field for energetic traders, including the sale of petrol, motor lamps, and the accessories required in the up-keep of such vehicles. The whole of these goods when grouped together make a branch, the importance of which cannot well be overlooked. It is therefore satisfactory to note that Hardwaremen are more than ever turning their attention to this department, and that in all probability during the next year or so a very large number of ironmongers, who have hitherto held aloof from this trade, will take up a position among the cycle dealers and suppliers of motor accessories in this country.

THE CARPET SWEEPER QUESTION.

It is astonishing how, from time to time, questions arising out of very small beginnings seem to monopolize the whole thought of the trade, both manufacturers and retailers. This has been the case in the dispute which has been going on for some time past in connection with the carpet sweeper question. The whole matter is somewhat complicated, but may be briefly summed up in a few words. The Bissell Carpet Sweeper Company of America and Entwisle & Kenyon of Accrington, who respectively make "Bissell" and "Ewbank" sweepers, are the two leading manufacturers of these domestic necessaries, and "Bissell" and "Ewbank" sweepers may be seen in almost every ironmonger's window. The competition between the large storekeepers and retail ironmongers has always been keen, and James L. Pollitt, the British manager of the Bissell Carpet Sweeper Co., has been a firm friend to retail ironmongers in his perseverance in the price maintenance policy; carpet sweepers being the first price maintained goods in connection with the ironmongery trade. The grievance which has now sprung up consists largely in the fact that many of the large storekeepers in their endeavors to undersell retail ironmongers have forced the manufacturers to provide them with a class of sweeper cheaper than those which were price maintained. Several leading members of ironmongers' associations took up the question and made strenuous efforts to discover the origin of these low-priced sweepers, which bore striking resemblance to the well known patterns made by both Entwisle & Kenyon and the Bissell Carpet Sweeper Co. The matter was finally taken up by the venerable president of the I. F. A. and Secretary Smith, who were successful in arranging a meeting between the two leading manufacturers, resulting in an amicable settlement, and a statement of fact, which it is believed will provide a satisfactory solution of the problem, and enable the manufacturers to price maintain the goods sold by ironmongers; the chief point desired being that any sweepers sold at a low figure shall be distinctly different and marked in such a manner that they cannot be confused with price maintained goods.

GROCERS THINK IT AN OPPORTUNE TIME TO TAKE UP HARDWARE.

The members of the grocery trade, many of whom are closely allied with the large storekeepers in this country, have always dabbled in ironmongery—but only to a very limited extent. The connection between grocers and Hardwaremen is more apparent in the larger shops of country villages and rural hamlets, where the local grocer makes no secret of his desire to sell brushes, cleaning materials, and sundry articles of ironmongery, especially tinware and culinary utensils. The town grocer, however, has hitherto held aloof from any goods other than kitchen sundries, although the gradual introduction of the prize bonus system which has been introduced by many of the smaller storekeepers and grocers has led to the so-called free gifts of coal boxes, lamps and other sundry Hardware articles, to the injury of retail ironmongers. Lamps may be instanced as one of the features in which the grocery and Hardware businesses overlap; indeed the sale of lamps has become so important a feature in country grocers' businesses that the Trades Markets and Exhibitions Ltd., who hold an annual grocery exhibition at the Agricultural Hall, London, have for several years past offered a prize for the best cheap safety lamp, one that will prevent the possibility of accident and minimize the risk of using petroleum. According to many of the leading authorities in the grocery world that trade now considers that the time is opportune for taking up the sale of ironmongery to a much greater extent, and there are indications that ere long grocers will add ironmongery departments just as in the same way they have been in the habit of taking on glass, china and earthenware, which trade, it may be remarked, has always been an uncertain department, apparently the property of either grocer, draper, Hardwareman or any other retailer who chooses to take it up.

HELPING THE DEALER.

The Pike Manufacturing Co., Pike, N. H., have earned the everlasting gratitude of retail dealers and at the same time, no doubt, an increase in orders by their recent action in placing in the dealers' hands display cases containing Pike goods, so arranged that they practically act as their own salesman. In putting out these boxes they are doing what so many manufacturers fail to do—helping the dealer sell goods—and in their particular line of goods this action should be especially pleasing to the dealer, inasmuch as few dealers are—or, for that matter, could be expected to be—well posted on the uses of each article in Pike's varied assortment of edge producers.

In announcing the "coming out" of the new boxes Pike Manufacturing Co. says:

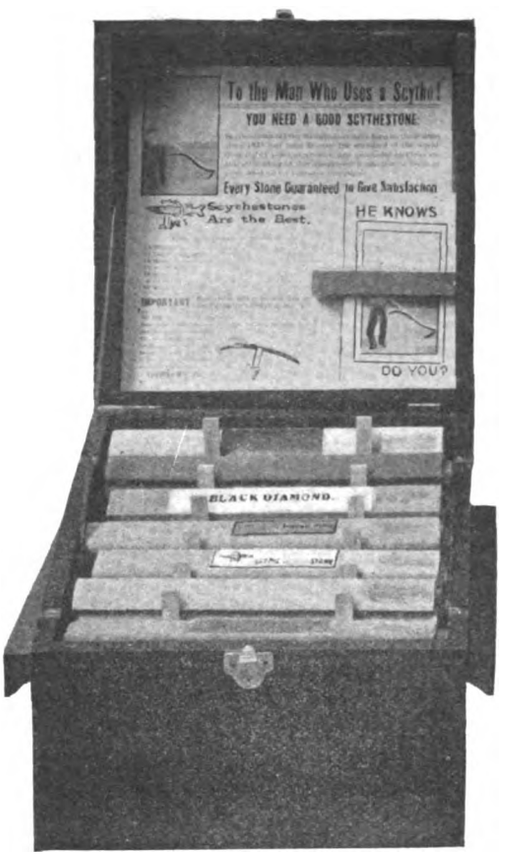
"Realizing that the average retail dealer is not carrying a complete assortment of sharpening stones, that perhaps he is not always giving the stock he has the necessary display to induce sales, and realizing that an assortment of any class of goods in an attractive display box is preferred by all dealers, we have been led to make an innovation in our line of business, by offering on the market an Assorted Oilstone Box and an Assorted Scythe-

ASSORTED OIL STONE BOX.

stone Box. We believe these are the best things we have ever put on the market, and that they will very largely increase your trade and profits in sharpening stones."

The Assorted Oilstone Box, which we illustrate herewith, is attractively gotten up, and contains an assortment of oilstones that should readily meet with sale. It is not too large to be placed on a counter, its measurements being 16½ in. long by 11¾ in. wide by 9½ in. deep. Each case contains a supply of printed matter for free distribution. A box of this kind enables the dealer to carry a small, choice assortment of goods, attractively displayed. To get the same assortment of goods in any other way, at equal prices, would entail a larger investment, take up more valuable room on the shelves or counter, and even then, not be in as attractive shape. Each stone is plainly marked with selling price, name and purpose for which it is best adapted, thus enabling the dealer to sell, and the purchaser to buy, intelligently.

In the "Oilstone booklet," a liberal supply of which accompanies each box, is the following:



"The first point to be considered in selecting an oilstone is the purpose for which it is required; many mechanics make the common mistake of expecting one oilstone to answer all purposes. It would be just as reasonable for a carpenter to use a coarse-tooth saw on fine cabinet work, as to expect a coarse-grained, fast-cutting oilstone to impart a fine razor edge."

The Oilstone box contains 66 different articles, comprising 26 different varieties of oilstones. The list of articles, with retail price of each, is plainly printed on the inside of the cover, which, when the box is open, is in plain view of the customer.

The Assorted Scythe stone box, which is also illustrated herewith, is on the same general style as the Oilstone box and measures 10½ inches long by 12 inches wide by 10½ inches deep. This box contains one dozen each of six different kinds of scythe stones and eight "Corundum" scythe stones. In the inside of the cover is an attractively printed card, on which is set forth the names and uses of the different scythe stones and the retail prices of each. A more detailed description of these goods is given in the folders, a supply of which is carried on the inside of the cover. The introduction to this folder is interesting; it reads as follows:

"Eighty-two years ago, way back in the hills of Old New Hampshire, was discovered a ledge of rock, the pieces of which when used on a knife or scythe, demonstrated its wonderful cutting qualities. A primitive mill was erected; women and children worked at the rubbing wheels shaping the stones for the market. When finished the stones were peddled about the surrounding country and even were sent down the Connecticut River to the great city.

"Year by year their name and fame spread; the little mill was supplanted by a larger one; this in turn gave away to another and still the sale of this remarkable stone increased. Year succeeded year and with each succeeding year came larger sales. One line of Scythestones was not sufficient to meet trade demands. From other parts of New Hampshire came stones of different grit, but of equal merit. From across the river in Vermont came another

ASSORTED SCYTHE STONE BOX.

grit. The little business, started in such a modest way, developed year by year; the Scythestones were sent all over the world. To-day the name and fame of Pike's Scythestones are known everywhere. So out of the modest and primitive industry started in 1823, has grown a world-wide business.

"Goods that have stood the test for more than three-quarters of a century and are to-day recognized as the world's best product in their line, are the goods you want to buy, and buy again. You may be sure that a reputation built up by the unremitting efforts of so many years will not be jeopardized by lending itself to any article of inferior merit. On this we base our claim to your confidence."

These boxes are being placed in the hands of the retail dealers on ninety days' trial, with a discount of 2% for cash within thirty days and at a price that leaves a good profit for the dealer. Every stone in every assortment is guaranteed to give satisfaction to the user, and all unsold or unsatisfactory goods may be returned to be exchanged for new goods or for whatever has been paid for them.

Taken altogether, the Pike Manufacturing Co. is offering the retailers a "square deal" in every particular.

SAXON INDUSTRIAL SCHOOLS.

There are seven industrial schools in Saxony which have been founded for the sole purpose of training young men to become competent and skillful locksmiths and blacksmiths. These schools are supported in the first instance by the blacksmith and locksmith guilds of Saxony. They also receive annual subventions from the Saxon Government, and private individuals from time to time aid them with voluntary contributions.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bellingham, Wash.—The Blake Hardware Co. has been incorporated with a capital stock of $9,500.

Emmetsburg, Iowa.—The Palo Alto Hardware and Implement Co. has been incorporated. Capital, $15,000. Incorporators: John Peters and others.

Essex, Iowa.—Earl McClain has engaged in the Hardware and furniture business.

Groesbeck, Tex.—The Groesbeck Hardware Co. has been incorporated. Capital stock, $3,000. Incorporators: Lester L. Brown, Young Jones and Osborne Kennedy.

Kankakee, Ill.—Edward Irps, Jr., will open a Hardware store here in a short time.

Middletown, N. Y.—A company, composed of George A. Swalm, Sr., George A. Swalm, Jr., and Charles C. Foss, has been incorporated to carry on the Hardware business of G. A. Swalm & Son. The new concern will be known as George A. Swalm & Son Co. The capital stock of the company is $40,000 and the Board of Directors is composed of all three gentlemen comprising the company.

Muskegon, Mich.—The Alberts Hardware Co. has been incorporated. The capitalization is $5,000, with Abner Alberts, John F. Murdock and Mrs. Abner Alberts the shareholders. The company has opened a Hardware store at 46 Pine Street in the Newton Block.

Oakland, Iowa.—William Jackson has engaged in the Hardware and implement business.

Pittsfield, Mass.—The Hardware & Mill Supply Co., 126 North Street, has been incorporated. President, J. A. DeCamp; treasurer, W. S. Smith. Capital stock, $15,000.

Seattle, Wash.—K. R. Stewart has engaged in the Hardware and crockery business.

Seattle, Wash.—The Enterprise Plumbing and Tinning Co. has been incorporated. Capital stock, $6,000.

Somerville, Mass.—A. E. Salt, of Melrose, will shortly open a Hardware and plumbing store on College Avenue.

Springfield, Ohio.—The Wilbur F. Tuttle Hardware Co. has been incorporated. Capital, $15,000. Incorporators: W. F. Tuttle, L. Floyd Routzahn, Silas W. Printz, C. W. Minnich, C. O. Hayes and W. J. Stickney.

Twin Falls, Idaho.—H. J. Johnson has established himself in the Hardware and implement business.

Tigerton, Wis.—The L. C. Arps Hardware Co. has been incorporated. Capital stock, $15,000. Incorporators: H. F. Leverenz, Clara Leverenz, L. C. Arps.

Whitney's Point, N. Y.—Philo H. Landers has opened a new Hardware store and has received a fine stock of goods.

York City, Pa.—M. L. Bingley, formerly with the Baltimore firm of Martin Kesmodel, Jr., has removed to this city and has opened a first-class cutlery store at 131 North George Street. Mr. Bingley will make a specialty of grinding, sharpening and honing.

Changes.

Adairsville, Ga.—Rosser Thomas has bought out the interest of Thomas Lewis in the Lewis & Hightower Co. and has taken charge.

Ashland, Ky.—The Ashland Hardware Co. is moving its stock of goods into its new quarters in the O'Kelly Block, on Fifteenth Street.

Attica, N. Y.—The Hardware business of the firm of Ballsmith & Pilgrim, of this village, has been sold to Nicholas Reding.

Augusta, Me.—The Brooks Hardware Co. are preparing for an increase of business by building a new storehouse 40x60 feet.

Avard, Okla.—Henry Pankratz has succeeded to the Hardware business of Pankratz & Leech.

Baltimore, Md.—Lyon, Conklin & Co. have just taken possession of their new and commodious warehouses in Nos. 13, 15, 17 and 19 Balderston Street.

Barnesville, Kan.—The Barnesville Merc. Co. has purchased the stock of Hardware, etc., of Elias Merrell.

Brazilton, Kan.—C. F. Stockton has purchased the Hardware business of F. J. Boller.

Broken Bow, Neb.—Martin J. Bates has purchased the interest of Eli Armstrong in the Hardware and implement business of Rockwell & Armstrong.

Bryant, S. D.—E. S. Dunn & Co. have purchased the Hardware and implement business of Bork & Hansen.

Caldwell, Kan.—William Scribner has succeeded to the Hardware business of T. A. Scribner.

Candor, N. Y.—A. C. Hart has sold his Hardware store to L. J. Hollister, of Caroline. Mr. Hollister has taken possession and is conducting the business.

Chancellor, S. D.—H. P. Temple has sold his Hardware business to Winne & Hornick.

Clayville, N. Y.—George H. Greene has sold his Hardware stock and good will to Edward F. Bohan.

Coggon, Iowa.—C. I. Fawley has succeeded to the Hardware business of Fawley & Wink.

Corinth, N. Y.—The firm of White & Potter, who have done a retail Hardware and plumbing business on Palmer Avenue, have dissolved by Mr. White purchasing Mr. Potter's interests. He will conduct the business as before.

Cortland, N. Y.—The Hardware firm of Buck & Lane, which has been doing business here for the past fourteen years, has been dissolved, Mr. Lane leaving the firm. The business will be continued by the senior member.

Dwight, Kan.—Bert Cold has purchased a half interest in the Hardware business of C. L. Holschouser.

East Bloomfield, N. Y.—Charles Donohue has sold his Hardware and agricultural business to Frank Forsyth.

Elmo, Kan.—A. L. Schroeder has succeeded to the Hardware business of Hoffman & Gutsch.

Fort Scott, Kan.—Sherwood Drake has bought out his father's interest in the Drake Hardware Co and he and his brother Charles as equal owners will conduct the business.

Galesburg, Ill.—E. H. Youell has purchased the Hughel Hardware store on Main Street and will conduct the business in the future.

Glasgow, Mo.—E. E. Rall has been succeeded in the Hardware business by Rall & Burkhardt.

Goff, Kan.—A. R. Howland has purchased the Hardware business of Berridge Bros.

Harvard, Neb.—Hill & Tucker have sold their Hardware business to Mr. Patterson.

Heburn, Iowa.—Brownlee Bros. have sold their Hardware business to Winter Bros.

Hillsboro, Iowa.—Mowery & Lewis have sold their Hardware business to G. W. McReynolds.

Humboldt, Neb.—Wozab & Ford have been succeeded in the Hardware and furniture business by J. F. Wozab.

Jamesport, Mo.—C. M. Potter has sold his Hardware and implement business to Abbond & Bond.

Knox City, Mo.—M. L. Cochrum has purchased the Hardware business of Wolter Bros.

Lake Odessa, Mich. — Bernard S. Schmehl, of the firm of Scheidt & Schmehl, has disposed of his interest in the general Hardware and stove business to his partner, James S. Scheidt, who will continue under his own name.

Lexington, Ky.—The Hardware store belonging to Houlihan Bros., on West Main Street, has been purchased by Payne & Beard, and the two stores will be consolidated. The purchasers have conducted a Hardware store on North Broadway for a number of years and have built up a large business.

Lee, Mass.—Willis A. and Charles H. Pease have bought of Mrs. M. H. Pease, Mrs. H. Williams and Miss Clara Pease, of Springfield, their interest in the M. H. Pease & Co. Hardware business, and will conduct it under the name of the Pease Hardware Co.

Limerick, Me.—W. W. Gayne, of this city, has purchased the Hardware stock formerly owned by the late John P. Fogg.

Madrid, Iowa.—E. A. Stover has sold his Hardware business to George Hulton.

Manitan, Colo.—James Benson has sold his Hardware and furniture business to T. H. C. Hilligos.

Manlius, N. Y.—Henry Peters has sold his Hardware and plumbing business to his brother, William, and will move to Syracuse.

Mt. Vernon, Tex.—Hill & Morris have been succeeded in the Hardware and furniture business by G. P. Hill.

Ontario, N. Y.—Samuel Hogeboom has bought Mr. Eaton's share in the Hardware business of Barker & Eaton. Mr. Eaton will go to Perry, where, in partnership with Eugene Sanders, he will conduct a Hardware store.

Osceola, Neb.—The Osceola Hardware & Furniture Co. has changed ownership to the extent that H. F. Henderson retires, selling his stock to Carl M. Nelson, who moves here from Stromsburg.

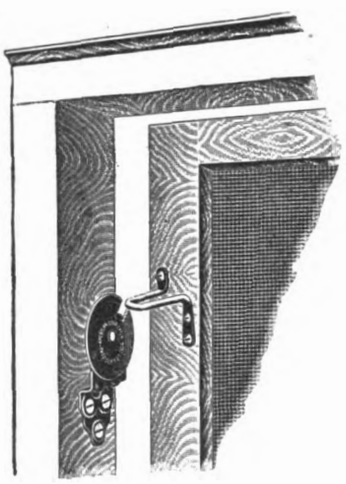
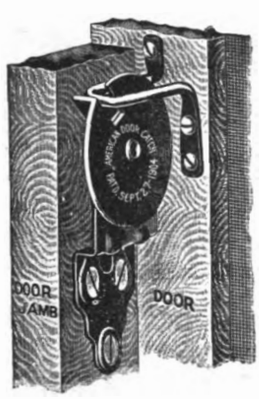
What is Next in Importance To Your Screen Door Trade?



The American Door Catch.

Here's Our Reason:



The American Door Catch is a durable, all-metal catch so simple in construction it *can't* get out of order.

It works quietly and accutraely, catching the door on the return swing and holding it firmly against the casing. On opening the door the catch releases its hold easily. It won't lock, bind nor allow the door to rebound.

Each catch is packed in an envelope with necessary screws, instructions and a cardboard Templet. With this templet and a screw driver a woman can attach the American Door Catch as easily as an experienced carpenter. The American Door Catch is adapted for cupboard doors, storm doors or wherever a door is to be kept closed.

See the Circle Action
It goes over the center

Packed 12 envelopes in a handsome carton with swing cover showing descriptive display cards.

A Working Model will be sent express prepaid, no charges whatever, on request.

Write to-day.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Anderson, Ind.—The Hill Tool Co. and the Standard Manufacturing Co. have pooled their interests and reorganized as the Hill-Standard Manufacturing Co. Hugh Hill heads the directory. Capital stock, $20,000.

Appleton, N. Y.—Bacon & Co. has been incorporated. Capital, $10,000, and directors: John Bacon, Henrietta S. Bacon, Appleton; H. V. Stoddard, Buffalo.

Battle Creek, Mich.—The Koalandair Furnace Co. has been incorporated, with $10,000 capital.

Birmingham, Ala.—The Birmingham Stove and Foundry Co. has been incorporated by H. F. Maus, J. M. Jolley, Ed. M. Chestnutt, J. B. Gibson, W. C. Estes, C. E. Thomas and T. F. Wimberly. Capital stock, $25,000. President, J. B. Gibson; vice-president, H. D. Maus; secretary, E. C. Chestnutt, and treasurer, J. M. Jolley.

Bridgeport, Conn.—The Bridgeport Wire Goods Co. has been organized. The company will begin business with a capital stock of $2,500, all of which has been subscribed.

Chicago, Ill.—The Murphy-Dugger-Clark Co. has been incorporated. Capital, $10,000. Manufacture construction Hardware. Incorporators: John B. Murphy, Samuel C. Dugger, Marshall Clark.

Chicago, Ill.—The S. & S. Automatic Grate Co. has been incorporated. Capital, $15,000. Manufacture grates. Incorporators: Frederick Schneck, Hubert Straeten, Harry Wolterding.

Columbus, Ohio.—The Uneedme Tool Co. has been incorporated. $5,000 capital stock. Incorporators: Joseph Schonthal, C. M. Taylor, M. M. Phenics, Charles R. McCauley and C. A. Howell.

Canton, Ohio.—On February 28th a local company, composed of Mayor Hanlon, J. L. Andrews, Lewis Thompson and Sheriff Dewolf, secured the territorial rights for all the States east of the Mississippi River and they will at once make arrangements for the manufacture of the gate in this city and will place it on the market. They expect before long to keep a large force of men busy in the manufacture of this article, and to that end will look about for a suitable location for their factory.

Eddystone, Pa.—The High Duty Saw and Tool Co. is the name of a new corporation which has been incorporated to manufacture high grades of tools.

Ft. Branch, Ind.—The Ft. Branch Implement Co. has been incorporated. Capital stock, $15,000. Directors, Hugh D. McGary, James D. Foster and C. W. Slinkard.

Ft. Wayne, Ind.—D. F. Valentine will engage in the manufacture and sale of a new oil gas stove.

Galesburg, Ill.—The Galesburg Grain Separator Co. has been incorporated. Capital, $25,000. Manufacture agricultural machinery. Incorporators: Bates C. Benson, H. M. Chase, O. J. Colton.

Greenfield, Mass.—Conant & Donelson, manufacturers of screw plates, have incorporated as the Conant & Donelson Co., with an authorized capital stock of $25,000.

New York, N. Y.—The Arthur Janes Co. has been incorporated to manufacture stoves, etc. Capital stock, $10,000. Incorporators: A. Janes, T. Smith, T. Faber, all of New York.

Louisville, Ky.—The Ohio Falls Tools Works has been incorporated. The capital stock is placed at $20,000. The incorporators are: Herman Berner, Charles Ferst, Joseph L. Haag and B. T. Gividen, with twenty-five shares each.

Marinette, Wis.—A large Brush and Broom factory and a woodenware factory are to be erected and managed by the Sawyer-Goodman Co. It is expected they will be in operation by next Fall.

Minneapolis, Minn. — The Minnesota Cream Separator Co., Minneapolis, has been incorporated, capital stock, $50,000, to manufacture creamery machinery and separators. Incorporators, officers and directors: Willard A. Odell, president; LeRoy B. Munuger, vice-president; George Dirimple, secretary and treasurer.

Mt. Clemens, Mich.—The Howard C. Wade Co. has been incorporated to manufacture and sell furniture, Hardware, etc. Capital stock, $71,000.

New York, N. Y.—The Tear and Key Tap Can Co. has been incorporated. Manufacturers of tools, etc. Capital, $10,000. Incorporators: R. M. Farrios, J. Brewster, E. Gentzel, all of New York.

New York, N. Y.—The Simple Machine Co. of America has been incorporated. Hardware. Capital, $50,000. Directors: Aaron Winkler, W. M. Murphy, Edward Coleman, New York.

Newark, N. J.—The Cre-Faitoute Co. has been incorporated. Office, 17 Orchard Street. Agent in charge, Mortimer A. Johnson, Jr. Capital stock, $50,000. Incorporators: William P. Coe, Moses W. Faitoute, Mortimer A. Johnson, Jr. The company is to manufacture and deal in Hardware.

North Sydney, N. S.—The A. C. Thompson Co. has decided to erect a nail factory, with a capacity of from 75,000 to 100,000 kegs a year. They will locate their plant in Sydney or North Sydney. They will also install a wire drawing plant which will enable the company to add other nail producing machines.

Providence, R. I.—The Eastern Nail Co. has been incorporated. Incorporators are Charles H. Tappen, James S. Kenyon and Claude A. Ball. The purpose of the corporation is for engaging in the business of manufacturing, buying, selling and dealing in nails, Hardware and other articles.

Rochester, N. Y.—The Economy Separator Co. has been incorporated. Agricultural implements. Capital, $100,000. Directors: W. H. Wray, C. F. Wray and Cornelia F. Wray, of Rochester.

Springfield, Ill.—The Mattoon stove foundry has commenced operations. The plant that cost the people of that city several thousand dollars, and which for a while resembled a white elephant, is now at work producing stoves. Ex-employees of the factory who were working in Michigan have arrived in the city and were given their old places.

St. Paul, Minn.—The Manteufel Refrigerator Co. has been incorporated. Capital stock, $10,000. Incorporators: William Manteufel, Benjamin B. Shipman and Matthew W. Carpenter.

Youngstown, Ohio.—The Ruth Washing Machine Co. has been incorporated, $10,000, by John S. Ruth, J. B. Kerr, Ellsworth Owens, Frank Miller and John Owens.

Changes.

Auburn, N. Y.—The capital stock of the Columbian Rope Co. has been increased from $600,000 to $1,000,000.

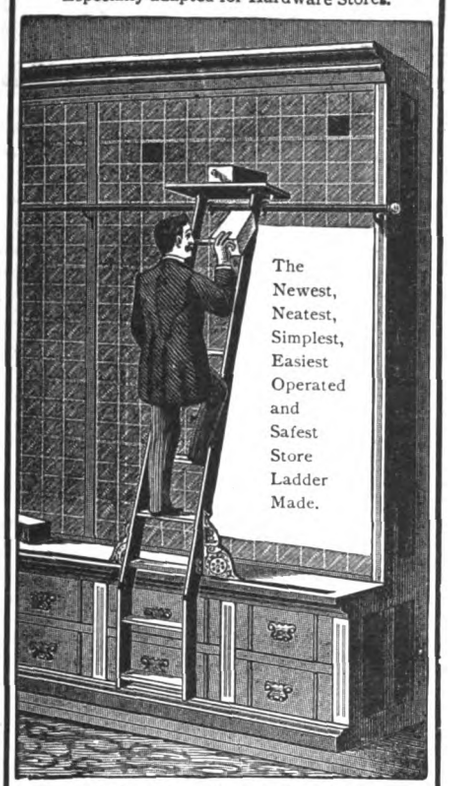
Bradford, Pa.—The affairs of the W. R. Case & Son Cutlery Co. have been settled, and the company has leased a room in the Hazelton Block on Mechanic Street, which will be used as a temporary office and wareroom until the new factory on Bank and Howard Streets is completed. Messrs. Case and son have at the present time over $30,000 in finished stock and good accounts with which to commence business. The greater part of the sum mentioned is in goods which will be brought to Bradford from Little Valley and Eldred as soon as the local store has been prepared to receive it.

Chicago, Ill.—A new plant for the Joy stove works is to be built at Eighteenth Place and Western Avenue. It will be three stories high, 75x150 feet, of brick and stone, and will cost $25,000.

Columbus, Ohio.—The United States Hoe and Tool Co. has bids under consideration for the erection of four factory buildings, having a total length of 700 feet and an average width of 40 feet. When completed the plant will employ in the neighborhood of 150 men. The work of construction will start at once and the factories are to be ready for occupancy on July 1. Electric power will be used throughout the plant.

Detroit, Mich.—The Art Stove Co. has increased its capital stock from $200,000 to $350,000.

Fremont, Ohio.—J. H. Diedler, who has been selling files under the name of the Buckeye File Co., has sold out to local parties. This is only the start of a mammoth bill file combine, which will merge all the smaller file companies into one concern and manufacture bill files and account pads on an extensive scale.



Greenfield, Mass.—The Goodell-Pratt Co., maunfacturers of mechanics' tools, has recently opened a store in London, where a complete stock of its products is carried in No. 149 Queen Victoria Street.

Greenfield, Mass.—The Goodell Tool Co. is now thoroughly established in their own factory. Considerable new machinery has been added to that moved from the old quarters and the number of employees has been increased one-third.

65 Randolph St., CHICAGO ,ILL.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Akron, Ohio.—The Stein Double Cushion Tire Co. has been incorporated. Capital, $100,000. Incorporators: Jacob Neuman, Joseph Frankel, Jacob Laudersman, Jacob Selmanovitz.

Columbus, Ohio.—The Consumers' Supply Co. has been incorporated. Capital stock, $5,000. Incorporators: M. E. Stover, Charles T. Warner, Jay Gaines, H. J. Geimberger and Charles E. Barr. They will make glass gasoline engines and automobile parts.

Minneapolis, Minn.—The Traveling Hobby Horse Co. has been incorporated. Capital stock, $100,000. Incorporators: John W. Lanning, E. E. Austin, G. W. Turner, J. T. Getty and Benjamin F. Fowler, all of Minneapolis.

North Blanford, Mass.—John E. Cooney has engaged in the manufacture of plane blocks and baseball bats.

St. Louis, Mo.—The St. Louis Tent, Awning and Fish Net Co. has been incorporated. Capital, $20,000. Incorporators: Charles W. Martin, W. B. Flynn and D. Walker Wear.

South Orange, N. J.—The South Orange Motor Car Co. has been incorporated, No. 108 Prospect Street. Automobile and bicycle business. Capital, $100,000. Incorporators: Fred. Ardrey, Alick Merriman, Everly Merriman, all of South Orange, N. J.

Changes.

Akron, Ohio.—The Swinehart Clincher Tire and Rubber Co. has purchased its own plant. The company has purchased the plant of the Rubber Specialty Co. and whatever interest the Federal Rubber Co. has in it for $40,000. The plant of the Rubber Specialty Co. is at the corner of North Howard and North Streets, is a three-story brick building, with a 65-foot frontage on Howard Street, and running back 200 feet. It is fully equipped with machinery, although a number of alterations and improvements will be made by the Swinehart company, which will require a month before active operations can be begun. The Swinehart company is incorporated for $100,000. Its officers are: President, J. A. Swinehart; secretary, Benjamin C. Swinehart; treasurer, Howard Siegrist. These, with Henry Feuchter and F. E. Ream, constitute the Board of Directors.

Hartford, Conn.—A. H. Pomeroy has sold his business at 96-98 Asylum Street to Harris Parker, of New Rochelle, N. Y., who will continue the same lines of merchandise and will add rubber goods, sporting goods and other specialties. Mr. Parker was for several years with the Willimantic Linen Co. in the local office, and was afterwards New England manager of the Crawford Bicycle Co. until its absorption by the trust.

Lowell, Mass.—Mr. George H. Bachelder, bicycle dealer of Post Office Avenue, has opened a branch store at 344 Westford Street. Mr. Bachelder, besides his regular line of bicycle repairing, is contemplating the equipment of his new place for automobile repairing.

Toledo, Ohio.—Dudley and Frank A. Pheatt, who have been engaged in gunsmithing and repairing at 604 Summit Street for the past twenty-five years, will remove to their new location on Summit Street, near Locust. The Pheatt Bros. erected the building last Summer.

Fires.

Boulder, Colo.—The gun and bicycle store of Thomas Hussie was destroyed by fire on the night of February 12. Mr. Hussie's insurance was $2,500, which only partially covers the loss.

Hoffmanville, Md.—The Rockdale Powder Mills, near here, were the scene of a disastrous explosion on February 8, three employees being seriously injured. The disaster occurred while one of the workmen was moving 1,200 pounds of powder, which was on plates and required to be transferred for drying. Damages to the plant are estimated at $2,000.

Swanton, Vt.—An explosion recently wrecked the mixing plant of the Robin Hood Powder Co., of this place, the financial loss being about $1,500.

Embarrassments.

Little Falls, N. Y.—J. W. Maltby, a dealer in bicycles and proprietor of a machine shop, has made a general assignment in favor of Charles Maltby.

Somerville, Mass.—The Morse Novelties Co., bicycle supplies, has filed a petition in bankruptcy. Assets, $300; liabilities, $2,600.

Miscellaneous.

Paris, France.—Sport glorified, sport in every conceivable shape, sport represented by every nation—such are a few of the ideas which the committee appointed this week by the French Government will endeavor to carry out in the great exposition des divertir of 1907. On the committee are many influential men associated with various forms of sport, and automobilism in particular takes a very important place. The site of the exhibition will probably be the Champs de Mars, and the occasion will be marked by a vast programme of international trials and contests in every branch of sport. The technical and industrial side of the matter will not be overlooked, although the primary idea is to encourage sport for sport's sake. The development of sport and athleticism in France has been very marked of recent years, and it denotes a keen desire to improve the national physique. Especially notable is the spread of such English games as football and cross-country running. The exposition des divertir will further encourage healthful pastimes, and will no doubt have a very salutary effect on the physical condition of the people.

Sharon, Pa.—The Sharon plant of the Brigg-Seabury corporation is now finishing several three-pound Rapid Firing Guns of modern design. When the plant is running full the company expects to make rapid-fire guns from one up to six inches in size. The company will have an investment of $1,000,000 when the plant is completed.

Minneapolis, Minn.—At the recent meeting of the Minneapolis Cycle Trade Association it was reported that the different shops throughout the city have at present all they can do in the line of repairing wheels and supply the demand for new ones. Financially, the bicycle path fund is in better shape than last year, having over $1,500 on hand. Ten thousand tags have been ordered.

Wilmington, Del.—The United States Court of Appeals has decided that the smokeless powder manufactured by the E. I. DuPont de Nemours Co. is not an infringement on patents held by Wolff & Co., of Germany. The decision sustains the lower court, which refused to grant an injunction to restrain the DuPont company from manufacturing powder by the process and formula at present employed.

HARDWARE DEALERS' RECORD.

Continued.

Quinby, Iowa.—Horton & Siefkin have sold their Hardware business to W. W. Burcham.

Rothville, Mo.—Allen & Carmichael have sold their Hardware business to H. B. Tregant.

Salt Lake City, Utah.—The Salt Lake Hardware Co. has bought out the business and good will of the Salt Lake Saddlery Co., the transfer to be made shortly, and T. R. Black will remain with the Hardware company.

Smithfield, Neb.—Charles Strickler has sold his Hardware business to Henry Hatcher.

Southbridge, R. I.—The Hardware business of the W. H. Clarke estate and Oldham & Ranahan, plumbers and steamfitters, have consolidated and will be known as the firm of Oldham & Ranahan Co., which consists of Mrs. Ella F. Clarke, Harry P. Oldham and John Ranahan.

St. Louis, Mo.—The Simmons Hardware Co. has purchased the entire stock of merchandise and good will of the Nelson-Bouquet-Holliday Hardware Co., of Minneapolis, Minn. It is the intention of the Simmons company to use this stock as a nucleus for a complete line of tools and Hardware, with which to serve its retail Hardware trade in Minnesota and North Dakota more promptly than is possible from St. Louis.

St. Paul, Kan.—C. M. Koenig has sold his implement stock and will continue in the Hardware business.

Union, Neb.—F. J. Dean has sold his Hardware business to L. R. Upton.

Wichita, Kan.—C. F. Bennett has sold his interest in the Hockaday Hardware Co. to I. N. Hockaday, Ed Hockaday and E. T. Battin. Mr. Bennett was the secretary of the company and was one of the heavy stockholders.

Winthrop, Iowa.—Diggins & Dubois have been succeeded in the Hardware business by Diggins & Diggins.

Kansas City, Mo.—The Kemper-Paxton Mercantile Co., of this city, will build a factory to cost $80,000 for the manufacture of farm implements, in the west end of Armourdale. Two hundred men will be employed.

New Haven, Conn.—The H. B. Ives Co., manufacturer of builders' Hardware specialties, has recently purchased of the Connecticut Manufacturing Co., also of New Haven, its trolley wheel and bushing business, which includes a line of special machinery for the manufacture of this class of goods.

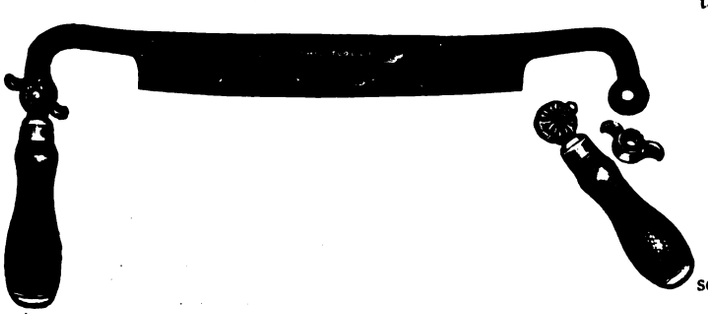
RIFLES

FILLS A LONGFELT NEED.

The **NEVERSLIP** Clothes Line Hanger (patented). Simple, Indestructible and Convenient.



No tying knots. No wearing out of lines. Clothes lines can be securely fastened with ONE HAND. The greater the strain, the tighter it holds. Positively cannot slip. Order through your jobber or address,

CHAS. E CULVER, 2271 North Paulina St., Chicago, Ill.

"OHIO" FOLDING HANDLE DRAWING KNIFE.

The Ohio Tool Co., Auburn, N. Y., and Columbus, Ohio, are placing before the Hardware trade the Folding Handle Drawing Knife which we illustrate herewith. It is simple and strong, especially where those qualifications are most needed. It is constructed in an original manner; the ratchet will permit the handles to be set at a great variety of angles to suit the convenience or particular use to which the mechanic may wish to put it. When folded, this knife makes a very compact and useful tool for the carpenter's outfit. The handles are set in such a way as to avoid the strain and tension peculiar to the ordinary drawing knife, thus allowing the tool to be held in a natural way while in use. This adjustable knife has only recently been placed upon the market, and as the company has for years been making carpenters' tools, including drawing knives, they know the importance of invariably using a high grade of tool steel, treated and tempered by an improved process that insures uniformity of temper and a correct cutting edge. The Folding Handle Drawing Knife shown above is fitted with handsome red stained handles in imitation of mahogany.

ODDS AND ENDS.

Love is never afraid of overwork.

Ignorance of the law excuses no one.

A bed of roses soon wears down to the thorns.

The sure sign of a fool is that he forgets his folly.

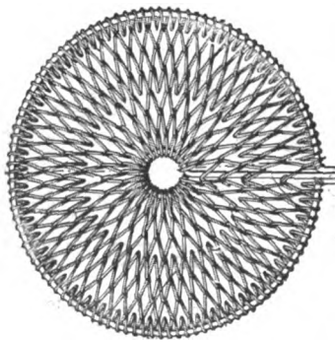
A warm handshake may do more than a cold handout.

He who dwells on his troubles always dwells in them.

One realizes the impotence of money when he tries to buy love.

Some girls marry for money because it is necessary to have some excuse.

Weak solutions may be all right in chemistry, but they don't go in business.



A miser is a man who carries his money in a purse that closes easier than it opens.

In order to join the great silent majority a man must either die or get married.

Some men claim to be self-made, while some others are supposed to be wife-made.

It's no use bragging about your ancestors unless they would feel like returning the compliment.—*Hardware Trade.*

PRICES CURRENT

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

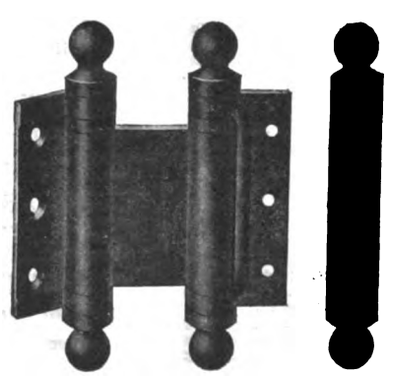
A HARDWARE DEALER'S

SELLING



SUCCESS

depends largely on his shrewdness in selecting a saleable article.

¶ Don't stock up with a cheap line of over-advertised goods which will appear in your next inventory listed as "scrap." Buy a live article, a well made, reliable spring hinge, for instance; one new enough to embody the most modern principles of construction and old enough to stand on its reputation. One that brings back your customer satisfied and several of his friends with him.

¶ The "COLUMBIAN" Wrought Steel Spring Hinge is just such a promoter. An examination of the hinge will indicate its superiority; a trial will prove it.

¶ Made in a variety of durable and beautiful finishes, also in solid bronze or brass. Our new catalog, "Builders' Hardware," No. 12, gives further information. Sent free on request.

"Horse Sense"

demands that the best Rein Holder—Read's—is none too good for any horse. So great is the demand for them that there were

50,000 READ'S REIN HOLDERS

sold in a single month!

Why? Simply because it's "a good thing" and we've advertised it everywhere extensively.

Furnished mounted on handsome display cards. We supply you with advertising literature. 10,000 dealers, 300 jobbers handle it.

$15,000 will be spent to advertise Read's Rein Specialties. If you are after a profitable proposition—write us. Mention HARDWARE.

O. B. Read Mfg. Co., Troy, N. Y.

BEST-NESS IN HORSE NAILS

We make only one grade of Horse Nails—The Best—

***The* New Putnam**

Ⓦ

Horse Nail

It will not crimp, break nor sliver, will not cut off, will hold in the clinch. Drives most easily. Has stood the severest practical tests. It has stood the highest test for tensile strength, elongation and elastic limit.

1½c. per horse is the difference in price between the cheapest Horse Nail and The Best—The New Putnam.

Say that last over out loud—slowly.

PUTNAM NAIL COMPANY

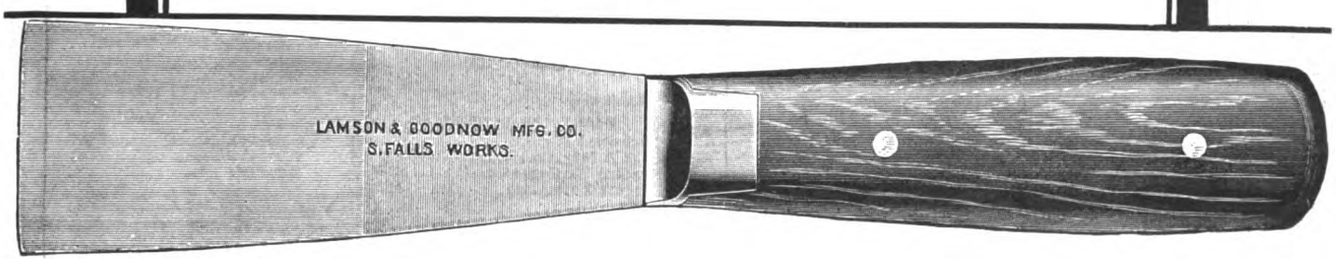
Capture the Paint Trade

With Lamson & Goodnow Putty Knives.



¶It is common talk among hardwaremen that L. & G. Putty Knives are Leaders—being more solid, substantial and serviceable than other makes.

¶Our best testimonial is that thousands of painters use no other kind.

¶Don't stock up on Putty Knives till you have OUR prices.

¶Write us at once—mention HARDWARE.

Lamson & Goodnow Mfg. Co.

Shelburne Falls, Mass., U. S. A.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,

General Industrial Agent,

Seaboard Air Line Railway,

Portsmouth, Virginia.

We have a good location for your plant.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED 'REVERSIBLE HINGE' INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.
